What effect would the carrying of an Irish Compulsory Purchase Bill have upon English agrarian economics? There was a time when I held that every principle introduced into the Irish land laws must, sooner or later, be, in a more or less degree, introduced into the English land laws. I can no longer pretend to hold this opinion. It is a strange fact, for which no adequate explanation can be found in the rules of logic, that ther has been a gradual decline in the demand for the reform of the English land laws since the great policy of Irish land reform has been in operation. The land nationaliser and the land reformer have practically disappeared. Elections are now fought in England without the wisdom of even a moderate policy of reform being suggested. Should the land question be at all suggested it is only to consider by what means rural England can be utilised in order to arrest the congestion of population in the towns. Even the Welsh politician has, since the death of Mr. Tom Ellis, abandoned any grave interest in the land problem. Yes, I know that the Welsh Parliamentary party has had a Bill drafted dealing with the matter, but not a soul in that party has been seriously perturbed at the failure to secure a place in the Parliamentary ballot. For the nonce, therefore, the English and Welsh politicians have lost interest in the question. Hence the passing of an Irish Compulsory Purchase Bill would have no immediate or serious influence upon the English agrarian system. Still the example would always be ready at hand; and the extreme politician would, of course, invoke it. However, the English people have apparently lost their sympathy with extreme politics.

I find among the agricultural M.P.'s a strong conviction that the Central and Associated Chambers of Agriculture acted very wisely in refusing to bind itself to any special method with a view to arresting the depopulation of the villages. The question has not arrived at a ripe stage yet. A hurried panacea might only emphasise the evil. There is, of course, a concensus of opinion that small holdings have had a most beneficial influence, and are likely to exert a still more useful effect upon agrarian life. However, there is also a pretty strong conviction, at least among the Radical section of the rural Parliamentarians, that something very much more heroic will have to be resorted to. True, the increase of small holdings might prove a palliative; and the temper of the House of Commons would allow of an immediate extension of Parliamentary powers to this end. However, the House of Commons would not accept an Extension Bill as a settlement of this very grave problem. In fact, in its disappointment, it might show a too ready disposition to listen to economic quackeries. The Central and Associated Chambers have thus done wisely in the esteem of sane policians in appointing a committee unfettered by any conditions.

Home Notes.

The Borough.

Although business was last week not quite so brisk as it had been just previously, quite sufficient trade has been done to maintain recent prices. The search for samples of superior quality continues, and when any little lot of this description is found it is at once taken over, even if a slight advance is demanded. The absolute scarcity of good hops causes buyers to be more content with medium sorts, and the market is rapidly being cleared in this direction. Discoloured and otherwise inferior parcels also find purchasers, but the prices paid are still miserably low, demonstrating with increasing force the foolishness of crowding the market with such poor stuff. It is curious to observe the rapidity with which all sorts of hops are changing hands, despite the superabundance of our last crop. But the explanation is not difficult. Prices have, throughout the season, been abnormally low and tempting, the facilities of "cold storage," have greatly enlarged, therefore brewers do not hesitate to lay in stock to cover more than their present requirements, and while they are hanging on to their stocks, of good qualities, bought previous to and during the present season, they are taking the low qualities, bought at absurdly low rates, into immediate consumption for their running beers. But we must not be misled by these proceedings into any

False Estimate of the Future,

for there still stand in front of us the accumulated supplies, which will give brewers the command of our market next season. Unless growers are well advised in reducing the output. Consumers of our hops will retain the possession of the key to our trade, and will only open the door at their pleasure, as they can close it at their will. I am concerned and somewhat pained when I note the comparative indifference with which planters seem generally to regard this most serious aspect of their industrial prospects. The other day the resolution passed by the Tunbridge Wells Farmers' Club, in favour of reduction of acreage, was considered by the East Sussex Club at Lewes. The conclusion of the discussion is significant, as the report says, "no action was taken in the matter." Does not such a weak shelving of the question prove that our people are deficient of foresight. I cannot quite accept the cruel proverb, which tells us that the gods first impart folly to those whom they wish to destroy, but I must beg to be forgiven if I express an opinion that there seems to be some truth in the saying in the present case. Therefore I will again reiterate my conviction that without a large reduction of the output of English hops, whether by limitation of acreage or other equally efficient means, the industry in this country is ultimately doomed to extinction. The process may be slow or it may be sudden; in any case, it is sure, if wise counsels do not prevail to stem the torrent which threatens to overwhelm us.

Foreign Notes.

Nuremberg.

The firmness which has characterised the hop market since the beginning of January still continues, values being well maintained, although the severity of the weather has to some extent lessened the volume of business. During last month the sales, which have amounted to about an average of 1,400 bales per week, appear to demonstrate that sellers had not previously covered their engagements, and the tendency of affairs is consequently in favour of increased strength, and higher prices as the spring season opens. Any samples of good quality can easily be sold at full figures, and hops, which were previously classed as "medium," are now, owing to the change in the general position, marked and quoted as "choice." By thus raising the qualification, an important advance in actual value has been established, with the result that the current rates are really higher than the quoted figures would appear to convey. Moderate quantities of inferior hops are still exported to England, the home values of the best qualities rendering export business in them impossible.

Alsace.

Business is hindered by the high prices demanded for any samples that may be described as of good quality. Growers are getting 80 to 85 francs per 50 kilos. even for low qualities, and 110 to 115 francs for occasional superior lots. These figures represent respectively about 65s. and 90s. per cwt.

Munich.

Demand is active, and as the new arrivals for the week ending February 3rd were only 340 kilos., while the sales amounted to 14,647 kilos., stocks are considerably reduced, and values are gradually becoming higher. The selection of choice qualities becomes more restricted, the only description now quoted being Hallertans, Spalts, Saazville, and other Bohemian growths.

Belgium.

Alost hops of 1901 crop are in full demand at 44 to 45 francs, and as holders are very reserved, business is hardly possible at these figures. The indications of the market are distinctly towards continued firmness, and further improvement in values appears to be inevitable. Similar feeling dominates the speculation market on the Brussels Bourse, being encouraged by the importance of the transactions at Nuremberg, which market exercises the strongest influence upon the other Continental centres. In the Poperinghe district considerable increase of strength is also evident, and the general impression throughout Belgium is in favour of a substantial advance in values, as soon as the opening of spring causes increased production by the local breweries.

France.

At a recent meeting of the Society of Brewers, of Boulogne-sur-Mer and district, an address was delivered by M. Raymond Cottignie, on the net cost of beer. The speaker devoted some time to the consideration of hops, which he considered to be "one of the principal products used in brewing." The necessity of better knowledge of the qualities of hops by brewers was enforced, as in this department of his business the brewer was in general "un bon enfant," a good fellow, who was too easily persuaded by the plausible tongue of the travelling merchant. Inferior hops were thus frequently sold. It was therefore essential that brewers should buy at first hand, from reputable houses, and that they should themselves become acquainted with the actual qualities, and thus avoid the deceptions of which they had, too frequently, been the victims. I mention this circumstance to emphasise the advice I have frequently offered, applicable to our own trade, to the effect that more intimate association between the producer and consumer of hops is not only desirable, but necessary in the interests of both parties.

America.

Brewers are not buying quite so freely on the New York market, and general trade is rather quieter than when previously reported. But there is no relaxation of the firmness which has prevailed since the beginning of the year. Business on the Pacific Coast is sufficiently active to maintain values, and a gradual increase of strength is being developed. Exports from New York in the week ending January 17th were larger than during any previous week of the present season; but the total exports from September 1st to date named only amounted to 31,790 bales, against 51,573 bales in the same period of previous year.

From Otsego Co. (New York) I hear that "farmers are much discouraged, and have ploughed up many acres since last fall. No new yards will be set this spring; growers are taking up dairying, instead of hops." From Schoharie Co. it is reported, "Crop nearly all out of farmers' hands. Market very firm, and will probably go much higher." Ownership of the 1901 crop was changed so quickly as to excite comments from both growers and dealers." Latest quotations at New York are 14 to 15½ cents per lb. for choice, 13 to 13½ cents for prime, and 11 to 12 cents for medium samples. German hops are selling at 30 to 42 cents in New York.

The Influence of Phosphates on Farm Crops.*

Experiments at the Glasgow Exhibition.

Agriculturists as a class are slow to move out of the beaten track of things. This is perhaps the main reason why the great advantage of artificial fertilisers has not even yet been fully grasped or admitted, in spite of the fact that their influence is no longer open to question. Most of the experiments which have been conducted to ascertain, or to prove, the usefulness of these manures have, it is true, achieved local rather than extended publicity, and this may in part account for the cultivators of our farm lands failing to give due attention to facts which are unquestionably of vital moment. Whatever the cause may be for a state of things we must all deplore, we propose to-day to focus some remarkable results which have attended the careful experimental work carried on by Professor Wright, of the West of Scotland Agricultural College, both in conection with the college itself and in connection with last year's International Exhibition at Glasgow.

For some years experiments on the manuring of the chief farm crops with artificials have been conducted by the college in the counties of the west, south, and centre of Scotland; and the results and the conclusions based on them have been embodied and published in a series of annual reports. In view, however, of the difficulty constantly felt of making such results widely and generally known, the idea was mooted of taking advantage of the opportunity afforded by the International Exhibition in question to demonstrate to agriculturists and horticulturists the exact effect produced, by the important ingredients supplied in manures, on the plants which constitute our chief farm crops. For this purpose it was decided to show in the exhibition grounds during the summer a series of plants in pots treated with various combinations of artificial manures. The pots had a diameter of 9.5 inches and a superficial area of 70.8 square inches, which is about equal to 1/89,000th part of an acre. The necessary amount of water added to keep the soil sufficiently moist brought up the gross weight of the contents of each pot to 53¼ lbs., and during the whole summer the plants were regularly watered up to this weight.

It should be particularly remembered that in most cultivated soils there are three constituents which plants have difficulty in obtaining in sufficient quantity to enable them to make a full growth, and which, when applied to soils, are capable of causing a great increase in their crop-producing power. These three substances are (1) nitrogen (ammonia), (2) potassium (potash), and (3) phosphorus (phosphoric acid or phosphate). Farmyard manure owes its usefulness and efficiency chiefly to the fact that it supplies to soils these three substances, while the whole enormous trade in artificial manures, amounting to millions of tons annually, is made up almost entirely on the necessity of giving to the soil these same substances. Now, the quantity of such substances contained in the whole available supply of farmyard manure is insufficient for the requirements of modern agriculture.

In the demonstration with plants grown in pots, it was only necessary therefore to attempt to illustrate the effect produced by these three substances; and it was decided, with a view to immediate results, to supply them in their most soluble manurial forms. The nitrogen, therefore, was applied by nitrate of soda (because it is the quickest acting and most generally effective nitrogenous manure on the market); the potash was applied in the form of muriate of potash; and the phosphoric acid was applied in the form of mineral superphosphate (because this is its cheapest source in its most soluble and effective form).

A very special importance attaches to this last constituent, because it has been found to be deficient in nearly all soils, and because it can be applied with advantage to all cultivated crops. Potash is needed on most soils, and can be applied with benefit to most crops, but on some crops growing on soils in high condition, its employment occasionally proves ineffective and unprofitable. Nitrogen can also be given in such quantity to some crops, especially on soils in a high state of fertility, as to do more harm than good, while to the whole series of leguminous crops its application is, as a rule, alike useless and unnecessary. But there are few soils indeed to which phosphoric acid cannot be given with advantage, and there are no farm crops grown which are not benefited in a greater or less degree by its presence in abundance. Land kept under pasture for a series of years and grazed with farm stock becomes gradually richer in nitrogen derived mainly from atmospheric sources, and it may also become richer in available potash. But it becomes steadily poorer in phosphoric acid, because so much is carried away in the bones and carcases of the animals grazing on it. Hill pastures on which ewe flocks are kept, and on which lambs are reared, annually lose much phosphoric acid carried off in the bodies of the young animals, all of which has been taken from the soil. Herds of milking cows grazed on any pasture carry off large quantities of phosphoric acid in their milk, which always contains much phosphate, while the bones of all young cattle and horses grazing on the pasture are also formed at the expense of the phosphoric acid in the soil. The process of removal is slow, but as it has been continued year after year, and generation after generation, from the time when agriculture was first practised, without any restoration of phosphoric acid except that derived from the slow disintegration of rocky fragments in the soil, the total loss has become enormous, and the exhaustion of the soil in phosphate very great. Hence the remarkable effect—only discovered in the last century, and not yet fully appreciated—produced by applications of superphosphate, bone meal, basic slag, and other phosphatic manures, on all old pastures or poor lands, which have been apparently lacking in productive capacity and in nutritive quality chiefly from want of phosphate. Great as has been the exhaustion of phosphate brought about on old pastures in the course of time, a much more rapid exhaustion takes place on all arable land devoted to the regular cultivation of farm crops. In all of them phosphoric acid is removed in substantial quantity. Hence has grown the enormous demand for phosphate manures; 5,000,000 tons of superphosphate alone being applied annually to the crops of the world.

Plan of the Demonstration.

Eight pots were set apart for each crop grown, in order that the influence exercised by the several manures on the plants, when applied separately and also when given in the undermentioned combinations, should be fully grown. The pots were manured as follows:—Pot 1, no manure; pot 2, nitrate of soda; pot 3, superphosphate; pot 4, muriate of potash; pot 5, nitrate of soda and superphosphate; pot 6, nitrate of soda and muriate of potash; pot 7, superphosphate and muriate of potash; pot 8, nitrate of soda, superphosphate, and muriate of potash.

Eight crops were selected for the demonstration, viz., oats, perennial rye-grass, red clover, lucerne, turnips, potatoes, maize, and tobacco. The superphosphate and half the quantities of nitrate of soda and muriate of potash were mixed in dry with the soil, and the seeds of all the plants except the tobacco were sown immediately thereafter. In the case of the tobacco plant, a number of plants of equal size which had grown to a height of a few inches were procured, and these were transplanted into the pots on the same date. About a month later the remainder of the nitrate of soda and the muriate of potash were added in solution to all the pots, except those containing the turnip and tobacco plants. Only half the remainder of the nitrate and muriate was then applied to them, and the final application of the manures to these two crops was made about ten days later. The seeds germinated in all the pots in due course. The pots were kept in the open till the brairding had been successfully completed, and they were then transferred to the grounds of the Exhibition.

THIS ILLUSTRATION SHOWS THE EFFECT OF A PHOSPHATIC MANURE ON OATS.

Importance of Phosphates to Young Plants.

The observations made on the progress of the various plants after they had brairded were most instructive, and the outstanding lesson they taught was the remarkable need of young plants of all kinds for an ample supply of readily available phosphate in the stages of their growth immediately succeeding germination. No observations made in the course of the experiments conducted by the college have ever, except on the turnip crop, shown so clearly and so decisively the vital

* The "Influence of Phosphates on Farm Crops," by R. Patrick Wright, F.N.A.S., F.R.S.E., Professor of Agriculture. Published by John Lewis & Co., 5, Bridewell Place, London, E.C.

importance of phosphate to the rapid and vigorous growth of young plants, and the degree in which their progress is retarded by the absence or the deficiency of phosphate. That nitrogenous and potassic manure also exercise a great influence on the ultimate yield of crops has been amply enough demonstrated, and on some of the plants grown in the pots the influence of these manurial ingredients became quite evident at an early period, and grew more obvious as the season advanced. But in the period immediately subsequent to the germination of the seeds and the brairding of the plants, and when they were chiefly engaged in extending their roots through the soil and getting themselves firmly established in it, the one obvious fact thrown into prominence was the great effect produced by the presence in the pots of some soluble phosphate. Another most striking feature in this action of phosphates on the young plants was the fact that it seemed to be as effective on crops that are not supposed in ordinary farm practice to be specially susceptible to the influence of phosphate as on those that are known to be specially affected by it. For example, phosphate is not the dominant or most influential constituent in a manure for lucerne, or oats, or potatoes, yet the soluble phosphate mixed with the soil in the pots affected the early growth of these plants in the most remarkable manner.

Influence of Phosphates on the Period of Ripening.

In the *field* experiments carried out by the College it was observed that the application of superphosphate is followed by an earlier ripening of crops, and that the period of harvest is hastened. In what various ways the presence of readily soluble phosphate contributes to this earlier maturity is not fully known, but one probable contributing cause is deserving of mention. The seeds of plants under normal conditions contain a remarkably large proportion of phosphate. In the wheat grain, for example, nearly one-half of the total ash consists of phosphoric acid. Nature does not work by chance, and it seems obvious that the great quantity of phosphoric acid stored in the seed as compared with that found in other parts of plants indicates the importance of phosphoric acid to the embryo at the time of germination. But this also accounts in part for the influence of superphosphate in promoting the early ripening of crops. The final stage in the history of a plant's life, towards which all the previous steps in its progress tend, is that of completing the formation of the seed so perfectly that the existence of the plant may be continued in the succeeding generation. But in a soil deficient, as most soils are, in phosphoric acid, the ripening of the crops may be much retarded by the difficulty experienced by the plants in collecting the quantity of phosphate required to be stored in the seed before it becomes perfectly equipped for its primary purpose of carrying on the life of the plant through another generation. An application of a readily available phosphate to the crops removes this difficulty. It seems also a natural inference that better seed—seed more capable of producing and of nourishing strong young plants—will be obtained from land rich in available phosphates than from land in which they can hardly be gathered in sufficient quantity.

The Value of Phosphates for Cereal Crops.

In the Demonstration the oat was selected as the fittest representative of the cereal crops because of its great importance in the agriculture of Great Britain. It is known with regard to all the cereals that nitrogen forms the most important and effective ingredient in manures specially intended for these crops, *provided* the land contain a sufficiency of phosphates and potash; but the results (see illustration) obtained in the pot experiment show how comparatively inefficacious is an application of a nitrogenous manure *unless the plants can also find a readily available and ample supply of phosphates.* The oat plants manured with nitrate of soda alone were hardly stronger than those in the unmanured pot, but when superphosphate was added the two manures in their joint action produced a marvellous change on the plants, and gave them a vigour and luxuriance which are very well shown in the illustration. This observation confirms a deduction drawn from field experiments carried out by the college in 1894. These experiments were carried out on fourteen farms, and where 1 cwt. nitrate of soda per acre was applied alone, it gave on the average of all the farms a large and very profitable increase in the yield of the crop, which had a value of £2 per acre, as against an expenditure of 10s. 3d. This increase was by no means uniformly obtained on all the farms. On soils in good condition, and rich therefore in available phosphates and potash, the nitrate of soda acted very effectively on the crop, but on the poorer soils its action was much less certain and uniform, and on some it failed altogether to produce any increase in the yield of grain. But the addition to the nitrogenous manure of 2 cwt. superphosphate per acre not only added greatly to the yield of the crop on the average of the farms, but it also gave a greater uniformity and certainty to the result. On not a single one of the fourteen farms did the two manures used together fail to give a profitable increase of crop. The cost of 1 cwt. nitrate of soda and 2 cwts. superphosphate amounted to 17s. 3d., and the increase of crop per acre produced thereby had a value of £3 1s. 7d., giving a profit of £2 4s. 4d. Where sulphate of ammonia was substituted for nitrate of soda in corresponding quantity and applied with 2 cwts. superphosphate, the return in increase of crop had a value of £2 18s. 8d. for a cost of 18s. 10d., thus showing a profit of £1 19s. 10d.

In the experiments carried out in 1895 on 15 farms, the uncertainty and irregularity of the action of nitrate of soda when given alone to the oat crop were much more distinctly manifested. In that year the nitrate failed to produce any increase of crop at all on four out of the fifteen farms, while on several others the increase was insufficient to pay the cost of the manure. On the average a small profit of only 2s. per acre was obtained, which was entirely due to the effect produced by the nitrate on the soils in rich condition. But when 2 cwt. superphosphate was added to the nitrate of soda, the manures were found to be efficacious on every one of the farms, and on all of them they produced a substantial increase of crop, which gave an average profit of 12s. 10d. an acre.

The exact amounts of increase to be expected from such a manuring of the crop may be shown by placing together the average results obtained in the experiments of the three years 1894-6. (See table below):—

THE EFFECT OF PHOSPHATIC &c., MANURES ON THE OAT CROP.

The Effect of Phosphates on the Grain of Cereals.

That phosphates tend to cause an earlier ripening of the crop has been already pointed out, and that effect in itself represents an advantage which can hardly be over-estimated. This early ripening is, moreover, of very special importance when the superphosphate is given, as it ought usually to be given to the oat or other cereal crop, along with nitrate of soda or other quick-acting nitrogenous manure. Nitrate of soda applied alone is in some respects unreliable in its action, but should it cause the greater luxuriance of crop that is desired it generally prolongs the period of growth and makes the harvest later than it would be were the crop left entirely unmanured. This is a great drawback to set against the advantage derived from the increased yield, and it is one which has acted as a deterrent to many farmers who contemplated top-dressing their corn crops. But this disadvantage arising from the employment of nitrate of soda may be altogether obviated if superphosphate be given along with the nitrate, and if to the superphosphate there be added an equal quantity of potash, not only will a still larger and more profitable crop be obtained, but the harvest will actually come at an earlier date than on land that has been left without any manure. Not only, however, does superphosphate counteract the retarding effects of nitrate of soda, but it also ensures that the increased crops produced by the nitrate will be of a more valuable character. Nitrate of soda applied alone has a strong tendency to alter in some degree the character of the crop and to promote the development of the stem and leaf without producing a quite proportionate improvement in the seed. Thus in the experiments quoted in the table it was found that on the plots manured with nitrate of soda alone the percentage of straw in the total crop was somewhat increased, while that of grain was correspondingly diminished. But the application of superphosphate along with the nitrate entirely prevented this. Moreover, the phosphates not only increase the percentage of grain yielded by a corn crop, but they also add to its intrinsic value whether it be employed for feeding purposes or be used as seed.

Influence of Phosphates on the Potato Crop.

It is well known that the dominant ingredient in a manure for potatoes is potash, and that nitrogen also exercises a great effect on them. But the influence of phosphates is also of much importance. The effect shown on the plant to which nitrate of soda and superphosphate were applied together, which grew with remarkable luxuriance, and far excelled the others in the strength and abundance of its foliage was extraordinary. That phosphates cause an increase in the yield of potatoes even on land in good condition has been very well shown in some of the field experiments carried out by the College. Thus, in experiments conducted on five farms in 1897, a dressing of farmyard manure gave an average produce of 6 tons 2 cwt. tubers, but where 4 cwt. superphosphate was added to the farmyard manure the yield rose to 6 tons 17 cwt. per acre. On some dry soils the superphosphate applied in this way seemed, however, to cause a rather premature ripening and even a reduction of the crop, and its best effects were only produced where it was used along with nitrogenous and potassic manures. This was shown more clearly in the experiments carried out in the succeeding year, 1898, on 19 farms. In that year 4 cwt. superphosphate added to an application of 10 tons of farmyard manure gave an average increased yield of 8 cwt. potatoes per acre. When sulphate of ammonia was also given, the sulphate produced an increase of 11 cwt. per acre, and when sulphate of potash was also added the superphosphate gave an increase of 10 cwt. per acre. At the usual value of potatoes these were all profitable increases. But even more important, perhaps, than the influence of phosphates on the yield of the potato crop, is the satisfactory effect they have on the quality of the tubers. The tendency, too, of the phosphate to hasten the growth of the crop secures that its ripening will be more complete, and the assimilation of the maximum percentage of starch, on the presence of which in abundance the quality and nutritive value of the potato tuber mainly depends.

Influence of Phosphates on the Turnip Crop.

Of all crops there is none on which phosphates exercise such a remarkable influence as on the turnip, whether of the white, yellow, or swede varieties. Manures supplying nitrogen and potash produce a considerable effect on the yield of the crops on most soils, but phosphates form the dominant and most important constituent of a turnip manure. In the pot demonstration the attempt, on a soil poor in phosphate, to grow turnips with nitrogenous and potassic manures without phosphates was an entire failure; while the addition of superphosphate produced a remarkable change in the health, vigour, and luxuriance of the plants. The effect produced by phosphates on turnip plants is not, however, more conspicuous in their early growth than in all the succeeding stages, and it is equally shown in the ultimate size and weight attained by the bulbs or roots. The phosphates cause a much more vigorous extension of the roots of the plants throughout the soil, and this allows them to draw more fully, not only on the manures distributed in it, but enables them also to utilise more completely the ingredients of the soil itself, whether these be in the form of available nitrogen, potash, or phosphates. It is in part due to this stimulus to active root extension given by the phosphates, that their employment on soils in good condition renders the plants much less dependent on manurial supplies of nitrogen and potash than they are on poor soils. The degree to which young turnips are strengthened and forced on by phosphatic manures, has been frequently observed in the field experiments conducted by the College, in some of which turnips manured with large quantities of farmyard manure have been seen, at the time of thinning, much smaller and feebler than those which had received no manure save a few cwt. of mineral superphosphate. This rapid stimulus given to the young turnip plants is most important and valuable, as it is often the means of saving the crop from entire destruction by the "turnip fly." When an attack by the fly occurs, a weak and slow growing crop may be wholly destroyed, when, in a stronger and more vigorous crop, a sufficient number of plants may escape the ravages of the insects to give the field an adequate cover.

The remarkable effects produced by phosphates on the total yield of the turnip crop have been shown in many field experiments. For example, while a complete manure, supplying nitrogen and potash as well as phosphate, is essential to the production of a full crop, the application of phosphates in the College's experiments alone increased the yield by about 50 per cent. in 1894, and 80 per

cent. in 1895, and was sufficient without other manures, and at a very low cost, for the production of a fair yield. In both cases also the value of the increased yield of roots amounted to about four times the cost of the manure, while the superphosphate was in fact only partially utilised by the turnip crop, and remained capable of giving, and undoubtedly would give a still further return in the increased production of succeeding crops grown on the same land.

Influence of Phosphates on Grass Lands.

The effect of phosphatic manures is no less apparent on meadow and pasture than it is on arable lands; indeed, it is essential to the greatest success on grass lands that such manures should be used, for both grazing animals and dairy cattle carry off the phosphoric acid element in the soils to resupply which not anything like enough farmyard manure is used or produced. The results of experiments in England, Ireland, Scotland, and Wales—to say nothing of abroad—are conclusive on this matter. Superphosphate can be used either alone or, preferably, in conjunction with some other fertiliser: such as nitrate of soda, or kainit. The application of 2 cwt. of superphosphate (costing between 6s. and 7s.) in one of the experiments just referred to, gave an increase of more than 3 tons of grass over the portion of the field that got no manure. When slag and superphosphate were used in conjunction with 1½ cwt. of nitrate of soda, the result was still distinctly in favour of the superphosphate. In another case, viz., at the Royal Agricultural College, Cirencester slag and superphosphate were separately tested at a cost respectively of 20s. and 14s. per acre; the percentage of increase of each oveh the unmanured land being 25 for the basic slag and 62½ per cent. for the superphosphate. It only remains, therefore, to state that the best results when superphosphate is used have been usually obtained when the fertiliser is applied to the land as soon in the New Year as circumstances permit. A good top-dressing, whether for pasture or meadow land, would be a mixture of 3 cwt. high-grade superphosphate, and 2 cwt. of kainit per acre, applied in January, to be followed in March with 1 cwt. of nitrate of soda; or, if superphosphate alone is used, then 4 to 6 cwt. of the high grade would be the most beneficial.

Pasture Land as Sources of Revenue.

In the article which appeared in our last issue under the above heading, one of the percentages was, by a printer's error, incorrectly stated, the figure given being 6½ instead of 62½. It occurred in the following paragraph, which now appears correctly:—

"Professor Kinch, of the Royal Agricultural College, Cirencester, has been conducting a series of experiments for the last nine years on pastures, and the results of these during 1901 are now available. These show that the application of 5 cwt. of superphosphate per acre gave an increase of 62½ per cent. over the unmanured plot, and more striking results still were obtained by using a compound manure containing phosphates, ammonia, and potash, for the percentage of increase of yield over the unmanured plot amounted to no less than 120 per cent."

Cheques and Post Office Orders payable to WILLIAM A. MAY, 1, Essex Street, Strand, London.

SUBSCRIPTION RATES:—United Kingdom, one year, 15s.; six months, 7s. 6d.; the Colonies and Abroad, 17s. 6d. per annum.

The Hunter Stud Book.

Sir,—My attention has been drawn to a small pamphlet, issued under the title of "The Agricultural Register," its contents mainly consisting of a register of stallions and mares of various breeds of horses, tabulated under the respective title of "Imperial Stud Book of Hunter Horses," "Imperial Stud Book of Ponies," etc., etc., and, judging from inquiries which have been made to me, the use of the first-mentioned title has created an impression that this pamphlet is connected with the society's publication, "The Hunter Stud Book."

I, therefore, in order to correct this misconception, beg to state that this "Agricultural Register" has no connection whatsoever with the Hunters' Improvement Society.—I am, Sir, your obedient servant,

A. B. CHARLTON,
Secretary, Hunters' Improvement Society.
February 6th, 1902.

Six-Rowed Barley.

Sir,—As the writer of the article in the "Field," on six-rowed barley, referred to by Mr. W. H. Wilson in the MARK LANE EXPRESS, last week, allow me to state that he has not given the facts of the case quite correctly. I stated in my article that Mr. Stopes had informed me that two of the best of the samples exhibited at the Brewers' Exhibition were of the winter six-rowed variety, and this was the point on which Mr. Wilson the following week contradicted me. He said that the samples Mr. Stopes alluded to in such high terms were not six-rowed but Archer's. I considered this gratuitous statement an attempt to advertise a particular kind of barley that had nothing to do with the matter, but as, on referring to Mr. Stopes, he fully confirmed my former statement and promised to write to the "Field" that I had only declared what was perfectly true, I left the matter in his hands.

Mr. Wilson makes it now appear that his chief object in replying to me in the "Field," was not to advertise Archer's barley, but to prevent farmers from following my advice of growing six-rowed barley for malting purposes, inasmuch as all the six-rowed barleys he has ever seen of English growth were only fit for grinding. If Mr. Wilson's letter had been of this character I should have taken him up, for after my conversation with Mr. Stopes, I became convinced that the valuable six-rowed barley can be grown equally well for malting purposes in England as in foreign countries. I grew it myself some years since, and while the yield of crop was greatly in excess of what I should have obtained had I grown the common two-rowed, the corns were large and plump. At the time I was under the same false impression as Mr. Wilson, that the English six-rowed was unfit for malting, the ground on which I formed that opinion being that the skin was thick and coarse. But in my conversation with Mr. Stopes at the Brewers' Exhibition he gave me to understand that these thick-skinned barleys actually yield more malt than thin-skinned ones. Consequently, I opine that the six-rowed Mr. Wilson happens to have met with were grown in a dry summer, after the flag and stalks had been fed down bare in May. I stated in the "Field" that a great deal of valuable sheep-feed might be utilised in spring and the crop still be matured for grain, but this feed has sometimes been consumed after the plants have spindled up, under which circumstances thin corns, only fit for grinding, might naturally be expected.—Yours faithfully,

AGRICOLA, OF THE "FIELD."
January 6, 1902.

Wireworm in Broken-up Sainfoin.

Sir,—May I ask you for advice on the following matter:—I have a field which has been under sainfoin for eight years, and which I now wish to plough up and sow with oats. How can I best prevent the destruction of the crop by worms? Thanking you in anticipation, yours faithfully,

M. M.

[Probably the "worms" alluded to are wireworms, as broken-up sainfoin land is often badly infested with these pests. On this account some prefer to pare and burn the surface, and then cultivate deeply and take a root crop of some kind before taking a corn crop. The best remedies for wireworm are gaslime, lime, and soot; but some think rape cake is a deterrent. Whether this be so or not, the application of rape cake, which is a powerful manure, is always beneficial to the crop, and, as the particles of the cake attract the wireworm, causing them to leave the roots of the crop, there is no doubt that the application is of service, even if the cake attracts the wireworms instead of repelling them. Gaslime is a powerful insecticide, and a heavy dressing will do more to kill wireworms than any other; but it should be applied some time (say three months at least) before a crop is to be sown. It is now too late to apply gaslime without seriously prejudicing the prospects of the oat crop. Hot lime is also a useful remedy, and may still be applied with good results; but rather heavy dressings must be used, say five tons per acre, if the wireworm is numerous. Soot is a well-known deterrent of all insect pests, and it is also a forcing manure, and you can scarcely do better under the present circumstances than sow broadcast 30 to 40 bushels soot per acre, and harrow it in with the seed. Salt is sometimes found useful, but less so than any of the other dressings mentioned. After the crop is sown it should be heavily rolled, as consolidation is one of the best preventives of the attacks of wireworms and all soil grubs and worms. You cannot do better than apply the soot as already advised and afterwards roll heavily. Should the growing crop appear to be injured by the wireworm, the only thing to then do is to apply the most rapidly acting forcing manures, so as to bring the plants on past the dangerous stage of growth, and for this purpose, nitrate of soda, sown at the rate of 1 cwt. per acre, will be best. You might with advantage apply 2 cwt. of salt with each cwt. of nitrate of soda, but it will be well to divide the dressing into two equal parts, giving the one as soon as injury is apparent, and the other a fortnight or so later if the crop does not appear to be overcoming the attack.—M.Y.]

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended Feb. 1, 1902, together with the quantities imported in the corresponding week of the previous year:—

Animals Living.	1901	1902.		1901.	1902.

Sale of Fodder at Leamington.—An important sale of fodder was held by Messrs. J. Stack and Sons at Leamington last week, which drew together a large company of farmers and dealers. The lots were situated in an area which included Warwick, Kenilworth, and Southam, and there were altogether on offer no fewer than eighty-six ricks of prime old and new hay, clover, and straw. Some of the lots remained on sale by private treaty, but by far the larger portion of the fodder was knocked down in the room, and the sale realised about £5,000. Straw fetched 65s. or 66s. per ton, good hay averaged over £4 per ton, and a similar average was secured for clover.

WATERPROOF SHEETS

FOR

THRESHING MACHINES, PORTABLE ENGINES, MILLERS, CARRIERS, LUGGAGE CART COVERS,

AND ALL PURPOSES.

Illustrated Price List and Samples Post Free.

Waterproof Oil Sheets at 1/6 and 1/8 per square yard.
Chemically-Dressed "Peck" Cloth at 1/11 per square yard, complete with tie cords, lettering, &c. Thoroughly seasoned, ready for immediate use.

J. H. PECK & CO., LTD., WIGAN.

Established 1803. *Telegrams*—"Peck, Wigan."

Bedfordshire.

We are having a taste of winter, which is welcome and seasonable. A white mantle is to-day spread o'er the landscape, to the advantage of everybody and everything except the young lambs, which now require night and day attention. Lambing is not yet in full swing in this county, but the few reports to hand are not favourable, there being much loss, both among the ewes and lambs. I have up to now only lambed thirteen ewes, all alive, but have only sixteen lambs with them.

Cattle are healthy and doing well where properly attended to, but the straw and hay is fase disappearing, and we are praying for an early spring. The wheat grown last year on the Bedfordshire clay land is far above the average, both as to quality and quantity, and, as I have before said, I hope to see 1901 repeated again and again. I was thrashing last week, and the machine filled fourteen sacks an hour. I have never experienced this before. But this sack-filling extraordinary does not even force a smile, letting alone cheerfulness. This wheat went straight away to the mill, and there was a dead loss upon every sack that went. I would never grow another kernel of wheat if it was not for the straw, that is, until the old country wakes up. The recent speeches of Mr. Pease, M.P., Sir R. Giffen, and others go to prove what I have for years stated, that agriculture will be protected by the Radicals rather than the Tories. I am not a party man sir, I have only voted once during the last seventeen years, and then I voted Liberal; but since 1886 I have, in season and out of season, through the press and on the platform, advocated a duty upon foreign corn, and have been called, even by many Tories, a fool for my pains. The "Bedfordshire Standard"—the county Tory paper—on January 3rd, said:—"Last year new duties were, very properly, imposed on imported sugar. It is much to be hoped that the success which has attended this new departure in our financial policy will encourage the Chancellor of the Exchequer to make further experiment in the same direction." If the editor of every paper who believes in fostering English industries, would show the same honest, manly courage, agriculture would begin to breathe again. I do not agree with some of the views expressed in the editor's column, but should like, sir, through your world-wide-read paper, to publicly express my gratitude to the editor of the Bedford Tory paper for his consistent and long-continued efforts on behalf of depressed agriculture.—T. S. (February 4th).

Derbyshire (West).

The weather is still frosty, but getting milder, with some sunshine. Live stock healthy, and new milched cows selling well; store stock cows, owing to fodder being short and all feeding stuffs at a premium, while wheat has been dropping in price, selling at less price than other feeding stuffs, so that a good deal will be used for stock purposes. Work on the land fairly forward. We are looking forward to an early spring, as the hay stacks are getting less fast.—C. M. (February 6th).

Hampshire (East).

Hitherto the winter's weather in this district has been favourable to the farmer, has saved his keep, and has enabled him to get well forward with his season's work. To the flockmaster it has been especially propitious, and one hears generally good accounts of the fall of lambs and their subsequent health and progress. The growing wheat looks very promising, and the frost of the last day or two will serve as a healthy check to its rather forward condition. Roots are keeping soundly, and all the autumn-sown crops look well. The corn trade is weak, with the exception of oats, for which a good demand exists. The price of good beef seems inclined to rise, but we have had a poor trade for mutton lately.—G. S. M. (February 7th).

Salop.

Weather very mild, suiting the ewes and lambs, but the effect of a light barley crop is seen plainly in the yield. Both ewes and lambs are going on well.—J. G. (February 7th).

Wiltshire.

At this time of year there is nothing of special interest to record in connection with farming. The winter so far has been favourable; we have had but little snow, with sufficient frost to make the land healthy and keep vegetation from getting too forward. The work of the farm is well in hand; cattle have done well, and are making fairly satisfactory prices. On the other hand, both fat and store sheep are selling badly, and will make a poor return for the winter's keep. Hay and straw is getting very scarce; there will be less left over than for several years past. Should we get a backward spring many farmers will have to buy.—T. P. (February 7th).

Wiltshire (North),

The weather till towards the end of January was all that could be desired, since then we have had severe north-east gales, with some snow, which still lies on the highlands. The small supply of hay and straw has held out well, till the cold came, but now it will go rapidly. The lambing has been generally satisfactory so far. On many farms straw, chaff, and cake or corn has substitutdd hay, with satisfactory results in every way. The trade is very bad, I hear, of sheep bought in September, being offered at only 3s. more now, which makes flock owners anxious for the future, lest the care and expense of wintering a flock should be wasted. Beef has been selling at a fair price, 7d. per lb. for best quality. Milch cattle also make a fair price. Only exceptionally able men with exceptional opportunities make farming pay in these days; during the last thirty years it has been a desperate struggle.—J. S. (February 10).

Foreign Prospects.

FRANCE.—The general condition of the wheat crop continues satisfactory, a large area is covered with snow, and the weather has become much colder.

BELGIUM.—There seems to be no uneasiness respecting the autumn-sown wheat crop.

HOLLAND.—Recent advices make no reference to crop prospects.

SPAIN.—Snow fell recently over most of the Peninsula, but it is feared that the crops have suffered from previous severe frost.

GERMANY.—Weather has been changeable, with rapid alternations of rain, snow, and frost, which are not calculated to improve crop conditions.

RUSSIA.—Over the greater part of the wheat and rye-growing country, temperature has been above the normal; drought prevails in many Southern districts, and no where is the rainfall equal to the season's average. Snow lies in eastern and north-eastern governments.

ITALY.—Inundations occurred in many districts, and a considerable area of the crops is under water. At Turin and Milan snow fell to a depth of three feet.

ROUMANIA AND BULGARIA.—The season has been unusually mild, and navigation on the Danube is not closed. Agricultural conditions are regarded with satisfaction; a heavy fall of snow would be greatly appreciated.

HUNGARY.—Once more the crops are under snow, and the weather is colder, with night frosts. Lower temperature has given an impetus to the wheat market.

MONDAY (February 3).—The winds were still north-easterly over our islands, but the gales had moderated on our coasts, although in the English Channel and on the East coast the force continued strong. Small amounts of melted snow and rain were measured in the eastern and southern districts in the morning as the result of the fall since the previous day. The weather continued very raw and cold, and the temperature was changing irregularly. The thermometer was everywhere low for the time fo year, and the readings were, generally, only a few degrees above the freezing point.

TUESDAY (February 4).—The winds were still generally easterly over our islands, but the force had everywhere decreased, and the strongest wind reported on our coast was a moderate breeze. Rain or sleet was measured in the morning in the southern and eastern districts, but the amounts were everywhere small, and the weather during the day was mostly dry. Slight frost occurred during Monday night in the East of England, and the midday temperatures were again low for the time of year, the highest readings being generally about 40 degrees.

WEDNESDAY (February 5th).—The weather was generally dull or cloudy, and there was a good deal of mist or fog in different parts of our islands. The barometer had continued to decrease, and a westerly wind was setting in over the northern and western portions of the kingdom, and the easterly wind seemed to be everywhere giving way. A slight frost was generally experienced during Tuesday night, and the temperatures remained low during the day. Scarcely any rain fallen.

THURSDAY (February 6).—Cloudy weather prevailed in most parts of the British islands, and snow or sleet fell at a few places in the north. The barometer continued to decrease, and readings were considerably below the normal, not only in the United Kingdom, but over the whole of Western Europe. A shallow cyclonic disturbance wa sapproaching the Norwegian coasts, and another disturbance had arrived over the Bay of Biscay. The latter storm area, although apparently shallow and unimportant, had occasioned a brisk rise of temperature in France, but had caused the wind to remain easterly, and the weather cold over England. Temperature had risen somewhat in Ireland, where a light southerly wind was blowing. The weather was dry in London, and the highest temperature was thirty-nine degrees.

FRIDAY (February 7th).—The weather was generally fine and dry over England, but slight rain was again reported at some of the Scotch and Irish stations. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, in the north and west, as well as at several places on our south coast. The winds were everywhere light, and they continued chiefly northerly over Great Britain, whilst the southerly wind, which had set in over Ireland was dying down. Frost occurred in many parts of the country during Thursday night, and in Scotland the sheltered thermometer fell ten or twelve degrees below the freezing point. There was a slight sprinkling of snow in London on Thursday night, and the exposed thermometer indicated a frost. The temperature during the day rose to thirty-nine degrees.

SATURDAY AND SUNDAY (February 8th and 9th).—The weather continued cold over our islands during these two days, and sharp frost occurred at night over the northern part of the kingdom. In Scotland, as well as in the midland districts of England, the sheltered thermometer fell ten degrees and more below the freezing point. The midday temperatures were below the average on both days. Snow or sleet fell on Saturday in the north and east, and rain occurred in the south of England, but the amounts measured were not generally large. Shallow cyclonic disturbances were situated over the North Sea on Sunday, and under their influence the wind was chiefly north-westerly over the United Kingdom, but shallow disturbances had appeared on our south-west coasts.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: The trade remains much the same as noticed last week. Barley steady. Wheat firm. Oats, 3d per qr dearer. Maize, advanced 3d per qr. Flour dull.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—With the exception of maize, steadiness was the prevailing feature. The attendance was quite of an indifferent nature. English wheat continues to be dealt with almost exclusively on the provincial exchanges, town millers here still being satisfied to abide events. Dry milling grades continue in support. Whites range at 28s 6d to 30s, and reds at 28s to 29s 6d per qr delivered. American reds well maintained. Russian sorts remain about the level of this market. Flour unaltered. English in good supply, being steady at the recent decline. Grinding barley steady, with a fair supply on hand, but not much coming forward at present. English malting qualities adapted for seeds are still mainly sought after, ranging at 26s to 30s. Useful types become more and more scarce up to 40s. The better sorts of oats are rather firmer, while generally firmness pervades the market. English commands enhanced rates. Gartons (spring sown), 23s 6d 42lb; black winters, 24s to 24s 6d; grey ditto, weighing the same, 23s to 23s 6d. Flat maize nominal, being out of supply, and round corn 6d dearer since last Monday. The market for imported beans and peas retains stability.

Mark-Lane, Friday.—There were no disturbing features, and symptoms of an improvement began to be felt. So far, however, the reaction has been but mild, while buyers were limited. English wheat continues to be dealt with almost exclusively on the provincial Exchange, as town millers adopt the same indifferent mood. Whites range at 28s 6d to 30s, and reds at 28s to 29s 6d per qr. delivered. Foreign steady, and American descriptions in small compass. Flour in general maintains a good tone, despite the laxity of trade. First patents, 23s ex granary. Of fancy patents, Mayblossom held for 23s 6d; second patents, 21s 6d to 22s 6d. Town households, 23s; and whites, 3s per sack more. Australian patents, 19s 6d to 20s ex store, 280lb. Grinding barley fairly steady, and Odessa rules at 18s 3d ex ship to come up, 18s 9d ex quay being more in supply than demand. English malting continues mainly secured for seed, which ranges at 26s to 30s. Oats rather firmer since last Friday, and are wanted. F.a.q. Libau, 17s 9d ex ship, 18s 6d and more ex quay, 38lb. Konigsberg, ordinary, 20s 6d; good, 21s ex-quay and 40lb. Libau, 20s upwards. New Zealand ordinary Bluff, 25s to 26s, 384lb ex store. American still out of supply. English fully in sellers' favour. Gartons, 23s 6d (spring sown), 42lb. Flat maize remains exhausted, and roun corn about 6d dearer on the week. Roumania and South Russia continue to send forward fairly liberal supplies. Holders of imported beans and peas were again demanding firm prices, despite few inquiries, the market being still somewhat bare.

COUNTRY.

Ashford, Tuesday.—Wheat—Trade quiet at prices scarcely so good as last week. Barleys—Moderate demand at about recent quotations. Oats were held for quite as much money. Beans and peas scarce and dear. White wheat, 27s to 30s; brown wheat, 26s to 29s; malting barley, 26s to 33s; grinding ditto, 22s to 25s; black oats, 18s to 21s; white ditto, 20s to 24s; old beans, 32s to 36s; grey peas, 34s to 35s.

Banbury, Thursday.—Wheat, red (new), 28s to 30s per qr. Very little wheat at market, prices remaining about the same.

Birmingham, Thursday.—The market was inactive and the attendance small. English wheats unchanged at 11s to 11s 3d per bag. Maize went up about 3d, Plate offering at 23s to 23s 6d in Channel, and round 22s to 23s per qr. Grinding barley, 17s 6d to 18s 9d, Liverpool. Black English oats, 20s 6d to 21s 6d, and white, 21s to 23s per qr.

Boston, Wednesday.—A fair attendance and a small show. Wheat, 27s 6d; malting barley, 28s to 32s; oats, 19s to 21s; peas, 54s to 58s; and beans, 34s per qr. Maize 6d dearer on the week. Grinding barley 21s 6d per qr. Linseed cake £8 to £9, and cotton cake £5 5s per ton.

Braintree, Wednesday.—Wheat in average quantities; reds, 28s 6d; whites, 30s per qr. Barley trade very quiet.

Bristol, Thursday.—At our market to-day English wheat was in moderate supply at late rates; foreign unchanged. Grinding barley 3d to 6d dearer. Oats and maize firm, and unaltered in value. The flour trade still remains inactive at previous prices.—GRACE BROS.

Cambridge, Saturday.—Trade has been quiet during the week, without any change in values. The supply of wheat is about an average, but barley is coming short. At this market to-day there was an average supply of wheat, and the trade was dull, but prices were unchanged—from 27s to 28s per 504lb. Barley was in short supply, and not much wanted except in seed lots. Oats quiet and steady. Beans dull.

Canterbury, Saturday.—Wheat slow; prices unchanged. Barley and oats firm. Ruling prices:—White wheat, 28s to 31s; red, 27s to 30s; malting barley, 28s to 35s; grinding ditto, 23s to 25s; white oats, 20s to 24s; black oats, 20s to 23s.

Carlisle, Saturday.—Small supply of oats in our market to-day; good demand at late rates. New, 20s 6d to 22s 6d per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—The attendance was small, and there was little 9nglish grain offering. Wheat was 1d to 2d per bushel lower. Other grain unchanged. Quotations:—Wheat, white and red, 4s 3d to 4s 4d per 75lb; malting barley, 3s 10d to 4s per 60lb; grinding barley, 3s 4d to 3s 6d per 64lb; beans, 5s 6d to 5s 8d per 80lb; oats, new, 2s 10d to 3s 1d; old, 3s 4d to 3s 6d per 46lb; Indian corn, 12s 9d to 14s 3d per 240lb.

Chichester, Wednesday.—There was an average attendance. Wheat was in moderate supply, with a quiet trade at last week's prices. Feeding stuffs firm, with a rising tendency. Flour unchanged.

Colchester, Saturday.—Wheat very small supply; trade very firm at slightly advanced prices. Feeding corn firm and rather dearer.—FRANCIS AND CO.

Croydon, Thursday.—White wheat, 28s to 30s; red ditto, 27s to 29s; malting barley, 28s to 36s; grinding, 22s to 24s; oats, 19s to 21s; beans, 31s to 33s; peas, 29s to 31s. A thin attendance at market. Trade for wheat remains quiet; barley and oats firm.

Devizes, Thursday.—We had a fair supply of corn to-day. Prices show no alteration, but wheat sells rather more freely. Quotations:—Best wheat, 14s to 15s; secondary, 12s 6d to 13s; best malting barley, 29s to 34s; secondary, 25s to 28s; grinding barley, 20s to 24s; oats, 20s to 23s; beans, 16s to 20s; fine flour, 22s to 24s; extra fine, 23s to 30s; best bread, 9d.

Glasgow, Wednesday.—There was the usual attendance at our Corn Exchange. Wheat and flour met a slow sale at about last Wednesday's prices. Maize steadier, flat being held for 3d advance; round the turn in sellers' favour. Barley, fine malting, the turn better; grinding barley dull and unaltered. Oats in limited demand, and rather easier in price. Beans quiet; grinding sorts steady. Peas scarce, and held for full prices. Oatmeal very dull. Bran and milling offals are quiet, and nominally unaltered on the week.—GIBSON AND CLARK.

Ipswich, Tuesday.—Wheat: With a by no means large supply, the trade was quiet, and prices barely equal to last week's. Good reds in condition 29s per 504lb, delivered at Ipswich. Barley: Supply moderate, with a fairly steady demand for useful medium samples, at 29s to 32s 6d per qr. Oats scarce and firm, at 22s to to 24s 6d per qr. Poland 22s 6d to 22s 9d, Hanoverian 22s to 22s 3d, German 21s 6d to 21s 9d per 336lb. Maize firm at 22s 9d to 23s for new round; other sorts nominal. Beans, peas, and all other feeding corns very scarce and firm. Linseed cakes firm, at £8 10s to £8 15s per ton. Cotton cakes quiet. Bran firm, at £5 10s per ton.

Leeds, Tuesday.—The wheat trade is slowly but steadily emerging from the long period of inactivity and depression and the consumptive demand shows signs of improving. Prices on the week cannot be called quotably better, but are the turn in sellers' favour. Foreign malting barley in more request; English continues firm. Feeding stuffs firm.—DUNNS AND Co.

Leeds, Friday.—English wheat firmly held at Tuesday's prices. Foreign the turn dearer owing to further rise in Americans. Maize slightly favour sellers. No change in beans, peas oats, barley or flour.

Leicester, Saturday.—Good attendance, fair supplies of wheat, and fine samples a better trade; prices, 28s to 31s per 36 stones. Malting and grinding barley quiet. Fine oats sold very freely.

Leith, Friday.—Trade during the week has improved. Prices are much firmer, but buyers are still holding off, although future prospects are encouraging. Wheat quiet sale. Scotch oats better demand at unchanged prices. Barley—Scotch dearer; foreign feeding, 21s. Hard white peas, 37s 6d. Beans—All varieties, 33s 6d to 34s. Round maize, 23s to 24s; parcels with slight heat, 21s to 22s 6d. Millet seed, 19s. Mill offals—Fair consumptive trade in bran. There is a great demand for dried grains, which has the effect of raising prices. Broad bran, 120s to 125s; medium bran, 100s to 102s 6d; sharps, 95s to 97s 6d; parings, 105s to 107s 6d; cummings, 82s 6d to 87s 6d; dried grains, 100s; oat husks, 45s; meal seeds, 67s 6d; all sacks included.—WILLIAM MACLAY.

Lewes, Tuesday.—New white wheat, 28s to 29s 6d; new brown ditto, 27s to 28s 6d; malting barley, 32s to 35s; grinding ditto, 21s to 24s; oats, 21s to 25s; beans, 35s to 38s; peas, 32s to 35s per qr.

Lincoln, Friday.—Moderate supply of English wheat, which was selling at last week's rates, 28s to 29s. Barley trade very quiet. Oats a large show and easier in value. Maize and beans firm.

Liverpool, Friday.—The market has had a good attendance, and wheat experiences an improved demand, prices being generally ½d higher, with a fair business doing. Flour has a very small inquiry, but is steadily held at unchanged prices for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers. Maize: Mixed is in small demand at ½d to ¾d below last Tuesday. Plate is steadily held at unchanged prices, and receives a fair inquiry from customers Europeans have a moderate trade, with values generally ½d lower. Barley is idle for malting, and lower to sell. Feeding sorts are steadier, and meet an improved inquiry, with values ½d dearer. Beans are very firm at an occasional advance with a fair inquiry. Peas steadier, with a better inquiry, prices the turn against buyers. Oats have had only a small inquiry, and although prices are unchanged, the tendency is easier for English. Foreign sorts are in better request, and are held for ½d over last Tuesday. Oatmeal steady, but inactive at quotations. Oilcake steady, with a fair inquiry at last market day's prices.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—There was a good attendance at the market to-day, but business very quiet. The wheat trade about the same as last week; buyers of it not plentiful, produces inactive tone. Supply of barley quite equal to requirement, and former terms obtained not easily. Oats continue very firm, and the best article as regards relative value. Maize is weak for round corn; so much of it not in condition, holders press to get rid of it; but flat description scarce and well up to former cost. Not any change worthy of note in other grain and feeding material.

Manchester, Thursday.—A steady tone has ruled in most sections during the week; late rates are repeated for both wheat and flour, and in some instances a moderate trade is reported. Indian corn keeps steady, but purchases are not named to any great extent. Peas and beans are also steady. Barley is practically unchanged, demand rather quiet. Oats, both English and foreign, keep steady at last week's prices.

Newcastle-on-Tyne, Saturday.—At our market to-day a quiet trade prevailed for wheat; last week's prices, however, were maintained. Maize steady at last Saturday's prices. Peas and beans firm and favouring sellers. Oats a slow demand; quotations unaltered. Barley firm for malting purposes; feeding qualities unchanged.—JOSEPH POLLARD AND Co.

Newport, Wednesday.—A better inquiry for wheat, which was firm. Maize 6d to 9d dearer on the week. No change in all other feeding stuffs. Flour fines 23s per sack. Offals dear and scarce. Average attendance.

Northampton, Saturday.—Considering the snowy and unfavourable weather, the attendance was good. Supply and demand indifferent. Wheat and barley were more in request than last week, and buyers more inclined to operate at a slight advance. White wheat, 28s to 29s 6d; red, 27s to 29s; barley, 25s to 34s; grinding ditto, 21s to 24s; oats, 19s to 23s; old, 25s; beans, 32s to 40s; flour, 21s to 22s; fine, 25s.

Norwich, Saturday.—Wheat still in small supply, with a firm trade, and in some cases more money was made. Barley in limited supply at previous quotations. Cold weather, with easterly winds, has prevailed this week, but has now changed to rain and sleet showers. Wheat, red, 28s to 28s 6d per qr; weight, 63lb per bushel imperial. Corn inspector's return for the week ending 3rd February, 1902: Wheat, 23,117, 26s 7½d; barley, 5,694, 28s 10d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in fair supply; steady trade at late rates. Barley small show, and prices in sellers' favour. Oats and beans scarce, and made full prices.—ROBERT HUBBLE.

Peterborough, Saturday.—There is no quotable change in the value of wheat to-day, trade being quiet at about last week's prices. Barley keeps firm in value, the chief demand being for seed qualities. Oats firm at the full rates of last week.—THOMAS HILL AND SON.

Plymouth, Thursday.—At market to-day average attendance; trade generally better tone, with an enlarged demand. Wheat unaltered in value. Maize, in view of reports as to crops in Argentina and small quantities due at this port, realised 3d advance. Barley held in favour of sellers. Oats very firm.—ORLANDO DAVIS AND Co.

Reading, Saturday.—We had a fair attendance today, and the trade all round proved firm. The wheat supply was rather larger than usual, and, the demand being limited, little or no change occurred in the quotations from those recorded last week. There was a steady inquiry for barley, which maintained recent values, while oats, which were in good supply, sold fairly well at unaltered figures.

Romford, Wednesday.—Wheat trade firm at last week's prices. Small supply. Red wheat, 27s to 28s; white, 28s to 30s per qr.

Sheffield, Tuesday.—To-day's market was better attended than that of a week ago. Wheats were in improved demand. Maize was 3d per qr cheaper. Beans firm at recent quotation. Oats and barley were also firmer at unchanged prices. Quotations:—Wheat, white 30s to 31s, red 30s 6d to 31s per 504lb; oats, new white 21s 6d to 22s 6d, new black 20s to 21s per 336lb; barley, grinding 22s to 23s, malting 28s to 32s per 448lb; peas, grinding 32s to 34s, blue 53s to 80s per 504lb; beans, Egyptian 36s to 36s 6d, English new 37s to 37s 6d per 532lb; Indian corn, small 25s to 26s, American mixed 27s 6d to 28s per 480lb.

Spalding, Tuesday.—At the Corn Exchange there was a good attendance of farmers and merchants, and a fair amount of trade. A small show of wheat, and a firm trade at 27s 3d to 27s 6d per qr. Oats remained firm, and late rates were well maintained. Beans, peas, and other articles unchanged.

Stamford, Friday.—The show of wheat was fair, and trade was about the same as last week. Prices ranged from 27s 6d to 29s. There was not very much doing in barley, oats, and maize, which made late rates.

Stockton, Wednesday.—There was only a very small supply of English wheat, which made 30s per qr. The foreign wheat trade keeps quiet; in some instances more money was being asked, which had a tendency to stop business. Oats and maize 3d dearer. No malting barley showing.

Sunderland, Saturday.—Fair supply of grain at this day's market. Wheat quiet and in buyers' favour. Barley and oats rather dearer. Arrivals coastwise:—Wheat, 180qrs; barley, 595qrs; oats, 847qrs; foreign, nil.—E. AND F. RICHARDSON.

Wakefield, Friday.—No alteration in prices of wheat, and the trade done on to-day's Exchange is small. Few inquiries for malting barley, as maltsters are now finished for the season. Maize 6d per qr, oats and grinding barley 3d per qr dearer on the week.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—The wheat trade is steady at last week's prices; offers from abroad are by no means liberal, and limits too lofty, so that little fresh business is practicable, but the demand still leaves much to be desired. Malting barley in moderate request at late rates. Maize 6d, beans and oats 3d dearer.—DUNNS AND Co.

Wisbech, Saturday.—A moderate supply of grain. Wheat a quiet trade at barely late rates; prices, 27s to 28s. Oats firm at full prices, 21s to 24s. Barley, 26s to 30s. Beans, 34s to 38s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a fair attendance, but trade was quiet. Quotations:—Wheat, new 12s 6d to 13s per 216lb; oats, old 15s 6d to 16s, new 12s to 13s; beans, old 15s 6d to 16s 6d per 196lb, new 14s to 14s 6d per 196lb; barley, 31s to 32s per 448lb; maize, 26s to 26s 6d per 480lb.

Worcester, Saturday.—Wheat trade lifeless, without any quotable alteration in values of home qualities. Barley obtained rather more money, and all feeding corn showed a steadier tendency.

Worksop, Wednesday.—Better attendance than usual, with inquiries for barley for seed. Wheat down 6d per qr. White wheat 27s 6d to 28s 6d, red wheat 25s 6d to 27s 6d, best malting barley 29s to 32s, secondary 26s to 28s, grinding barley 23s to 24s, white oats 21s to 23s, black oats 19s to 21s, maize 27s to 28s per qr.

York, Saturday.—Wheat is flat and makes 6d to 1s less money than last week. Malting barley steady, without change in price. Oats firm. Rye, 8d to 8½d per stone; beans, 10½d to 11d ditto.

FOREIGN.

Hamburg, Saturday.—Trade quiet, and prices are barely supported. Supplies of grain have fallen off, but potatoes are still plentiful and cheap. Wheat less inquired after; millers are complaining of a slow sale for flour. Hard Winter No. 2 is offering at 29s, Red Winter No. 2 at 29s 6d, Northern Spring No. 2 at 28s 6d of 480lb, Walla Walla, April-May-June delivery, at 29s 6d of 500lb. Rye maintains its value; 915.20 South Russian, March-April, is held at 23s to 23s 3d per 480lb. Malting barley quiet. Small lots of fine Saal are offering at 33s 6d up to 39s best. Silesian to arrive per barge is held at 27s 6d to 29s 6d. Bohemian at 31s 6d to 33s, Slovatian at 32s to 36s per 448lb f.o.b. South Russian and Danubian feeding barley is selling at 17s 6d to 18s 3d per 400lb ex ship. The small arrivals of maize are taken at unaltered prices. Odessa 21s 6d to 22s, Turkish at 22s 3d to 22s 6d per 480lb. Mixed is held at 25s 6d.—JOHN TATLOCK.

Paris, Wednesday.—The tendency of native wheat shows no improvement since last market day, a weak feeling still continues. This is attributed to millers still finding flour so hard to dispose of, and consequently they display some moderation in their purchases. Offers were rather numerous, but sellers manifested the same reluctance to lower their prices, and business was effected with much difficulty. The tendency may be noted as undecided at about last week's rates as follows:—Choice red 37s 10d to 37s 5d, ordinary 37s 5d to 36s 11d, and white 38s 3d to 37s 10d per 480lb. The flour market was dull at the opening, and closed a little better with an average advance of 5c. at the following prices:—February 27s 51 to 27s 8d, March 27s 8d to 27s 11d, March-April 27s 11d to 28s 2d, March-June 28s 2d to 28s 5d, and May-August 28s 8d to 28s 11d per 280lb. Rye, like wheat, displays a weaker feeling, but it must not be overlooked that the article is nowhere abundant, and that the least demand would suffice to arrest the tendency. Here prices were nominally unchanged, with a few more sellers; buyers offered 27s, but no sellers under 27s 6d per 480lb. Oats are quiet in all directions, and offers are fuly adequate to requirements, the demand remaining generally inactive. There is no alteration to report in barley, prices remaining rather steadily supported. In the North 26s 1d is paid. In Beauce good qualities are worth 23s 3d to 23s 11d. Here the tendency was steady for grinding and feeding corn, and unaltered for malting sorts. Buckwheat.—Owing some improvement in the demand, rates have made a slight advance, and quotations now stand at 27s per 480lb.—*Dornbusch.*

FOREIGN CORN TRADE.

The shipments of grain from the chief exporting countries last week were as follows :—

	Wheat. Qrs:	Flour. Sks.	Maize. Qrs.	Barley. Qrs.	Oats. Qrs.
United States	366,000	162,000	88,000	—	—
Russia	220,000	—	115,000	49,000	109,000
France	—	5,000	—	—	—
Austria-Hungary	—	5,000	—	—	—
Roumania	89,000	—	110,000	20,000	30,000
Argentina	4,000	—	10,000	—	—
India	39,000	—	—	—	—
Australasia	110,000	—	—	—	—
Miscellaneous	20,000	10,000	20,000	20,000	10,000
Total	848,000	182,000	273,000	89,000	149,000

MANURES.

Liverpool, Friday.—Nitrate of soda has further advanced to £10 6s to £10 10s per ton, the latter for guaranteed best quality, and sulphate of ammonia is in sympathy firmer, but the demand is only rather quiet. Basic slag in active request, but as prompt deliveries are impracticable, more attention is being diverted to superphosphate of lime; prices as annexed. Feeding stuffs are a quiet trade, and values tend slightly in buyers' favour:—Nitrate of Soda, best quality, *i.e.*, guaranteed 95 per cent., pure, in bags, £10 7s 6d to £10 10s per ton; East India Bone Meal, fair to prime, in bags, £4 1s 3d to £4 6s 3d per ton; Kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; Palm Nut Cake, prime, in bags, £5 12s 6d per ton; Linseed Cake, American thin oblong, prime, in bags, £7 10s to £7 12s 6d per ton; Linseed Cake, English, prime, in bulk, £8 12s 6d to £8 17s 6d per ton; Linseed Cake, foreign, thin oblong, prime, soft and oily, in bags, £8 5s per ton; Cotton-seed Cake, N.A. decorticated, prime, in bags, £7 2s 6d to £7 5s per ton; Cotton-seed Cake, English decorticated, prime, soft, in bags, £7 10s to £7 12s 6d per ton; Cotton-seed Cake, English, undecorticated, prime, in bulk, £4 12s 6d to £4 17s 6d per ton; Cotton-seed Cake (crushed), 20/25 per cent. oil, prime, in bags, £7 5s per ton; Maize Germ Meal, prime, in bags, £5 2s 6d to £5 5s per ton; Rice Meal, Rangoon, as imported, in bags, £5 10s per ton; Indian Meal, coarse to fine grinding, prime, in bulk, 13s to 13s 6d per 240lb; Linseed, fine bold feeding, in bags, £3 3s to £3 6s per quarter, 416lb; D.N.S. Brand Superphosphate of Lime, guaranteed, 25 to 27 sol., in bags, £2 5s to £2 7s per ton; D.N.S. Brand Superphosphate of Lime, guaranteed, 30 to 31 sol., in bags, £2 10s to £2 12s per ton; Superphosphate of Lime, guaranteed, 35 to 36 sol., in bags, £3 to £3 2s per ton; Basic Slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 12s to £1 13s per ton; Basic Slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, £1 14s 6d to £1 15s 6d per ton; Basic Slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, £1 17s 6d to £1 19s per ton at the producing depots.—H. JONES LANGAR AND CO.

HAY AND STRAW.

Manchester, Wednesday.—Hay, 6½d to 7½d; clover, 6½d to 7½d; straw (wheat), 6d. to 6½d; straw (oat), 5½d to 6d per stone.

Whitechapel, Saturday.—Fair supplies met a quiet sale. Quotations:—Best clover, 95s to 110s; inferior ditto, 80s to 90s; specially picked hay, 115s; good ditto, 108s; inferior ditto, 80s to 90s; mixture and sainfoin, 90s to 100s; and straw, 28s to 40s per load.

THE BALTIC.

Wheat cargoes are held with commendable steadiness in face of the American decline. The London sales show little decline in any sort. They include alifornian at 30s. 3d.; Blue Stem at 29s. 9d.; Walla Walla at 29s. 3d.; Russian Winter at 30s.; Australian at 30s.; Argentine at 30s.; Northern Manitoba at 28s. 4d.; Hard Winter at 29s., and White Kurrachee, 29s. per quarter.

Maize cargoes are dearer for round corn and also for yellow near at hand; but yellow is a trifle easier for May shipment. Prices are:— Roumanian, 23s.; Turkish, 23s. 9d.; Galatz, 23s. 3d.; Caucasian, 22s 6d., and Argentine 23s. per quarter for cargoes on passage; 22s. 3d. for May shipment.

Barley cargoes are steady. Odessa malting, 19s.; Roumanian, 18s. 6d.; Kustendje, 18s. 3d.; Californian, 24s. 9d., and the best Saale, 38s. per quarter.

Oats have made 18s. 3d. for Petersburg; 18s. for Odessa; 20s. 3d. for Konigsberg; 18s. 3d. for Roumanian, and 24s for 384lb. New Zealand. These prices argue a firm market. Beans have fetched 29s. for Egyptian new crop May shipment. Peas are offered for May shipment from India at 25s. These are the green kind.

Other cargo sales comprise—Bombay Linseed at 53s. per quarter; Locust beans at 95s per ton, and Cottonseed at £6 5s. per ton.

The arrivals of grain and seed-laden vessels at ports of call for the week were, 1 maize (Sulina.)

The sailings of grain and seed-laden vessels from ports of call for the week were, 2 wheat (1 Belfast, 1 (Birkenhead); 1 flour (Sligo); 1 barley and wheat (Southampton); 1 maize (Belfast); total, 5.

Since 1st January, 1902, the total arrivals have been 13 wheat, 1 flour, 1 barley and wheat, 3 maize, 1 barley, 1 beans, 1 canaryseed; total, 21.

Last year during the same time the arrivals were 14 wheat, 1 flour, 3 barley and wheat, 5 barley, 2 beans, 4 pease, 2 locust beans, 2 canaryseed, 2 valonica; total, 35.

POTATOES.

Goole, Wednesday.—Plentiful supply here to-day, for which a slow trade was experienced. Prices were practically the same as last week—from 50s to 54s per ton for best. Retail price, 6d per stone.

Spitalfields, Saturday.—Very heavy supplies, and the demand showing no recovery, the market remained dull. Quotations:—Best Lincoln Up-to-Dates, 55s to 65s; Blackland ditto, 40s to 45s; Wisbech ditto, 50s to 55s; Scotch ditto, 60s to 65s; Scotch maincrops (grey soil), 70s; Lincoln maincrops, 80s to 85s; Reading Giants, 45s; and Blackland Gartons, 40s to 45s per ton.

Southampton (Friday).—Prices are as follows: Plate maize, 24s. 6d. ex quay; small Odessa, 23s. 6d. ex ship to arrive; 501b. Russian barley 19s. spot, and commoner quality, 18s. 6d. to arrive; American oats (401bs.), 21s. 6d.; black Libaus, 20s. (381b.), white Konigsbergs, 20s. (381b.), Finns 20s. (381b), black Irish 21s. (381b.), white Dutch 20s. to 20s. 3d. per 304lbs.; buckwheat, 24s.; dari, 24s.; sorghum, 20s.; white peas, 37s.; fine middlings, £5 15s.; bran, £5 10s.; pollard, £5 2s. 6d.; feeding flour, £6; distillers' dried grains, £5 7s. 6d.; maize cones, 21s. 6d. per sack; oat chaff, 65s. per ton; linseed chaff, 80s. per ton; German linseed cakes, £8 5s.; American, £7 17s. 6d.; malt dust, £4 12s. 6d. per ton, all free on rails.

Linseed Cakes.—The colder weather has given a filip to the trade, and there is every appearance of this class of cake advancing in value. Stocks are small, linseed is again dearer, and Riga is closed for the time being through ice. Best Westerns are firm at £7 6s. 3d. ex dock, and Russians in mats are quoted at £7 12s. 6d. to £7 15s.; seedy qualities in bags in good demand at from £17 16s. 3d. to £8 2s. 6d. ex dock. London cakes at to-day figures of oil and seed, show crushers a nasty loss, and prices are again dearer at from £8 5s. to £8 8s. 9d. ex mills. Cotton cakes have eased to the extent of 2s. 6d. per ton, the shipment having been rather large. However, there is a good sale for Egyptians at £4 7s. 6d. to £4 8s. 9d. ex docks, whilst home make command £4 10s. to £4 12s. 6d. ex mills. Decorticated cotton cakes move well into consumption at about previous quotations, £6 11s. 3d. for prime, £6 12s. 6d. for Yayoos and Clintons, and £6 16s. 3d. for Crescents, ex dock. Meal is unaltered on the spot at £6 12s. 6d. ex dock, but Feb.-March shipments would come at £6 10s. free to trucks from ship.

Maize Germ Meal.—American offers only to arrive about the middle of the month at £6 2s. 6d. free to truck and £6 for February mills. Best English yellow sells in its place at £6 ex wharf. Corn cake maintains a steady sale at £6 ex dock. Rice Meal.—A few tons landed in the dock offers at £5 6s. 3d., and £5 ex ship terms is named for a parcel due towards the end of the month.—JOHN BURSTALL AND Co. (Mark Lane).

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Snow fell rather heavily in Scotland, France, and Spain during the first four days of February, and the weather was cold in most parts of England from the 1st to the 7th. On Saturday morning there was a cold thaw with rain. Wheat is not likely to take any harm from this sort of weather, which, however unpleasant for human beings, must be called seasonable. Russia is experiencing a mild winter, the soft snow is very bad for inland traffic, but the great development of the national railways enables large supplies of grain nowadays to reach the coast, even in mid-winter. Californian rainfall from September 1 to January 31 was only seven inches against an average of twelve. As February to May are the dry months on the Pacific seaboard considerable apprehensions are entertained. The rest of the American union has a hopeful outlook; the winter wheat is now said to be promising over an extended area. The special Friday cable to *Dornbusch's List* states that the maize crop in Argentina has been much benefited by timely rains. This intelligence may be expected to make yellow corn easier for future delivery.

The quantity of barley now on passage is rather above the average.

	Qrs.
Californian	480,000
Asiatic	60,000
Russian	120,000
Roumanian	40,000
Bulgarian	25,000
Total	725,000
A year ago	465,000

The price of English barley is 1s up on the year, but foreign is not dearer on the twelvemonth.

Of oats only a small supply is on passage. The total shipments from Russia 1 Jan.—8 Feb. were only 554,000 qrs., against 756,000 qrs. last year, and America having shipped nothing, the perspective supply is decidedly below the average. There is an excellent demand for seed oats, 24s. being paid for best English, and 30s. for best New Zealand. Stocks in London stand at 570,000 qrs.; or fully 200,000 qrs. more than usual. This keeps the Russian kind from advancing, but some forward movement is anticipated for March.

Beans are rather neglected, but there is very little on passage, and holders are consequently confident. Peas are weaker at Liverpool, but London is, if anything, in sellers' favour. Linseed is rather down on the week. Linseed oil has advanced £1 per ton, and is still rising in value. Rape oil is 5s dearer in sympathy with linseed. Cotton oil is 7s. 6d. dearer for February. A short crop of sesame in India makes that seed dearer to buy.

America during the past week has made British wheat markets take a somewhat downward course. The holders in the States contest a large usable supply, which on the 1st inst. stood at 11,900,000 qrs. There is plenty of corn for manipulation with such a total, and the "bear" movement since February came in has been of a somewhat decided character. London grain arrivals for the month of January are now ascertained to have been as follows:—

	Qrs.
Wheat	140,000
Barley	150,000
Oats	411,000
Maize	251,000
	Sacks.
Flour	323,000

The arrivals of wheat and flour were rather below the average, but those of barley, oats, and maize were heavy. This was the cause of a heavier fall in maize than had been anticipated; oats and barley resisted to the increase of stocks very well. Trade is showing pretty evidently that when both maize and oats are dear the average buyer prefers to have the oats.

Continental prices for wheat, thus compare with value at Mark Lane:—

	London average.	Term market.	Paris.	Berlin.
	s. d.	s. d.	s. d.	s. d.
Jan. 1	28 5	31 3	38 0	37 6
Jan. 8	27 1	31 3	37 6	37 6
Jan. 15	28 2	30 9	37 9	37 3
Jan. 22	27 9	30 9	37 0	37 0
Jan. 29	27 10	30 3	37 3	37 0
Feb. 5	28 0	31 3	37 6	37 0

American prices equal 29s. 3d. per qr. at New York, 25s. at Chicago, 25s. 6d. at Duluth, and 21s. 6d. at San Francisco. The low price accepted for Californian wheat has been the cause of considerable shipments, and quantities of wheat now on passage come out thus:—

	Qrs.
Californian	2,200,000
American	285,000
Argentine	125,000
Russian	45,000
Indian	142,000
Australasian	445,000
Other Countries	10,000
Total	3,252,000

On January 1, 23,500,000 qrs. were on passage. This is a very considerable increase in forty days, and largely is responsible for the present weakness of trade.

The week's sales and imports have been as follows:—

	Qrs.
English wheat	165,000
Foreign wheat	241,000
Foreign flour	93,000
Breadstuffs	499,000
Maize	170,000
Barley	185,000
Oats	94,000

Receipts of breadstuffs and oats were below the mean, those of barley exceeded it. Of maize the supply was probably equal to the reduced inquiry. The stocks of wheat in the United Kingdom on 8th inst. were:—

	Qrs.
British	3,122,000
Foreign	2,932,000
Total	6,054,000

January imports of minor staples into the United Kingdom are thus returned:—Beans 40,000 qrs., peas 41,000 qrs., linseed 136,000 qrs., rapeseed 13,000 qrs., and cottonseed 79,000 tons. The totals are all very moderate, except that of cottonseed, which was large.

Stocks of wheat on 1st February were 392,000 qrs. at Liverpool, 37,000 qrs. at Manchester, 91,000 qrs. at Hull, 16,000 qrs. at Glasgow, 80,000 qrs. at Edinburgh, 78,000 qrs. at Newcastle, 60,000 qrs. at Gloucester, and 124,000 qrs. at Bristol. London holdings are estimated at 225,000 qrs., against 248,988 qrs. on 1st January and 285,000 qrs. on 1st February last year. These figures are not discouraging to Mark Lane.

The average price of English wheat is 9d. up on the twelvemonth; that of Californian is 3d. up on the same period. On the other hand, best flour is 2s. per sack down on the year. Household flour is 2s. 3d. down, and best American is 2s. 6d. down. The flour trade can hardly be in a healthy condition with these prices respectively ruling.

The quantity of maize on passage has fallen to 480,000 qrs., against 660,000 qrs. a year ago. Of the present expectations, 380,000 qrs. all round, 80,000 yellow, and 20,000 flat corn. The price at New York on Saturday was 23s., against 15s. 9d. on 8th February, 1901. London is 4s. dearer on the year for flat corn, but is not dearer for round. Scarcely any yellow maize is on offer in England just now, but there is an increasing business for May shipment of the new crop to be secured in March. Turkish round maize gives satisfaction, and makes 24s. per qr.

LONDON TERM MARKET.

This market is held twice a day, except on Saturday, when there is no afternoon call. The market is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals. The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

WHEAT.—Calls.	March.	June.
	s. d.	s. d.
Feb. 3 11 a.m.	6 3	6 4
4 p.m.	6 3	6 4
Feb. 4 11 a.m.	6 2	6 4
4 p.m.	6 2	6 4
Feb. 5 11 a.m.	6 2	6 3
4 p.m.	6 2	6 3
Feb. 6 11 a.m.	6 2	6 3
4 p.m.	6 3	6 3
Feb. 7 11 a.m.	6 3	6 3
4 p.m.	6 3	6 3
Feb. 8 11 a.m.	6 3	6 3
To-day noon	6 4	6 4

Maize is firmer for futures; 4sd 8d. per cental may be quoted.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100 lb. We do not give fractions of a penny per cental. The maize quoted is fair average quality from the United States.

The deposit required from members of the Term Market has been fixed at £50 minimum and 1s. per quarter margin on any purchases above 1,000 quarters.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

THIS DAY'S MARKETS

MARK LANE, MONDAY.

[FIRST REPORT.]

Country wheat was sometimes 6d. dearer to-day, and there was a decided improvement in the inquiry from millers. Where old prices were accepted the small supply to hand went into buyers hands without delay. Foreign wheat was fully as dear as formerly. Californian at 30s. 9d. was locked up. No Walla Walla was on offer. Demand for seed barley was good, and 40s. was paid for the best, whether English, Scotch, Hungarian, or Saale. Common barley for feed was neglected, though a little crushed Russian core was taken at 15s. 6d. per 304 lb. The price of oats was fully 3d. dearer for all kinds. Some White Sea oats fetched 19s. 6d., a good price, per 304 lb. weight. Samples weighing 320 lb. were seldom parted with for less than a guinea, whatever their country or type. Maize was firmer. A small quantity of American fetched 27s., and 25s., was paid for Cinquantina. Tares per feed, from Turkey, were on offer at £4 per ton. Seed oils, maize meal, and fine white cloverseed were scarce, and made somewhat fancy prices.

MAIZE, OATS, AND FEEDING BARLEY CLOSED WITH A SLIGHT ADVANCE MADE. WHEAT AND MALTING BARLEY WERE AS PREVIOUSLY REPORTED.

THE FLOUR TRADE.

MARK LANE Monday

The demand for Norfolk and Cambridgeshire flour was distinctly better from a week ago, and some factors held for 6d per sack rise. But there was a good supply up, and most agents were instructed to effect a clearance at the currencies of the 7th. The price of London makes was well maintained, but not advanced. For "supers" 26s. 9d. was paid. American flour was firm for fine types, but feeding sorts were on offer at fully 1s. decline. This is a complete reversal of January position, when the common types had the call. Minor sorts of flour were in fair demand, 18s. commanding paste flour, 20s. 6d. rye flour, 21s. the best rice cones, and 20s. maize cones. There were buyers of Corbeil's A.A. French flour at 21s. 6d. per sack.

THE BALTIC, 1 p.m.

STATE OF TRADE.

There is not much demand for cargoes of wheat of pulse or of barley, but maize, oats, and oil-seeds are in improved request, and a slight advance in prices sometimes accompanies the increase of enquiry.

BUSINESS DONE.

WHEAT.—Californian, 30s 3d, on passage; Bahia Blanca, 30s 6d, March shipment; Victorian, 29s, on passage; Manitoba, 29s 3d, on passage.

MAIZE.—Roumanian, 23s 6d, on passage; Galatz, 23s 3d, on passage; Bulgarian, 22s 9d, March shipment. Canadian, 23s. March shipment; Argentine 22s 9d, May shipment; Odessa, 22s 6d on passage.

BARLEY.—Azoff 18s 9d, May shipment; Kustendje, 18s 3d, prompt shipment.

OATS.—White Liban, 17s 9d, on passage; Black Liban, 19s 3d, on passage; Roumanian, 18s 3d, March shipment; Swedish, 22s 6d, prompt shipment.

LINSEED.—Argentine, 51s 3d, arrived; Calcutta, 51s, May shipment.

RAPESEED.—Brown Calcutta, 39s 9d, May shipment; Ferozepore, 40s 3d, April shipment.

COTTONSEED.—Egyptian, £6 8s 9d, prompt shipment; Egyptian £6 11s 3d, May shipment.

PROVISIONS

London, Monday.—The arrivals from Ireland last week were 2,159 bales bacon, and from foreign ports 9,061 bales bacon. The bacon market was steady last week, and prices on the whole were a shade better, the lower-priced Canadian having been sold up more closely. Irish ranged from 48s to 56s up to 61s. Danish ranged from 46s to 54s up to 58s. Canadian ranged from 44s to 48s up to 54s. There was a fine all round demand for butters; French from 104s to 114s; Danish from 113s to 116s; Colonials from 80s to 110s. The lard market was quiet. Irish, 53s to 63s; American, 48s, 50s.

HOPS.

Borough, Monday.—W. H. and H. Le May report:—There has been a steady consumptive demand for English hops during the past week, which still remain the best value of any hops in the world.

GRAIN AND FLOUR FACTORS REPORTS.

The arrivals of wheat and flower are small. The demand is limited. Prices are fully supported. Maize is 6d. per quarter dearer. Barley and oats 3d. per quarter higher.—COVENTRY.

Milling Offals.—The trade in milling offals is slow, in spite of the cold weather. Prices remain about the same as Monday last. Imported stuff appears to be all cleared off, and London mills are keeping fairly clear.—JOHN BAWCOMB AND CO.

Trade to-day has been quiet but steady, and prices are unchanged on the week.—T. S. MEDILL AND SONS.

Flour.—With expected smaller arrivals, and high prices demanded for shipment, sellers are not pressing, although rather low prices are being accepted for flour on quay. Grain.—Flat corn being in small supply, has improved 3d. per boll. Round is also 3d. dearer. Oats and barley are in buyers favour. Beans are slow and 1½d. lower. Oatmeal unchanged. Mill Stuffs.—Bran and thirds dull.—MCKINNON AND MCDONALD (Glasgow).

Flour.—Notwithstanding firm quotations of flour for shipment, fluctuations in wheat have had a deterring influence on buyers with respect to flour on spot, and while quotations have not been lower, business during the week has been limited, buyers only purchasing for immediate requirements. Values on spot are as follows:—1st spring patents, 24s. 9d. to 25s.; 2nd spring patents, 23s. 9d. to 24s. 3d.; American winter patents, 24s. 9d. to 25s. 3d.; extra fancies, 27s. to 28s 6d. Offals—There is no change to report in bran. The demand is less active than is usually experienced at this period of the year.—GREENHILL BROTHERS (Belfast).

FEEDING STUFFS.

London, Monday.—Linseed cake: Market rather dearer on the week, owing to advance in seed and decreasing stocks. Decorticated cotton cake firm, unchanged; meal not so strong. Undecorticated is again lower, supply exceeding demand. Linseed has been advancing almost every day, and is 2s. dearer since the 3rd.

ROBERT AND JOHN HEWETSON.

SEEDS

London, Monday.—There was an average attendance at to-day's market, but not much business. In red clover there is not much passing. The supply of English seems falling off. White clover is less active, but the late advance is maintained. Attention seems now turned on alsike, which tends upwards. Perennial and Italian ryegrasses are quiet. The demand for spring tares is increasing; winter seems quite cleared off. Canary seed is dull. Haricots and blue peas attract little notice.—JOHN PICARD AND CO.

2 p.m.—There is something like a "boom" in linseed, and closing prices may be regarded as a full 1s above the printed list of quotations.

A New Shire Horse Society for Staffs.—At a largely attended meeting of farmers, breeders, and others, held at Newcastle-under-Lyme on Monday, it was decided to form a Shire Horse Society for the district, and to invite the Duke of Sutherland, who, it was stated, had promised to help in the movement, to become president of the society. It was resolved that the minimum subscription for membership should be 5s., and a radius of 10 or 12 miles of Newcastle was suggested as the most suitable area for the society, though they would not refuse to accept members from outside the area. It was decided to raise a subscription list, and the opinion was expressed that a really good horse should be obtained, even if 400 guineas had to be paid, as the object of the society was the improvement of the breed of shire horses in the district. At the close of the meeting about 50 members joined the society. Mr. E. W. Jones, Newcastle-under-Lyme, was appointed secretary.

Milch Cows, per head, £16 to £23.

British arrivals include, as follows:—Scotland, 57; Eastern Counties, 788; Midland, Home and Western Counties, 657; Devon, 30; Ireland, 128.

In the beast market to-day there was an increase compared with Monday last, chiefly from the Eastern counties. Trade opened dull, both for prime and second quality, the former being scarce. Rates were firm at the commencement, but had to be lowered later, and even then a clearance is doubtful. Fat cows, being in short supply, and fewer in number, made late rates; fat bulls were firm and steady. The following are top quotations per 8lb (sinking the offal):—

	To-day.			Feb. 11, 1901.		
Scotch	4s 7d	to 4s 9d	..	4s 6d	to 4s 8d	
Devon	4s 6d	to 4s 8d	..	4s 7d	to 4s 8d	
Norfolks	4s 6d	to 4s 8d	..	4s 7d	to 4s 8d	
Lincolns	4s 4d	to 4s 6d	..	4s 2d	to 4s 4d	
Irish	4s 2d	to 4s 4d	..	4s 2d	to 4s 4d	
Fat cows	3s 10d	to 4s 0d	..	3s 6d	to 3s 8d	

In the sheep market there was a decrease in the number penned compared with Monday last. For wether sheep trade was firm at late rates. For ewes there were more inquiry, and, being short in number, cleared early at from 2d to 4d per 8lb more money. Lambs met with but little inquiry, and, being rather strong in number, made low rates, many really prime quality making only 6s per 8lb. The supply included 270 Scotch and 5,050 from the Eastern Counties.

Undermentioned quotations are at per 8lb (sinking the offal), and are for the best of each class penned:—

	To-day.			Feb. 11, 1901.		
7½ to 8-st. Downs	5s 2d	to 5s 4d	..	5s 10d	to 6s 0d	
9-st. ditto	5s 0d	to 5s 2d	..	5s 8d	to 5s 10d	
10-st. Half-breds	4s 8d	to 4s 10d	..	5s 6d	to 5s 8d	
12-st. Lincolns	4s 6d	to 4s 8d	..	5s 2d	to 5s 4d	
10-st. Down ewes	4s 2d	to 4s 4d	..	4s 8d	to 4s 10d	
11-st. Half-bred do	3s 10d	to 4s 0d	..	4s 6d	to 4s 8d	
5-st. Lambs	6s 4d	to 6s 6d	..	7s 4d	to 7s 6d	
6st Half-bred do	5s 10d	to 6s 0d	..	6s 10d	to 7s 6d	

The pig trade was very dull at less money; best small breeds were quoted at 4s 4d per 8lb.

London, Monday.—Large supplies; trade slow. Beef carcases, 4s 1d to 4s 2d; hind quarters, 4s 6d to 4s 8d; roastings, 5s 4d to 6s. Sheep (ewe), 2s 8d to 3s; wether, 3s 8d to 4s; hind quarters (ewe), 3s 8d to 4s; wether, 5s to 5s 4d; pigs (large), 3s 4d to 3s 8d; small, 4s to 4s 4d.

St. Ives, Monday.—Beasts, 287; sheep, 296; pigs, 327. Beef, 7s to 7s 9d; mutton, 7s 7d to 9s 4d; pork, 6s 3d to 7s 3d; sows, 5s to 5s 6d. Fat cattle—Fair trade; stores slow. Fat and store sheep fair trade. Fat and store pigs good demand. Milch cows short supply; good demand; prices, £14 to £23.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 683. To-day's supply was below the average both in regard to number and quality, and consisted of 550 from the United States and 133 from Canada. Trade was of a firm, steady nature, with an early clearance at following quotations per 8lb—offal given in:—Best States beasts 4s 9d; seconds, 4s 6d; best Canadians, 4s 4d to 4s 6d; ditto cows, 4s. Sheep, 970, consisting of a shipment from the United States, trade for which was very dull. Best pens were quoted at from 3s 10d to 4s per 8lb. On Saturday, February 8th, the supply consisted of 1,098 beasts, of which 800 were from the States and 298 from Canada; the trade was slow for the former, at from 4s 6d to 4s 9d, and for Canadians at from 4s 2d to 4s 6d. Sheep numbered 1,827 from the United States, and were difficult to cash, quotations being given at from 3s 10d to 4s per 8lb. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 866, 4s 5d to 4s 6d per 8lb, to dress about 680 to 720 lb; sheep, 431 slaughtered.

Liverpool, Monday.—A smaller supply of cattle; demand fair and prices about the same as last week. Sheep—Supply much smaller, the greater proportion on market being Scotch; trade better for finished quality at higher prices. Beef, 6½d to 7½d per lb; mutton, 8½d to 9½d per lb. At market—1,287 cattle and 3,603 sheep.

ROSSON'S CATTLE MART, BELFAST, HELD ON 4TH FEBRUARY.

The following returns are those of actual sales made in the markets referred to, the stock being weighed either before or after sale, for the week ending February 8th, 1902

English moss litter, 21s. to 23s. 6d. on rail at works. (Mark Lane, Monday.)

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

Notwithstanding the rather larger supply of fat beasts at Islington, trade for both prime and second quality was of a firmer and steadier nature both in regard to tone and value, a clearance rather unusual than of late being made, the majority of the supply consisted of Norfolks, which, however, were not up to the general standard of quality; for fat butchering cows there was a rather better demand by both town and country buyers, though the finish was dull; fat bulls were also in good request, and made fully late rates, whilst for rough cattle there was but little inquiry. At the Foreign Cattle Market the supply was light, business being confined to Wednesday and Saturday, trade on both days ruling firm and steady, with a marked upward tendency in value, some of the best beasts on offer making up to 4s. 10d per 8lbs. The total number on offer at both markets was 3,147 (increase 247), consisting of 1,600 British (increase 190) and 1,547 foreign (increase 57); these latter comprised 1,249 from the United States and 298 from Canada. The following were the top rates paid per 8lbs. (sinking the offal):—90-stone polled Aberdeens, 4s. 9d.; 90-stone polled Norfolks, 4s. 8d.; 100-stone Shorthorn, 4s. 7d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto, 4s. 4d.; 95-stone Irish, 4s. 6d.; 90-stone States, 4s. 8d. to 4s. 10d.; 100 stone fat cows, 4s.; 100-stone fat bulls, 3s. 8d. The sheep trade at Islington ruled dull and dragging, rates ruling in favour of the buyer, this being due to the larger supply, ewes meeting with less demand and sold with difficulty at a reduction of 2d. per 8lbs.; whilst lambs, of which there was too large a proportion on the market, met with forced sales at fully 8d. per 8lbs. less money. At Deptford the supply was larger than usual, and trade was dull and heavy. On neither market days was a clearance made. The total number penned at both markets was 13,977 (increase 2,909), consisting of 10,190 British (increase 1,630), and 3,787 from the United States (increase 1,279); best pens made per 8lbs. as follows (sinking the offal): 7½ to 8 stone Downs, 5s. 4d.; 9-stone ditto, 5s. 2d.; 10-stone ditto, 5s.; 10-stone half-breds, 4s. 10d.; 12-stone Lincolns, 4s. 6d.; 10-stone Down ewes, 4s.; 8-stone States, 4s.; 5-stone fat lambs, 6s. 6d. Neither the calf or pig trade are worth noting.

Trade in the West.

The lambing season still promises to be a record one, unless anything very untoward in the way of weather should be experienced, as such a time for twins can scarce ever before be remembered. And most of those dropped are doing well—remarkably well on many farms—the favourable weather we have enjoyed for so long being a very helpful factor in the matter; in fact, there is a promise of lambs coming out in better condition than has been the case for years. And the ewes, as a rule, are keeping uncommonly well, and many flockmasters are looking hopefully forward to a good season, despite the present discouraging state of the mutton market, as 7d. to 7½d. per lb. is now the very outside price for fat sheep, plenty not making more than 6d. to 6½d. Early lambs—cross-breds—are marketing a trifle better, the present range being from 33s. to 42s. (or 8½d. to 9½d. for anything very choice). Fat bullocks maintain their old firmness, the best class of heifers and steers selling well during the past week from £16 10s. to £22 10s. each (or 10s. 6d. to 11s. 6d. per stone), and fat cows also meet a good inquiry from 10s. to 10s. 6d., according to quality; contract bullocks bringing 9s. to 9s. 6d. The veal trade has opened with unusual buoyancy and with no lack of demand. Ripe calves freely make 8d. to 8½d. per lb., and seconds 6d. to 7d. Pigs, too, have quite recovered from their recent drop, especially all the neater weights in the way of either porkers or baconers, the former realising up to 11s. 6d., and baconers 10s. to 10s. 6d. Heavy sows, though meeting a fair inquiry, are scarcely as saleable as they were, prices, too, varying considerably as regards quality. In store bullocks there is again a good inquiry, milch beasts being very generally wanted at prices ranging from £16 to £21 for all the more useful grades of good milchers. Barreners, though the cold weather caused a temporary lull, are once again being a good deal looked after, really serviceable young bullocks making £20 to £28, but older grades are not quite so free of sale. There is nothing doing just now in store sheep.

Trade in Ireland.

There was a little more animation in both cattle and sheep at last Thursday's Dublin market. A decrease of nearly 500 cattle and 250 sheep had possibly something to say to healthier business, but shippers certainly appeared more anxious to buy. Well-finished lots of bullocks and heifers were scarce, and harder to buy at prices favouring sellers, and rough cattle, which have been such a drug for some time past, were much more easily disposed of, and a clearance practically effected. Prime ox and heifer beef made from 52s. to 56s., with a few extra-finished lots making up to 60s. per cwt.; second quality, 46s. 6d. to 52s. 6d.; and inferior 42s. 6d. to 45s. per cwt.

In the mutton department a decided revival was noticeable in the demand, though it could hardly be said that there was any quotable advance in prices. For nice-aged wethers there was a good steady inquiry at the extreme rates of the previous Thursday, and the best quality of Cheviots paid from 7½d. to 7½d. per lb. Prime wether mutton ruled at from 6½d. to 7d. per lb.; ewe, 6d. to 6½d; and inferior sheep 4½d. to 5d. Hoggets for the English markets dragged rather heavily, export trade being very slow. Small to medium hoggets sold at from 27s. to 40s., and heavy from 42s. to 54s. each. Inferior sheep did not clear. Not much demand for house lambs, but the few sold made an average of 40s. each. Choice veal scarce, and selling readily at from 8d. to 9d. per lb.; coarse calves at from 4½d. per lb. up. A large supply of milch cows, but very few springers of good quality. The latter were at once picked up at prices ranging from £17 to £21. In the absence of supply there was no change to note in store cattle. A small margin of pigs, and business of a dull order, with prices a shade weaker. Local pork butchers had to pay pretty smartly, as very few suitable animals were offered for sale. Nice light pigs made from 44s. to 47s. per cwt.; coarse from 30s. to 38s. per cwt.

In the Southern fares the store cattle trade is still in a very unsettled state, but there is a good inquiry for forward bullocks and heifers, which sell well. Good calves also rule high. From 52s. to 54s. per cwt. is about the current price for good fed, with perhaps 2s. per cwt. more for prime cattle. Good mutton is worth from 7d to 8d per lb.

LONDON.

Islington, Thursday.—Supplies were fairly good, but the bulk comprised fat bulls and rough cattle. The demand was of a steady nature, and a fair business transpired at late rates. Fat bulls, 3s 4d to 3s 8d. Sheep arrivals were on a very small scale, and with next to no demand trade proved quite nominal. Calf trade and supply nominal. Pigs steady. Neat small porkers, 4s 8d to 4s 10d per 8lbs to sink the offal.

COUNTRY.

Ashford, Tuesday.—There was a stronger tone about the trade in beef, and best steers and heifers made fully 12s 6d per score. Mutton too, was a little dearer, but the best small Down wethers did not exceed 5s 4d per 8lb. Veal remained unchanged, and pork sold well.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard there was a fair attendance of buyers to meet a supply of 43 fat beasts, 44 calves, 416 fat sheep and lambs, 167 pigs, and 51 head of dairy and store cattle, for which the following prices were realised:—The show of fat beasts included some prime Devons from Major-General Holley, Mr. R. May, and Mr. W. Bowden; shorthorns from Sir R. Rycroft, and Kerrys from the Grange Estate. Pure Devon beasts reached £21 5s; ditto cows, £18 10s; two-year-old shorthorn steers up to £20; prime shorthorn bulls from General Holley made £22 10s; Mr. J. T. Best, £18; Mr. C. Tone, £17. A satisfactory clearance was made, prime quality beasts selling readily at late rates, and good bulls and cows making more money. Fat calves, 80s to £5 5s; small, 25s to 60s; fat hogs up to £5 12s; fat porkers, 48s to 64s; smaller, 28s to 42s; store pigs, 10s to 23s 6d; dairy cows, £8 to £21 5s; prime quality fat sheep and lambs realised from 44s to 56s; twelve-months-old ditto, 35s to 49s; fat ewes, 31s to 48s 6d; fat sucking lambs, 31s to 39s. A rather short supply of fat sheep and lambs met an improved demand and prices ruled slightly higher all round. Fat wethers from Mr. T. Bishop were sold at 56s. A consignment of Dorset sucking lambs from W. Barrow Simonds, Esq., made up to 39s. A ready clearance was made of the short supply of dairy cows on offer with high prices; store cattle met with little inquiry; fat calves realised more money Fat hogs and porkers were on demand at a slight advance upon last week's figures; store pigs still keep up their value. Ruling values:—Prime Devon beasts, 6¾d to 7½d; ditto shorthorn ditto, 6d to 6½d: bulls, cows, and inferior beasts, 5d to 6d per lb. Best quality fat sheep, 7d to 8d; second ditto, 6d to 7d; fat sucking lambs up to 10d per lb; old ewes, rams, and inf rior sheep, 5d to 6d per lb. Fat calves, 6d to 8d per lb. Fat hogs up to 10s 6d, and porkers to 11s 6d per score.

Boston, Wednesday.—Stores were a quiet trade. Calves in fair demand. Beef ruled firm, with plenty of customers. In the sheep pens there was a reasonably good show of hogs, with a quiet trade except for the best. Store beasts averaged £14 to £16, in-calvers £18 to £20, heifers £15 to £17, and calves 50s to 60s each. Best beef realised 8s, and cow 7s to 7s 6d per stone. Store hogs 34s to 38s each. Choice heavy mutton 7½d and 8d, heavy 7d and 7½d, and ewe mutton a poor trade at 5½d per lb.

Braintree, Wednesday.—Messrs. Balls report at their Braintree Cattle Auction Mart trade for beef better than last week, for mutton about the same; pork good. Sheep were in shorter supply than usual. Good hoggets sold well, and in demand. Prices: Beef, 4s 8d to 5s 2d; mutton, 4s 8d to 5s per stone, 8lb; pork, 11s to 12s per score. Numbers penned: Beasts 36, fat sheep 120, hogs 50, milking cows 7, calves 17.

Bristol, Thursday.—Large supply of beef to-day, chiefly of middling quality. Trade steady for best animals, which realised 60s to 62s per cwt.; secondary qualities made 56s. Short supply of sheep, light wethers fetching 7½d to 7¾d per lb. Ewes, 5½ to 6d. Pigs were plentiful, baconers making 9s 6d per score; porkers, 10s 6d to 10s 9d. Restricted inquiry for store cattle.

Bury, Wednesday.—At Messrs. Simpson and Son's Auction Mart there was a good average show of fat beasts, which met a brisk trade at fully late rates, prices reaching up to £26 10s. Several lots of store beasts sold well at late rates. Large supply of fat sheep, which met a slow trade at rather lower rates than last week, in sympathy with London and other markets. Rather more fat ewes penned. Several lots of keeping hoggets met a rather better demand. Mr. H. E. Jobling's half-breds reaching up to 35s 6d; 200 good black-faced ewes in lamb made up to 50s. Shorter supply of fat pigs, which met a sharp trade. Several fat sows made from £8 10s to £6 10s per head. Short supply of store pigs and London jointers.

Calne, Friday.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of the Back.	Price per Sc. s. d.
6 sc. 10 lbs. to 9 sc. 10 lbs.	2½ in. and under ...	9 6
Under 10 sc.	Not exceeding 2½ in. ...	9 0
Under 11 sc. 10 lb. ...	Not exceeding 2¾ in. ...	8 6
Under 12 sc.	Not exceeding 3 in. ...	

—C. & T. Harris & Co., Ld.

Cambridge, Monday.—Beasts, 263, 7s to 8s 3d; sheep, 538, 3s 10d to 5s; pigs, 483, 6s 6d to 7s 6d; horses, 14. A few store beasts shown, and nearly all sold. Fat beasts a good number; trade better. Fat sheep a fair show; trade slow. Stores a poor trade. Fat pigs a good, brisk trade at more money. Stores not so good as last week. Hay and roots short supply. Straw a fair supply; trade good.

Canterbury, Saturday.—Some very useful teg sheep fetched from 28s 6d to 34s 6d; two-year-olds in good condition, from 38s to 42s per head. A few young cattle were offered, but there was little inquiry.

Carlisle, Saturday.—Notwithstanding a considerable depth of snow on the ground, a fair number of Irish store cattle were offered on the Sands. There were few buyers in attendance, and trade was dull. Stripping cows were quoted at £12 10s and £13; small heifers, £6 10s; and the best class of heifers up to £15.

Chichester, Wednesday.—Fair supply of fat stock, of which beef was in demand at rather better prices. Mutton trade dull. The supply of store sheep was not so large as usual, and though all were not sold, the tendency in prices was somewhat improved. There was a very fair business in the pig department, and a clearance was effected, though porkers were a trifle cheaper than of late. The stock in market was as follows:—Cattle, 475; sheep, 2,484; pigs, 481; calves, 81; horses, 29; total 3,550. Tolls taken, £22 10s 1d.

Dorchester, Wednesday.—If anything, there were rather more extensive supplies to-day, but the demand being brisk for most things. Good fat bullocks met a ready sale at about 10s 6d to 11s per score for the best. Fat calves sold freely at 7½d per lb.

Dublin, Thursday.—Numbers in market:—Beasts, 2,230; decrease, 475. Sheep, 4420; decrease, 259. Calves, 43; increase, 13. Brisker trade all round for cattle, particularly for choice, well-finished bullocks, which were the turn dearer. Rough sorts easier sold. More animation apparent in the sheep market, but no alteration from late quotations. Cattle, live weight (best), 32s to 35s per cwt. Other sorts, 27s to 31s per cwt. Mutton, dead weight, 6d to 7¼d per lb.—GANLY, SONS AND CO.

Hereford, Wednesday.—Bullocks and cows, 1,016; calves, 79; sheep and lambs, 742; pigs (fat and sows), 60; sucking pigs, 74; pigs (stores, not more than ten), 155; pigs (store, more than ten), 68; horses, 154; colts, 32. Prices of stock—Candlemas Fair:—Prices in Cattle Market—Best beef, 6d to 7d per lb; wether sheep, 5½d to 8d per lb; ewes, 5½d to 6d per lb.; veal, 7½d per lb.; lamb, 9d per lb.; pork, 5½d to 6d per lb.; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report an average number of fat cattle penned and a good attendance of local and distant buyers. Trade was brisk, and prices showed an upward tendency, in some cases touching 9s per stone. Fat cows and bulls were in good demand, mostly being purchased for the Midlands. The fat sheep pens were well filled, but good qualities were scarce. There was not much alteration in values, but when any was observable it was in favour of buyers. A good entry of calves for weaning; trade was slow and prices lower. Fat calves sold freely up to £6 5s. Fat swine were short, and met a very brisk demand at higher prices. Fat sows dear up to about £8 per head. Store swine in strong demand from 22s 3d to 33s 6d. A few lots of grazing cattle offered, all of which changed hands. Cows and heifers were not numerous, and were in demand up to £17 10s. Numbers at sales and market:—Beasts, 386; calves, 41; sheep, 1,746; swine, 1,397; horses, 42.

Leicester, Wednesday.—Very full consignments of Norfolk and Lincolnshire-fed bullocks, but a good proportion of the lots were of a secondary character. Buyers and dealers were well represented, and trade ruled active for choice qualities at 10s per head advance; secondary and inferior sorts very dragging, a good many lots being left unsold. Choice bullocks made 6½d to 6¾d, secondary qualities 6d to 6¼d, cows 5d to 6d, and heifers 6¼d to 6¾d per lb. Sheep were a large supply, and sold rather slowly at easier rates, choice qualities making 7¼d to 7¾d, large sheep 6¾d to 7d, and ewes 5¾d to 6d per lb. Calves a better trade at 8d to 8½d per lb.

Newport, Wednesday.—Good supply all round and with a large attendance of buyers a clearance was effected. Last week's prices were fully maintained. Quotations:—Best beef 6¼d to 6¾d per lb, secondary quality 6d to 6¼d, cows 5¼d to 5¾d; mutton, best wether 7¼d to 7¾d, ewes 6d to 6¼d; veal, 8d to 8¼d per lb; pigs, porkers 10s 6d to 11s per score, baconers 9s to 9s 6d. Good auction sales were reported.

Norwich, Saturday.—The supply of store beasts here to-day was about an average and quite equal to the demand; in the business done prices showed scarcely any change. Fat beasts, which were offered to a fair extent, were firm at 7s 6d to 8s per 14lb. Store sheep were in fair supply; trade ruled dull, hoggetts making 25s to 35s per head. Fat sheep, of which there was a pretty good number on offer, were quoted at 7s 6d to 8s and 8s 3d per 14lb. There was a slight fall of snow in Norfolk to-day, but it afterwards became showery, so that, upon the whole, the weather may be said to have continued open in the county.

Romford, Wednesday.—Short supply of fat beasts, and trade a little better. Best animals, 4s 6d to 4s 8d; middlings, 4s 2d to 4s 4d per stone. Short supply of calves; trade dear; 5s 8d to 6s per stone. Average supply of sheep; trade a little slower. Best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d per stone. No store beasts on offer. Pig market closed.

Salford, Tuesday.—The supply of cattle was larger than last Tuesday. There was a better demand, and sales were more readily made, but prices remained unchanged. The supply of sheep was also larger. Trade ruled slow, and prices were in favour of the buyer. A large show of calves, and a slower trade than last week at late prices. Quotations:—Cattle, 4½d to 6½d; sheep, 6d to 8d; calves, 5d to 8d per lb. At market: Cattle 3,056, sheep 9,143, calves 178, pigs 45.

Sheffield, Tuesday.—Milch beasts in small supply. Quiet trade passing. Quotations:—Best lots, £18 to £20; secondary sorts, £15 10s. to £17 10s.

Spalding, Tuesday.—A rather small show of beef, which realised 7s 6d to 7s 9d per stone, there being a good attendance of buyers. Some improvement in the store trade, good animals selling readily at improved prices. In the sheep market there was little alteration in the mutton trade, which fetched 6½d to 7¼d per lb.

Shrewsbury, Tuesday.—Best beef and mutton made good prices, with a slower trade generally. Store cattle fairly firm. Quotations:—Beef, 5½d to 6½d; mutton, 6½d to 7½d, and veal, 6d to 7d per lb; porket pigs, 9s 6d to 10s; and bacons, 9s to 9s 6d per score. Cows with calves up to £23 5s. Number offered:—785 cattle; 43 cows with calves; 562 sheep; 67 calves (49 fat); 124 porket, and 444 store pigs.—B. R. CROXTON, Markets Inspector.

Thame, Tuesday.—Supply of stock was not equal to the demand, buyers being in strong attendance, and prices all round had an upward tendency. Beef maintains its price of about 5s per stone, and mutton was a much better trade. Mr. Bond's sale comprised 68 fat beasts, 88 fat sheep, 51 fat and weaning calves, and 122 fat and store pigs. Fat bullocks made £17 to £21 2s 6d; fat heifers, £14 to £22 15s; fat tegs, 44s to 52s; fat ewes, 51s to 63s 6d; fat wethers, 47s to 53s; fat calves, £4 to £6 5s; cow calves, 24s to 56s; bull calves, 21s to 45s; fat pigs, 10s per score. Stores dear.

Wakefield, Wednesday.—The market was similar to last week, although dealers in beasts got rather more money. Best beef 6¾d, secondary sorts 5d to 6½d; young sheep 7½d to 7¾d, other sorts 5d to 7½d. Nmbers of beasts 1,253, sheep 3,327.

Wolverhampton, Wednesday.—Beasts and sheep a fair supply; trade moderate. Calves: Small number offered; good demand. Beef, 5d to 6¾d per lb; mutton, 6½d to 8½d per lb; veal, 7d to 8½d per lb; pigs, bacons 10s to 10s 6d per score, porkets 10s 6d to 11s per score, sows 8s to 8s 4d per score.

Worcester, Saturday.—Supplies small, and prices showed very little change. Slow trade for beef, and mutton at about late rates. Pork pigs in demand, and values rather firmer.

Worksop, Wednesday.—Very fair supply, and good attendance, and a decidedly better tone in the market, beasts being up quite £1 per head. Best quality beef made 7s 3d to 7s 9d, secondary 6s 9d to 7s per stone, best wether mutton 6½d to 7d, ewes and other sorts 5d to 6d per lb.

FOREIGN.

Deptford, Wednesday.—At to-day's market, 449 United States beasts were offered, against nil on Wednesday last, and experienced a sharp clearance at 4s 6d to 4s 9d. 1,050 Canadian sheep and lambs met a good demand at 4s and 4s 4d per 81b, to sink the offal respectively.

Yorkhill, Monday.—At the sale of Canadian cattle held here to-day 306 animals, landed by the "Orcadian," from Portland (Me.), were offered, and all sold. Taken all round they were up to the average as regards quality, and all were presented in good condition, they having been in the sheds for the last few days. There was the usual attendance of buyers; trade was of a firmer character than that ruling last week, the demand for all classes being good throughout. Small, neat, well-fed beasts secured the best inquiry, and changed hands smartly at good prices. The deadweight quotations may be given as follow:—Bullocks, best quality, medium weight, 58s, and for really choice up to 60s per cwt; heavy prime, 56s; secondary and heavier, down to 54s; heifers, 54s to 56s; bulls, best class, to 50s; secondary and heavier, 46s to 48s.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Supplies plentiful, only small sales resulted. Quotations:—Fowls: Yorkshire, 3s to 3s 6d; Essex, 3s to 3s 3d; Boston, 2s 9d to 3s; Surrey, 3s 6d to 4s 6d; Sussex, 3s to 3s 9d; Welsh, 1s 9d to 2s 6d; Irish, 1s 9d to 2s 3d; Irish ducks, 1s 9d to 2s; turkeys (cocks), 6s to 7s 6d; ditto (hens), 4s 9d to 6s; geese, 5s to 7s; country ducks, 3s to 4s; Bordeaux pigeons, 10d to 1s; feathered ditto, 9d to 11d; wild rabbits, 9d to 11d; tame ditto, 1s to 1s 4d each; Australian, 8s to 10s 6d per dozen; pheasants, 4s to 4s 6d; young partridges, 3s; old, 1s 6d per brace; hares, 2s 6d to 3s; leverets, 1s 6d to 2s; wild ducks, 1s 6d to 2s 1d; widgeon, 1s to 1s 3d; pintail, 1s 2d to 1s 4d; teal, 1s to 1s 3d; woodcock, 2s to 2s 6d; snipe, 8d to 1s; golden plover, 9d to 11d; black ditto, 6d to 8d. Russian game: Capercailzie (cocks), 2s 6d to 2s 9d; hens, 1s 6d to 1s 9d; ptarmigan, 1s; black game, 1s to 1s 2d; partridges, 1s 1d to 1s 3d each.

HOPS.

Worcester, Saturday.—There has been little doing in hops on our market during the past week; the recent demand has toned down and business is quiet again. Any choice lots offered find a ready sale, but they are very scarce. Prices keep very firm at the recent advance.—PIERCY AND CO.

Canterbury, Saturday.—Trade healthy and a fair number of sales recorded. The demand is more especially for grades, selling at from 35s to 45s per cwt.

WOOL.

Canterbury, Saturday.—Trade disappointing; 5½d per lb now the top price for fleeces, and 4d for lamb wool.

London, Wednesday.—The first series of London sales of Colonial wool, which commenced on the 21st ult., closed to-day, the total catalogued having been 183,718 bales, against 261,759 bales in the corresponding series of last year. The net total available amounted to 192,000, of these 177,000 bales have been sold, 92,000 bales for home consumption, 77,000 bales to the Continent, and 8,000 bales to America, leaving 15,000 bales to be carried forward to next series. The result of these sales is for Australian merino wool a rise of 5 per cent. upon the closing rates of last series. This is an average figure; for the best classes of grease and for scoured clothing wools of fine quality the improvement was sometimes greater, on heavy and faulty lots occasionally less. American competition supported superior Geelong wools to some extent, as it did also, among cross-breds, both the best Port Philip and low long New Zealand wools. Fine cross-breds were about 5 per cent. dearer than in December, but in medium and coarse classes the rise was quite 10 per cent. Capes were 5 per cent. higher, with the exception of the best snow-whites, which sold on a par with December. The sales were well attended, and witnessed throughout strong competition from all quarters. They close with a good tone, leaving the market fairly clear of old stocks.—HELMUTH SCHWARTZE AND CO.

London, Friday.—English, per pk. of 240lb.—Fleeces S. Dn. Hggs., £7 to £8 10s; half-bred hoggs, £6 to £6 10s; half-bred wethers, £5 to £6; Kent fleeces, £5 to £6; South Down ewes and wethers, £7 to £8 10s; Leicester do., £5 to £5 10s; Colonial, per lb.—Vic.—Fleece super., 1s 5d to 1s 7d; scoured good, 1s 7½d to 1s 8½d; scoured average, 1s 6d to 1s 7d; greasy avr. to fair, 10½d to 11½d; N.S.W., scd. avr., 1s 3½d to 1s 4d; greasy average, 8d to 9d; S. Aus., gray avr., 6½d to 7d; N.Z.—Scoured avr., 1s 4d to 1s 5d; grease average, 8d to 9d; Cape scred sup., 1s 5d to 1s 6d; fleece average, 7d to 7½d; greasy average, 5½d to 6½d; Natal—Scourd, 1s to 1s 1d; greasy average, 6½d to 7d; crossbreds—Grs.—Vic. good to supr., 10½d to 11½d; New Zealand fine, 8d to 9d; New Zealand medium, 4½d to 5½d; New Zealand coarse, 4d to 4½d.

BUTTER.

Tuesday.—Bedale: In rolls of 24oz, 1s 11d to 2s 1d per roll. Gainsborough: 1s 3d per lb. Leeds: York lump, 15s to 15s 6d per stone; do long rolls, 1½lb, 1s 10d to 2s; fresh, in 1lb prints, 1s 3d to 1s 4d per lb. Danish: 112s to 116s per 112lb. Irish creameries, 98s to 104s. Colonial: 100s to 106s. Stone: 1s 3d to 1s 4d per lb. Settle: 1s 2d, to 1s 3d per lb: Spalding: 1s per lb.

Wednesday.—Barnsley: 1s 3d to 1s 4d per lb. Boston: 11d to 1s 2d per lb. Colne: 1s 2½d per lb. Goole: 1s 2d per lb. Hereford: 1s 3d to 1s 4d per lb. Keighley: (wholesale) 1s 2d per lb; (retail) 1s 3d per lb. Kirbymoorside: 1s 1d to 1s 2d per lb. Knaresborough: 1s 10d to 2s per roll of 24oz. Louth: (wholesale) 1s per lb. Market Drayton: best, 1s 3d to 1s 4d per lb. Market Weighton: 1s per lb. Northallerton: 1s 10d to 2s 2d per 24oz. Stockton: 1s 3d to 1s 4d per lb. Worksop: 1s 2d to 1s 3d per lb. Uttoxeter: 1s 3d to 1s 5d per lb.

Thursday.—Brigg: 1s to 1s 2d per lb. Driffield: 1s per lb. Kidderminster: 1s 3d per lb. Penistone: 1s 2d per lb. Ripon: 2s to 2s 2d per single roll of 24oz. Scarborough: 1s 3d to 1s 4d per lb. Wellington: 1s 3d to 1s 5d per lb.

Friday.—Easingwold: 1s to 1s 1d per lb. Grimsby: Danish, 113s to 115s per 112lb; Dutch, 106s to 112s; Canadian, 100s to 104s. Helmsley: 1s 2d to 1s 3d per lb. Leeds: Danish, 114s to 118s per 112lb; Irish creameries, 100s to 108s; Colonial, 104s to 112s; York lump, 15s to 15s 6d per stone; ditto long rolls, 1½lb, 1s 10d to 2s; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb. Leyburn: 2s per roll of 26oz. Lincoln: 1s 1d to 1s 2d per lb. Otley: 1s 10d to 2s per roll of 24oz.

Saturday.—Appleby: 1s 2d to 1s 4d per lb. Berwick: 1s per lb. Carlisle: 1s 5d per lb. Doncaster: 1s 1d to 1s 2d per lb. Grantham: 1s 1d to 1s 3d per lb. Howden: 1s 2d per lb. Lancaster: 1s 3d to 1s 4d per lb. Malton: 1s 3d per lb. Pontefract: 1s 3d per lb. Retford: 1s 3d to 1s 4d per lb. Richmond: 1s 6d per lb. Skipton: 1s 2d to 1s 3d per lb. Stokesley: 1s 2d to 1s 3d per lb. Whitby: 1s 3d to 1s 4d per lb. York: 1s 2d to 1s 4d per lb.

EGGS.

Tuesday.—Bedale: 10 for 1s. Gainsborough: 10 for 1s. Leeds: Yorkshire, 14s 6d to 15s 6d per 120; Irish, 10s to 13s; Danish 8s 6d to 10s; Austrian blues, 7s to 7s 6d; do reds, 6s to 6s 4d. Stone: 11 to 12 for 1s. Settle: 11 or 12 for 1s. Spalding: 11 or 12 for 1s.

Wednesday.—Barnsley: 8 for 1s. Boston: 10 or 11 for 1s. Colne: 2s 7d per score. Goole: 12 for 1s. Hereford: 10 to 12 for 1s. Keighley: (wholesale) 10 for 1s. Kirbymoorside: 11 to 12 for 1s. Knaresborough: 9 or 10 for 1s. Louth: 14 for 1s. Market Drayton: 10 to 11 for 1s. Market Weighton: 12 for 1s. Northallerton: 9 to 10 for 1s. Stockton: 8 or 9 for 1s. Uttoxeter: 1s 10 per score. Worksop: 1s 8d per score.

Thursday.—Brigg: 11 to 12 for 1s. Driffield: 11 or 12 for 1s. Kidderminster: 10 per 1s. Penistone: 9 for 1s. Ripon: 9 to 11 for 1s. Scarborough: 8 or 9 for 1s. Wellington: 12 to 13 per 1s.

Friday.—Easingwold: 11 to 13 for 1s. Grimsby: Austrian, 6s 5d to 7s 9d per 120; Styrian, 6s 6d to 8s 11d; Egyptian, 4s 9d; preserved, 6s 1d to 8s 6d. Helmsley: 11 for 1s. Leeds: Yorkshire, 15s to 16s per 120; Irish, 10s 6d to 13s; Danish, 8s 6d to 10s; Austrian blues, 7s to 7s 6d; ditto reds, 5s 8d to 6s 2d. Leyburn: 11 for 1s. Lincoln: 10 or 11 for 1s. Otley: 9 or 10 for 1s.

Saturday.—Appleby: 11 to 12 for 1s. Berwick: 1s per dozen. Carlisle: 8 for 1s. Doncaster: 10 and 11 for 1s. Grantham: 10 to 12 for 1s. Howden: 11 for 1s. Lancaster: 8 or 9 for 1s. Malton: 10 to 12 for 1s. Pontefract: 8 for 1s. Retford: 1s 8d to 1s 10d per score. Richmond: 9 or 10 for 1s. Skipton: 9 or 10 for 1s. Stokesley: 9 or 10 for 1s. Whitby: 10 and 11 for 1s. York: 9 for 1s.

CHEESE.

Glasgow, Wednesday.—The arrivals of cheese in the Glasgow market this week were smaller than usual. There was a fair demand for Dunlops at firmer prices. Cheddars met a quiet sale; they are now accumulating. Cheddars and Dunlops were quoted from 50s to 58s per cwt. New Zealand and Canadian parcels were in moderate request at late values.

Newport, Wednesday.—Quotations:—Caerphillies: 63s to 68s; fancy dairies, 70s to 78s. Derbys: 66s to —s; doubles, —s to —s; truckles, 63s to 68s. Cheddars: 63s to 65s. There was a short supply and a good inquiry for best quality cheese.

Nantwich, Thursday.—There was a pitch of 22 tons of cheese. The market was sharp, superior qualities being in demand, and prices were slightly better than those realised at corresponding fair last year. Best lots fetched from 66s to 74s per cwt; medium made prices down to 60s. There was no common cheese in the fair.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report a steady inquiry for grass and clover seeds, etc. The most interesting article for the moment is alsyke, of which the supply is moderate, with prices favouring holders. Trefoil and white clover seed are unchanged in value. As regard red seed, inferior qualities come cheaper, and are hard to sell, but choice samples find buyers at about late figures. For perennial ryegrasses the market keeps strong, and high rates are demanded for lucerne and timothy. Spring tares continue in good request on fully former terms, whilst there is an eager inquiry for winter vetches. Mustard, rape, and linseed move off slowly at last week's currencies. Canary seed is dull; other kinds of bird seeds showing no alteration. For peas and haricots the sale is still disappointing.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Supplies of vegetables were fair, and met a generally steady sale. Fruit, in fairly good supply, met with fair request. Cabbages, 5s to 6s; cauliflowers, 6s to 10s per tally; beetroots 1s 9d to 2s 3d per bushel; parsnips, 3s to 3s 6d per bag; carrots, 2s; turnips, 2s to 2s 6d; parsley, 2s to 2s 6d; leeks, 1s 6d to 2s 3d per dozen bunches; horseradish, 1s to 1s 6d per bundle; celery, 10s to 14s per dozen rolls; forced rhubarb, 1s to 1s 3d per dozen bundles; English onions, 6s to 7s per cwt; Valencia, 7s 6d per case; Dutch, 5s per bag. Potatoes, 40s to 85s per ton. English apples, 3s 6d to 12s 6d per bushel; Nova Scotian, 18s to 24s per barrel; Californian, 7s 6d to 10s per case; English grapes, 1s 6d to 2s 9d; Channel Islands, 1s to 1s 6d per lb; Almeria, 18s to 24s per barrel; Denia oranges, 10s to 20s; Valencia, 8s to 12s 6d; Jaffa, 10s to 12s per case; bananas, 7s to 10s per bunch; pineapples, 2s 6d to 6s each; Italian chestnuts, 12s to 15s per bag; lemons, 8s to 18s per case.

COLONIAL DAIRY PRODUCE.

London, Friday.—Australian and New Zealand butters are meeting an improved demand, owing to the lessening arrivals. In secondary grades there is an excellent demand, as this class of goods is very short in supply. Strictly "choicest" brands are making 110s per cwt, and others are fetching 106s to 108s. "Finest" grade is making 102s to 104s per cwt. The Copenhagen Committee has again raised the official quotation by another 2 kroner, and it now stands at 96 kroner, against 103 kroner last year at this date. Although the Danish imports are about 2,000 cwts per week more than last year, the Australian imports are about 6,000 cwts less, and there is a general feeling that a shortage of "choicest" butter is at hand, and high prices for the next two months are expected. "Choicest" Canadian cheese, both coloured and white, are being held for 51s to 52s per cwt. The demand is an improvement on last week, and is specially strong in underpriced goods at about 46s, of which the quantity is limited. The stocks of Canadian cheese in London are 78,000, against 142,000 last year at this time. The "Tongariro" brought about 2,692 crates of New Zealand cheese, which is selling at the same prices as last week.—W. WEDDEL AND CO.

FEEDING STUFFS.

Hull, Tuesday.—Linseed: The arrivals are 1,615 qrs from Bombay, 1,365 qrs Hamburg, 250 qrs Labau; total, 3,230 qrs. Steady. River Plate—Theft rst boat has made 50s 3d, and "Holgate" has been sold at 49s 6d full terms; Dec.-Jan. and Jan.-Feb. sellers 48s 9d; Calcutta, 49s 6d April-June. Cottonseed: The market has continued inactive, and rather les smoney accepted on spot which done last week at £6 3s 9d and £6 5s coupled, but latter price since paid, with sellers at it to-day. Small sales January B-L reported at £6 5s to £6 6s 3d, and a little Feb.-March changed hands at £6 8s 9d to £6 7s 6d. To-day there is more disposition to sell in all positions. Oils: Exports for the week ending 28th January, 1902:—Linseed oil: 27 India, 9 Norway; total, 36 tons. Cotton oil: 90 Austria, 83 Belgium, 22 Denmark, 61 France, 149 Germany, 110 Holland, 4 Italy, 3 Norway, 6 Sweden; total, 528 tons. The market is firm. Linseed oil: 28s 6d spot; 28s 1½d Feb.-April; 28s 1½d May-August. Cotton oil: 22s spot; 22s 3d Feb.-April; 22s 9d May-August. Crude: 21s 7½d spot; 21s 9d Feb.-April; 21s 4½d May-August. Rape oil: Jamba naked, 24s spot; first quality naked, 24s 6d spot. Oil seed cakes: Linseed cakes—Scarce and dearer, pending arrivals of Plate seed later in the month. Cotton cakes—Deliveries on contracts very large, but fresh sales poor. In market steady, at 2s 6d per ton decline.—KEIGHLEY, MAXSTED, AND CO.

London, Thursday.—Linseed has met with a very good demand, and prices are dearer in all positons. We quote spot Calcutta-London 56s, passage 54s 6d to 53s 6d, February 53s, March 52s, April 51s 3d, April-June 50s 9d. La Plata spot 52s 3d, afloat 50s 3d, Jan.-Feb. 50s. Hull firm. Calcutta, April-June, 51s 6d. La Plata, afloat, 50s 9d to 50s, ascording to position, Jan.-Feb. 50s. To the Continent, Bombay, Feb.-March 53s, April-May 52s. Calcutta afloat 54s, April-June 51s. La Plata shipping or shipped 49s 6d, Jan.-Feb. 49s 6d. Linseed oil.—A further considerable advance has taken place, and the market continues very firm. We quote spot in pipes £30, barrels £30 5s, which is also nearest value for all positions up to August. Hull spot naked, £29, March-April £29, May-August £29. Linseed cakes.—Steady. We to-day quote London-made £8 to £8 7s 6d ex mill, American Western £7 7s 6d to £7 10s, Russian £7 10s to £7 15s. Cotton cakes weak, London-made £4 7s 6d to £4 10s. Rapeseed.—Firm and dearer, with a good demand. Brown Cawnpore, afloat 39s 6d, March-May 40s. To the Continent we quote Yellow Guzerat Jan.-Feb. 43s 6d, March-May 45s. Brown Cawnpore afloat 39s 6d, March-May 40s. Brown Calcutta, Jan.-Feb. 36s 6d, March-May 37s. Ferozepore 39s 6d afloat. Jamba, March-May to Hull sold at 31s 3d. Cotton-seed is quiet. Spot London £6 7s 6d, afloat £6 7s 6d, Feb.-March £6 8s 9d, April-May £6 10s buyers. Hull spot £6 5s, January £6 5s, Feb.-March £6 7s 6d, April-May £6 10s buyers. Bombay to Hull £4 11s 3d Feb.-March sellers. Cargoes, Feb.-March £6 11s 3d, April, £6 12s 6d sellers.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed cakes:—There is no improvement in the market; both supply and demand continue exceedingly small, and values, although firmly held up, are not quotably dearer. Russians still offer at unchanged prices. Americans move off steadily, but are also unchanged in price. Calcutta made in bags remain relatively good value at last Monday's quotations. London-made meet a less active inquiry at the advanced prices now asked by crushers. Cotton cakes:—The heavy arrivals of Egyptian have a depressing effect on the market, and best brands may now be bought at 1s 3d to 2s 6d per ton less money, while English are unchanged. Decorticated are the turn cheaper at 1s. 3d. per ton under last week's quotations, and meal £6 10s. Rape cakes:—Dull. East India £4 5s. Maize germ meal.—American does not offer on spot, but there are sellers at £5 15s c.i.f. for February-March despatch. English is in moderate request at last week's prices. Rice meal.—There is no change in values of spot or near at hand parcels, but for new crop meal shippers are willing to entertain bids of £4 11s 3d to £4 12s 6d.

STOCK AND SHOW NOTES.

By Herdsman.

Mr. Sidney Cooper, R.A., the well-known artist, died on Friday at his residence, Vernon Holme, Harbledown, near Canterbury. Mr. Cooper was born at Canterbury on September 26th, 1803, and at a very early age he showed a great fondness for drawing animals, and spent his holidays in the fields with slate and pencil drawing horses, dogs, and sheep. This fondness was maintained throughout his life, and, as is well known, the majority of his famous pictures were farm scenes. In the early portion of his career as an animal painter he found his models in Smithfield Market and in Regent's Park; but later, having settled in a country home in Kent, he bred cattle, sheep, and goats specially for the purpose of his work.

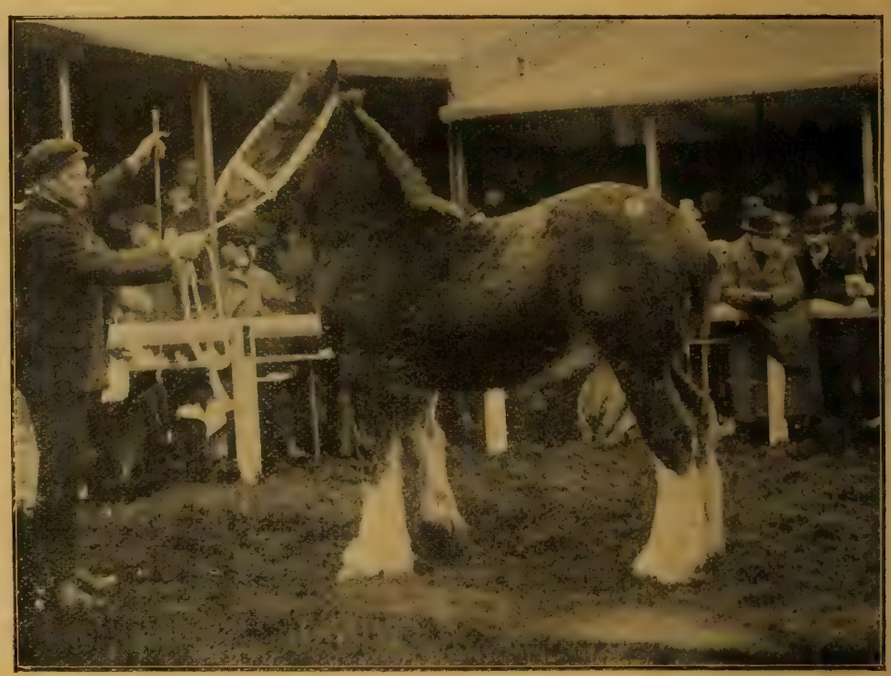
An incident which Cooper delighted in relating to his friends arose out of his having in 1848 been commissioned by the Queen to paint a certain prize Guernsey cow at Osborne. When the painting was nearly finished, the Queen expressed her approval of the picture as a portrait. The late Prince Consort, however, who was present at the inspection of the canvas, objected to some of the surroundings which the artist had introduced, especially some dock leaves and a pool of water. Cooper pleaded that artistic license was essential in order to make a good picture. "It may be a good picture," replied his Royal Highness, with mock severity, "but it is very bad farming and draining, and as such is a libel on her Majesty's Consort."

In the spring of 1834 Mr. Vernon gave him a commission for a picture, which he advised him to send to the Academy. This was "Milking Time," a study in a farmyard near Canterbury, now in the Vernon Collection. It narrowly escaped rejection for want of room, but was ultimately accepted, and thenceforward, for an unbroken period of more than sixty years, Mr. Cooper was invariably represented by a work, or works, on the Academy walls. In that exhibition alone more than two hundred and forty examples of his art have been seen at various times. He exhibited, besides, at the Society of British Artists, the Royal Institute of Painters in Oil Colours, and elsewhere, and large numbers of his works, executed to commission, have never been publicly shown at all.

At a meeting of the Reading Town Council held on Thursday the town clerk read a letter from Sir Arthur Bigge stating that the Prince of Wales hoped to pay a visit to Reading between the 10th and the 13th of June next, on the occasion of the Royal Counties Show. His Royal Highness has intimated his regret at being unable to accept the freedom of the borough of Reading, which the corporation proposed to confer upon him.

Our livestock illustrations this week were reproduced from photographs taken at the sale of shire horses belonging to His Majesty the King, at Wolferton on Tuesday, which is described in another column. With one exception, full details are given under the illustration, the exception being the small one of Benedick 17761, a bay stallion foaled in 1898, sire Prince Harold 14228, dam Hendre Beatrice 12193. Benedick, like the other horses illustrated, has won prizes at the principal shows, his record being as follows:—1899, seventh, Shire Horse Show, London; first, Royal Agricultural Society's Show, Maidstone, 1900, third, Shire Horse Show, London; first, champion and Shire Horse Show silver medal, King's Lynn; first, Lincolnshire, 1901, highly commended, Royal Agricultural Society's Show, Cardiff.

Western Canada's great agricultural fair, at which the sum of thirty-five thousand dollars (£7,000) is given in prizes open to the world, is now one of the most important in Western America, and should claim the attention of British breeders of pedigree stock of all kinds. It is held at Winnipeg, Manitoba, in July.



This year's show of the Cheshire Agricultural Society will be held at Hyde, on August 23rd. The entries will close on August 2nd with the secretary, Mr. Thomas A'Beckett, St. Werburgh Chambers, Chester.

A sale of pure-bred red polled cattle belonging to Mr. R. Harvey Mason will be held at Necton Hall, Swaffham, Norfolk, on Thursday, May 4th, Messrs. J. Thornton and Co. being the auctioneers. In 1849, when the Royal Agricultural Society held its meeting at Norwich, the late Colonel Mason took a prize with a three-year-old red polled bull, to which some of the pedigrees can be traced. The breed had been many years at Necton, long before the Herd Book was established. In 1879 a sale of the herd was held, and the present owner then purchased many of the best animals of the old strains and continued to improve the stock by the selection and use of the best sires in the county, including Erebus 841, champion bull at the R.A.S.E. Show at Plymouth, 1890, a son of the noted Falstaff 303, and Majorlini 3600, champion bull at the R.A.S.E. Shows in 1896 and 1897. The herd reached a high state of excellence and became very successful at the leading shows, both in this country and abroad. The Ensign 3096 exported to the United States of America in 1894 won many first prizes out there.

At the Royal Agricultural Society's Meeting at Maidstone in 1899 the first and champion prize was won with Magician 5021; many of the cows are in calf to this fine bull, who is included in the sale, as well as Crown Diamond 6104, a son of Mr. J. J. Colman's celebrated sire, Red Prince 2902, winner of the champion prize at the R.A.S.E. show at Chester, 1893, as well as numerous other prizes. Mild records were commenced in 1884, and the published returns show the continuous and rich milking qualities of the cows. The catalogue of the sale includes the entire herd that is kept at Sparham Hall Farm, as well as the young cattle from the Necton Hall herd, comprising altogether over fifty very promising animals, including several handsome young bulls and heifers.

At the annual meeting of the Tunbridge Wells and South-Eastern Agricultural Society it was decided to hold the next show on Thursday and Friday, July 24th and 25th, at Tunbridge Wells, the site being the same picturesque one of previous years. I am sorry to hear that there was a loss on the year's working, but the report presented was on the whole a satisfactory one. Mr. F. W. S. Cornwallis, of Linton Park, Maidstone, was unanimously elected president of the society for the current year. Mr. William Roper, who was unanimously re-elected secretary, states that the prize schedules for the show will be ready shortly, and can be had, together with any other information on the subject, on application to him, at the offices of the society, Kentish Buildings, Tunbridge Wells.

A three days' combination sale of drafts from twenty-three different herds of Herefords was held at Kansas City, U.S.A., on January 14th, 15th, and 16th. Owing to short keep and the somewhat inclement weather, buyers were not too eager, and no sensational prices were attained. The top price obtained was £143 for Beau Donovan, a young bull, while £122 was given for Lady Coloumbus, a cow calved in 1899. The average for 171 head was £45 10s., the aggregate sum taken being £7,788. The other important American sale of the month was the dispersal of Messrs. Moffatt's Clydesdales at Chicago on January 16th. The condition of the animals in the ring was far from perfect, and prices were not extravagant, although on the average fair sums were realised. The top price was £340 paid for an imported stallion, Palmerston, which was foaled in 1896 and has been a winner at the Royal. Forty animals in all were disposed of for £2,296, an average of £57 10s.

DEWY MAY, the Yearling Shire Filly, was sold to Lord Llangattock at H.M. the King's sale last week for 310 gs. She is a bay by Bold Harold, 15,095, out of Rokeby Friar, 14,827, and was a first prize winner at the Ashbourne Shire Horse Show last year.

Wednesday, July 23rd, has been fixed for the date of this year's show of the Chesterfield and West Derbyshire Agricultural Society, which will be held at Chesterfield. The last day for entries is July 8th, and the secretary is Mr. Thomas Wardle, Chesterfield

Following their usual custom the Native Guano Company, Ltd., of 29, New Bridge Street, Blackfriars, E.C., have issued a pamphlet of the testimonials they have received during the year from users of Native Guano, which illustrate in a remarkable manner the beneficial results of its application in the farm and garden.

Plantagenet Coins Turned up by a Plough.—It is stated that a farm servant, ploughing on a farm near Bervie, Kincardineshire, turned up an urn containing between four hundred and five hundred silver coins of about the size of a sixpence. Unfortunately, the plough broke the vessel. The coins belong to the reigns of Edward I., II., and III.

Sale of the King's Shires.

The first draft sale from Sandringham Shire Horse stud after His Majesty's accession naturally brought together a very large number of would-be buyers and spectators, and when Mr. Beck ascended the rostrum on Tuesday last to conduct the sale he found himself surrounded by a very big assemblage, amongst whom, either in person or by deputy, were most of the principal breeders of the shire. Previous to the sale there was the usual parade, and it added much to the éclat of this proceeding by its being witnessed by Her Majesty the Queen and other members of the Royal Family. The sale was a thorough good one taken in a collective sense, for though the average was not a record one, nor were any sensational prices made, the general result was one that demonstrates the vitality and genuineness of the present home demand for shire horses. A full price list, together with a detailed summary, which gives the range of values for its age and their aggregate and average, renders it needless to refer in detail to every individual lot, therefore we limit our remarks to the principal lots of the several ages as they were tabulated in the sale catalogue.

Commencing with the brood mares, whose average was a highly satisfactory one, it was evident that there would be a good competition, the first lot to reach high value was that grand mare Solace, by Lord Arthur, dam of the well-known Victor's Queen, who made 600 guineas in the 1898 sale. She, however, just failed to reach her daughter's price by making 575 guineas, the top price of the sale, going to Lord Rothschild. Southernwood Echo, by the same sire, made 300 guineas, to Mr. L. Salamons, who was one of the principle buyers, and secured in this and his other purchases some very fine and typical animals. Calwich Mavis joined Mr. F. Crisp's stud at 200 guineas; whilst Kingsbury Violet and Rocks Regina went respectively to those of Mr. Eadie and Mr. A. Henderson, M.P., at 230 guineas and 210 guineas, and Dunsmore Wy-Lass went to Mr. Stubbs at 200 guineas. Of the four four-year-old mares, the top price was 230 guineas for Girton Dolly Varden, who went to Mr. Hardcastle at that price. The well-known stallion Benedick hardly made his full value in the 500 guineas for which Mr. Smith-Carrington paid for him. Premawilhar, a three-year-old, followed, going worth the money to Mr. F. Crisp at 140 guineas, whilst the two-year-old Topsman Blind joined Mr. Muntz's stud at 170 guineas. Lord Coventry secured that very promising yearling colt Royal President, first at the last Ashbourne show, for 230 guineas, and "Hawthorn," the other yearling, went to Mr. Walpole Greenwell at 180 guineas.

Of the yearling fillies which sold well Sir J. Blundell Maple secured a gem in Mountain Echo at 350 guineas, Mr. P. L. Mills's agent being the runner up. Another of this age, Dewy May, went over three hundred, namely, 315 guineas, to Lord Llangattock, the same breeder as in the preceding case being the runner up, whilst Torfrida, whom Mr. Kearns was fortunate enough to secure, made 270 guineas. The two-year-olds excited some keen competition for the pick of them, notably for Ruby Glimpse, which, after a tussle between Mr. L. Salamons and Mr. Gibson for Mr. P. L. Mills, went to the former at 450 guineas. The nine three-year-olds were collectively a good even lot of young mares; two made 300 guineas each, Queen's Birthday to Mr. L. Salamons, and Lady Darling to the Marquis of Winchester, whilst Mr. Garrett-Taylor paid 270 guineas for Blythwood Royal Bounty, Mr. Morbey 250 guineas for Maidenhair, and Mr. Moat 155 guineas for Throstle.

Sale of the King's shire horses at Wolferton: H.M. the Queen and Prince and Princess Charles of Denmark drive over to see the horses.

Shire Stallion, BENEDICK, bought at the Wolferton Sale for 500 gs. by Mr. Smith Carrington.

Mr. R. Allen's Shire Horses.

On Wednesday Messrs. Sexton, Grimwade and Beck disposed of a number of Shire horses belonging to Mr. Richard Allen, of St. Germans, near King's Lynn, in the presence of a large company of buyers. Finding that his stud was exceeding the limits of his occupation, Mr. Allen decided to sell every pedigree animal in his possession, and the catalogue comprised 40 brood mares, stallions, and fillies. The best Shire blood was represented through descendants of Harold, Premier, Royal Albert, and Bury Victor Chief, and Gipsy Gentleman, a son of Premier Beau, was the sire of most of the home-bred stock. It was a very suc-

cessful sale, the aggregate sum realised being 2,626 guineas, or an average of a little over 65½ guineas. The highest price was 360 guineas, given by Mr. Cobb, of Theobald's Park, Enfield, for a three-year-old stallion, Wiggenhall Prince, a son of Gipsy Gentleman. Wiggenhall Prince II., his brother, made 100 guineas, and Wiggenhall Rupert, a two-year-old stallion by Gipsy Gentleman, fetched 130 guineas, the buyer being Mr. Wayman, of Haddenham. Wiggenhall Spartan, a stallion foaled in 1898, sire Gipsy Gentleman, was bought by Mr. Forshaw, of Carlton-on-Trent, for 150 guineas; whilst Gipsy Gentleman himself made 100 guineas, the purchaser being Mr. Bostock, of Bury St. Edmunds. Wiggenhall Brag, a grey mare foaled in 1893, was bought by Mr. Cresswell, of Beccles, for 105 guineas. Mr. Cobb bought a three-year-old filly, Wiggenhall Star, for 105 guineas, and a similar animal, Wiggenhall Depper III., was secured by the Marquis of Winchester for 100 guineas.

Below we give the names of the principal prices and purchasers:—

BROOD MARES.

		Gns.
Wiggenhall Brag	Mr. Cresswell	105
Wiggenhall Depper	Duke of Devonshire	46

FOUR-YEAR-OLD MARES.

SPENCER'S
COD LIVER OIL FOR CATTLE.
Calf Brand.

The Best and Cheapest article for rearing Calves, being a natural substitute for Cream. Equally good for all other stock—a medicine and food combined, Far better and cheaper than Feeding Meals.

Write for booklet giving full particulars to the Manufacturers:—

ISAAC SPENCER & CO.,
HULL.

Sale of the Finmere Jerseys and Farm Stock.

This small herd of Jerseys, bred in Buckinghamshire for many years by the late Rev. Seymour Ashwell, was sold by auction, along with the farm stock and implements, on Wednesday by Messrs. Thornton and Co. The day was very cold, but there was a large company of local farmers, who meant business, and bid up well for both the implements and the hay, straw, and roots. The Jerseys were rather small, but were good, honest cattle, and these were mostly bought to keep in the neighbourhood. The Shropshire sheep made up to 56s. for six-tooth ewes (Mr. P. Percival), and a chesnut gelding £17 10s. (Mr. A. Lepper). We give below a few of the best prices of the Jersey cattle.

Particulars of Transactions in Store Stock.

Reported to the Department of Agriculture and Technical Instruction for Ireland.

At Nenagh, Co. Tipperary, on Monday there was a small fair, composed chiefly of second-class cattle, for which prices ruled higher than a month ago. Quotations:—Calves, 2nd class, £4 11s. 6d. to £5 17s. 6d; 3rd class, £3 10s; yearlings, 1st class, £8 10s. to £9; 2nd class, £7 5s. to £8 10s; 3rd class, £6 12s. 6d; two-year-olds, 1st class, £12 5s.; 2nd class, £9 to £10 15s.; 3rd class, £7 10s; springers, 1st class, £15; 2nd class, £12 10s. to £13; 3rd class, £10 10s. Lambs, 1st class, £1 10s. to £1 15s. 6d.; 2nd class, £1 4s. 6d. to £1 7s. 6d; over 12 and under 24 months old, 2nd class, £1 19s.; 3rd class, £1 12s; two years old and upwards, 3rd class, £1 11s. 6d. to £1 13s.

Cold Storage Calendar.—A handy little calendar for the pocket has come to hand from the offices of "Cold Storage," 19 Ludgate Hill, London, E.C. An amount of useful information is presented, together with some handy memorandum tables.

Boys Fire a Rick "to have a Warm."—Three schoolboys, whose ages ranged from nine to 13, were recently, by order of the Northampton borough magistrates, birched for setting fire to a rick of hay, doing damage to the extent of £60. Their only object, they said, was to have a warm.

The Board of Agriculture and Louping Ill.

Captain MacIlvaine, deputed by the Commission appointed by the Board of Agriculture to inquire into the diseases of louping-ill and braxy among sheep, attended the meeting of the Teviotdale (Hawick) Farmers' Club on Thursday. The Captain said the Commission was composed of gentlemen fully qualified to deal with the subject, and if they could not find a remedy for these diseases they would at least be able to give valuable practical suggestions to pastoral farmers. Dr. Hamilton wished the co-operation of Border farmers. He would like to have specimens of sheep affected with louping-ill sent to Kielder, where he proposed to reside, with the view of investigating the subject thoroughly. If they could not be sent alive, he should like to have the carcases immediately after death; also specimens of ticks, which were supposed by some to be the cause of the louping-ill scourge; the names of farms on which this disease was prevalent, and liberty to come and visit these farms himself in the spring. The club agreed to heartily co-operate with the Commission, and a committee was appointed to carry out Dr. Hamilton's suggestions.

PIGS.

Somerset Farmers and the Swine Fever Orders.

A meeting held under the auspices of the Somerset Dairy Farmers' Association took place at Highbridge on Monday, the principal business being to petition the Board of Agriculture for a modification of the regulations for the restriction of swine fever. For several years the very stringent regulations of the Act for preventing the spread of swine fever have been a serious drawback to the producers, who have been unable to negotiate their sales in public markets, and another grievance which was strongly commented upon was the restriction as to breeding sows. The feeling of those present was unanimous that the authority responsible for the regulations should be appealed to, so that the public sale of pigs should be less hampered by restrictions; that infected areas should be more limited, and greater licence be granted for removals.

It was admitted that excellent results had accrued from the application of the Swine Fever Act, but the regulations were considered to be altogether too stringent, and in some cases unnecessary. It was resolved that the Somerset County Council or other necessary authority be petitioned to re-open that and other pig markets, as no case of swine fever had occurred for some considerable time, and that the regulations as to breeding sows be altered from 28 days to 14 or 20 days. This resolution the hon. secretary was instructed to forward, with a petition, to the Board of Agriculture and the Somerset County Council, together with the signatures of those who approve of the same.

Pig Salesmen Fined for "Scoring" Pigs.

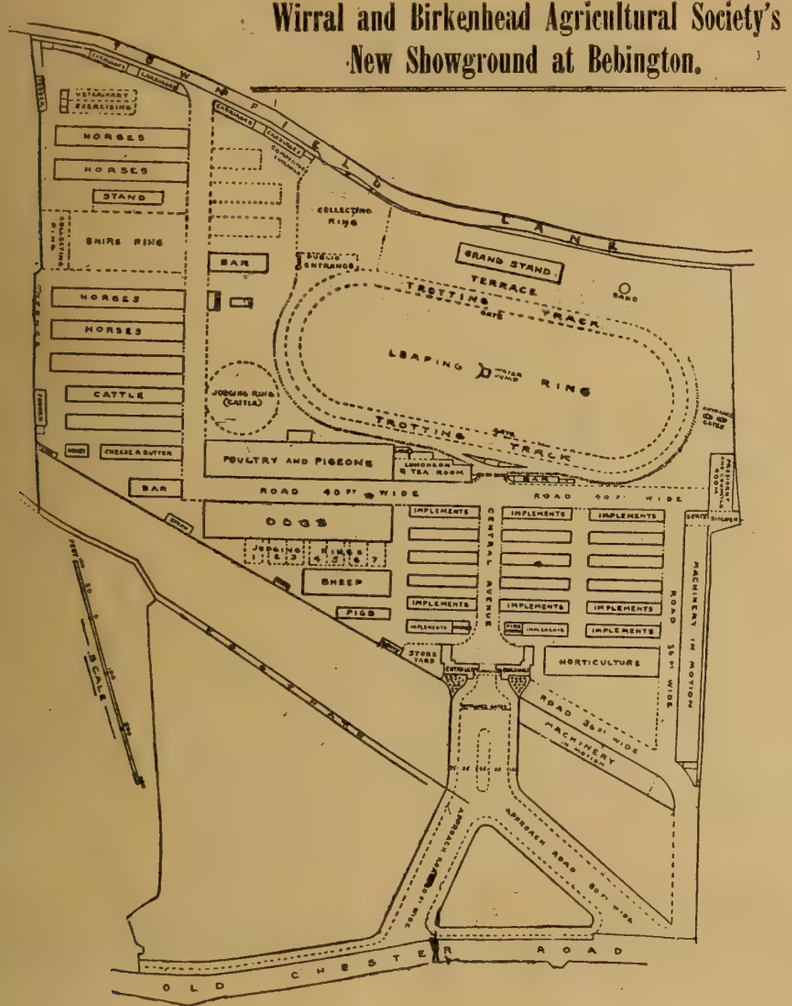
Michael Flood, of the firm of Flood and Cuddy, pig salesmen, and a man named Nolan employed by them, were charged at Manchester on Wednesday with cruelty to four pigs. The evidence of two inspectors of the R.S.P.C.A. was that the pigs had deep scratches or incisions which had been made for the purpose of identifying them. Blood was trickling from the scratches, and the pigs were squealing with pain. Inspector Blackburn said similar prosecutions in different parts of the country had resulted in the scoring being discontinued. In reply to Mr. Cobbett, who appeared for the defence, he suggested that if it were necessary to mark the pigs it could be done by tatooing.

Mr. Cobbett described the case as an instance of the "periodical tilting at the windmill" which the society took. It was a necessary practice to "score" the pigs. They could not be identified after death otherwise, and if there was any pain at all it would only be very slight. Mr. Holburn, chief inspector for meat at the Corporation abattoirs, said scoring was a universal custom of the trade. It was bound to inflict a little pain, and some drops of blood would be drawn. The bench held that there had been a certain amount of cruelty, and Flood was fined 21s. and costs, and Nolan 10s. and costs.

Wirral and Birkenhead Agricultural Society.

Plan of the Proposed Show Ground.

The efforts of the committee of the Wirral and Birkenhead Agricultural Society to secure a new site for their permanent showyard has, as we have previously announced, proved successful. By the courtesy of the *Liverpool Daily Post*, we are enabled this week to give a plan of the new showyard, from which it will be seen that it is to be fitted in the best possible manner, and will rank as one of the best in the country. It may be mentioned here that stormy weather prevailed while the society's 1900 show was being held, and caused such extensive damage to the stands, sheds and other buildings that the cost of reinstating them would have involved the society in a heavier expenditure than the committee felt justified in undertaking with the funds at their disposal. This, coupled with the fact that a number of prominent exhibitors had intimated their determination of not exhibiting their stock on the old show ground, also that the society's tenancy was terminable at short notice, decided the committee to lose no time in acquiring a new site. Under these exceptional circumstances they were reluctantly compelled to abandon the idea of holding the show in 1901; but it is hoped that the new site will be ready for Diamond Jubilee Show of the society, which is fixed for September 10th and 11th next.



Certain gentlemen kindly came forward and purchased this desirable site, which consists of 22 acres of land situate in Lower Bebington (in close proximity to Bebington Station, on the London and North-Western and Great Western Joint Railway, between Chester and Birkenhead), and agreed to lease the land to the society for an extended term, at a rental only sufficient to pay the interest on the purchase money, also coupled with an option to the society of purchasing the property at cost price at any time during the term.

To enable the society to enter into a lease and to generally deal with its property as an incorporated body, without the intervention of trustees and without the necessity of its officers incurring personal liability, it was decided to register the society under the license of the Board of Trade, as a society for the promotion of agriculture, at the same time retaining its original title, viz., "The Wirral and Birkenhead Agricultural Society."

The society has issued an appeal for contributions towards the cost of this extensive undertaking, which it is estimated will cost between £12,000 and £14,000. That the appeal has met with a generous response is shown by the following list of donations already promised:—

	£
His Grace the Duke of Westminster	50
Sir Elliott Lees, Bart., M.P.	200
Joseph Hoult, Esq., M.P.	250
Thomas Brocklebank, Esq., J.P. (High Sheriff)	50
Charles Gatehouse, Esq. (President)	250

Wirral and Birkenhead Agricultural Society's New Showground at Bebington.

		£
Edward Twigge, Esq. (Vice-President)		25
Joseph Heap, Esq. (Chairman)		500
W. H. Lever, Esq.		1000
Edward Evans, Jun., Esq., J.P.		100
Walter Glynn, Esq.		100
J. G. Frost, Esq., J.P. (Mayor of Chester)		20
P. Allen, Esq. (Member of Council)		25
J. Ball, Esq.	do.	25
C. M. Beckett, Esq.	do.	25
T. Davies, Esq., J.P.	do.	25
J. W. Macfie, Esq.	do.	25
W. Parker, Esq.	do.	25
Ald. W. Getley, J.P.	do.	10
J. R. Turton, Esq.	do.	10
T. Johnson, Esq.	do.	5
"Anonymous"		100
J. Johnson Houghton, Esq., J.P.		100

The following gentlemen have also promised contributions:—Lord Arthur Grosvenor, Sir A. L. Jones, K.C.M.G., Edmund Taylor, Esq., J.P., J. W. Kenworthy, Esq., J.P., James Moon, Esq.

The council earnestly appeal not only to former contributors, but to all who may not hitherto have subscribed to the society for their warmest support and co-operation in the work of obtaining the necessary funds, thus enabling the society to take its place as one of the foremost organisations of the kind in England.

Glasgow Stallion Show.

The Glasgow Agricultural Society's annual Stallion Show was held at Glasgow on Wednesday in the Society's capital show ground at Scotstoun. The different sections into which the exhibition is divided were amply accommodated, and the judging proceeded under the most satisfactory conditions alike as regards those officially engaged within the rings and the eagerly-interested crowds who followed the proceedings. The attendance of the public was considerably above the average, the fine display of agricultural horses and the keenly-contested trotting match provided specially with the view of attracting city patrons combining to bring together a large number of spectators. The drawings for the day amounted to £334 4s. 6d., an increase of £106 15s. 6d. compared with last year. The entries numbered 130, against 127 in October, 1899, and 138 in February of the same year, but the quality of the animals shown was above the average, so that the show was altogether a successful one. There was one falling off, however, and that was that comparatively few selections were made, although Tuesday was reserved for the reception of deputations, many of the societies having already fixed upon horses for their districts. As has already been explained, the original intention of the promoters of the show was to give district agricultural societies and others specially interested an opportunity of selecting stud horses for their localities, and for many years it served this purpose to the satisfaction of all concerned. A number of years ago, however, breeding societies began to make selections in anticipation of the show, and this practice increased to such an extent that the date of the meeting was altered recently from February to October. It is perhaps doubtful whether this had the desired effect in wholly checking this tendency, but last year circumstances led to a reversion to the early part of the year as the most suitable period for the show, and so far as the numbers entered are concerned the old method compares favourably with the result of the experiment of holding the fixture in the autumn. This year, however, as was previously found to be the case, a much larger number of selections were made before the show than is considered desirable, and in this respect the late winter gathering compares less favourably with the autumn fixture.

Following the practice of past years the judges were ballotted for, with the following result:—Aged class (society's premium)—Messrs Alexander Love, Margaret's Mill, Kilmalcolm; James F. Murdoch, East Hallside, Newton, and William Fleming, Fulwood, Houston. Three-year-old (society's premium)—Messrs John MacDonald, Boquhanran, Dalmuir; Thomas Fleming, Easter Farm, Busby; and Stephen Fleming, Raith, Bothwell. Aged open class—Messrs. William Renwick, Meadowfield, Corstorphine, and James A. Wallace, Claycrop, Kirkinner. Three-year-old (open class) Messrs. William R. Trotter, South Acomb, Stocksfield-on-Tyne, and William Kerr, Houdstone, Girvan. Two-year-old (open class)—Messrs. Wm. Kerr and James A. Wallace. Cawdor Cup Competition—Messrs. Trotter, Renwick, Kerr, Wallace, and Wm. Fleming.

Thirty-one entries, as compared with 22 last year and 43 at the preceding show, were obtained for the Society's premium of £80 for aged horses. The preliminary examination occupied a good deal of time, and ultimately a leet of 17 was selected, including Mr. John Crawford's Mathias and Royal Success, Mr. Peter Crawford's Carbineer and Hillhead Chief, Mr James Kilpatrick's Laird of Cragie, Sir Lachlan and The Dean, Mr. A. M'Robbie's Canny Man, Lord Melbourne, and Prince of Roxburgh, Mr. A. B. Matthews's Enigma, Mr. Walter S. Park's Lothian's Best, Mr. Renwick's Gartly Squire, Mr. David Riddell's Dawdondene, Mr. Alexander Scott's Prince of Cowal, Mr. Wm. Taylor's Sir Simon, and Mr. David Whyte's Clan Chattan. They made an unusually large and interesting group, and some further time was spent by the judges in making their selection; but it was evident from the outset that Mr. Taylor's Sir Simon was the favourite, with Mr. Park's Lothian's Best as the runner up, and this was the ultimate decision. The winner, a good, thick, substantial type of Clydesdale, which has previously won prizes, was bred by Mr. Alexander Cross, Knockdon, and is getting on to six years of age, his sire being Sir Everard, and his dam the Mains of Aires mare Sunbeam. Mr. Park's horse was bred in Cumberland, and was also sired by Sir Everard, his dam being Flash Girl, a daughter of Flashwood.

In the class of three-year-olds for the Glasgow premium there were 30 entries, and here also the short leet was very extensive, including no fewer than 13 animals, namely, Mr. George Alston's Vanora's Pride, Mr. Peter Crawford's Sweet William, Mr. William Crawford's Baron Primrose, Mr. William Dunlop's Dunure Castle, Mr. Archibald Jackson's Provost, Mr. John Leckie's Here's Luck, Mr. Matthew Marshall's Manorama, Mr. Wm. Renwick's Royal Scott, Mr. David Riddell's Gallant's Pride and Mr. Tibbie's Cowt, Mr. Wm. Taylor's Sir Edward, and Mr. James A. Wallace's

Nick o'Time. In the end the premium went to Mr. Marshall's Manorama, a very pretty horse of sweet quality, and a good mover. This is the first time he has been shown. He was bred by Mr. Thomas Crawford, Dowhill, Girvan, his sire being Prince Alexander, and he is out of a Prince of Kyle mare. The reserve ticket was given to Mr. Taylor's Sir Edward, a horse also of a fine type and a good mover.

In addition to the two classes for the Society's premiums, there were three sections open to exhibitors who did not wish to be limited by the conditions imposed in the two main competitions. This, of course, brought out many horses which might not otherwise have been present. In the class for aged stallions the judges had to some extent to review the decisions of those engaged in allocating the premiums. The animals which were in competition included all those entered for the premium, as well as several newcomers, the most notable of which were Mr. John Pollock's Hiawatha, which had won the Cawdor Cup three times, and had the distinction, later in the afternoon, of winning the trophy for the fourth time, as well as Mr. Matthew Marshall's Marcellus, the son of Hiawatha, which was the runner-up for the Cawdor Cup last year. It was early seen that the competition for first place would lie between this noted sire and son, and in the result Hiawatha, which was brought out in wonderfully good form, was preferred. Being a younger animal, Marcellus rather beat Hiawatha in action, but he was not brought out in quite the same strong form as last year, and it seemed to be considered that Hiawatha had even an easier victory than on that occasion, when Marcellus very nearly tied with him for the Cawdor Cup. Marcellus has been selected by the Strathmore Association. The premium winner, Sir Simon, came third and Lothian's Best, a five-year-old, owned by Mr. Walker S. Park, which was close up to the premium-winner, but hardly up to the same size, was fourth. He has been engaged for East Stirlingshire. Mr. Peter Crawford's big, powerful horse Carbineer, rising five years old, and by Baron's Pride, and bred by Mr. Hannay, Broughton, Whithorn, was fifth.

In the open class for three-year-olds the contest for the principal award lay between Mr. W. Park's Marmion and Mr. Matthew Marshall's premium-winner Manorama, but in the end the newcomer led the way. Bred by Mr. William Park, his exhibitor, and got by Prince of Brunstane out of Lady Rose, Marmion is a horse of good size, with grand feet and legs, and a nice short back. His movement was also very good. Manorama, of course, was placed second, and was followed by Baronson, bred by Mr. David Mitchell, Millfield, Polmont, and got by Baron's Pride, out of the Prince Alexander dam, Princess Alexandra. Baronson, which was third here last year, and occupied the same position at the Highland Society's show, is a sweet horse, with nice ankles and good feet, but he hardly seemed to do himself justice in his movement. Mr. St. Clair Cunningham's Alexander Everard, of his own breeding, and got by Sir Everard, was placed fourth, Mr. James A. Wallace's Nick o' Time fifth, the latter being engaged by the Sutherland Farmers' Club.

The two-year-olds formed a class of about a dozen, and here Mr. Walter S. Park's Ardlethan, by Gold Mine, out of the Darnley's Hero mare took precedence. A son of Cawdor Cup, which was bred by Professor M'Call, and owned by Mr. James Kilpatrick, was second. Pearl Stone, as this animal is named, promises to be a bigger horse than the winner. Mr. William Clark was third, with a nice, hard-looking colt: while Mr. John Weir's Dunure Mac, a get of Montrave Mac, was fourth: and Mr. William Crawford's Bancor, a get of King of Kyle, fifth; and Messrs. J. and J. Wilson's Virgil, of their own breeding, and got by Good Gift, sixth.

For the honour of carrying off the Cawdor Challenge Cup there were four competitors—Mr. John Pollock's Hiawatha; two sons of this famous sire—Mr. A. B. Matthews's Labori, and Mr. Matthew Marshall's Marcellus—and Mr. William Park's Marmion. The contest was really between Hiawatha, which had already carried off the trophy three times, and the three-year-old Glasgow premium horse of last year. The aged horse again carried the day, and the decision of the judges was very popular with the spectators. Mr. Pollock having now won the cup three times, it becomes his property, and his horse has the distinction of having carried off the coveted honour no fewer than four times.

"Mark Lane Express" Diary.

February.
11. Council Meeting of the Kent or Romney Marsh Sheep-breeders' Association.
11. Castle Cary Annual Bull Show and Sale.
12, 13. Horse Sales at the Cheshire Repository, Crewe.
13. Show and Sale of Pure Bred Shorthorns at the Agricultural Hall, Aberdeen.
14. Sale of Shorthorns and Shropshire Sheep, bred by Mr. W. Thomas at the Bean House, Montford Bridge, Salop.
14. Dorchester Bull Sale.
18, 19. Show and Sale of Pedigree Aberdeen Angus Cattle at Perth.

SOCIETIES.

The Royal Society.

A monthly council of the Royal Agricultural Society was held on Wednesday, the Earl of Coventry, vice-president, in the chair.

The secretary having reported the receipt of a letter from H.R.H. the President, expressing regret that he would be unable to attend the meeting in consequence of another engagement, the Earl of Coventry, vice-president, was called to the chair. The minutes of the last ordinary meeting of the council, held on December 11th, 1901, having been taken as read, and approved, the election of the following thirty-seven members was proceeded with:—

Allen, Glendower, Wickmere, North Walsham, Norwich.
Alsebrook, Arthur, 5, Sansome Place Worcester.
Ashton, Thomas Gair, M.P., Hyde, Chester.
Boldero, Albert J., Rattlesden, Bury St. Edmonds.
Bosworth, A. W. T., Newland Works, Lincoln.
Colles, Thomas Orme, The Parsonage, Manchester.
*Collier, C. J., Barncote, Baslow, Derbyshire.
Dale, Harry Mayo, Crown Farm, Walton-on-Thames.
*Darlington, M., Cayley Arms Hotel, Rhos-on-Sea, Colwyn Bay.
Doherty, Major Henry, Vernon House, Weston, Bath.
Dulac, Albert, 21, Place de la Madeleine, Paris.
Fowler, George, 19, Knightrider Street, Maidstone.
Gilbert, Bernard Samuel, Ivy House, Billinghay, Lincoln.
Gyorgy, Endre, 22, Laurence Pountney Lane, E.C.
Haslam, William, Cowdray Estate Office, Midhurst, Sussex.
Hill, John Richard, Orleton Court, R.S.O., Herefordshire.
Hodgson, Archibald S., Westons, Warnham, Horsham, Sussex.
Hollond, Edmund Robert, Benhall, Saxmundham, Suffolk.
*Jones, H. T. The Grange, Tabley, Knutsford, Cheshire.
Kearns, Henry Ward, Bexenden House, Accrington, Lancashire.
*King, John B., Farthinghoe, Brackley, Northants.
Legard, Sir A. W., Bart., Ganton Hall, York.
Leslie, Arthur Cecil, Newton-le-Willows, Lancashire.
Maxwell, Major J. A. C., Wedderburn, Glenlair, Dalbeattie, N.B.
Nicholson, John, Mossthorn, Penrith.
Platt, William, Bexton Hall, Knutsford.
Roberts, Robert, Brongadair, Carnarvonshire.
Rochford, Thomas, Turnford Hall Nurseries, nr. Broxbourne, Herts.
Smethurst, W. O., Brandlesome Hall Farm, Elton, Bury, Lancashire.
Snelgrove, John S., Kingswood, Tunbridge Wells.
Thompson, Archibald, Mymwood, Hatfield, Herts.
Thorold, James E., Burghley Estate Office, Stamford.
Thorpe, Thomas Wells, "Holmwood," Beulah Hill, Upper Norwood.
Vachell, Loder W. Tanfield, Landsdown Park, Bath.
Warwick, Benjamin James, 23, Albemarle Street, W.
Wathen, John Bridge Court, Hereford.
Watson, William, Millom Castle, Millom, Cumberland.

* Re-elected under Bye-Law 12.

The reports of the various Standing Committees were then presented and adopted as follows:—

Finance.

Mr. Ashworth reported the election of Sir Nigel Kingscote as chairman of the year. The accounts for the month ended December 31st, 1901, as certified by the society's accountants, showed total receipts amounting to £2,175 5s. 8d., and expenditure amounting to £3,247 0s. 4d.

House.

The Hon. Cecil Parker reported the election of Sir Nigel Kingscote as chairman of the year, and presented a number of accounts for payment. A letter had been received from Miss Emily Drew offering the society a portrait in oils of the late Mr. John Monkhouse, of The Stow, Whitney, Herefordshire, who was a well-known breeder of Hereford cattle. The committee recommended the acceptance of this offer with thanks.

Journal.

Sir John Thorold reported his election as chairman of this year. Copies had been laid upon the table of Volume 62 of the society's Journal, of which the delivery to members had been completed. Various letters expressing appreciation of the appearance of the new volume had been received.

Sale of Poisonous Substances used in Agriculture.

Mr. Bowen-Jones, in presenting the report of the Chemical Committee, said that members of the council would no doubt remember that their attention had already been drawn to the question which was now under the consideration of a committee appointed by the Privy Council as to the operation of the Pharcacy Act of 1868, which at present regulated the sale of poisons, especially in its relations to the very numerous articles now used in agricultural and horticultural operations for insecticides, sheep-dips, and the like which contained poisonous ingredients. Since the last meeting of the council an official letter had been received from the Privy Council Office, inviting the Royal Agricultural Society to give evidence before the Poisons Committee from the agricultural point of view, and the Chemical Committee had nominated him as their chairman, to represent their views, Dr. Voelcker accompanying him to answer any question that might be raised on technical points, in which his scientific knowledge and experience would be of value.

The Act of 1868 made it illegal under panalties to sell or keep open shop for retailing certain poisons by any person other than a duly qualified chemist. The poisons that could not be sold otherwise were enumerated in Schedule A of the Act, and they could be added to from time to time under Section 2 of that Act by a resolution of the Pharmaceutical Society declaring other articles to be poisons under the Act, provided that resolution were approved by the Privy Council. The poisons named in Schedule A of the Act of 1868 that were generally used in preparations or compounds for agricultural and horticultural purposes were arsenic, and its preparations, strychnine, and all poisonous vegetable alkaloids and their salts, and corrosive sublimate. Since the passing of the Act, carbolic acid had been added under Section 2, but through the opposition of the agricultural interest this substance was excepted "in any preparations used for agricultural and horticultural purposes." The poisons referred to in the original Schedule A of the Act entered largely into the composition of insecticides, vermin killers, dressings for live stock, sheep-dips, sheep fly powders, fruit tree and hop sprayers, and disinfectants, and others might still be added from time to time under Section 2, such as butter of antimony, sulphuric acid, and sulphate of copper, which were extensively employed in agricultural and horticultural operations.

The ordinary layman's construction of the Act of 1868 would be that it never was intended to apply to such compounds as he had named, used for purposes stated. But the action of the Pharmaceutical Society two or three years ago had rather set aside such a contention. Probably the considerable increase in the use of these articles in connection with agricultural and horticultural work which had taken place in recent years might have been the exciting cause for their action; but, be this as it might, some cases were, at the instance of the council of the Pharmaceutical Society, brought before the courts, claiming penalties against vendors—who were not chemists—of preparations containing arsenic for weed-killing, and of nicotine used as an insecticide. The first case failed throug a tecnicalihty, but in the second case a conviction was obtained, and the sellers of the insecticide preparation were fined under the provisions of the Act of 1868. It appeared, therefore, that chemists had, to some extent, obtained a monopoly, and there were signs that they wished to extend it.

The Poisons Committee had been appointed to inquire and report the alterations which they deemed expedient in Schedule A of the Pharmacy Act of 1868, and to consider whether a third subdivision might not properly be added to the schedule containing substances, which, whether sold by pharmeutical chemists or not, should be labelled or otherwise distinguished. The Chemical Committee were of opinion that it would be inconvenient to farmers and others living in rural districts to compel them to purchase the articles referred to at no other place than a chemist's shop; that the effect of such action would be to create a monopoly which would much enhance the price of the commodities purchased, to the detriment of farmers and gardeners, and for the benefit of one class of traders; and that such action would be strongly resented and resisted by agriculturists generally.

With regard, therefore, to the first subject of reference to the Poisons Committee, "to report the alterations which they deem expedient in Schedule A of the Pharmacy Act of 1868," the Chemical Committee were of opinion that it was necessary—

(a) That Schedule A of the Act of 1868 should be more strictly defined than at present. For example, the first item, "Arsenic and its preparations," might be held at present to cover sheep dips, weed killers, Paris green—for fruit trees—arsenical soaps, and other articles used in agricultural operations, which were totally unconnected with pharmacy, and were not required to be dispensed, being already prepared in the form in which they are used by the public. Such articles should either be excluded from Schedule A. or otherwise excepted from the provisions of Section 15 of the Act.

(b) That the power at present given under Section 2 of the Act to the Council of the Pharmaceutical Society to declare by resolution that "any article in such resolution named ought to be deemed a poison within the meaning of the Act of 1868," should as regards agricultural and horticultural articles be only exercised with the previous approval of the Board of Agriculture.

With regard to the second reference to the Poisons Committee "to consider whether a third sub-division might not be added to the Schedule, containing substances which, whether sold by pharmaceutical chemists or not, should be labelled or otherwise distinguished," the Chemical Committee thought it would be reasonable that any vendor of what for convenience might be called "agricultural and horticultural poisons" should be allowed to do so, provided he sold the article in the same condition as that in which he received it from the manufacturers, the packet, bottle, or other receptacle being kept intact and unopened, and marked outside with an indication of its contents, and of the poisonous nature of the substance. The specific articles to be included in this third sub-division should be clearly stated in the Schedule. In the case of the more virulently poisonous of such preparations, the same precautions as defined in Section 17 of the Act of 1868, as to a register of sales, etc., might also be prescribed; but otherwise there should be no restrictions or monopoly in the sale of poisonous sub-

stances used in agricultural or horticultural operations. He proposed, therefore, to give evidence before the Poisons Committee on the lines he had explained to the council.

Unsoundness of Travelling Stallions.

A letter had been received from the Devon County Council, forwarding the following resolution and inviting the co-operation of the Society in bringing the subject to the notice of the Government:—"That, in view of the national importance of an adequate supply of sound horses, this Council is of opinion that legislation should be introduced empowering county councils to prohibit the use for hire within their districts of stallions suffering from hereditary disease."

Mr. Ashworth, referring to the resolution from the Devon County Council, said he was sure that the council of the Society were fully in sympathy with the main object which the county council had in view, viz., to secure an adequate supply of sound horses; but whether this could be effected by legislative interference was another question. It seemed to him that, in view of the action taken by the Society in permitting no animal entered in the breeding classes for horses at its show to receive a prize unless it had been first declared free from hereditary disease by the Society's veterinary inspectors, and also in view of the similar action of the Royal Commission on Horse Breeding in connection with the King's Premium Stallions, the Devon County Council were moving in the right direction. In his own neighbourhood—and, he supposed, also in the neighbourhood of every other member of the council, there were some of these unsound stallions travelling at low prices. Farmers used them, and the injury they received was not to be measured by a year's keep, as the disease did not appear until the horse was three or four years old. By the use of these unsound stallions, the animals bred were useless, and instead of encouraging the farmers it disgusted them. He contended that it was just as culpable to conceal the unsoundness of a horse which was travelling as it was to sell margarine for butter, which brought anyone guilty of such an offence into the police court. He suggested that the Devon County Council should be informed of the action which the Royal Agricultural Society had taken for a number of years past in making it a condition that no prize should be awarded to any horse or mare in the breeding classes at the Society's shows unless the animal was previously certified to be free from hereditary disease.

Mr. Alfred Smith thought the matter was worthy of careful consideration, and he had felt very strongly on the point for years past. For his own part, he did not allow a groom to travel any stallion unless he carried with him a certificate of soundness. In his opinion, the majority of small farmers were simply led away by the looks of the horses and the low fees and he believed that nine out of ten small farmers did not know in the least where to look to find unsoundness in a horse. Anything that could be done to ensure the soundness of travelling horses would be of great national benefit.

Mr. Terry thought that the subject did not only apply to stallions, but also to unsound mares that were sent to the horses.

After remarks by the Hon. Cecil Parker, Sir Nigel Kingscote, and Mr. Bowen-Jones,

The chairman observed that the question was one of considerable importance. He thought it would be sufficient, on the present occasion, if a reply were sent to the Devon County Council, stating that the council of the Society were fully conscious of the national importance of an adequate supply of sound horses, and that by their rules, under which breeding animals in the classes for horses at the Society's shows were required to be certified as free from hereditary disease before receiving prizes, they were doing all they could to encourage the breeding of sound horses.

A reply in this sense was agreed to, and the report of the Veterinary Committee was adopted.

Stock Prizes.

Mr. Crutchley reported the election of Mr. Sanday as chairman of the year, and that in Mr. Sanday's absence, through ill-health, he had been elected chairman of the meeting. The committee recommended the acceptance of the following prizes, which had been offered during the Christmas recess and provisionally accepted by the chairman:—

SHETLAND PONY STUD-BOOK SOCIETY.—Two classes for Shetland Pony Stallions and Mares, with prizes of £5, £3, and £2 in each class.

SHORTHORN SOCIETY.—Two Champion Prizes of £20 for the best Shorthorn Bull and the best Cow or Heifer.

THE SHIRE FILLY shown above is Ruby Glimpse, 37,110, for which his Majesty the King obtained 450 gs. at last week's sale, the purchaser being Mr. Leopold Salamons. Ruby Glimpse was foaled in 1900, her sire being Calwich Blaze, 14,544, and her dam Glimpse, 23,801. At the Norfolk Agricultural Society's Summer Show last year Ruby Glimpse won first prize and the Shire Horse Society's Medal.

ENGLISH KERRY AND DEXTER CATTLE SOCIETY.—Prizes of £10, £5, and £3, in two classes, for Kerry and Dexter Heifers, born in 1900 or 1901, and third prizes of £3 each in four classes provided by the Society for Kerry and Dexter Bulls and Cows.

OXFORD DOWN SHEEP BREEDERS' ASSOCIATION.—Third prize of £3 in each of the classes for Oxford Down Ram Lambs and Ewe Lambs.

HAMPSHIRE DOWN SHEEP BREEDERS' ASSOCIATION.—Two Champion Prizes of £10 each for the best Two-shear or Shearling Ram and the best Pen of Shearling Ewes or Ewe Lambs.

NATIONAL PIG BREEDERS' ASSOCIATION.—Gold Medal for the best Small White Boar or Sow.

General Carlisle.

The Earl of Derby (chairman), reported that various matters relating to the Carlisle meeting had been discussed, and that instructions had been given for the usual application to be addressed to the Chief Commissioner for the services of a detachment of the Metropolitan Police for duty within the showyard.

Selection.

Sir John Thorold reported his election as chairman of the year. The committee had to report with deep regret the death, on December 23rd last, of one of the honorary members of the society—Sir J. Henry Gilbert, F.R.S.—to whom the society was indebted for many valuable contributions to the Journal. A letter had been received from Mr. C. S. Mainwaring resigning his seat upon the council, and the committee presented their recommendation as to the nomination of a member to fill the vacancy thus created.

The Chairman said he was quite sure that the council would share the regret expressed by Sir John Thorold at the death of Sir Henry Gilbert, who had rendered such great services to the cause of agriculture. They were also sorry to learn that Mr. Mainwaring had expressed his desire to retire from the council. Mr. Mainwaring had been a regular attendant at their meetings, and it had always been a great pleasure to work with him.

Site Committee.

Mr. Crutchley reported his election as chairman of the year. Progress was being made with the fencing, draining, and other preparations of the site for the purposes of the Society's permanent show. The committee, having decided that some additional ground was necessary to provide room for trials and for other purposes in connection with the shows, had been able to secure from the owner of the property a lease for five years (with an option of purchase) of a further 14 acres of land situated to the west and north-west of the showyard, together with the farmhouse and garden, which would practically be inside the showyard.

The Earl of Derby proposed that a cordial vote of thanks be passed by the council to the Lord Mayor of London, for his courtesy and hospitality at the Mansion House, in connection with the conference his lordship had been good enough to arrange in the previous week between His Royal Highness the President and other members of their council and the representatives of the leading City Guilds. It was thought that as their shows were coming to London, and would therefore attract not only London residents, but visitors to London from the provinces, it would be useful to enlist the practical sympathies of the great City Companies in their project. At the meeting at the Mansion House His Royal Highness the President had clearly explained the position in which the society found itself when the change to a permanent showyard had been decided upon; and they hoped that they had been able to convince those whom they had the pleasure to meet of the advantages of the proposed change. The Lord Mayor's invitation had been given in a most friendly spirit, and he moved that the best thanks of the society be conveyed to him for his courtesy in inviting them to meet the representatives of the City Companies.

Sir Walter Gilbey said he had much pleasure in seconding the motion. By the kindness of the Lord Mayor, the society's representatives had had the advantage of a personal conference with the masters of the chief City Guilds, and had been able to bring before them, under the pleasantest auspices, the circumstances under which the society sought the support of the City to its new enterprise of a permanent agricultural showyard in the neighbourhood of the metropolis. He trusted that all the members of council who had interests or influence in the City, would do their utmost to support the steps which had been taken by the society towards enlisting the sympathy and financial help of the City of London. He cordially seconded the vote of thanks to the Lord Major for the courtesy and hospitality which he had extended to the society.

The Chairman then put the motion, and it was carried unanimously.

Miscellaneous.

The secretary reported the receipt, through the Royal Commission for the Paris International Exhibition of 1900, of the Grand Prix Diploma which was awarded to the society at that exhibition.

Other business having been transacted, the council adjourned until Wednesday, March 5th, 1902.

Clydesdale Horse.

The annual meeting of the Clydesdale Horse Society was held at Glasgow on Tuesday, Mr. R. Brydon (Seaham Harbour) presiding. The annual report (extracts from which appeared in our issue of January 27th) was submitted, and the chairman, in moving its adoption, expressed satisfaction with the financial position of the Society, the year's working showing a credit balance of £224 1s. 9d. He thought the Society ought to feel indebted to the Messrs. Montgomery for their enterprise in sending across to Chicago a team of draught horses, which had been so successful there. In connection with the closing date for entries for the stud book, Mr. M'Neilage suggested that, in future, entries should close on August 31st, instead of October 31st as at present, in order that the work might be got through in time to have the book out for the stallion show. Lord Arthur Cecil (Orchard Mains, Kent), seconded, and the report was adopted.

Mr. St. Clair Cunningham (Hedderwick Hill, Dunbar), was elected president, and Mr. Robert Brydon (Seaham Harbour) vice-president. Mr. Matthew Mitchell (of Messrs. Mitchell and Smith) was appointed auditor, and councilmen were elected for the ensuing year.

Central and Associated Chambers.

The first meeting of the council of the Central and Associated Chambers of Agriculture, under the chairmanship of Sir Edward Strachey, M.P., took place on Tuesday, and there was a good attendance.

The Business Committee reported that at the next meeting they proposed the two following questions for discussion, namely: (1) Food supply in time of war, and (2) Rating of Machinery Bill. Mr. Berry pointed to the necessity of considering the sugar question from the fruit-growers' point of view. The Hon. James Lowther, M.P., said he hoped it would not go forth from that Chamber that there was anything against a reasonable increase of the sugar duty, especially if accompanied with preferential items in favour of British and Colonial produce. (Hear, hear.)

The chairman, in moving the appointment of the Earl of Warwick as vice-chairman, congratulated the council in having the services of a nobleman who was so well known, and who evinced such a deep interest in agriculture. The motion was carried with acclamation.

Mr. Bowen-Jones was re-elected treasurer, and the following were elected members of the Business Committee:—Mr. A. F. Jeffreys, Mr. B. St. John Ackers, Right Hon. James Lowther, Mr. C. Middleton (Cleveland), Mr S. Kidner (Somerset), Mr. Henry Williams (Monmouth), and Professor Long (British Dairy Farmers' Association).

Local Taxation.

The Local Taxation Committee submitted a review of the final report of the Royal Commission on Local Taxation, and expressed gratification that the report, on the whole, supported the policy advocated and the claim put forward by the committee ever since its formation that a large amount from Imperial sources should, in equity, be given in aid of local rates. The committee stated its conviction that, whether the contribution comes from the central authority in the shape of "assigned revenues" or "direct grants in aid," no arrangement could be considered equitable which did not provide that local authorities should have an amount assigned from the Government fully representing the interest of the general community in local expenditure on onerous services, and that such an arrangement would not encourage extravagance if the local authorities were empowered to raise, by a local rate, the amount needed to cover any excess of expenditure over the Government grant. The committee expressed a hope that before long the Royal Commission's opinions may bear fruit in permanent legislation.

Sir John Dorrington, Bart., M.P., in moving the adoption of the committee's report, said they had had an important duty to perform in summarising the extensive report of the Royal Commission. It would be noticed that the Royal Commission agreed to what had all along been the contention of that Chamber, that the system of local rating was unfair, as throwing too big a burden on special classes of property and those paying local taxes. He thought the report presented by the committee represented very fairly the essence of the report of the Royal Commission, to which he recommended the serious consideration of the Chamber. Sir Edward Hamilton and Sir George Murray presented the minority report, and he (Sir John Dorrington) failed to see why they did not agree with the majority report, seeing they agreed with it although from different standpoints. In the minority report they drew attention to the immense complexity and difficulty of the whole matter, which prevented any satisfactory conclusion being come to in regard to placing local taxation upon the same basis as Imperial taxation —namely, a charge upon the whole of the population. A recommendation in the minority report was that a sum should be paid out of Imperial taxation towards the assistance of local taxation. For the first time it was therefore authoritatively stated that there would be a distinction between onerous and beneficial burdens; that persons who had certain advantages by local expenditure should pay for it, but where the expenditure was not beneficial to any particular class it should be distributed over the whole of the population. To remedy this, the only method suggested was the payment of a contribution from Imperial funds. The Government would not deal with the question this year, but it was promised in the King's Speech that attention would be directed during the year towards securing a fair and equal valuation throughout the country. At present there were three valuations—the Crown, the county, and the parish or Union valuations—except in London, where all the three were co-terminous. The problem to obtain a single valuation did not seem a difficult one, and the Royal Commission suggested that it should be at once taken in hand.

Mr. J. Lowther, M.P., in seconding the motion, said the producer of butter, cheese, milk, corn, and cattle in this country was ground down by rates, while his foreign competitor was left absolutely free. He regretted that the committee had not called attention to this, and suggested that reasonable means should be taken to end such a state of affairs. The principle of subvention now recommended was wrong from beginning to end, as had been shown by the way in which money given to the county councils for the promotion of technical education had been flung about.

Mr. Middleton (Stockton) thought the report, so far as agriculturalists were concerned, only touched the fringe of the subject. Several other members expressed their dissatisfaction with the character of the report, but it was in the end adopted.

Rural Depopulation.

Mr. W. Charlton (Newark) then resumed the debate, adjourned from the last meeting of the council, upon Professor Long's motion, "That this council is of opinion that the establishment of small holdings in suitable districts and under suitable conditions will tend to arrest the migration of rural labour from the land." He expressed a belief that small holdings would have the effect of increasing the supply of labour available for large farmers, but urged that such holdings would not be generally successful without the adoption of co-operation among those who took them. The condition of agriculture in Denmark showed how much could be achieved by co-operation among small producers. In the Bewdley district of Worcestershire the labourers had readily accepted the principle of self-help, and in a few months a co-operative society formed among them had taught them to work together in a way which was impossible before. Agricultural co-operation would stem the tide of rural depopulation.

Mr. Middleton (Stockton) was against the proposition, because he was sure that working men would not take the trouble to keep a cow, and milk it. There were many estates with which he was acquainted in the north where land was set aside for small holdings which no one applied for; and the owner had to keep the land in his own hand.

Mr. James Lowther expressed the opinion that such suggestions as the adoption of co-operation, the supply of small holdings, and the improvement of labourers' dwellings, though good in their way, were but tinkering and petty devices that did not touch the main point. The flight from the rural districts was due to the fact that the business of those districts had ceased to be profitable, because it was impossible for it to compete against foreign rivals who were free from taxes, absolutely absolved from rates, and often in receipt of a substantial bonus. The amount of money that went out of the country, but might be kept here by improved fiscal arrangements, was an enormous national loss. Even economists hostile to anything in the nature of protection admitted that we were at the parting of the ways, that the country must recognise that the ideas of fifty years ago were out of date, and that retrograde financiers must be relegated to some other sphere. They must no longer suffer the foreigner to come into the country, endowed as he was, to the detriment of the English farmer. This was what the chamber must make known in every direction. (Applause.)

Mr. H. Stopes (London) said the whole question was one of prices for the farmer. It was imperative for them to secure a proper remuneration for the farmers and his labourers in growing produce.

Mr. A. F. Jeffreys, M.P., remarked that if they were to wait for an improvement of agriculture until the whole fiscal policy of this country had been changed, as Mr. Lowther desired, many of them would be ruined. The working of small holdings, he believed to be beneficial if the right people were placed upon them, and not people drawn from the towns.

Mr. Buchanan (Salop) agreed with the views expressed by Mr. Jeffreys, and described the small holdings granted to labourers on his estate, where they were within three miles of a market town, as being very successful.

Mr. Lawrence Hardy, M.P., was of opinion that small holdings were very good things, but he did not think that that alone would solve the difficulty with which they were met.

Mr. Channing, M.P., spoke with satisfaction of the effect of small holdings, but did not think that the Chamber should be bound down by the resolution, and moved as an amendment, "That a committee should be appointed to consider and report what measures—whether by the promotion of small holdings or other means of improving the conditions of life in agricultural districts—will tend to arrest the migration of agricultural labour from the land."

Mr. Kidner (Taunton) seconded the amendment.

Sir Mark Stewart, M.P., urged that if they wanted to keep good agricultural labourers on the land they must pay them a wage commensurate with that with which they could earn elsewhere. He had had experience of small holdings in his district, and as a rule they were taken by men who were old, and who could not do anything for themselves in town.

Mr. Rider Haggard said the Chamber would admit that this was a matter of very great importance, and one in which the national life of the country was concerned. He thought they would admit that it was one in which that Chamber could not come hurriedly to a conclusion. When a conclusion was reached it could go forth to the world as the mature judgment of the greatest body of agricultural experts in England. For that reason he supported the amendment. It was not the slightest use introducing the question of Protection. They might or might not believe in Protection, but in crying for Protection it was like crying for the moon. (Laughter.) They knew that Protection would not appear in this country again unless some terrible catastrophe, which they never wished to see, happened. (Hear, hear.)

Mr. G. E. Francis, who proceeded to discuss the principles of Free Trade, urged that Cobden never intended universal Free Trade. Although several times called to order, Mr. Francis went on to say that Free Trade was repugnant to the success of the farmer, and that the manufacturers, by sticking to Free Trade, were doing an immense amount of damage, not only to themselves, but to agriculture. He was prepared to prove those propositions, and added that if he went out of the room still holding with Free Trade, they would be going to the ——. (Loud laughter.)

Mr. Digby Collins (Cornwall) said he had laid out a large number of small holdings, but not one farm labourer was in the occupation of one of those holdings; those in occupation were men who had an additional pursuit to help them. There was no migration of elderly people into the town; but those who drifted there were couples, or single persons in the prime and vigour of life. (Applause.)

Mr. Beechcroft (Cheshire) supported the amendment. In Cheshire a farm of 200 acres was thought to be a large holding; but they were really small, and on that account he believed they had been better able to stand up during the recent bad times. So far as his experience went, where a small holding of three or four acres was to be obtained there were scores of applicants. The question of wages had a great deal to do with the present position of matters. They must have good labourers, but they must not forget that a good labourer could not be made out of a walking-stick. (Laughter.)

Mr. J. T. Wilson (Stockton) described the various attractions which men had in towns, and recommended that some relaxation should be allowed to the labourer in the form of a holiday, or wages in lieu thereof. He supported the amendment.

Professor Long said he would adopt the amendment of Mr. Channing, so that the resolution was withdrawn, and the amendment became the substantive resolution.

Mr. D'Arcy Wyvill then moved this amendment:—"That a committee be appointed to consider the question of rural depopulation, and that the business committee select the names and submit them at the meeting of the council."

This was seconded and passed unanimously, and the meeting then adjourned.

Royal Commission on Horse Breeding.

A meeting of the Royal Commission on Horse Breeding was held on Monday at 13, Hanover Square, W. There were present the Duke of Portland (Master of the Horse), in the chair, the Earl of Coventry, Sir John Gilmour, Bart., Mr. J. Bowen Jones, Mr. Alfred E. Pease, M.P., and Mr. J. Herbert Taylor (Secretary). Sir Jacob Wilson wrote expressing regret at being unable to attend the meeting.

The financial statement for the past year was presented and passed. The stewards were appointed and the judges and veterinary surgeons nominated for the forthcoming show, to be held at Islington, on March 11th, 12th, and 13th. The number of thoroughbred stallions entered for King's Premiums was reported to be ninety-six up to the closing of first entries, but post entries will be received up to to-day (Monday).

New Agricultural Patents.

Specially compiled for *Mark Lane Express* by Mr. G. D. Howard (Hughes, Son and Co.), patent agent, 38, Chancery Lane, London, of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge:—

1510.—Edward Meredith Griffiths, of Ludgate Square, London, for "Improvements in grinding machines."

1557.—George John Bachmann, of Chancery Lane, London, for "Improvements in planters for potatoes and the like."

1661.—Carl Aufsberg, of High Holborn, London, for "Improved process for preserving eggs."

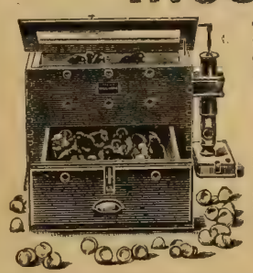
CHICKENS ALL THE YEAR ROUND
BY USING
Hearson's Patent
CHAMPION INCUBATORS.
Manufacturers by Appointment to
H.M. THE KING.



The CHAMPION INCUBATOR has now been before the world over 20 years, and has achieved a reputation which eclipses all competitors.

Address—**CHAS. HEARSON & CO.,**
"D" Department, Ltd.,
235, REGENT ST., LONDON, W.

COVERDALE'S
Poultry Powder
The Wonderful Chicken Tonic.
It won't prevent Chickens Dying in the Shell,
BUT, once hatched, and properly fed with food containing just a sprinkling of
Coverdale's Poultry Powder,
you are assured of success. A 1/3 tin is enough for 600 chickens for a week, or 30 chickens for 20 weeks. 1/3 spent in this way might save you 15/-.
Coverdale's Poultry Powder is not a spice, but a scientifically prepared tonic. It contains all the elements necessary for producing perfect health and condition—it is THE Powder for bringing forward young chicks. We want every Poultry-keeper to send a penny stamp for a Free Sample, sufficient for 20 chickens for two days.
Sold in Tins, 8d., 1/3, and in Bags, 3/- and 5/9, post free.
COVERDALE'S POULTRY POWDER, Ltd.,
20, Parliament Street, YORK.

AWARDED THREE PRIZE MEDALS FOR THE BEST INCUBATOR, DAIRY SHOW, 1898, 1900, 1901.
SEVEN OTHER GOLD AND SILVER MEDALS IN ENGLAND AND CONTINENT, 1901
TAMLIN'S . .
NONPAREIL
PATENT **INCUBATOR**

This is the only Incubator that ever hatched 95 per cent. in Competition for Hatching results open to the World.
Guaranteed Automatic.
Best planished Copper Tanks.
Packed ready for immediate use.

TAMLIN'S SELF-SUPPLYING LAMP
Patent No. 20,182.
Which automatically supplies itself with oil the whole time of hatching. **4s.** extra. Testimonials. Hatching 100 per cent. Over 1,000 Letters of Thanks received for Results. Write for our Catalogue, post free.
W. TAMLIN SOLE MANUFACTURER **RICHMOND, SURREY**
The Largest Manufacturer of Incubators in the World.

Sir William Harcourt on the Poultry Industry.

A meeting in support of the National Poultry Organisation Society was held at Londonderry House, Hyde Park, on Tuesday, and was attended by a large and distinguished company. The Duke of Portland presided, and in opening the proceedings, said he was glad to do all he could to further a well-considered scheme likely to be beneficial to agriculture, the greatest of all our national industries; and he believed the objects of this society, if they became widely known and strongly supported, would be a very great improvement indeed. No longer could our farmers depend upon corn growing and cattle-rearing to pay their rents; they were compelled to turn attention to those articles formerly regarded as the minor products of the farm. The objects of the association were, shortly, to help farmers to meet the demand for eggs and poultry, and to encourage the keeping of poultry on farms and small holdings. This it was hoped to do by securing the best markets at the very least cost. The fact that the demand for poultry and eggs had increased very rapidly was quite unquestionable; and the increase had not nearly equalled the demand our population made upon such articles of food. This fact was borne out by the startling statistics of the foreign supply, which he proceeded to give. In the 20 years to 1901 Great Britain paid foreign countries more than 25 millions sterling for eggs alone, and in the last year the amount was double what it was in the first year. He thought such figures justified the existence and demanded public support for such a society as this. He was informed that no country in the world had a better climate or one more suitable for the poultry industry than our own, and the efforts of the society had already met with a large amount of success.

Lord Aberdeen moved "That this meeting regards with satisfaction the increasing attention given to the production in the United Kingdom of poultry and eggs of good quality, and is of opinion that the extension and development of the industry would be advantageous and profitable, whether as part of the ordinary operations of the farm or in the hands of the occupiers of small holdings and of cottages."

Mr. Grant Lawson, M.P., representing Mr. Walter Long, M.P., seconded. He rejoiced to know that all parties could unite in supporting the society, and that the simple egg, whether of English or foreign extraction, had ceased to play an active part in British politics. As a producer of eggs he could not compete with many present, but as an appreciative consumer he yielded place to no one. (Laughter.) He confessed that his appetite had often been dulled by the knowledge that he was occasionally obliged to eat foreign fowls at a fancy price, while the farmers of England were receiving an entirely unremunerative sum for their chickens.

Sir William Harcourt proposed, "That this meeting congratulates the National Poultry Organisation Society on the substantial success which has attended its efforts, and commends the society to the support of all who can render it assistance either by becoming subscribers or donors to its funds, or by taking part in the establishment of branches and collecting depots in the rural districts." He said: The thing that astonishes me, and I think must astonish you, is why I should be here to move a resolution; but I can give an account of that which will, I think, be satisfactory and conclusive. She directed me to be here. I once read an interesting novel, in which the principal character was "She, who must be obeyed." There are so many of them, and they are the lineal representatives of the first She in our history. (Laughter.) On this occasion I was directed by Lady Cranborne, the president of this association, to be here and move a resolution, and perhaps, with her intimate connection with official circles, she is of opinion that those who have long dealt in politics ought to be adepts in judiciously walking upon eggs. (Laughter.) But the real truth is that I had the advantage some weeks ago in an historical country house to hear from Lady Cranborne the objects and the works of this society. She and I live on opposite banks of the Avon in a country with a sparse population, with a wide range of district occupied principally by small holders, and inhabited also by a very independent class of labourers, and anything which tends to the advantage of such a population as that naturally interests me, as it does her.

I was very glad to hear from Mr. Grant Lawson, as a member of the Government, that the question of the import of goods to the amount of £5,000,000, is a matter that ought not to be neglected. In these days, as he very properly observed, £5,000,000 here or there is nothing. But it is in point of fact a very serious matter, and without pretending to any special or detailed acquaintance with this matter, there is one object which is, I think, of very special and urgent importance, and that is in interesting the populations that occupy our rural districts in remaining in those districts with advantage and with profit. (Hear, hear.) I am glad to think, after a long experience of life, that there is nothing more satisfactory than the improvement of the condition of the agricultural labourer. I, who can recollect when wages were much lower, when hours of labour where much longer, when, above all, the women worked in the fields (which now, I am happy to think, they hardly ever do), must know that they have means and opportunities—I might also mention their better education—of placing their time to better advantage than that in which it is now employed.

I do not believe that the development of this industry is mainly to be looked for in the large holdings of land in this country. It does not suit their industry. If you really want to popularise the production of articles like those of poultry and eggs, you must develop it among the small people. (Hear, hear.) The small holders in the district where I live have train advantages and other facilities which, if they were developed, might be very largely increased. The labourers themselves and their wives, if you only gave them proper opportunities, might make a very decent profit, as well as a very good occupation of their time.

Something had been said in a disparaging way by my friend Mr. Lawson as to the British climate, but I do not believe that the climate is an obstacle at all. It seems to me that there is no obstacle but one, and it is one which affects not only a small trade like this, but all the great trades of this country. Somehow or other, while we produce articles as good or better than the rest of the world, we are beaten by them because they have cultivated the art of bringing their commodities to the best market in a manner we have never succeeded in doing. If you read all the colonial reports and the valuable reports to the Foreign Office, you will see it is constantly said that the British manufacturer does not take the pains other manufacturers do to place his goods to the best advantage in the markets of the world.

We ought in this country to have a monopoly, if we managed it properly, of the high class of eggs, eggs which command a high price. But the fact is that eggs which really are of the highest class, in consequence of the want of facilities of marketing, get the price simply of the lowest egg in the market. That ought not to be. And you can perfectly well understand that to small holders of whom I speak, and labourers in the New Forest—it is a matter of trouble and expense to get their fresh eggs to the market. This association is for the purpose of devising means by which a small man with his dozen or so of eggs may obtain what he ought to have—the best price that can be got in the market, and the best price is about double that which he gets. There ought to be a decent profit. What a former speaker said is quite true, that there has been a great improvement in the poultry industry of this country. The breeds are better understood, the methods of production are altogether better understood, and therefore all the materials of what I would call a monopoly of price, which you ought to have, are lost and sacrificed because there is wanting a method of giving the commodity a market which it ought to have.

Mr. W. Palmer, M.P., seconded the motion, and pleaded for increased financial aid to the society, which he said required from £12,000 to £15,000 to carry out the work in hand. In return for that outlay it hoped to put into the pockets of the British farmers profits amounting to between £5,000,000 and £6,000,000. (Hear, hear.)

The resolution having been carried unanimously,

Sir James Blyth proposed a vote of thanks to the Duke of Portland, to the Marquis and Marchioness of Londonderry, Viscountess Cranborne, and others who had promoted the success of the meeting.

Mr. E. F. G. Hatch, M.P., seconded the motion, which was briefly acknowledged by the chairman.

By Hordeum.

The British Barley Society.

This society has been established with a view to undertaking a lot of useful and necessary work, and if it only accomplishes a part of it there will be general satisfaction felt with its attempt. Every thoughtful person is growing concerned at the diminished amount of food we produce, and the depopulation of our rural districts. There is no agreement as to which evil is the greater, but few sensible people dispute the fact that it will be well for the national good if both are stopped. Some can see the intimate relation they bear to each other, for if the land were made to produce more a larger number would be supported by it. Everyone acquainted with farming knows that any land under the plough or spade, if properly tilled, yields more in every way than if laid down to grass or permanent pasture. It is commonly known that it gives employment to

More Labourers,

consequently anything that gives work, if fairly paid, must keep more men on the land and in our villages. Practical farmers are agreed that one of the things that still pay to grow is barley. But by the time we reach this stage there ceases to be agreement upon any suggested course. One man wants one thing one another. Small holdings may meet certain requirements, and improved social conditions with better pay may do more, but the fundamental point after all is the production of paying crops.

Consequently, any steps that improve the quality and quantity grown per acre of a crop like barley are desirable, provided the cost equals only a part of the increased return that ought to be fairly looked for.

Now, it is certain that our barley-growers are in a parlous state. Prices have shown so little tendency to rise even under the exceptional circumstances of this season that we can only hope for improvement with the dread certainty that it is not likely to come.

The Only True Hope

may be fixed upon improvement in quality or, better still, in a much greater yield per acre. Brewers have started upon the exceedingly short-sighted and suicidal policy of grinding down the price of barley to a non-remunerative point. It is useless to look to Parliament for redress or readjustment of the wrong as it stands. We have far too large a proportion of our legislators interested in the profits of brewers to expect them to pass Acts that will protect consumers or benefit producers.

But even if they would, it is desirable in the national interest to make barley-growing pay independently of the brewers. This can only be done by greater attention being given to the practical steps in production and use.

The Barley Show

has proved that right understanding of customers' requirements has led to general improvement in the cultivation and handling of barley, but it has also brought into prominent relief the need existing for further progress.

It is not reasonable to expect private individuals to go further than the executive of the Brewers' Exhibition have already done. In fact, the whole community are under a heavy debt of obligation to Messrs. Dale and Reynolds, and the able staff of judges who have so generously helped them for many years.

But much as the Brewers' Exhibition has done, its chief value ultimately may prove the admirable start it has prepared for the young society which will have to carry on the good work so well begun.

A large number of good barley-growing counties, representing more than half the barley area of England, most of Wales, and all Scotland and Ireland have no incentives offered to exhibit at the show. This will be altered, and every small suitable area will have separate prizes offered, so that the competition will be on fair lines to all concerned. A dozen more groups of counties will be able to demonstrate to buyers their ability to offer sound, useful malting grain or seed-corn, even if they cannot expect to win champion honours.

Technical education in county areas will doubtless lead to much improvement in many ways, but this will only extend the true usefulness of the society, which can step in and do work that County Councils, agricultural schools, or colleges, and even our universities, will not be able to do.

The society starts upon the strong

Foundation of Utility.

There is much for it to do, and it only needs the support of members to do it. Well will it be for our country when it has four million acres sown to barley, instead of two, if for no other reason but to furnish sturdy country-bred recruits for our Army and Navy. It is certain that the attention of the country is turning to the reconsideration of the fallacies of Free Trade, and on this point also a vigorous organisation can be productive of great good when the right time comes. Changes will certainly occur in the methods of levying existing taxation, and probably new taxes will arise. In these changes barley at present has no representation, greatly as it is interested, but it must in the future, and the British Barley Society will make its influence for good felt in this direction also.

Mr. H. Stopes, of 11, Queen Victoria Street, London, E.C., and chairman of the judges at the Brewers' Exhibition, the hon. secretary of the British Barley Society, has forwarded us the following communication:—

There has long been a strong wish on the part of many interested in the national well-being, that there should be a society formed in order to foster the important industry of barley-growing.

It is widely felt that, whilst there are many societies devoted to the special interests of particular classes, or special breeds of horses, cattle, sheep, swine, poultry, flowers, and numerous other things, our most important cereal crop is sadly neglected, and the arable cultivation of our soil is becoming more and more restricted every succeeding year. Agriculture is hereby depressed to exceedingly grave national disadvantage.

Even our agricultural societies and farmers' clubs do not give the care and consideration to this branch of agriculture which is urgently required.

It has become unhappily true that the most valuable and important crop produced in Great Britain is barley. But, at the same time, it is equally true that this crop is the one that our islands can produce better than any of our colonies or foreign rivals have thus far done.

Probably the influence of the Brewers' Exhibition has contributed to this supremacy of barley, for it has furnished many of our best farmers with information, and provided object-lessons, from which they have been swift to learn. The judges at this exhibition are a selected band of a dozen of our best maltsters, brewers, and agriculturists, who have harmoniously worked together for many years, and have consistently tried to select the best types of barley to grow. They have also taken infinite trouble to acquire, and put into concise tables and in practical form, much information concerning the selection of soils, time to sow, quality and quantity of seed to use, manures to add or avoid, the rotation of crops, treatment of the grain, and other things.

The good thus far accomplished is the best proof of the need for more to be attempted, especially as the time has come when the further improvement of the crop, in other directions than for maltsters' use, is a vital necessity.

All this "The British Barley Society" will be able to do, provided only a small proportion of those directly concerned join the society, and give to it the power of numbers and experience.

The objects of the society are:—(1) To improve the character and quality of barley; (2) to aid growers in every way by furnishing fullest information as to soils, seed, rotation and manures, stacking, threshing, and dressing, and use; (3) to encourage the better use of barley; (4) to foster arable cultivation of the soil, keep men on the land, and where possible, to bring them back to it; (5) to aid national defence.

One purpose will be to offer incentives and direct encouragement to growers in counties where more and better barley can and should be grown.

The society will be non-political and non-contentious, but it will help the industry of barley-growing by all legitimate means, and work in entire unison with all existing organisations that aim at the improvement of agriculture.

It is proposed that, starting from January each year, the subscription shall be not less than 5s. (five shillings) per annum from each tenant farmer occupying under 250 acres, and a guinea, or upwards, from all others, the amount to be ruled by their own feeling in the matter.

The purpose is to secure members rather than funds, although the society cannot be conducted without means.

Members of the society will be able to enter at the barley show at half price, and the society starts its career with a recognised and influential annual show, ready formed, and with many years of acquired experience. It is anticipated that the utility and influence for good of the Brewers' Exhibition barley competition will be extended by the society.

You are cordially asked to join at once, for it is imperatively needed that the decrease in area of arable land may be stopped.

In the whole history of trade combination it has not yet been so manifest how much the interest of traders has been bound up with the nations gains. History does not record an instance of national defence being so dependent upon the assistance a single industry can give.

Britain grows the best barley. Join in the effort to make its production good for all concerned, growers, intermediaries, and consumers.

IN PARLIAMENT.

HOUSE OF LORDS.

On Monday Earl Carrington asked the Under Secretary of State for War what portion of the meat supplies for the British troops in South Africa had been procured from Argentina, on what authority was the statement made that Australia and New Zealand were unable to furnish adequate supplies of meat for this purpose, and whether the contracts from the Argentine could be cancelled in view of the protests of the Premiers of New South Wales and New Zealand.

Lord Raglan said that the contracts, as usual, contained no stipulation as to the sources from which the meat should be drawn, but a large portion of the supplies had consisted of frozen mutton from Australia and New Zealand. It was believed that in the course of the second year of the contract a certain amount of Argentine beef had been supplied, but it would be difficult, if not impossible, to say what the proportion was. When the tenders were issued in November special arrangements were made in the interests of the Colonies, the quotations being returnable in London so that the Agents-General might submit offers, and cabled prices being admitted to competition. Only three tenders were received, and the lowest was from a firm connected with a syndicate having close connections with South Africa and New Zealand. The Secretary of State having satisfied himself as to the financial standing of the firm, accepted their tender. The original tender contained no stipulation as to where the meat supplied should come from, but before it was signed an undertaking was obtained from the firm that as far as possible the meat should be obtained from Australia and New Zealand. It would be seen, therefore, that there were no grounds for the protests, but that, on the contrary, everything had been done which could reasonably be done to encourage the supply of meat from the British colonies.

HOUSE OF COMMONS.

The Tuberculosis Experiments.

Mr. Channing asked the President of the Local Government Board whether he could state when the Commission, appointed to report on Professor Koch's theory that bovine and human tuberculosis were distinct diseases and incommunicable, was expected to report.

Mr. Lawson, who replied, said:—My right hon. friend is not in a position to state when the Commission will be able to report; but it is not likely that they can do so for a considerable time. I am informed that very extensive experiments will have to be carried out by the Commission, and that for this purpose laboratories and other buildings have been erected on the farms where this part of the work is to be done. It is, I understand, impossible to say how long these experiments will take, but arrangements have been made for the Commission to occupy the farms for three years.

Old Age Pensions.

Mr. Black asked the First Lord of the Treasury on Thursday whether His Majesty's Government would introduce or give facilities for the passing into law of a measure for providing Old Age Pensions.

Mr. Balfour: The hon. member will hardly expect me to add to the list of measures to be dealt with in the course of the session. (Laughter.)

The Plano Manufacturing Company, of Chicago, U.S.A., and 115, Southwark Street, London, S.E., have issued a capitally got up catalogue of the Plano harvesting machinery. It is most profusely illustrated; the various parts of the machinery are shown and described, and among other illustrations showing the machines at work is one particularly pretty scene, which depicts four mowers at work on a Norfolk farm.

British Draught Stallions for Canada.

The fifty million bushel wheat crop has placed the Manitoba farmers in a position to purchase high-class stock, and the demand for such should receive the immediate attention of British horse breeders. Stallions commence to travel in Canada about the 1st of May, and British sires could be landed in Winnipeg in from 15 to 18 days at comparative little cost or risk, the latter can be covered by insurance.

The Brandon correspondent, writing to the "Winnipeg Free Press" (Manitoba), of the 15th of January, 1902, says:—

"There has been an increasing demand among farmers in the West for heavy horses, averaging 1,400 pounds weight. For the last few years 1,500 horses on an average have been imported by Brandon dealers, and an average of 1,000 imported for the last 20 years; making a total of about 20,000. Add to this other horses of all description, mustangs, etc., and Brandon's total comes well up to 25,000 horses, most of which have been distributed within a radius of 30 miles of Brandon alone.

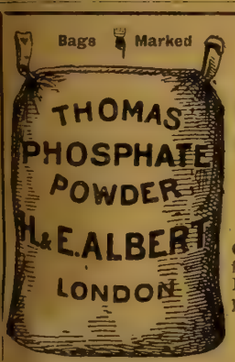
"With the better settlement of the country, and the establishing of a large number of the farmers, there has arisen the need of more home-breeding, with the best pedigreed horses. The difficulty chiefly was that of cost. Few could give £500 for a good stallion, and take the risks of bad results; but a plan which has grown popular was adopted by the dealers to suit the circumstances of the farmer. Syndicates, of about 25 farmers or less, are formed, each member taking a £30 share of the cost of the horse. This is adapted to the farmer, and lessens his chances of losing much; while on the part of the dealer it proves even more satisfactory, as he is absolutely sure of getting his money, since practically every farmer can be depended on for the £30.

"Clydesdales predominate, there being fifteen of them brought in to one of other breeds. The Percheron, which was so largely bred in the States, is being rapidly replaced by the Clydesdale. The greater number of this class of horses are brought in from Iowa, which imports them direct from Scotland mostly. One dealer has said that the large number of Scotch people in the West greatly influences the importing of Clydesdales. There is a great demand for them, and it is increasing at a quick rate. From all over the province and the Territories comes the demand for these high-priced pedigreed horses.

"Messrs. Munn and MacGregor, of Brandon, made a splendid start some 15 years ago, by importing a score of high-class Shires, purchased at Lord Ellesmere's and other sales; and although there is a good demand for draught stallions of far less value than £500 in the newer districts, the shipment of non-pedigree and inferior sires of any breed would be sure to result in failure. There is, for the present, even a greater demand for big-boned, thoroughbred, hunter, hackney, coaching, and cob stallions in the western territories than for draught.

"The Horse Breeders' Lien Ordinance, which came into force in the Canadian North-West in 1899, provides for the registration of stud horses, and a mare or foal can be followed for a service fee, which takes precedence to mules or any other claim."

Bad Meat Farmer Fined £50.—Frederick William Tatam, of Hall Farm, Harpswell, near Gainsborough, Lincolnshire, was summoned at the Clerkenwell Police Court on the 31st ult. for depositing for the purpose of sale on December 21st at 95, Charterhouse Street, Smithfield, four quarters of beef which were unsound and unfit for food of man. George Billing, meat inspector, proved the seizure and spoke of the general condition of the meat. From its appearance he concluded that the animal—a heifer—had been killed when in a moribund condition. Dr. Newman, medical officer, said the entire carcase showed signs of general inflammatory disease, and was dropsical. There had probably been acute inflammation of the kidneys. The defence was that the meat had been sent to London by the defendant's servants and without his special knowledge. Mr. D'Eyncourt said the defendant either sent the meat to London wilfully or was grossly negligent. He imposed a fine of £50, with 10 guineas costs.



Carlisle Candlemas Hirings.—These quarterly hiring of farm servants were held at Carlisle on the 1st inst., and there was an unusually large attendance of all classes of servants. Farmers requiring their services, however, were not so numerous, and high wages being asked all round, business was dull. Owing to the high rate of wages recently paid for farm labour, farmers are now laying more land down to grass, and require less labour for ploughing, and more men are therefore seeking work. Up to £12 was asked for the quarter till Whitsuntide, including board and lodgings in the farm houses, but not more than £9 or £10 was paid for the best men, whilst boys and younger men were hired at from £4 or £5 up to £7, according to their experience and usefulness. Women obtained from £5 to £7, and girls from about £2 10s., for the quarter.

SULPHATE OF AMMONIA.

Incomparably the BEST and CHEAPEST form of Nitrogen and Ammonia.

PRODUCES LARGER CROPS THAN ARE OBTAINED FROM THE USE OF ANY OTHER FORM OF "ARTIFICIAL" NITROGEN.

See Reports of Experiments at Dalmeny, Woburn, Midland Dairy Institute, The Coachford Agricultural Society (County Cork), The Escrick and District Agricultural Club, The North Walsham and Aylsham Agricultural Society, The Yorkshire College Experiments.

See also Report of Root Show at Scottish National Fat Stock Club, which all the First Prizes in the Open Classes were awarded to Roots and Cabbage grown with Sulphate of Ammonia.

PRODUCES CROPS OF HIGHER FEEDING VALUE THAN ARE OBTAINED BY THE USE OF ANY OTHER MANURE.

See Reports of Analyses of Crops in Experiments at Dalmeny, Woburn, &c.

PRODUCES BETTER QUALITY OF MALTING BARLEY THAN IS OBTAINED FROM THE USE OF ANY OTHER MANURE TESTED AT ROTHAMSTED.

See Report on "Manurial Conditions affecting the Malting Quality of English Barley," in **Journal of the Royal Agricultural Society of England, 1897.**

Also Report of Barley Competitions at the Brewers' Annual Exhibition, Royal Agricultural Hall, London.

MOLASSINE MEAL

FOR

HORSES, CATTLE, SHEEP and PIGS,

A STAPLE FOOD, APPETISER & DIGESTER,

Replacing an Equal Quantity of other Food. Patented in all the Principal Countries in the World.

Old Rides, Eastchurch, Sheerness.

Dear Sir,—I have given the Molassine a fair trial, and find it a particularly good appetiser and food for **Store Lambs**; and my **Fat Beasts** (of which I tie up about 120 a year) **have never done so well as with a mixture of Molassine.**

Faithfully yours,
THOMAS HORNSPOOL
(Steward to Capt. G. L. Holford),
Equerry to H.M. The King.

Milton House, Rainham, Kent, Jan. 18, 1901.

Dear Sir,—I have given my Horses and **Turn Mark Ewes** a fair trial with your "Molassine Meal," and am well pleased with the results.

Yours faithfully
S. J. BRICE.

Bridgewood House, Burham, Dec. 31, 1900.

Dear Sir,—I have given your Molassine Meal a fair trial, and am pleased to say **I have never had my Horses in better condition than they are at the present time**: in fact, I have been working them very hard of late with my Drag-hounds, and the going has been extremely heavy. Please get me another half ton ready.

Yours truly,
BANKS W. BARLING.

Rainham, Jan. 10, 1901.

Dear Sir,—I have used the Molassine Meal which I had of you for my **Horses and Sheep** during the whole of the winter, and I must say that it makes them healthy, and gives them a very good appetite.

My sheep have done well on it, and I shall highly recommend it to all I know.

Faithfully yours,
W. DENNIS.

BEWARE OF IMITATIONS.

Price £6 15s. per ton
in quantities not under 1 ton.
(Quantities under 1 ton at the rate of ***7s. 6d.*** per cwt.)

F.O.R. at either LIVERPOOL or LONDON. A Sample Lot of 6 cwt. in 4 Bags of 1½ cwt. each delivered free to any station in England on receipt of remittance, ***£2 11s.***

Or Their Agents.

Gushmere Court, Selling, nr. Faversham, Jan. 15, 1901.

Sir,—**MOLASSINE MEAL.**—I have given this preparation a fair trial, and am pleased with the results. I first gave it to two **Farm Horses** that were out of condition, and in a few weeks saw marked improvement, and they look as well now as any of my horses, and appear to work much more cheerfully.

I am now trying Molassine on a yard of fatting Steers; they are doing very well, but the trial has not lasted long enough to say much about it yet.

Yours faithfully,
W. W. BERRY.

Allington Farm Maidstone, Oct. 4, 1900.

I cannot speak too highly of your Molassine Meal. **I tried it on all my stock, and can see a great improvement since using it.** Kindly forward me one ton to Maidstone, S.E. Railway, at your earliest.

J. EDMUNDS.

(Repeat order on Oct. 17 for one ton, to his other farm at Gillingham.)

The Manor, Borstal, Rochester, Jan. 16, 1901.

Dear Sir,—I am very pleased with the results produced by Molassine on the **Jersey Cow** I keep for the house; **she has made flesh, and kept up the quantity and quality of her milk. My lambs have all done well with it.**

Yours truly,
W. R. CRASKE.

TENDERS.

ETON UNION.
TENDERS FOR SEED POTATOES.

THE GUARDIANS of the above Union, will at their MEETING at the WORKHOUSE, SLOUGH, on TUESDAY, the 25th Instant, at 10 o'clock, a.m., receive TENDERS for supplying SEED POTATOES, as follows, viz.:—

10 Sacks Early Rose or Beauty of Hebron.
10 Sacks Dunbar Main Crop.
10 Sacks Puritans. 10 Sacks Imperator.

Tenders, together with samples, must be delivered at the Workhouse, Slough, addressed to the undersigned, not later than 10 o'clock, a.m., on the 25th Instant.

The Guardians do not bind themselves to accept the whole quantity from any person tendering.

R. H. BARRETT,
Slough, Clerk to the said Guardians.
F b. 11th, 1902.

BOROUGH OF FULHAM.

THE FULHAM BOROUGH COUNCIL is prepared to receive TENDERS for the supply of OATS, HAY, CLOVER, MIXTURE, STRAW, BEANS, BRAN, and LINSEED for about 70 horses in such quantities as may be required during the six months ending 29th September, 1902.

Tenders must be made on printed forms specifying conditions of contract, provided by the Council, sealed and endorsed "Tender for Horse Provender," and delivered at the Town Hall by 4 p.m., on Wednesday, the 5th March 1902.

The Council does not bind itself to accept the lowest or any tender.

By order, R. M. PRESCOTT,
Town Hall, Fulham, S.W. Town Clerk.

AUCTION SALE.

On THURSDAY NEXT, FEBRUARY 20th, 1902.—HARRINGTON HALL, SHIFNAL, about four miles from Shifnal Station, G. W. Railway, two miles from Coalport (Severn Valley Line), six miles from Bridgnorth, and 12 miles from Wolverhampton.

ALFRED MANSELL & CO. have received instructions from Mr. A. E. Mansell (who is settling in Tasmania) to SELL by AUCTION, on THURSDAY NEXT, FEBRUARY 20th, 1902, the valuable LIVE and DEAD FARMING STOCK, comprising—

476 SHEEP, including 96 Shropshire Ewes (in or with Lamb), and 380 Ripe Fat Wethers.

215 CATTLE, viz.:—117 Prime Fat Bullocks and Heifers, 80 Hereford and Hereford Cross Bullocks and Heifers (outlyers), 12 Blue Grey Heifers, 2 Cross-bred Heifers, 2 Hereford Heifers (in calf), Cross-bred Cow (in calf), Cross bred Cow (in milk), all of good quality and in nice condition.

8 Upstanding CART HORSES.
2 HACKNEY MARES, and 1 MULE.

Also a vast collection of AGRICULTURAL IMPLEMENTS and MACHINES, 900 extra strong IRON HURDLES (equal to new), Threshing ENGINE and BOX.

The Fat Cattle—including a lot of good Herefords, Hereford and Shorthorn Cross-breds and Polled Angus Cross-breds—are an exceptionally well-fed lot of Cattle, and having had ample time they have all their best points well developed. The Store Cattle comprise a lot of beautiful Hereford Bullocks and Heifers, also some nice Blue-Greys, all of which are outlyers in nice condition, with abundance of good hair. The in-lamb Ewes are a good class of farmers' sheep, served by good rams bred at Harrington. The Fat Sheep are extra good quality, ripe, and nice handy weights. The Horses are of a superior stamp, and comprise several young horses likely to grow into money. The Implements, &c., are a unique collection, and include all the most up-to-date and approved Implements adapted for modern farming.

Sale at 10.45 prompt.

Conveyances will meet all trains at Shifnal Station to take passengers to and from the Sale at a charge of 1s. each way; also the trains at Coalport will be met.

Catalogues from ALFRED MANSELL and Co., Auctioneers, College Hill, Shrewsbury.

Largest export flock of Shropshires in England. Sires used this season include four First Prize Royal winners. The 310 Guinea Champion "Royal Record," "Ashlyns Knight" (winner of Six Firsts and two Champions), "Shenstone Cardiff," and "Royal Cardiff."—For particulars apply to FRANK WEBB, Estate Office, Shenstone, Lichfield, or J. P. MILNE, Ashlyns, Berkhamsted.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J.A. is now booking orders. N.B.—Polled Angus or West Highland Heifers and Black-faced Gimmers, Ewes, Wedders, and Lambs for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

CATTLE FOR WINTERING. —J. A. will be glad to receive orders for the purchase of Cattle, which, owing to the shortness of straw in Scotland, can now be bought cheaply. A good profit should be the result either for feeding or wintering.

CATTLE AND SHEEP FOR WINTERING. E. GOODWIN PREECE, Live Stock Agent and Exporter, Shrewsbury, will be glad to receive orders for the PURCHASE of CATTLE and SHEEP, which, owing to the shortness of winter keep in the West of England, can now be bought very cheaply. A good profit is assured either for feeding or wintering.

Several lots of Shropshire and Clun ewes, Shropshire, Oxford and Lincoln rams, and cattle of various classes on sale, which can be seen by appointment.

Address, Portland House, Shrewsbury.

SEEDS, PLANTS, &c.

AGRICULTURAL TRANSITION STAGES.

In the article on "English Agriculture in the Reign of Queen Victoria," in the new volume of the "Royal Journal," Mr. R. E Prothero states that it was in a transition state when the reign commenced, and that the question is open to inquiry whether agriculturists are not now "passing through another transition stage, which, like its predecessor, may effect another revolution, and necessitate another social disorganisation." The contrast is in many respects a happy one, although the changes now taking place can scarcely be considered to be affected by such social volcanic eruptions as the magnitudinous ones which were on the eve of evolvement when her late Majesty ascended the throne.

Very true is the statement that there was agricultural distress in 1837, in which particular the two periods strictly compare, and farmers were crying in vain to the Parliamentary Jupiter to lift the waggon out of the rut for them. There had been several Committees of Inquiry and Royal Commissions on depression during the previous two decades. Agriculturists were crying out for more protection, but the legislature was about to take away from them that which they already had. But grand discoveries were being made in the arts and sciences calculated to revolutionise trade and manufactures. Steam was about to throw its girdle round the world to work wonders such as had scarcely ever been dreamed of by magicians. The Railway Age, with oceanic steam traffic and the multitudinous mechanical inventions actuated by the steam-engine which came in their train, upheaved Society from its very foundations a little before and immediately after the middle of the last century, and we can scarcely expect anything the like to happen again, unless, indeed, electricity should be so cheapened by some great discovery that industrial progress and social life shall be revolutionised thereby in the twentieth just as they were transformed by the steam engine in the nineteenth century.

When Queen Victoria came to the throne, the flail was in common use. Muck was the only manure, and the few auxiliary fertilisers employed were bones broken down by hand, with a little soot, shoddy, and some trifling waste articles from manufactures, except, indeed, lime, chalk, and marl. The land was virtually corroded by pauperism. The agricultural labourers had been in a state of semi-starvation for many generations. There were agrarian riots from time to time, for the suppression of which troops of yeomanry were organised in every district, but the poor were bound by iron bonds to Parishes, and were virtually powerless to escape from abject misery and social degradation. How different the state of things now that there is depopulation of rural districts, and the cry is heard from all quarters that the exodus to the towns will soon leave only the old, lame, and physically impotent to respond to urgent farming needs. The changes of from fifty to sixty years since covered the country with a network of railways which was what in reality burst the bands of settlement and made population migratory. Farmers, it is true, have lost their labourers thereby, but they have gained some sterling compensatory advantages, such as valuable, highly effective mechanical inventions for almost every operation connected with farming, greater facilities for marketing live stock, and also for producing more remunerative kinds of them. Long before the middle of the last century, and, indeed, previously to its commencement, there were as high-bred cattle and sheep in the country as any to be found to-day, but they

were few and far between. If anyone had a shorthorn herd in the West of England he had to breed in-and-in, it being impossible to send his cows and heifers to the sires of other herds. To this is due the circumstance of our best breeds having in the past been so intimately associated with particular localities, even shorthorns having been termed Durhams until recently. We owe also our lucrative exports of pedigree stock entirely to oceanic steam traffic and the railway system. No doubt there is the corresponding magnitudinous evil working the other way of foods of well-nigh every description, the products of foreign lands being poured into our markets for our home farmers to compete with, but we are not just now balancing gains and losses, but regarding the magnitude of the revolutionary changes. Truly may it be said that old things have passed away, and all things have become new.

What are the signs, then, which lead Mr. Prothero to make the inquiry whether the "transition stage" agriculturists are now passing through "may effect another agricultural revolution, and necessitate another social disorganisation." We confess inability to discover them, and we have searched carefully through Mr. Prothero's dissertation without finding any indication why he propounded it. The question was entirely outside the subject of the review, and the fact that we find "a marvellous progress in all the processes of agriculture, which has been effected in the face of heavy sacrifices and innumerable difficulties," brings us no nearer in sight of the revolution to be expected. Mr. Rider Haggard deemed agriculturists in a stage of transition also. But on the faith of several good authorities he unfolded the probability of a large increase of small holdings becoming the result of the evolution. The debate at the February meeting of the Central Chamber of Agriculture did not thoroughly confirm that view. Still, it must be admitted that the times are very trying to the big middle section of renting farmers which were everywhere found by Mr. Haggard to be only just holding their own—a class doomed to early extinction by many prophets. All those marvellous developments of progress of the Victorian reign, proud as we are of them, tend to the advantage of farm capitalists and large holdings. They render pedigree stock-breeding a remunerative means of emolument, cause farming to pay by keeping lands up to their maximum state of fertility, and by a lavish use of labour-saving implements and machinery make it easier to manage with scarcity of hands. But only co-operation, of a much more general and wide-spread nature than any hitherto exemplified, can by any possibility cause these grand advantages to be fully shared by the large important class who occupy from fifty to one hundred and fifty acres.

South Lincolnshire has lost one of its foremost agriculturists by the death of Mr. T. G. Widdowson, of Helpringham, near Sleaford, which took place on the 8th inst. He was a large landowner of Helpringham and Clipston, Notts, and also farmed an immense acreage.

Mr. John Rogers, well known in Bedfordshire agricultural circles, died on Monday afternoon, at his residence, Rawdon House, De Parys Avenue, Bedford. His death was not altogether unexpected, for he had been ailing for some years from the result of a severe fall sustained when out hunting, and his horse rolling over him. Mr. Rogers was born in April, 1839, and early in his career took to farming, but soon his natural ability asserted itself, and he became and remained an agricultural valuer. Mr. Rogers was for some years secretary to the Beds Agricultural Society, and he has also been a vice-president of the society, and also the Beds Chamber of Agriculture, whilst at all times he has accorded both institutions hearty support. He was connected with the Bedford Wool Fair for years, and any movement to benefit agriculture always met with his hearty co-operation.

By a Man of Mark Lane.

The receipts on account of Revenue from April 1, 1901, when there was a balance of £5,596,918, to February 8, 1902, were £112,891,202, against £101,930,213 in the corresponding period of the preceding financial year, which began with a balance of £3,517,047. The net expenditure was £169,074,577, against £158,262,992 to the same date in the previous year. The Treasury balances on February 8, 1902, amounted to £6,530,554, and at the same date in 1901 to £2,646,719.

Mr. MacIver, M.P., has given notice that when the Chancellor of the Exchequer introduces his financial proposals he will move "That, in the opinion of this House, the income-tax should be reduced by one-half, and that such additional revenue as may be required should be obtained by a tax of not less than five per cent. *ad valorem* on importations generally, and of not less than ten per cent. *ad valorem* on importations of manufactured goods, in each case subject to preferential advantages in respect of those of our Dominions, Colonies, and Dependencies which accord preferential treatment to exports from Great Britain and Ireland."

The Board of Trade Returns show that imports for January amounted to £30,131,348, against £45,987,516 in the corresponding month of last year, an increase of £4,143,832. The exports for the past month were £24,354,574, as compared with £24,753,531 in January, 1901, a decrease of £498,957, which is due to the fall in the price of coal. The total imports of sugar for January were 5,540,434 cwt., which is about double the quantity imported in the two preceding Januarys.

The new number of "Symons's Meteorological Magazine" contains an interesting account of the dust or muddy rain which fell last month in the south-west of England. It was noticed at many places in Cornwall and on the western side of Devon, over an area measuring, perhaps, 80 by 40 miles, and about the Bristol Channel over another some 60 by 30 miles. No information of its descent has yet been received from the intervening district, so the two falls may have been distinct, and they certainly were not simultaneous. At Oxford, on the morning of January 21, a singular appearance was noticed in the sky, which suggested the coming of a dust storm, but nothing actually came down. On the same day splashes of a muddy rain fell in the Scilly Islands; on the 22nd, after a warm misty day, with only a slight fall of rain, the glass and woodwork of greenhouses, etc., at Chewton Priory, were covered with a rust-coloured dust; on the 23rd, iron railings and wire netting at Barry Island were "painted" a "pale salmon-pink colour" with this fine dust; at Failand, near Bristol, frames, hedges, and gates were similarly smeared, and clothes hung out to dry had to be washed again. Quethwick had the same experience on the night of the 23rd, but here the material is described as "yellowish—not unlike Peruvian guano."

The material has been examined under the microscope, and is found to be mainly terrestrial dust, not of volcanic origin, generally similar to that of the blood-rain which fell so abundantly in Southern Europe last March. It cannot be attributed to any local cause, and must have travelled far; probably from some part of Northern Africa. During the days when it was falling a high pressure area lay over the Bay of Biscay and Southern France, but the wind over South-west England was more or less from the west. The dust, however, may not have been affected by the latter current until it began to come near the surface of the earth.

PRACTICE WITH SCIENCE.

The Needs of Rural Education.

Mr. A. Keen, of Cambridge, presided at a meeting of the Association of Directors and Organising Secretaries for Technical and Secondary Education, held on the 24th ult. at the Guildhall, Westminster, to consider the provisions of the Education Bill of the Government, chiefly in relation to the inclusion of Elementary Education within the scope of control by the County Councils, and delivered an address on "Rural Education," in the course of which he said there could be no doubt as to the very great and pressing necessity for legislation that would provide an opportunity for putting rural education into a more satisfactory condition. Whether elementary, secondary, or technical, it was equally backward. Many large towns had developed splendid systems of elementary education; in many centres excellent Secondary schools already existed; while in connection with every important industry Technical schools, equipped and staffed on the most modern and liberal lines, had been established. But in agricultural districts the Elementary schools had followed the lead of the towns in curriculum, and been taught by men not specially trained for rural work; and the Secondary schools had pursued a course which generally ignored agriculture and the sciences subsidiary and essential to intelligent practice. Whereas technical instruction had formed the foundation of the progress made in various manufacturing industries, particularly in Yorkshire and the West of Scotland for the last 50 or 60 years, and in some cases even longer, it was only yesterday that agriculture, the greatest of all industries, had received recognition; and only to-day was it beginning to dawn on the minds of authorities generally that a suitable and valuable foundation could and must be laid in the Elementary schools.

He regarded the schoolmaster as the most important person in any village. The unsuitability of past teaching was not his fault. Oftentimes he struggled hard against it, but he must comply with Codes and satisfy Inspectors. He had himself heard lessons on the cotton plant, cocoa cultivation, elephants and tigers given with great painstaking to children who could not identify an apple or a plum branch. The present system of rural education was wholly out of date, and suitable education would do more than anything else to stem the depopulation of our villages, although the operation would be slow. At the present time people blamed education as the cause of this depopulation, but they should rather blame the penny post, railways, and Disraeli's splendid police pensions. In all schools there should be a uniform and common course of instruction for all boys up to 14 and 15 years of age at least, and a great deal of what was now commonly called "technical education" in rural villages ought to have previously found a place in Elementary and Secondary schools.

What we wanted was (a) a system of suitable elementary instruction which should include practical work in every standard, common to both boys and girls in the lower standards, but varied in the upper, according to sex; (b) a good supply of Secondary schools at low fees; (c) a more limited supply of higher Secondary schools of the high grade grammar school type for boys and girls who intended to continue their education beyond the usual age; and (d) for the benefit of boys intended to be farm bailiffs and other rural workers there should be in every large county, and in every group of smaller counties, a farm school for boys of 15-16 years of age and upwards.

In rural districts pre-eminently one education authority was required. As to religious education in rural schools, he declared that Bible teaching was good enough for him, and he would have no sectarian teaching recognised in the official hours of the school. Not the least important duty of the education authority would be the provision of an adequate system of scholarships, and there should be a very liberal supply of scholarships from Elementary to Secondary schools, each covering free tuition and travelling expenses for at least three years, on easy conditions. He concluded by urging that there should be one authority for all rural education.

The following resolution was subsequently adopted:—"That this Association considers it imperative that the Councils of Counties and County Boroughs should at once be constituted the supreme supervisory and rating authorities in their areas for both elementary and secondary (including technical) education and should be furnished with adequate rating powers."

By a Lobbyist.

All felicitations to Mr. Jeffreys! I would that I could bring myself to think that the appointment of the member for the Basingstoke division to the eminent office of Deputy-Speaker of the House of Commons is of political moment—that it has, in a word, some significance for the agricultural interest. It has not. Mr. Jeffreys is, in a sense, the most distinctive figure among the agrarian members of St. Stephen's. However, this appointment is a tribute only to his personal influence—to his eminent character, to his dignity, and to his remarkable knowledge of Parliamentary procedure and Parliamentary regulations. In this it is fragrant—it is an evidence that the rural constituences of England send to the House of Commons men of as great intellectual parts as those who come from the bustling and hustling centres of life. Mr. Jeffreys will play his part well. He has an innate dignity which probably will be the best foil to the methods which the Irish legislators now apparently regard as supremest statecraft; he has, withal, a sympathy with the traditions of the House which will be the best buckler against any attempt to degrade it. At the same time, the appointment has, I repeat, no political significance. The election of one of the most prominent members of the Central and Associated Chambers of Agriculture to this position does not mean that the Government has any warmer sympathy with the legislative purpose of that body.

The position of Mr. Horace Plunkett, the Vice-president of the Irish Board of Agriculture, is still surrounded with a good deal of hesitancy and indecision. Do the Tory organisers intend to provide this eminent administrator with a seat in the House of Commons? If they do not, he will inevitably have to renounce a position in which he has been able to place Ireland under an incalculable obligation, and in which he has done more for the Irish tenant farmers than all the crowd of agitators of the last two decades. Mr. Plunkett himself now perceives this. Up to the present his absence from the House of Commons has not been a serious obstacle, by reason of the fact that his time has been fully occupied in laying down the lines upon which his excellent department must run. However, as Mr. Plunkett himself averred last week, we are on the eve of the introduction of legislative issues which must seriously concern the Irish Board. His absence from St. Stephen's, then, would possibly operate to the disadvantage of he Irish farmer, and he would certianly be unwise to assent to it. If it be impossible to find him a constituency, then let the position go to some other man, who will adequately reflect the purpose of the department. The absence of the only official properly equipped for indicating the position of the Irish Board on a question of moment to Irish agrarian economics, would be an unpardonable anomaly. "But why," asked an Irish farmer, of Mr. Plunkett a few days ago, "should not the party whips find you an English seat?" Why, in all sooth? There must be, on the eve of the distribution of Coronaton honours, not a few politicians anxious to place their party under some indebtedness to them. The endeavour of Mr. Horace Plunkett from the House of Commons—and official exclusion it undoubtedly is—is gravely unwise.

The possibility of providing sources of supply of British cavalry horses in Britain has deeply impressed the House of Commons. I see that the well-informed London correspondent of the "Birmingham Daily Post" declares that we shall see this anxiety given a disciplined character in the course of the next few weeks, and that it is already certain that this disciplined effort will have the prctical sympathy of some of the most distinguished men in British agriculture, and some of the most prominent men in British horse-culture. We find a justification for this effort in a confession which Mr. Brodrick made on Thursday. This confession is that the experience of the war has shown that British and Australian horses stand war-work—and altogether 59,800 British horses have been bought for service in South Africa — better than those from any other country, except South Africa. Mr. F. W. Wilson, one of the Norfolk members, who, although a newspaper proprietor, is as prime a judge of a horse as any man in the House of Commons, declares that not only have the British horses done their work better than those purchased on the Continent, but that they have enjoyed a longer life. Of course, this means that they possess a greater value than their Continental rivals. Mr. Brodrick does not at once assent to this assertion, because he is not possessed of official, authoritative information on the point. However, Mr. Wilson is persuaded of its truth, and, I believe, is able to back it up with definite statements from artillery and cavalry officers at the front.

Now, it is emphatically necessary that if, in connection with this matter, an attempt is to be made to capture a market which properly belongs to British agriculture and British horse-culture, that attempt should not be made in any undisciplined or haphazard fashion. The British ratepayer is not prepared to provide a market for the foreigner and to be done at the same time. The War Office, anxious to retrieve its position—and assuredly it would be impossible to parallel its sorry and ridiculous blunders—would be willing, nay anxious to conciliate, and while doing this, to re-establish itself. The moment has arrived for the preliminary steps to be taken in connection with the matter. May I make a suggestion? Would it possible for men like Sir J. Blundell Maple, who has certainly played a very patriotic part in this business, to, in conjunction with politicians like Mr. Chaplin, Mr. James Lowther, and Mr. F. W. Wilson, to hold conference with men of the type of Sir W. Gilbey and Lord Coventry? I emphatically say that to allow this opportunity to pass by would be an offence. Both the country and the House of Commons are sympathetic to the idea.

I must now frankly declare that, in my opinion the methods which Mr. H. R. Mansfield, the Liberal member for the Spalding division, is pursuing in connection with this horse-suppy question, is not the wise one. I do not wish over this business, that the dead past should bury its dead. I wish rather that the past should provide a lesson. The position is not in fact, an occasion for swelterng epithets and resounding adjectives. It is, indeed, only an occasion for a little business-like method. Money has been spent wastefully on the foreigner; the English farmer has not been sufficiently considered; if the money so lavishly spent on the foreign horse-raiser had been spent as freely on the English farmer—for remember it has altogther run to millions—he would be able to laugh at the idea of "distressed agriculture." All this is truly most excellent, Mr. Mansfield. If, however, the British farmer is to benefit from the position which has now been created for him he must indulge in something more effective than big-drum-political-beating. He must be practical and business-like. What steps does Mr. Mansfield propose to take in order that the British farmer and British horse-raiser may supply the British artillery and cavalry? It is all very well to call upon the War Office to buy of the British farmer and the British horse-raiser, but at least the War Office must be provided with assured and regular sources of supply.

As I am concluding my article I learn that the War Office itself looks with the utmost favour upon resorting to British markets. Mr. Brodrick is said to be the author of the change of attitude. I would to heaven, then, that the right honourable gentleman would not dissemble his love by such a cold-blooded austerity. It is true that a new avenue of rural trade is being opened out, but the rural districts ought to be encouraged to resort to it. They, as a fact, need this encouragement; and Mr. Brodrick's attitude does not provide it. Still, the point that he regards the suggestion of a horse trade with favour is significant.

Mem.—I hope it is not true that, as the London corespondent of the "Birmingham Post" says, the disciplined effort to which I have alluded has as its purpose the utilisation of places lke Dartmoor, Exmoor, and Cannock Chase as breeding centres. If this be so, then the new avenue of rural trade will have a very restricted character. It will simply become a trade for the utilisation of derelict spaces.

LITERARY NOTICES.

The stimulating and encouraging of intelligent study of Nature among the children in rural schools is an important part of the duties of the teacher in country districts. For the purpose of aiding teachers in this work the South Eastern College, Wye, has inaugurated "The Nature-Study Journal." The fore-word to the magazine is written by Sir William Hart-Dyke, M.P., and in the editorial the aim and object of the magazine is clearly stated. The publication will be the official organ of a society of rural teachers, the subscription to which is the contribution in turn to the magazine of suggestions for a "Lesson." We can heartily commend any attempt to stimulate the intelligent teaching of Nature-study among our rural schools, and particularly so when it is conducted on co-operative and sensible lines, such as laid down in the introduction by Mr. A. D. Hall. The secretary, to whom all applications must be made, is Mr. Lance Rawes, Send, near Woking, Surrey.

The new number of the Journal of the British Dairy Farmers' Association is a fairly good one, but the Dairy show of 1901 takes up a considerable number of its pages. It opens with an interesting description of butter factories in France by Mr. Granville E. Lloyd Baker, which is followed by a contribution by Mr. F. A. Hordern, who consider the Kerry as a Dairy cow. Then come three papers which were read at the Association Scottish Dairy Conference, viz., "The Pasteurisation of Milk for Sale or for Manufacturing Purposes," by Mr. James Stirling; "The Manufacture of Cheddar Cheese," by Mr. F. J. Lloyd, F.C.S., F.I.C.; and "The Supply of Milk to Large Centres," by Mr. C. B. Davies. The milking trials and butter tests of 1901 are separately and exhaustively dealt with; there is a description of last year's dairy show, and the display of poultry and pigeons at same, and a full list of the prizes in all sections; whilst under the heading of "Progress in Dairy Farming and Dairying," a number of interesting items dealing with various subjects are given.

The tenth annual report of the Technical Education Committee of the County Council of Cumberland is largely of a statistical nature, and shows the attendance and cost of the classes held during the session 1900-01. On various agricultural subjects there were given 1,136 lectures, and there were held throughout the county 109 courses of instruction in dairy work at various centres. The total expenditure in scholarships was £6,622, of which sum £35 was granted as the cost of one agricultural studentship, while 99 farm exhibitions of the value of £3 to £8 each were awarded.

A sixth edition has now been prepared and published of Mr. Martin J. Sutton's book on "Permanent and Temporary Pastures." This work is now entitled to rank as a standard work on the subject, fully deserving place in every farmer's library by its comprehensiveness and intelligent treatment of a wide subject. The present edition is beautifully printed, and bound with a number of fine plates of the principal grasses and clovers, while the text has been thoroughly revised and brought up to date, some important statistics added, and the section on temporary pastures extended. The book is published by Messrs. Simpkin, Marshall, Hamilton, Kent, and Co., Ltd., at 5s.

Mr. Henry Warren, the author of several books dealing with the inner workings of banks, has issued yet another one, which he calls "A Bee Among the Bankers." This work, like the others, illustrates the fact that Mr. Warren must have had a very intimate acquaintance with the management of banks, and he has some very strong remarks concerning their dealings with both customers and employees. The work is divided into two parts, the first telling how to increase your current account," and the second contains strong criticisms of the Australian, African, and Indian Banks in London. The work, which is worthy of being read by all who have anything to do with banks, is published by Messrs. R. A. Everett and Co., 42, Essex Street, Strand.

Those who regularly receive Sutton's Farmers' Year-Book will find in the current year's issue a considerable increase in the information compiled expressly for the service of agriculturists. It contains concise notes on clovers and grasses, and valuable hints on leys, temporary, and permanent pastures. Root crops of all kinds receive full consideration. There are also practical articles on mangels, swedes, turnips, carrots, and cabbages, with details as to the relative feeding and manurial values of various crops. The insect foes of the farm are fully described, and the most effective remedies suggested for their destruction. A number of reports are quoted of extraordinary crops which, during the past year, secured leading prizes in all parts of the country, and one of the most interesting features of the work is the admirable series of illustrations reproduced from photographs. Sutton's Year-Book also contains an excellent calendar for the current year, and a number of useful tables which must prove of great assistance to the farmer.

Messrs. Webb's annual catalogue of farm seeds for 1902 sowing is well got up and arranged, and possesses a number of capital pictures. We note with interest that this firm, which has been so long and honourably connected with the seed trade, has been strengthened by the addition of Mr. W. Harcourt Webb and Mr. E. Stanley Webb. These two gentlemen have been connected with the firm for some time, and now raise the total of partners to four. Messrs. Webb report that the past season has been very favourable for harvesting seeds, especially for mangolds and other roots, therefore various seeds of good quality may be purchased at advantageous prices.

"Kelway's Manual" for 1902 is splendidly produced and illustrated. Keats said of a thing of beauty that "its loveliness increaseth," and this is, we think, fully exemplified in the case of the book under notice. Apart from its artistic excellence, however, it is no less admirable as a catalogue, the contents being well arranged in sections and fully indexed, while the hints to gardeners on culture and arrangement should prove most useful.

Messrs. Dickson and Robinson, of Manchester, who are seedsmen to his Majesty the King, have issued a catalogue of agricultural seeds for the present year. It is not a large one, but still contains particulars, accompanied by illustrations, of all the seeds that a farmer just now requires, and as it is arranged alphabetically, it is very easy of reference.

Messrs. Toogood and Sons, of Southampton, have issued a comprehensive and well-illustrated list of farm seeds. The section devoted to pasture grasses has a distinct educational value, as not only are illustrations of the many various grasses given, but a brief and useful description is given of each variety.

An Echo of the Arsenic in Beer Scare.—The Court of Appeal gave judgment on the 8th inst. in a case arising out of the recent discovery of arsenic in beer. Richard Holden (Limited), brewers, of Blackburn, at the Manchester Assizes, sued Bostock (Limited), sugar refiners, of Liverpool, to recover damages for the loss of a quantity of beer brewed with invert sugar supplied by the defendants, which contained arsenic. Judgment was given for the plaintiffs for, in all, £1,980, and the defendants contested the decision of Mr. Justice Bilham as to two items—£50 which plaintiffs spent after finding their beer contaminated in printing notices and advertising that in future their beer would not be brewed with invert sugar, and £300, the amount which the plaintiffs would have realised for the beer they had to throw away. The Court held that these sums had been rightly allowed by the judge at the trial, and dismissed the appeal, with costs.

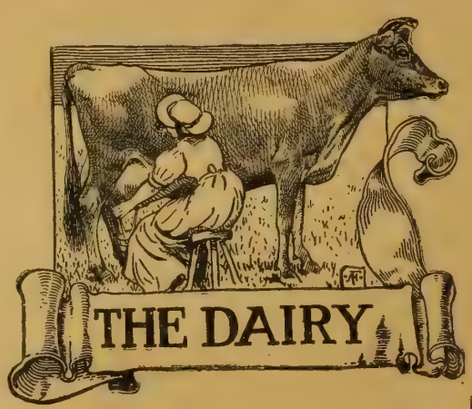
WATERPROOF SHEETS

FOR

THRESHING MACHINES, PORTABLE ENGINES, MILLER'S, CARRIERS, LUGGAGE CART COVERS,

AND ALL PURPOSES.

Illustrated Price List and Samples Post Free.



Waterproof Oil Sheets at 1/6 and 1/8 per square yard.

Chemically-Dressed "Peck" Cloth at 1/11 per square yard, complete with tie cords, lettering, &c. Thoroughly seasoned, ready for immediate use.

J. H. PECK & CO., LTD., WIGAN.

Established 1868. *Telegrams*—"Peck, Wigan."

Water in Butter: The Proposed Limit.

An interim report has been issued by the Departmental Committee on Butter Regulations, appointed in July last to "inquire and report as to what regulations, if any, may with advantage be made under Section 4 of the Sale of Food and Drugs Act, 1899, for determining what deficiency in any of the normal constituents of butter, or what addition of extraneous matter, or proportion of water, in any sample of butter shall, for the purpose of the Sale of Food and Drugs Acts, raise a presumption, until the contrary is proved, that the butter is not genuine."

The reason for issuing this interim report is explained as follows:—

"Having regard to the large number of prosecutions which had recently arisen in respect of an alleged excess of water in butter, and since the miscarriage of some of these proceedings was attributed to the absence of regulations—which must await the result of this inquiry—the committee considered it convenient to issue an interim report as soon as a conclusion had been reached regarding this particular part of the reference, and without waiting for the completion of the inquiry, or for the publication of the evidence."

The committee state that the evidence was overwhelmingly in favour of some official regulation as to the amount of water to be allowed in butter, but the real difficulty which the committee felt in arriving at a decision arose from the existence in the market of a particular article—Irish salt firkin butter—which, many witnesses declared, would be injuriously affected by any limit applicable to all other butters. It is a peculiarity of this butter, owing to the method of its manufacture, which has prevailed for many generations, that it frequently contains—and those interested in its production and distribution say it *necessarily* contains—a higher percentage of moisture than is found in any other butter coming into the market.

Some witnesses proposed that this difficulty should be met by the fixing of *two* limits—a higher one, which would probably have to be fixed at 20 per cent. for one class of butter—for which various definitions were suggested, but Irish salt firkin butter being exclusively in view—and, for all other butters, a lower limit, which was placed at from 15 to 18 per cent., the weight of evidence settling at 16 per cent.

Three bases for the division of butters under the dual limit system were suggested, *i.e.* (a) the percentage of salt in butter; (b) the trade description of the particular article in question; and (c) the price.

None of these classifications, however, appeared free from objection, and the committee was convinced of the undesirability, if it could possibly be avoided, of complicating the regulations by fixing a dual limit. The committee also felt that, given time and training, the remaining makers of Irish salt firkin butter would probably be enabled to fall into line with the vast majority of Irish butter producers, who can now with modern methods easily conform with any reasonable limit to the proportion of water in their butter; and this result would be accelerated in proportion to any further decrease in the demand for this special class of butter.

The committee moreover understand that vendors of this type of butter, containing water in excess of the proposed official limit, would be legally protected, provided that a sufficient disclosure is made to the purchaser. This consideration finally decided the committee to recommend a *single* limit, and to leave it to the vendors of Irish salt firkin butter to protect themselves in the simple manner indicated.

There then remained the question of the actual percentage of water which might be fairly adopted as the limit. The committee sought to learn from practical and scientific dairy farmers, agricultural experts, and analysts how far the amount of water was within the control of the maker. In the case of creameries and factories there was a general agreement that this question presented little difficulty. In carefully-made butters the proportion of water is found to range from 10 per cent. to 15 per cent. The difficulties mainly arose when it became necessary to take into account the position of small producers, with little knowledge, with unsuitable buildings, with rude appliances, and without access to sufficiently cold water in hot weather. After hearing a large amount of evidence on this point, the committee nevertheless came to the conclusion that a limit of 16 per cent. could safely be prescribed.

Were the limit to be placed higher than this the committee felt that the reputation of, and the demand for, home-produced in competition with imported butter must inevitably suffer. So far as could be learned no official limit to the proportion of water exists in butter-exporting countries; but it must be remembered that the industry in some of these States is controlled by inspection and branding, or the producers of butter are encouraged to secure a low percentage of water and a uniform standard of excellence by the general dissemination of information, and by educational and experimental means.

In the course of their inquiry the committee were informed that the incorporation or blending of water with butter intended for exportation to this country, in order to increase its weight, was at one time extensively practised in Hamburg and in certain parts of Holland. A modified form of this practice is now in operation in this country, and considerable quantities of a material known as "milk-blended butter," are now made by working milk into butter. As to "milk-blended butter," the committee is of opinion that the seller would be legally protected, provided that a sufficient disclosure of its real character were made to the purchaser at the time of sale.

The report concludes with the following recommendation:—"We therefore recommend the adoption of a limit of 16 per cent. for the proportion of water in butter to be fixed by a regulation under Section 4 of the Sale of Food and Drugs Act, 1899, and we make this recommendation on the assumption that butter containing a larger percentage of water than 16 per cent. will escape the operation of this limit provided that a sufficient disclosure is made to the purchaser."

"Mark Lane Express" Diary.

February.

18, 19. Show and Sale of Pedigree Aberdeen-Angus Cattle at Perth.

19. Devon Cattle Breeders' Society Show and Sale at Exeter.

19. Sale of the herd of Shorthorns, flock of Shropshire Sheep, and stud of Shire Horses belonging to Mr. A. Stretton at Wychnor, near Burton-on-Trent.

20 Sale of Lord Barnard's herd of Shorthorns at the Raby Home Farm, Staindrop, Darlington.

20. Show and Sale of pure-bred Aberdeen-Angus at the Agricultural Hall, Aberdeen.

20. Show of the Highland Cattle Society at Oban.

20, 21. Prize Horse Sales at Crewe.

21. Northern Counties' Breeding and Fat Show Club's Bull Sale at Inverness.

We learn that Messrs. Daniels Bros., Limited, the well-known seedsmen and nurserymen, have just been honoured by a Royal warrant appointing them seed growers to his Majesty the King.

The Cultivation of Maize.

As by discussion we diffuse knowledge, it is with pleasure that we have seen in these columns references to the article on the "Cultivation of Maize," that appeared in our issue of the 6th of January, and, further, to be able to place before our readers more particulars of a crop that could, with considerable advantage to our farmers, be grown in England. The cob sent by Mr. H. Hunt to us, which that gentleman states he grew in his garden, is a very fine specimen, and taken into account what our correspondent states in his letter, the variety originally came from South-east Europe, as it appears now to be becoming acclimatised, which would account for it having changed somewhat in size and colour from the original seed, unless by any chance Mr. Hunt obtained originally one of the small species of the 130 varieties we have evidence of being cultivated in Spain, the country to which corn was first sent from the New World. We communicated with Mr. Hunt, and he has kindly supplied us with a couple of maize cobs, grown by himself, and which are reproduced half their natural size on this page. With reference to the experiments of the late William Cobbett, Mr. Joseph Darby, just twenty years ago on the subject of "Green and Fodder Crops," thus wrote:—"As to maize, William Cobbett probably first propounded the idea that it might be successfully grown in this country, and one of his sons spent many years in endeavouring so to acclimatise a variety of this plant that the ripening of its corn might be a *fait accompli*, in the generality of English autumns. Experience proved his anticipations to be too sanguine, but the plant is likely to become worthy of extensive adoption for a far different purpose—to provide heavy crops of green forage for cattle and sheep at the latter part of August and throughout September and October." In this announcement we must take note of the value placed upon maize fodder as a green food for cattle in August and September and the month of October, but the writer of this article would like to draw attention to the variety of maize eminently adapted to the climate of this country that was grown by a Mr. Keene, who brought the seeds from the Pyrenees in the year 1847, where the seed had, in high latitudes, become acclimatised to such low temperatures as is experienced in this country, that it proved a most successful crop when sown in England. Mr. Keene introduced this kind of maize under the name of "Forty-day Maize," and from the result of the crops then grown in this country the question of whether maize as a crop can be produced in this climate is fully answered. In the MARK LANE EXPRESS, of the 20th ult., "J. D." requires information on practically the whole "botanical" life of Zea Mays, and in this connection most of the information that he requires will be found in an article, entitled "Maize, and its Uses," that appeared in the Journal of the Royal Agricultural Society of England, third series, Vol. x., part I., 1899. There are many seed growers and merchants and private individuals in more prosperous positions, who, no doubt, with perseverance, will succeed in placing a type of the maize plant that will mature sufficiently for use as a vegetable or a food for cattle as hay in England in our average summer, on the market, but it must be borne in mind that Zea Mays is not a cereal.

> "Maize in all its beauty,
> With its shining robes about it,
> And its long, soft, yellow tresses;
> Mondamin!

In "J. D.'s" letter maize, as a succulent food and a crop that yields abundantly is recognised but it is asserted that, "placed in the silo it cannot be until it ripens." Now, from personal experience of experiments, carried out to ascertain the value of this plant as a cattle food when green, just before the appearance of the tassel, in silk and in milk, as well as to ascertain its keeping properties at different periods of its growth, the writer cannot endorse this assertion. But in this direction the following data, representing the composition at two stages of growth of the maize plant, as analysed by F. T. Shutt, M.A., the chemist attached to the experimental farms under the Canadian Minister of Agriculture, is most interesting:—

	Stage of growth.	Water.	Dry matter.
Maize, average of 7 samples	Ears appearing	80.75	19.25
" " " "	About glazing	77.25	22.75

Composition of Dry Matter.

	Albuminoids.	Fat.	Fibre.	Carbohydrate.	Ash
Maize with ears appearing	9.17	1.08	26.98	55.60	7.17
Maize about glazing	8.28	1.45	27.36	57.58	5.33

Pounds of digestible matter in a ton (2,000 lbs.).

					Total.
Maize with ears appearing	25.58	3.10	77.16	143.91	256.31
Maize about glazing	27.41	5.00	89.68	175.77	297.72

The average in each case is from the same seven varieties of maize in the above table. Mr. Shutt, in his report on these experiments says that on account of the large yield per acre and the succulency and easy digestibility of the maize plant, it is one of the most valuable of all fodder crops, although low in albuminoids, requiring consequently the judicious addition of nitrogenous food to make it a nutritious and well-balanced fodder. In the above table the figures show that maize

MAIZE (half natural size),
GROWN BY MR. H. HUNT, NOWTON LODGE, BURY ST. EDMUNDS.

fodder at the "glazing" condition—that is, before it is ripe—contains about twice as much digestible matter as mangels, and about two-thirds as much as timothy and red-top grass cut at their best. From the analysis of two samples of this maize in the form of ensilage, taken 4th December and 5th March respectively, it was found that in composition to be fairly similar to the maize fodder from which it was made, and Mr. Shutt reckons from his experience that maize ensilage should contain from 250 lbs. to 300 lbs. of digestible matter per ton (2,000 lbs.), and its nutritive ratio should lie between 1:9 and 1:10.5. Our readers must not conclude from these remarks that maize destined for use as fodder should be cut before it has developed, for everything goes to show that the stalks of maize constantly improve until such time as the grain is formed, and the same is true, measurably, of all hay crops. The man who cuts half-grown oats, wheat, or lucerne for his stock wastes his labour, loses the use of his land, and cheats the animals to which the watery innutritious vegetable is fed, but the great value of maize as a fodder crop has never received full recognition by British stock-keepers. It is true that to get full advantage of its valuable qualities the silo is almost necessity, but wanting the silo it is yet possible in a fair autumn to do a great deal with maize as a hay crop by resort to the old-fashioned method of field-curing; however, with a good silo arrangement, such as employed in the United States, the crop can be gathered in and placed in the silo in the green state, which, considering the uncertainty of our late autumns, will be found a considerable advantage to English farmers, as the maize plant becomes more nutritious as it approaches the full development of its cob. Ordinarily the grain of maize reaches an advanced stage of ripeness long before the stalks and blades of the plant have ceased to be green and juicy, because of the heat at this period of its growth that prevails where it generally is cultivated, and the ears of the maize may, with perfect safety, be removed from the plant any time after the grain has become firm, a condition clearly indicated by the dense glazed look of the grain. If at this stage of ripeness the crop of maize is cut and stood on end in moderate-sized "stooks," the grain will ripen thoroughly in the course of a month, according to the weather, when ears can be husked and the stalks cured into fodder, and placed into a stack, or placed in the silo.

As regards ensilage-making, there still exists much misinformation, which is resulting in many more or less complete failures, but the fascinating subject of siloing is beyond the scope of the present article, except in a general way. For example, the silo, whether by this term is understood a masonry pit, a building above ground, or a system of powerful presses for use with stacks of green vegetables, must be such that it will more or less completely exclude the air from the contained fodder. Perfect exclusion of air is, of course, impossible, and, in fact, undesirable, inasmuch as a certain quantity of air seems necessary for the slow fermentation which goes on in the sweetest of silage. Maize silage, properly made, should, when first withdrawn, be of a bright straw or light green colour, and have an agreeable odour and slightly acid flavour. To obtain the desired result when the maize crop is required for silage purposes, *it should be harvested green*, but well matured, or, at any rate, if possible not cut until the seed is well advanced in the milk stage. With regard to ensilage-making it is well to point out to farmers that of all the work of the farm, unless the process is well carried out, it had better be left entirely alone. The above remarks dispose of "J. D.'s" question as to the employment of the American silo system for *green* maize, but it may be as well to point out, judging from the observations of the crops that have followed it when grown in this country, that maize does not appear to exhaust the land more than a crop of turnips. However, the following facts about the ash of the maize plant is interesting, as they relate to a crop from the Pyrenees seed produced in this country. This plant is of the small variety and matures very rapidly, and has the advantage of small grains which demand higher prices. The analysis was made to ascertain the mineral composition of the grain, of the stalks with the leaves attached, and of the pith or centre of the cobs in order to judge whether its larger production is dependent on more moderate requirements than in the case of wheat.

Percentage of water, ash, etc., in the different portions of maize plant.

	Water.	Ash.	Ash calculated on dry substance.	Sulphur on 1,000 grains undried.
Grain	9.25	1.37	1.51	2.05
Stalks and leaves	8.82	5.01	5.49	4.58
Pith of the cobb..	10.91	.50	.56	1.53

The ash of the pith is very small in quantity, being only 1-10th part that which is contained in the stem and leaves. These ashes consist of the following ingredients:—

Composition in 100 parts of the ash of different parts of the maize plant.

	Grain.	Stalks and leaves.	Pith of cobb.
Silica	1.55	27.98	26.35
Phosphoric Acid	53.69	8.09	4.37
Sulphuric Acid	traces	5.16	1.92
Carbonic Acid	—	2.87	7.46
Lime	.57	10.53	3.43
Magnesia	13.60	5.52	4.06
Peroxide of Iron	.47	2.28	.22
Potash	28.37	35.26	42.26
Soda	1.74	—	—
Chloride of Potassium	—	—	7.64
Chloride of Sodium	traces	2.29	2.28
	99.99	99.98	99.99

The first point to be noticed in the above table is that the phosphoric acid of the ash of the maize grain considerably exceeds that which is found in the ash of wheat, whilst the quantity of potash and of magnesia are very much the same in either case. The *mean* proportion of phosphoric acid in wheat ash is 45 per cent., but, on the other hand, maize only contains 1.37 per cent. of its weight of ash, whilst wheat has a mean mineral matter of 1.67 per cent. With the above analytical facts, and the weight of the crop from one acre of land, it is a matter of easy calculation as to the relatively exhausting or non-exhausting character of maize. The aggregate maize crop in England was about from 2½ to 3 tons per acre in

the following proportions after three months' natural desiccation :—

	lbs.
Dry leaves	937
Envelope of the seed head	312
Stalks with the roots	1,250
Pith of the seed head	625
Six quarters o. grain	2,880
Total	6,0004

In comparing the mineral composition of maize with that of wheat, all notion of attributing the relative produce of the two plants to their mineral peculiarities must be abandoned as—

A crop of 28 bushels of wheat carries off of phosphoric acid :—

	lbs.
In the grain	about 13
In the straw	about 7

And of potash—

	lbs.
In the grain	about 9
In the straw	about 14

But, in conclusion, we must point out that there is no species of cereal that manifests itself under such varied forms, sizes, and colours as the maize plant. Varieties are met with exhibiting every grade of size, colour, and conformation, caused by climatic influences, selection, cross-fertilisation, and cultivation. And, according to the soil, use it is intended to put the plant to, whether as vegetable for man or fodder for cattle, so must the seed be selected in this country.

Farmer Imprisoned for Cruelty to Horses.—John James Reynal Adams, farmer, of Hockliffe, near Leighton Buzzard, was, at the Woburn (Beds) Police Court, on Friday, committed to a month's imprisonment for systematically starving two horses to the verge of death. He was also ordered to pay £2 7s. 6d. costs. The accused had been twice previously convicted of similar cruelty.

Diseased Pigs at the Central Market.—At the Guildhall on Monday, George Murton, a farmer, of Denver, near Downham, Norfolk, was summoned for sending the carcasses of four pigs which were diseased to the Central London Market intending them for sale as human food.—Mr. Vickery, Assistant City Solicitor, prosecuting, said the meat when it reached London was in a very wet condition, the animals having suffered from some inflammatory disease, and the carcasses were in a state which rendered them totally unfit for the food of man. The carcasses were seized by Inspector Terrett, and, upon inquiries being made, it appeared that the defendant was the owner, and that he assisted in killing and dressing the pigs. The carcases were packed warm, which was a most unusual thing to do. This was a case of gross ignorance and carelessness.—Other evidence having been given, Sir Joseph Savory said that from the evidence it was quite clear to his mind that the defendant knew the state of the meat. Had it not been for the vigilance of the sanitary officers, great injury might have been done. He fined defendant £5 on each carcase and costs—in all, £23 10s.—Defendant paid £10 on account.

More Red Herrings.

The prospect of another Pure Beer Bill getting actually before the House this session is causing its opponents to bestir themselves, so we consequently see brewers' societies taking active measures. Of the general question it is not necessary to speak at present; the practical point that needs prompt refutation is the direct statement that any Bill similar to the one drafted last year will be harmful to the British barley grower, as it will encourage the use of foreign grain and increase the importation of foreign beer.

Both these assertions are baseless, but it is a grave misfortune that a large number of the friends of the measure in the House believe the statements made, and therefore fear that in doing anything to interfere with brewers' malpractices that they will hurt the agricultural interest.

Foreign Barley.

has come over to this country and been generally malted for many years; in fact, a large quantity had special exemptions, permitting it to be malted by weight instead of measure, long before the repeal of the Malt Tax. But because a sugar maker told the Arsenic Committee that brewers who never in the course of their innocent lives used foreign barley would most assuredly have to do so if they were prevented using sugar by this wicked Bill, there has been a general stampede, and the brewers, finding it takes, are determined to play the card for all it is worth.

The Imperial idea also is requisitioned to keep us from the ill-effects of foreign beer.

Both arguments are utterly absurd, and it is only a further proof of the sturdiness (or want of it) of those who champion farmers' interests if they permit such claptrap to influence their action in the least.

Brewers' Emphasis,

The assertion so late in the day, that they will be driven to use foreign barley against their will sounds very curiously when it is so well known that they have persistently used all they could get for many years past. Indeed, many brewers have advisedly done this, not for initial chapness, but to keep down the demand for home produce and consequently to keep the average price at the lowest point obtainable. Yet now they try to pathetically plead that they do this forsooth "because of the constant attacks made upon us by the agricultural interest, as we are, and ever must be, among the best customers of the farmer."

Customers who contrive by the aid of substitutes to drive down the price of home grain below the cost of production only make themselves a laughing stock if they prate of their superlative goodness. Yet who, really knowing the subject, can think differently?

Hop Substitutes.

are actually referred to in the Brewers' circular with great unction Recently everyone using these things have been ordered to make entry of them. Now, the good brewers say we do not use any, and they have the temerity to assert that it is referring to the records at Somerset House. It open to anyone to verify their statements by has long been claimed that a simple and effective stop to the use of such things would be to compel a declaration of use. It is tried, and now the brewers wish to triumphantly claim that the paucity of entries is proof of their own goodness, a virtue which has always been theirs.

When we get a declaration of the use of other substitutes in a form to bring it home to the minds of consumers we shall also be again told they are not used. There is nothing to show the country of origin of malt. Consequently, brewers try to pose as martyrs, driven to use foreign barley against their will by the

Constant Attacks

of farmers. It would be very useful to know how much foreign barley has been malted during the past ten years. Very few people have any idea, and perhaps it will be another iniquitous type of persecution to say anything about it. Still, the fact remains, and deserves to be put clearly on record that the constant attacks by farmers are directed solely against those who use improper substitutes for barley malt in beer, and never a word of complaint is made, even when farmer's agitators know, and have known, perfectly well for many years, the actual facts of the case.

Members of Parliament are funny folk and easily frightened, so this cry of bogey may scare them for a little, but when they get the other side of the story told them it will be well to bear in mind it was the assertions made by brewers that led to the mischief, if any, that may arise from this wicked and unseemly threatening.

The Ownership of Fences.

The case of the Earl of Craven v. Pridmore and Others was heard in the Court of Appeal on the 1st inst. by the Master of the Rolls and Lords Justices Romer and Mathew. This was an appeal by the plaintiff, from a judgment of Mr. Justice Ridley, who tried the action at the Warwick Assizes in the spring of last year. The plaintiff sued the three defendants for trespass committed in cutting down and carrying off certain trees situated in two fences, which were the boundary fences between land owned by the plaintiff, which was let to a tenant, and land of which one of the defendants, Mr. Pridmore, was the tenant, belonging to the other two defendants, the Rev. Samuel Garrard and Mr. J. Brown. The value of the trees was agreed at £8, but the question to be determined was the ownership of the fences. At the trial evidence was given that the defendants had for many years repaired the fence and cut trees in it, but those acts were known only to the Earl's tenant and not to the plaintiff.

The Master of the Rolls, in giving judgment, said Mr. Justice Ridley had entered judgment for the defendants on the ground that the acts of ownership over the fence that the defendants had exercised rebutted the presumption that the fence was on the plaintiff's land. In this case the edge was on the side of the ditch belonging to the Earl of Craven ,and it was admitted that if the presumption in the circumstances of this case applied a trespass had been committed. An important fact in support of the plaintiff's contention was that on the discovery of documents the defendants produced, along with other papers, a map, bearing the date of the year 1856, and this showed the boundary of the defendant's land coming up to, but not beyond, the edge of the ditch. The defendants' evidence as to acts of repairing the hedge was not sufficient, in his opinion, to displace the plaintiff's evidence of ownership. The defendants' evidence on this point seemed to have been of a very neutral character. In his opinion, the appeal should be allowed.

The Lords' Justices concurred, and judgment was entered for the plaintiff for the agreed value of the property destroyed, £8, and costs.

Milk Cases: Wilts Farmers Heavily Fined.—At the Brentford Police Court, on Friday, Stephen Gay, of Malmesbury, Wiltshire, answered four summonses—one for false warranty and three for adulteration of milk sent to Ealing, the percentage of added water in one case amounting to 34 per cent. Mr. Brain, another Wiltshire farmer, answered three summonses for selling milk deficient in butter-fat, *i.e.*, skimmed milk. Gay was fined £20 and costs in one case, £10 and costs in two other cases, and £10 inclusive on the fourth summons. Brain's fines were £10 in each case—plus costs in two. Altogether the fines imposed amounted, with the costs, to exactly 100 guineas.

Warwickshire Farmers and the Price of Milk.—At a recent meeting of the council of the Warwickshire Farmers' Association, it was reported that a practical attempt had been made to deal with the difficult question of surplus milk, and a society was in course of requisition for the purpose of running a milk-distributing factory and creamery. The prices of milk were fixed at 7d. and 9d. per gallon for Birmingham, and 1s. 3d. and 1s. 8d. for London, and it was decided to confer with the Birmingham Dairymen's Association on the subject of an improvement in the wholesale prices of milk, owing to the increased cost of feeding-stuffs.

Home Notes.

The Borough

was busy last week, a wave of increased energy having affected the buyers, who have in many cases been persuaded to advance their offers, and in some instances have yielded to the higher rates demanded by holders. The market may therefore be described as being in a healthy condition, if we are able to recognise as health the first feeble efforts of a sick man to raise himself from the bed on which weakness has so long detained him. Unfortunately, there are thus far but few signs of actual strength, although I am able to record the fact that profits were made last week by earlier buyers, who have transferred their purchases to other hands. It is, of course, very satisfactory to speak of the renewal of life and vigour in a patient whose previous condition has almost suggested the banishment of hope; but, while I heartily welcome the more favourable indications of our market, I am bound to seek for the causes of it, which do not appear very plainly on the surface. If I could think that the present activity is created by the pressure of actual consumption of our product, I should rejoice exceedingly. In such a case there would be good reason for confidence in our future. On the other hand, if the brewers are already well stocked, and are only tempted to buy further by the low prices now current in order to provide against distant but possible contingencies, there is not much comfort to be drawn from the situation. I have no desire to write in pessimistic strain, and can safely appeal to my readers for evidence that my temperament is generally rather sanguine than otherwise, but nevertheless I am bound to repeat my warning of last week, that we must not be led by present circumstances towards a "false estimate" of coming events. I fear there is no doubt that brewers are now providing themselves with a weapon which they will not hesitate to use to our future detriment, and that unless English growers are wide awake to the danger that threatens the life of their industry, wounds will be inflicted from which they cannot recover.

Planters can defend themselves

if they adopt the only effective means at their disposal. The output of English hops must be reduced if we are to retain control of affairs. Some of my correspondents are of opinion that reduction of acreage is not advisable, and that the abolition of washing hops in case of an expected severe attack of blight should rather be determined upon. Others advocate neglect of cultivation, or the limitation of expenditure in manuring. Whatever scheme may be adopted, the object to be accomplished must not be lost sight of. Another crop approaching that of 1899, or that of last year, will certainly bring absolute disaster to many of our growers, and the entire future of the industry will be seriously imperilled thereby. Even a moderate yield for one year can help us but little, therefore we are driven to the conclusion that some permanent defence against present and future dangers must be found. The advocates of this imposition of an import duty on foreign hops are numerous, and I am prepared to add my voice to theirs in asking the Government to consider our claims to such protection. A letter has recently been addressed by the Council of the N.A.E.H.G. to the Chancellor of the Exchequer, suggesting that, in raising the funds for the prosecution of the war in South Africa, he should help the nation and ourselves by an import duty on hops of 40s. per cwt. I trust this appeal may be effective, but I cannot advise English growers to depend upon its realisation. The real protection rests with ourselves. We must more closely adjust the supply to the demand. Our annual production must, by some means, be regulated, so that it shall approximately meet, and not exceed, the requirements of consumers. To arrive at this point, assuming the average supply from foreign sources continues to come forward, we should not grow more than 400,000 cwts. of English hops per annum. If this annual average can be permanently arranged, and if the quality of this limited quantity can be secured, we need not fear that we shall suffer from the losses we have lately sustained, but we may confidently anticipate a prosperous series of years for all concerned.

All official reports and notices of the National Association of English Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interes and benefit to the member of the society.*

Cold Storage in the Law Courts.

An action was brought last week at Worcester by Mr. W. H. Davies, a well known Herefordshire planter, against the Worcester Cold Storage Company for damage to hops. The evidence showed that the hops were of the 1899 crop, and that after being in cold storage for several months they had become "crushed" by damp, and were otherwise damaged by the decay of the cloth of many of the pockets. The damage was admitted by the defendants, who traced it to the incursion of rats, which had penetrated the floors and walls of the storage room to such an extent that the admission of the warmer external air had caused the deposit of moisture upon the hops. The main question at issue was the assessment of the damage, and to decide that point Mr. Justice Phillimore and a special jury were engaged for two days. A counter claim by the Storage Company for rent was also included. The result can hardly have been satisfactory to either party. Each obtained a favourable verdict, but neither was awarded the whole amount claimed. It would certainly have been a wiser course to have submitted the case to arbitration. Only a tithe of the expenses would then have been incurred, and both plaintiff and defendants would have been better satisfied. The efficacy of cold storage was not brought into question in the course of the action.

Foreign Notes.

Nuremberg.

A slight diminution of the volume of business is perceptible, inquiries from consumers being somewhat less frequent than during the preceding fortnight. This comparative calm is not attributable to any cessation of demand, but rather to the fact that the market is practically cleared of attractive qualities. New arrivals being generally of the inferior grades, have not assisted business, and a holder of any lots that can be classed as good are wililng to wait for the advancement of values, that they confidently expect, they do not run after buyers. Under these circumstances the previous firmness of quotations is well maintained, except for the very poorest sorts, of which there are considerable quantities in stock, that will not be moved until the necessities of brewers compel them to operate in this direction. Export dealers are taking small lots of the lower qualities at 45s. to 60s., but this department of the trade is very limited, and at present does not seem likely to increase.

Latest Approximate Quotations.

for first qualites are as follow:—Market hops, 70s. to 80s.; light Spalts, 85s. to 100s.; Hallertaus (unsealed), 90s. to 100s.; Hallertaus (sealed), 100s. to 110s.; Wurtembergs, 80s. to 95s.; Badens, 90s. to 100s.; Polish, 85s. to 90s.; Alsatian, 75s. to 80s.; Saag, 100s. to 110s.; Auschas, 85s. to 105s.; Galicians, 70s. to 90s.

Belgium.

Quotations on the Brussels Bourse are very firm, and are gradually advancing, Alost 8 marks being figured at 46 francs for prompt delivery, and 47 francs for March and April. Poperinghe town hops are held at 45 francs. Although there is not a great amount of business being done at the moment, the outlook seems to be favourable to further improvement in general values. It is estimated that the unsold stock of the Poperinghe district does not exceed 30,000 pounds, and holders are inclined to resist current offers, as they feel convinced that higher prices will soon be obtainable. Such small stocks at this season are very exceptional.

Belgian Imports and Exports

for the year 1901 are officially returned as follow:—

	Cwts.
Imports, 1,729,863 kilos, epual to about	34,600
Exports, 1,017,296 kilos, equal to about	20,300

Comparing these figures with those of the previous year, I find that the imports have fallen off by over 600,000 kilos, and exports have increased by about 150,000 kilos. As usual, the main bulk of hops imported were supplied by Germany, the total received from England being about 2,300 cwts., and less than half the quantity shipped to Belgium from our market in 1900. Direct trade with the United States has ceased; there is not a single entry in 1901, though in 1899 this business had attained a somewhat important position. Possibly some American hops still find their way into Belgium through English ports. The largest half of Belgian exports are sent to France, the quantity we received during last year being only about 1,500 cwts.

Hop Movements in France.

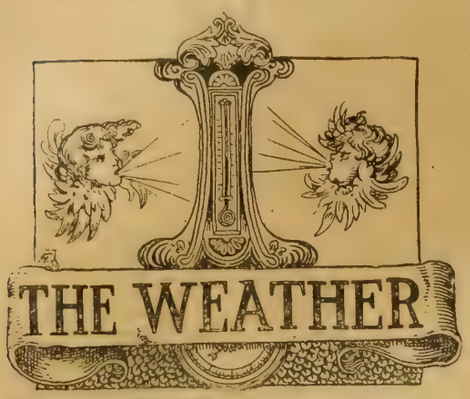
According to recent returns the French import and export trade for 1901 gave the following results:—

Imports for French consumption.....	43,258 cwts.
Exports of native growth	1,932 cwts.

Very little difference in the imports between the last and the two preceding years, but the exports have fallen off considerably. England holds only a subordinate position amongst the sources of supply of hops for French consumption.

America.

Firmness and general buoyancy are the chief characteristics of the New York market at present. Practically the whole of the last crop has passed out of first hands; the future is therefore under the control of dealers, who are naturally inclined to make the best of their opportunity. An advance of one to two cents per lb. has recently been established on all qualities, and indications are not absent that this movement will continue. I am prepared to hear at an early date that the currency for choice hops has arrived at 20 cents. The position of the market is the best possible proof of the shortage of last year's crop, especially as the internal revenue returns show that the consumption of beer is diminishing month by month to a remarkable extent. In December, 1901, the receipts from the beer tax were more than half a million dollars less than in the corresponding month of the previous year, showing a reduction of fully 10 per cent. But against this appears the reduction of the receipts of hops at New York, and the exports therefrom since September 1st of last year, these totals showing that the volume of business in each return is only a little more than half of that transacted a year ago. The general position of affairs points very distinctly to increased strength in hop values as the spring opens.



American Opinion.

The following letter from Tacoma, Washington, referred to in my report of the council meeting of the N.A.E.H.G., is, I think, sufficiently inteerstng to be printed *in extenso*, and I earnestly commend it to the attention of my readers:—

"We enter the new year with a good, healthy hop market. After a long period of depression, the market has suddenly turned, and is now advancing. The change is attributable to several causes—the main one of which is the anxiety of 'short' sellers to cover future sales. Quite a few hops are in the hands of speculators. These hops are practically out of the market, and consequently those who are forced to buy to fill sales must go to the grower. The stock in first hands on the coast is in very narrow compass, and the remaining holders, as is usually the case, are chronic holders, and generally several cents above the market. These conditions have forced the present purchasers of hops up as high as 11c. and 11½c. during the past two weeks. 12½c. and 13c. have been offered for two particularly fine lots. To strengthen the situation a good demand from brewers has come up. It is a well-known fact that several large dealers have sold heavily at low prices, and are not yet fully covered. Many of their sales are for January and February shipment. Some predict that there will be a big scramble for hops at the end of January and February, and that prices are certain to advance, possibly to 15c. by the end of next month. In any event, it is a certainty that the short sellers have the worst of it at this writing. They are eager to buy, but cannot get the goods except at prices which would mean a heavy loss.

"The crop of the U.S. for 1901 was as follows:—New York, 65,000 bales; California, 48,000 bales; Oregon, 62,000 bales; Washington, 32,000 bales; total, 207,000 bales. The following are still in first hands:—New York, 7,500 bales; California, 6,500 bales; Oregon, 3,000 bales; Washington, 2,300 bales; total stock remaining in growers' hands, 19,500 bales.

"We have read with interest your articles in the MARK LANE EXPRESS, in which you strongly urge the hop-growers of England to get together and outline some plan tending toward a reduction of the present acreage there. We think the idea a good one, and one which our growers could with advantage follow, as, with normal conditions here next year, Oregon should produce from 100 to 110 thousand bales, California 50,000 bales, Washington 40,000 bales, New York about the same as last year. Oregon will have at least 2,000 acres of hops which will come into bearing next year. With even a fair crop in England, the outlook is certainly not very encouraging for the coming season. The hop industry of the world is now facing a crisis, and unless some radical and immediate means are adopted, looking to a reduction of acreage, we can see nothing but chaos ahead. We presume your hop-raisers now see the folly of their actions last year, when they picked thousands of hundredweights of absolutely worthless hops, which crushed the market not only last year, but for some time to come. The effect of this has been felt in every hop centre of the world, but nowhere with such rigour as among your own growers. We wish you success in your laudable efforts to place the industry on a profitable footing again by a general reduction of acreage."

Monday (February 10th).—Snow showers were experienced again at many places in our Islands, especially in the northern and western districts. The conditions were generally complex, but the type of weather was chiefly anti-cyclonic, although the barometer was everywhere much below the average. The winds were, for the most part, northerly, but they were very light. Sharp frost occurred in Scotland and over the central parts of England during Sunday night, and the sheltered thermometer fell below the freezing point over nearly the entire kingdom. The highest temperatures were everywhere low, and in places it was freezing throughout the day. There was a sharp frost in London early in the morning, and the highest temperature was 34 degrees.

Tuesday (February 11th).—The weather continued very cold over our Islands, and snow showers were again experienced at a few places in the west, although the weather was very fine in most parts of the country. Snow had fallen generally in the north and west since Monday morning, but the measurements when melted were small. The winds were chiefly westerly, but they were very light. There was a very sharp frost during Monday night, and in the northern midlands the sheltered thermometer fell nearly 20 degrees below freezing point, while in Scotland the temperature was as low as 20 degrees. The mid-day temperatures were again very low, and in the east of England frost continued in places throughout the day.

Wednesday (February 12th).—The weather continued very cold over the whole of our islands, and fog was prevalent in the South-East of England. There was a further fall of snow at several places in the North and West. The winds were light, and very variable in direction. Frost occurred during Tuesday night over the entire kingdom, and in the Midlands the sheltered thermometer fell more than 20 degrees below the freezing point. In Ireland the weather was unusually cold, the thermometer indicating several degrees of frost at the coast stations. The mid-day temperatures scarcely touched 40 degrees in any part of the kingdom.

Thursday (February 13th).—The weather was again very cold over the whole of the British islands, and snow showers were reported at a few places in the north and west. Snow was measured in the morning, as the result of the fall in the preceding twenty-four hours, in Scotland, and in the North of Ireland. The winds were chiefly light from the northward, but at the entrance of the English Channel a fresh breeze was blowing from the north-east. A very sharp frost occurred over England during Wednesday night, and in many places the thermometer fell as low as at any time since the severe winter of 1894-95. At Penrith the temperature in the screen fell to four degrees, or twenty-eight degrees below the freezing point. The cold was severe in nearly all parts of the kingdom. At Liverpool the sheltered thermometer registered fifteen degrees of frost, and in the South of Ireland the temperature was nearly as low as in the great frost seven years ago.

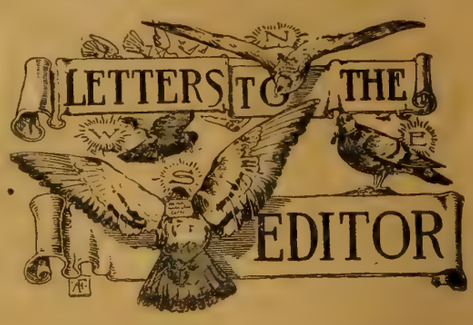
Friday (February 14th).—A shallow cyclonic disturbance was passing to the eastward across Scotland during the day, and snow showers were experienced at many of the northern stations. The winds were generally light to moderate in most parts of our islands, and the direction was mostly north-easterly in England. Temperature had risen somewhat in most parts of Great Britain, although the thermometer was still much below the average. In Ireland the cold was still intense, and at Parsonstown the sheltered thermometer indicated fifteen degrees of frost, and it was still freezing in the morning at the Irish coast stations.

Saturday and Sunday (February 15th and 16th.— Temperature had risen rather briskly in most parts of the British Islands on Saturday morning, and a thaw became fairly general during the day, the thermometer in many places exceeding 40 degrees; but in the East of England the highest readings were only a few degrees above the freezing point. A sharp frost set in again during Saturday night, the sheltered thermometer falling about 10 degrees below the freezing point in many parts of the kingdom, and in the South-East of England the cold was very severe. The weather was very clear during Saturday night, and in the southern suburbs the thermometer in the screen fell to 14 degrees, which is the lowest temperature in any winter since 1895, and that is the only year with as low readings in February since 1856.

The Severe Weather.

Heavy falls of snow and severe frosts have been experienced throughout the country during the past week, and in many instances deaths from the cold have occurred amongst both men and beasts. Stock-breeders, especially breeders of sheep, have had a very anxious time of it, whilst generally agricultural work has been at a standstill. In North Wales the weather has been very severe, the several heavy falls of snow and hailstones practically isolating the mountainous districts. Here large numbers of sheep have disappeared under the snowdrifts, and flockmasters of the district report it to be the most disastrous season they have had for some years. In the Westmoreland hills, too, sheep-breeders have had a most trying time, the snow lying to a considerable depth.

The worst weather of all, however, has been experienced in Scotland, where heavy snowstorms have been followed by the severest frost experienced since the great frost of 1895. The thermometer has here run down to zero at several places, whilst on Monday, just outside Langholm, it went a degree below zero, while yesterday 27deg. of frost were registered. Reports from the hill districts show that flockmasters have every reason to be anxious as to sheep stocks. The ewes are heavy in lamb, and are in poor condition to undertake the duties of motherhood, having been weakened by the previous storms this winter. Snow has been over a foot deep in many places. In Dumfriesshire the season is the most disastrous that sheep-owners have experienced for a decade, some of the farmers having lost as many as 250 animals in a single night. In the Mull of Kintyre no fewer than three shepherds have died within a fortnight from the cold.



THE GARDEN.

Since writing last the frost has broken up to some extent, and again set in with still greater severity, though, fortunately, unaccompanied this time by the bitter north-east wind of the previous week. The weather generally is finer and brighter, too, and the days are certainly lengthening out considerably, while the frost will doubtless benefit the land and prevent the growth of fruit trees, as well as of vegetation generally, getting into an unduly forward state. But after so long a continuance of mild weather one seems to feel the cold rather severely.

Do not attempt to work the ground in any way while frozen to any extent, though the hardened surface affords a good opportunity to get manure wheeled out on to plots to be planted with potatoes presently. Where the ground has not yet been broken up there is, however, no valid reason why it might not be thrown up into ridges with a fork, and the frost thus enabled to act upon the soil better, but do not bury any of the frozen clods, and leave the surface as rough as possible.

Even if possible it would be very unwise to attempt to plant any potatoes under the present conditions, although, where an early supply is looked for it is nearly, if not quite, time that at least a few rows were got in. If the weather should, fortunately, break again soon, get a few rows planted on a warm south border at once, but failing this it will be advisable to get two or three good-sized frames (preferably over a mild hotbed), or a few lights of a low pit, with or without a little artificial heat, filled. This might be done at once if convenient.

Indoors, the earliest-sown tomato plants ought to be ready for pricking out by this time, and as a rule the sooner this is done after they have formed the first pair of proper or rough leaves the better. If the plants stand thinly in the seed-pan or box, however, and only a small number are required, they may, however, be allowed to remain a little longer—though not till they become crowded and "drawn"—and then transferred singly to small pots. Keep them moderately warm and close for a week or so, after being either pricked off or potted, but always in full light and near the glass. Now is a good time to sow seed of a good hardy variety for outside cropping, though any time up to the end of March will do; some advise sowing about the middle of March, but to get good, stout plants, in 5in. or 6in. pots, hardened off and ready to go out about the middle of May, the latter half of this month is not too soon to sow. Good kinds for an outdoor crop are the Early Evesham, Earliest of All (Sutton's), Open Air (Laxton's), and the good old Conqueror, or Early Red.

Custom as to "Boozy" Pasture.

Sir,—When the outgoing tenant of a farm sells all his produce and live stock in the end of the year, is he entitled to buy in new stock to put in the "boosy" pasture in the spring, or may he sub-let it?—Enquirer.

[*** Until the tenancy expires, the tenant, unless expressly restricted by his agreement of tenancy from so doing, may sublet the whole of his land, or, if restricted from sub-letting or parting with the possession of the land, he may still let the eatage, unless there are some words in the agreement expressly prohibiting the letting of the eatage. Such last prohibition is most uncommon. He may let the eatage of the herbage of the boozy pasture up to the date of the termination of the tenancy, but not after he has given up the remainder of the grass land. He cannot sub-let during the period of "hold-over," as it is sometimes called, for if he has no stock his right in the boozy pasture terminates at the same time as his right in the other pastures of the farm. Your letter does not set out your address, and customs as to boozy pasture usage vary a good deal in different districts. In some places the farmer would certainly be allowed to turn in the boozy pasture stock bought by him during the spring; and in some places, where he is bound to consume all the hay, straw, etc., on the farm, he would have the right to do this even with agisted stock during the period of "hold-over," although it is clear his right to sub-let would then be gone. Generally speaking, the tenant may turn stock in the boozy pasture during "hold-over" if he has had that stock some little time, but he would not be allowed to turn in stock expressly bought for the purpose of grazing the boozy pasture during the period of "hold-over."—M. Y.]

Six-Rowed Barley.

Sir,—I wish merely to supplement "Agricola's" forcible letter in your last issue by pointing out the great need for existing for definite meaning to be placed on the terms "winter" and "autumn" barleys, and that the true winter or six-rowed varieties can, some of them, produce good malt. It is more than strange that six-rowed barleys from hot and sub-tropical climates can produce malt to brewers' complete satisfaction from the type of barley that thrives in higher northern latitudes than the Chevalier or other two-rowed types can grow at all. It is also very well known that in such climate as Canada the six-rowed brews better than the two-rowed of any type, and adds to the beer made one characteristic that is unknown naturally in any brewed in this country, viz., lengthened storage in bottle without deposit. Yet, so important and valuable a trait, so far as I can learn, has not yet been experimented upon fairly, or even at all, by any British brewer.

But, putting the malting properties on one side altogether, the suggestion that winter barley furnishes two crops at the cost of one—with the necessary economies in labour and outgoings, and with a stronger probability of a certain return for the grain crop, if the sheep are not allowed to feed off too much or too late—deserves extended trial. No one is prepared to learn that now calcareous heavy land is able to grow duoble the percentage of prize barleys compared with calcareous soils; but the figures given in the report of the judges on last year's barley show may not be lightly set aside. What is wanted is a genuine spirit of inquiry free from prejudice, and men willing to make experiments under right conditions. With reference to winter barley there must be farmers able to grow good stocks observantly, maltsters making the produce into malt intelligently, and brewers disposed to brew it with a determination to overcome any initial difficulties should they arise.

The results are sufficiently important to warrant the hope that ere long a right understanding may be reached and so simple a matter may be amicably settled, for it is eminently more fitted for proof by practical experiment than for discussion.

H. Stores.

11, Queen Victoria Street,
London, February 15th, 1902.

Cornwall.

We have had a fall of snow and severe frost for a week, which we do not often experience in this part, but will, I am certain, do a lot of good. The young wheat was looking well before the snow and frost came, and there was a nice fresh pick on the pastures for the sheep and lambs. The lambing season on most farms has only now commenced; so far the percentage of twins is small. Roots are very good and plentiful. Straw and hay are very little, and if this severe weather should last long it will scarcely hold out against the spring. All kind of farm work is well forward. An early spring will be desirable to all. —T. F. R. (Feb. 14th).

Devon

We are having dry, frosty weather here, and the land is too hard to plough in the early part of the day. Wheat looks very well in the ground, and not hurt by the winter; it is a thick plant, and of very good colour; no other grain has been tilled yet in the writer's district, as March is the favourite month for that. There is much demand for oats at 3s. per bushel, and it is thought a large quantity will be drilled in the coming spring. The root crop is holding out well on most farms, but in some cases they are nearly finished; fortunately there is a good crop of mangolds to fall back upon, which may be invaluable in the spring, as clovers will not be very good. Hay is very scarce, and has to be doled out sparingly; straw is also running short, especially oaten straw, in consequence of the drought of last summer. Stock is healthy and doing well; prices for sheep are bad, partly attributable to the low price of wool; bullocks sell better, the price of beef being fairly good and well maintained.—L. B. G. (Feb. 13th).

Ulster (East.)

A snow storm began on the 7th inst., and in a few hours deposited over a considerable area a snow blanket varying in thickness from 6 inches to 18 inches. It has not increased since the 8th inst., but several degrees of frost has, up to the present, retained all the snow unthawed, and in several districts limited marketing and stopped all labour, except attendance upon the animals of the farm. Ulster farmers have been so unused to such severe weather that much of the turnip crop is left in the fields, and only carted in as required during the winter. This practice has been the cause of much suffering to young cattle just now, as carting between farmyards and fields is quite impossible on any of the hillside farms. When wheat constituted a large proportion of the crops, a snow blanket did not come amiss in mid-winter, but now it only shuts the young stock off the pastures, and uses up far too rapidly the scanty supply of fodder, minus the turnips, which cannot be reached just now.

Considering the very low price of stores at the end of autumn, some farmers tried to keep a large part of their young stock over winter, hoping for an open one, and a good run over pastures and meadows until near spring, but this storm increases last year's loss by a double disappointment. In orchard districts old fruit trees are yielding many fruit-bearing branches to the unwonted weight of snow. Milk and eggs are reduced in quantity. Pigs continue to thrive, and pork maintains good prices in the local markets. Efforts are being made to place within the reach of farmers the means of improving their breeds of horses, cattle, and pigs, and prizes are promised to induce a large use of these helpful improvements. So, hope springs perennial in the human breast, and farmers above all other men need it.—W. W. D. (Feb. 13th).

Glamorganshire.

Cold winds, with sharp frosts, having prevailed during the last fortnight, have cut down the young grass produced by the mild weather in January. The ewes and lambs were looking forward to a bite of the succulent grass that was to be seen last month, but, alas! they are disappointed, and have to turn their attention to hay and corn, with roots, where any are left. The dry weather is suiting the young lambs very well, although so cold. It is rather early in the season to predict what is the average crop, but so far the ewes with lambs are doing well, with a liberal allowance of food.

The February sowings of oats and barley have been delayed on account of the frost. Autumn-sown wheat was looking remarkably well and forward, and has now received the needful check. Hay and straw are now selling very well, and more money could be made out of an acre of good wheat straw than from an acre of wheat grain.—C. J. S. (February 14th).

Herefordshire.

On the whole we have had a fairly open winter, which has greatly helped the short quantity of winter keep we had to start with, and stock has done better than could have been expected. All the autumn-sown corn is looking very well, and the work on the lands is well up. Good store cattle are scarce and selling well, beef making a fair price, but mutton selling badly; cart horses lower. Labour is not too plentiful, and certainly does not improve in quality. We have had very little snow this winter, and no great amount of rain, and our springs and small streams are drier than I have ever known them at this time of year. —D. E. (Feb. 14th).

Somerset (Mid).

The mild weather experienced up till February 1st has greatly benefited all classes of stock-owners, as very few of them commenced the winter with their stack-yards full Cheddar cheese, our staple product, has experienced a better demand lately, and the fact of our making 20s. per cwt. more of it than the finest States cheese fetches shows that we Britishers can still manufacture an article which "Uncle Sam" can't beat. We are now having rather severe weather, but still it is seasonable, as we are able to cart manure on to our wet pastures without injury. In this district we grow a large quantity of apples for cider making, and the quality of the juice last autumn was excellent; in fact, it has rarely ever been equalled. Now that people are beginning to find out what an excellent drink it is, the demand has greatly increased. Of course, there have been vast improvements made in its manufacture during the last few years, and thanks particularly are due to the Bath and West of England Society, and the old-fashioned sour, hard, and vile stuff sold as cider years ago is getting quite a thing of the past.—W. T. A. (Feb. 14th).

Somerset (North-East).

The weather is seasonable and winterly, but we need a lot more rain to raise the springs. The dry weather, although cold, is favourable for young lambs, but the ewes are short of milk owing to the pastures being cut so with the winds and frost. A little cake and plenty of hay will get them through till grass comes, which we may expect after this. Store cattle have done well up to now, but the small hay ricks are going fast. Beef is selling better, but it is getting scarce. The winter and summer grazing have not paid their way, as all feeding stuffs are too dear, and hay scarce, to leave any margin of profit. A great many grazing cattle were sold at the fall at the same price or less than they cost in the spring. I think 1901 the worst year we farmers as a rule have ever known. The foreigner beats us on every hand; our rents, taxes, and labour are much too high to compete with them. The wheat plant, before the winds, looked healthy and strong; the dry weather has kept the cart wheels well employed.—G. F. K. (Feb. 13th).

Worcester.

Not much fresh to relate. All corn crops except wheat yield badly, and all sell badly except good and fancy samples of oats and peas.

Stock have as yet wintered fairly well, but I doubt if it will pay for the hay and cake eaten, but when spent the land has been improved.

The weather has been remarkable for the small rainfall except for the wet days at the end of December which brought a flood.

Grass grew in January, but we are now having a severe check—sharp frosts every night—which has enabled all arrears of dung-carting to be finished, and will give a fine seed-bed for the Lent corn.

Wheat has kept a fair plant, but having been generally sown late is far from being "proud." Clover and artificial grasses are a better plant than was expected after the dry summer.

Sheep keep promising. Roots scarce; not many grown for sheep in this district.

Sheep have paid nothing for wintering, as mutton is selling very badly, owing to large importations. Why cannot these large importations of stock, corn, and all manufactured articles, especially flour, pay something towards the ever-increasing Budget? The latter tax would set all the old country mills going again.

Have just been reading the R.A.S. Journal on the past and present phase of agriculture.

A stranger would scarcely believe that the conditions there brought before us, say in 1760, are now still in vogue in the parish of Powick, within two miles of the loyal city of Worcester. There some of the best arable land is, as stated, only in the hands of the husbandman from February until harvest for two years cropping, the third year to be given up to fallow or thistles, the best grass land either mown or stocked with an overabundance of hungry horses, cattle, and sheep. —T. R. H. (February 12th).

Foreign Prospects.

FRANCE.—Colder weather does not appear to have damaged the wheat crop, which is reported to be looking well over most of the country.

BELGIUM.—Cold weather seems to have improved the wheat market in Antwerp, which yesterday with good demand was firm and rather in sellers' favour.

GERMANY.—Over a large area of the Empire the fields are under snow. Inland navigation is closed.

RUSSIA.—Weather for the time of year is mild, except in north-west and Baltic provinces. Rainfall in the south is below the average.

HUNGARY.—Snow has fallen and covered the cereal crops. Budapest reports a quiet milling demand for wheat; millers appears to be fairly well stocked.

ITALY.—The good condition of the autumn-sown cereals is generally maintained.

UNITED STATES.—The "Cincinnati Price Current" says that the covering of snow is favourable to the wheat crop, and there is no material change in the condition, which is generally fair to good, but it is poor in the Ohio valley. The interior movement of grain is light.—*Dornbusch*

New Agricultural Patents.

Specially compiled for the *Mark Lane Express* by Mr. G. D. Howard (Hughes, Son and Co.), Patent Agents, 38 Chancery Lane, London, of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

2087.—Robert Vincent Bradburn, of Wolverhampton, for "The pronged cup potato planter."

2323.—Lothian Kerr Scott, of Farnborough, for "Improvements in agricultural implements."

2548.—Alfred Durant Watson, of Cheapside, London, for "Improvements in food for cattle and the like."

Patents Sealed.

18359.—J. Boardman, of Lancashire, for "Potato diggers."

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended Feb. 8, 1902, together with the quantities imported in the corresponding week of the previous year:—

Animals living.	1901	1902.		1901.	1902.

* Not shown in 1901.

In my note last week referring to the sale of red-polled cattle belonging to Mr. R. Harvey Mason, of Necton Hall, Swaffham, Norfolk, the date was, by a printer's error, given as May 4th instead of May 15th.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: A little better inquiry during the past week. Barley, grinding, 3d per qr dearer. Wheat firm. Oats advanced 3d to 6d per qr. Maize made 6d per qr more money. Flour steady.—NIXON, GOWER, AND Co.

Mark Lane, Wednesday.—Although business was very quiet in the general departments a continuation of wintry weather is beginning to tell, and feeding stuffs were supported without effort, while breadstuffs moved with precision, the former, in fact, being again fractionally firmer. Buyers were, however, only in small attendance all day. English and foreign wheat remains slow, but steady, and nominally unchanged. Flour held at late rates, but inactive. Maize steady, with a quiet trade at unchanged prices. Oats in moderate at fully last day's rates. Barley quiet, but steady, and without change. Beans and peas quiet.

Mark Lane, Friday.—There was about an average attendance, and only quiet demands, being mainly directed to feeding stuffs, while sellers were firm, upholding quotations on the week. English wheat again scarcely differed this week, either here or in the country, which is fairly well supplied, the town millers remaining indifferent. Whites range at 28s 6d to 30s, and reds at 28s to 29s 6d per qr, delivered. On country rail, reds (good), 28s 6d per qr. American descriptions occasionally 3d firmer since last Wednesday. No. 1 Northern Duluth, certificate, 31s 6d ex ship, 32s ex granary. No. 1 Northern Manitoba in these positions, 31s 6d and 32s. Hard Manitoba, 33s 6d landed, and none ex ship. Hard Kansas Winters, 30s 6d, and Californian, 30s 6d, landed. Russian remains above the level of this market, and Indian still fails as an exporter. Australian maintained. New Zealand Tuscan, 29s 6d to 30s, 498lb, ex store. American brands of flour unaltered, patents being still in sellers' favour. Hungarian up to 33s for best, and very scarce. Australian patents, 20s, 280lb, ex store English generally in excess of requirements. Top price town made, 28s net; No. 1 households 21s 6d cash delivered at the mill door. The London Millers' Association made no alteration at this afternoon's meeting. Town households, 23s; whites, 26s per sack delivered to the baker. Whole meal, 174s per ton. Grinding barley firm at the recent advance, and little coming up at the moment. Odessa, 19s ex ship, 19s 6d landed. Danubian, 18s 6d ex ship, 19s landed. English malting is still dealt with from time to time when found suitable for seed. Oats maintained at the last advance, without an exception respecting supply. Mixed American maize is scarcely to be had on spot, and ex ship to come up named at 26s. Round corn fully up to last week's advance. The market for imported beans and peas remains poorly supplied, with little coming to hand at present.

COUNTRY.

Banbury, Thursday.—Wheat, red (new), 28s to 30s per qr. Trade, 3d to 6d better, but not a large show of wheat.

Boston, Wednesday.—Wheat, 27s 6d; barley, 23s; oats, 21s to 22s; peas, 48s to 53s; beans, 34s and 35s; maize, 23s 6d; malting barley, 28s to 31s 6d per qr.

Birmingham, Thursday.—The market was very quiet, and prices have undergone scarcely any change on the week. English wheats were unchanged at 10s 9d to 11s 3d per bag, and in the foreign department Russians were 5s 10½d; No. 2 Manitobas, 5s 11d, and soft red Calcutta shipped, 5s per 100lb (Liverpool). Round maize, 24s to 24s 6d (Sharpness); and the same prices at Liverpool; Plate maize, 23s to 24s per qr. at Sharpness, and 4s 11d per cental (Liverpool). Grinding barley unchanged at 18s 3d to 18s 6d (Sharpness), and 18s 3d at Liverpool. A firmer tendency was noted in regard to English oats, black offering at 21s 6d to 22s, and whites, 22s 6d to 23s 6d. New English beans, 14s 3d, and old 15s 6d to 16s per bag.

Braintree, Wednesday.—Wheat trade quiet; prices firm. Red samples made up to 28s 6d and whites 30s per qr. Barley trade slow.

Brighton, Thursday.—New white wheat, 28s 6d; new red ditto, 28s; barley, 28s to 32s; grinding ditto, 21s to 22s; English oats, 21s to 24s; beans, 34s to 38s. Wheat in fair supply and good condition; prices unaltered. Oats, 6d dearer. Barley firm. Quiet trade and small attendance.

Cambridge, Saturday.—During the week trade has been firm. Supplies are not so abundant, and farmers are disinclined to press sales at present low prices. At this market to-day a fair supply of wheat met a quick sale at the full prices of last week, and in some cases rather more money was paid. Prices: Red, 27s to 28s 6d; white up to 29s per 504lb. Barley is getting into small compass. Not a large demand, but prices are firm. Beans very firm. Oats a shade dearer.

Canterbury, Saturday.—Wheat firm. Malting barley scarce. Ruling prices: White wheat, 28s to 31s; red, 27s to 30s; malting barley, 28s to 35s; grinding ditto, 23s to 25s; white oats, 20s to 24s; black oats, 20s to 23s; grey peas, 33s to 35s; tick beans, 36s to 38s; mazagans, 33s to 34s; maize, 25s to 28s per qr; tares, 8s to 9s per bushel.

Carlisle, Saturday.—Small supply of oats in our market to-day; fair sale at unchanged prices; new, 21s 6d to 22s 6d per 336lbs.—THOMAS ROBINSON.

Chester, Saturday.—There was a quiet market. Wheat was quoted rather higher than last week, but no change in barley, beans, or oats. Indian corn 6d sack lower. Wheat, white, 4s 4d to 4s 5d; red, 4s 3d to 4s 4d, 75lb. Malting barley, 3s 10d to 4s, 60lb. Grinding barley, 3s 4d to 3s 6d, 64lb. Beans, 5s 6d to 5s 8d, 80lb. Oats, new, 2s 10d to 3s 1d; old, 3s 4d to 3s 6d, 46lb. Indian corn, 12s 9d to 13s 9d, 240lb.

Chichester Corn, Wednesday.—Wheat was in small supply and trade was firm at fully last week's rates. Feeding stuffs firm and again dearer. Flour unchanged. The attendance was small.

Colchester, Saturday.—Good supply wheat; steady trade at the extreme prices of last week. Beans and oats dearer, especially the latter.—FRANCIS AND Co.

Crovdon, Thursday.—White wheat, 28s to 30s; red ditto, 27s to 29s; malting barley, 28s to 36s; grinding, 22s to 24s; oats, 18s to 21s; beans, 31s to 33s; peas, 29s to 31s. Trade for wheat firm; 6d per qr dearer. Barley and oats remain the same.

Devizes, Thursday.—The demand for wheat is not so active, and the trade must be quoted dull, except for the best samples. Barley, with a demand for seed, is firm at late rates, and the same remark applies to oats. Quotations as follows:—Best wheat 14s to 15s; [illegible] 12s 6d to 13s; best malting barley, 29s to 34s; secondary, 25s to 28s; grinding barley, 20s to 24s; oats 20s to 23s; beans, 16s to 20s; fine flour, 22s to 24s; extra fine, 23s to 30s; best bread, 9d.

Glasgow. Wednesday.—There was the usual attendance at our market to-day. Wheat and flour are quiet at about late rates. Indian corn firm and still scarce. Round maize steady with little doing. Canadian pease firm, owing to scarcity. Foreign oats rather better in price, but quiet trade. Home oats pressed for sale, and rather easier. Grinding beans quiet. Barley steady. Oatmeal dull, and tending in buyers' favour. Bran and thirds quiet and unchanged.—GIBSON AND CLARK.

Ipswich, Tuesday.—Moderate supply of wheat; trade steady, at fully late rates. Reds 28s to 29s, whites to 29s 6d per 504lb. Moderate supply of barley, which was sufficient for the demand, and which was slow, prices unaltered. Oats 3d per qr dearer. Maize firm. Beans and peas steady.

Leeds, Tuesday.—The wintry weather imparts a firmer tone to the market, notwithstanding liberal world's shipments, and holders of wheat insist upon a slight advance on last Tuesday's rates. Barley steady, but less active. Maize and oats 6d dearer. Beans unchanged.—DUNNS AND Co.

Leeds, Friday.—Both English and foreign wheats are firmly held at Tuesday's advanced prices, Americans being the turn dearer. Beans, peas, oats, barley, maize, and flour all held for fully late rates.

Leicester, Saturday.—Good average attendance of buyers and dealers, with moderate supply of home-grown wheats. Trade steady, but only fine samples active at 28s to 31 per 36 stone. Barley quiet. Fine oats very firm.

Leith, Thursday.—With the advent of cold weather, a steady demand for some classes of feeding stuffs has been experienced. Prices, however, are without much change from those of last week. Wheat, Scotch, good demand at full prices. Scotch oats steady sale at recent prices; Barley, Scotch, steady; foreign feeding, 21s; hard white pease, 37s 6d. Beans, all varieties, 33s 6d to 24s. Round maize 23s to 24s; parcels with slight heat, 21s to 22s 6d; millet seed, 19s. Mill offals:—Continued demand, with some difficulty in getting delivery, Continental contracts taking up any surplus. Broad bran, 120s to 125s; medium bran, 100s to 102s 6d; sharps, 95s 6d to 97s 6d; parings, 105s to 107s 6d; cummings, 82s 6d to 87s 6d; dried grains, brewers', 97s 6d; distillers', 102s 6d; oat husks, 45; meal seeds, 67s 6d, all sacks included.—WILLIAM MACLAY.

Lincoln, Friday.—Fair supply of English wheats, which were selling at a slight advance; reds, 28s 6d to 29s 6d; whites, 29s to 30s. Scarcely anything doing in barleys. There was no material change in oats. Maize, beans, and peas unaltered.

Liverpool, Friday.—The market has had a rather small attendance, but wheat, for American sorts, have experienced a moderate trade at ½d to 1d per cental advance over Tuesday's rates. White sorts are still scarce, and held for ½d advance, but quiet. Flour is very dull, with only a small inquiry, prices being unchanged from previous quotations. Maize: Mixed is quiet at ½d to 1d decline; European has a steady inquiry, but generally ½d below last market day's currencies; Plate is ½d lower, but has a moderate inquiry at the decline. Barley: Malting steady, with a slight improvement in the inquiry; feeding steady, and the turn dearer. Beans continue scarce, and firm at full prices. Peas are steady, but quiet at late rates. Oats are firmly held, but only a small inquiry; yellow and blacks dearer, owing to scarcity; foreign sorts are unchanged, but very steadily held. Oatmeal again experiences only a moderate inquiry, at about late rates. Oilcake very steadily held, with a fairly good inquiry at late rates.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Steady trade for wheat at the market to-day; last week's prices quite realised, but an advance, though slight, was general. Barley moved off rather more freely, as the cold weather induces maltsters to purchase, especially prime lots, which are not plentiful. Grinding qualities cost 3d per qr. more than last Thursday. Oats are inclined to ascend in value, those for seed bringing good money. Not much doing in maize; round, 6d per qr. advance; flat too dear for buyers. Beans and peas a small show, and are both of them on the rise. We do not note any alteration in Rye, tares, brank, sergum, dari, or millet.

Manchester, Thursday.—Moderate attendance. English wheat 3d to 6d per qr. dearer; foreign ditto, ½d to 1d per cental dearer. Maize unchanged for round varieties, and 1½d per cental lower for mixed. Oats, a good demand for English and Irish at last week's prices. Foreign in rather better demand at ½d per bushel dearer. Barley, 1d per bushel dearer. Beans firm. Peas unchanged. Flour dull and unchanged.

Newcastle-on-Tyne, Saturday.—A quiet demand for wheat at to-day's market at unchanged prices. Maize slow sale, but not quotably lower. Oats a quiet demand at late rates. Barley unaltered. Beans and peas firm, and favouring sellers.—JOSEPH POLLARD AND Co.

Newport, Wednesday.—Wheat, slow sale and no change on the week. Maize, demand slow, and not much doing. All other feeding grains at last week's prices. Flour, fines, 23s per sack.

Northampton, Saturday.—Supply of wheat and barley good, but the same indifference remains with millers as to doing business, which is of a limited character; nevertheless, wheat is very firm and a little dearer than last week. Feeding stuffs are scarce and much inquired for; flour dull and not dearer. White wheat, 29s to 30s 6d; red wheat, 27s 6d to 29s 6d; barley, 26s to 34s; grinding barley, 22s to 25s; oats, 18s to 23s; old fine, 25s; beans, 33s to 40s; peas, 28s to 40s; flour, 21s to 25s.

Norwich, Saturday.—There was a fair supply of wheat at our market to-day, with no alteration in the trade. Very few samples of barley are now offering, the trade being virtually over for the season. Wintery weather has prevailed all the past week, with snowstorms and night frosts. Wheat, red, 28s to 28s 6d per qr., weight 63lb per bushel imperial. Corn inspector's return for the week ending February 10th, 1902:—Wheat, 2,040-4, 26s 6d; barley, 5,156-4, 29s 2d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in small supply, and prices advanced 6d per qr; but little barley offering, and values ruled in sellers' favour. Oats and beans scarce, and full rates realised.—ROBERT HUBBLE.

Peterborough, Saturday.—There has been a fair supply of wheat at market, and trade was firm at the full prices of last week. Rather more barley offering, which sold at late rates. Oats the turn dearer.—THOMAS HILL AND SON.

Plymouth, Thursday.— Moderate attendance at our market to-day. Maize unaltered; wheat firm; barley 3d advance; oats also dearer.—ORLANDO DAVIS AND Co.

Reading, Saturday.—Business ruled firm in all departments to-day, and there was an unusually numerous attendance. The quantity of wheat on offer was fair, and the best samples made up to 30s per qr, while ordinary sorts made 28s per qr. Barley sold fairly well at recent figures; and oats, which were plentiful, changed hands quickly at late values.

Ripon, Thursday.—Farmers' wheat slow at last week's prices. A light show of samples. Attendance good. Wheat, English (new), 28s 6d to 29s 6d; wheat, foreign, 29s to 33s; barley, grinding, 22s 6d to 23s 6d; barley, malting, 26s to 31s; oats (new), 21s to 24s; round maize, 24s to 27s per qr; beans, 1s per stone.

Romford, Wednesday.—Wheat trade unchanged from last week. Small supply. Red wheat 27s 6d to 28s; white wheat, 28s to 30s per quarter.

Rye, Wednesday.—White wheat, 26s to 28s: red wheat, 26s to 27s 6d; barley, 27s to 28s; beans (Tick), 35s to 38s; beans (Mazagan), 34s 6d to 36s; beans (Long Pods), 31s to 35s; oats (white), 19s to 24s; oats (black), 21s to 26s; oats (white), 21s to 22s; peas (grey), 33s to 35s; peas (blue), 48s to 53s.

Sheffield, Tuesday.—To-day's market was better attended notwithstanding the difficulty of locomotion. In wheat there was a better business doing, and prices were up 3d to 6d per qr. Small corn showed a similar improvement. American flat maize receded 6d per qr. Quotations: Wheat, white, 30s to 31s; ditto red, 30s 6d to 31s per 504lb; oats, new white, 21s 6d to 22s 6d; ditto new black, 20s to 21s per 336lb; barley, grinding, 22s to 23s; ditto malting, 28s to 32s per 448lb; peas, grinding, 32s to 34s; ditto blue, 53s to 80s per 504lb; beans, Egyptian, 36s to 36s 6d; ditto English, new, 37s to 37s 6d per 532lb; Indian corn, small, 25s to 26s; ditto American mixed, 27s 6d to 28s per 480lb.

Spalding, Tuesday.—Wheat firm, at 27s to 27s 6d per qr. Oats advanced 6d, making 21s to 22s, trade being very firm. Other grain firm, and not much doing.

Stamford, Friday.—There was a moderate show of wheat, and prices ranged from 27s 6d to 29s 6d. Oats moved off at late rates, and beans and maize maintained last week's prices.

St. Neots, Thursday.—Slightly larger supply of wheat. The quality was very good; yet prices were rather easier than otherwise. Trade in malting barley very quiet, and little doing at former rates. Oats firm and quite as dear.—ELGOOD AND SON.

Stockton, Wednesday.—English wheat made up to 30s per qr. During the week trade in foreign wheat has been quiet, millers only buying for their immediate requirements, and prices showed no change. Oats and maize 6d dearer. No malting barley on offer. b

Sunderland, Saturday.—Few samples of grain on offer, and there is no change to note in the value of wheat, barley, or oats. Arrivals coastwise: Oats, 461 qrs; foreign, nil.—E. AND F. RICHARDSON.

Wakefield, Friday.—Wheat meets with rather more inquiry, the stiffness of sellers proving the chief obstacle to a more extensive business. The Continent is evidently beginning to buy again, which may be the signal of better doings. Barley unchanged. Maize, beans, and oats 3d per qr dearer.—DUNNS AND Co

Wakefield, Friday.—There is a firm feeling in wheats on our market to-day, and 3d per qr advance in price is obtained on the business done. There are but few buyers for malting barley, maltsters being now practically finished. Oats, maize, and grinding barley 3d per qr dearer.—MICHAEL SANDERSON AND SON, LIMITED.

Wisbech, Saturday.—A limited supply of grain. Wheat sold slowly at late rates; prices, 27s to 28s. Oats dearer to buy, 21s to 24s. Barley—Little offering, 26s to 30s. Beans, 34s to 38s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—A steady market. Quotations: Wheat, new, 12s 6d to 13s per 216lb; oats, old, 15s 6d to 16s; new, 12s to 13s; beans, old, 15s 6d to 16s 6d; new, 14s to 14s 6d per 196lb; barley, 31s to 32s per 448lb: maize, 26s to 26s 6d per 480lb.

Worcester, Saturday.—Quiet trade all round. English wheat scarce and values steady on the week. Barley, oats, and beans were firm to 3d dearer.

Worksop, Wednesday.—Good attendance, but small show of grain, and firmer tendency for wheat. White wheat, 28s 6d to 29s 6d; red wheat, 25s 6d to 27s 6d per qr; best malting barley, 29s to 32s; secondary, 26s to 28s; grinding barley, 23s to 24s; white oats, 21s to 23s; black oats, 19s to 21s; maize, 27s to 28s per qr.

York, Saturday.—A fair attendance. Only a few samples of wheat on offer, for which there was a slow trade at last week's rates. Good white wheats, 29s to 30s; red and inferior, 28s to 29s per qr. Very little malting barley on hand which sold at late rates; best, 28s to 30s; good, 24s to 28s; medium, 24s to 26s per qr of 32 stones. Oats were more in demand, and fetched a little better price; white Tartary, 19s to 20s; blacks, 20s to 21s 6d; white Darton, 21s 6d to 22s 6d per qr. Rye, 8d to 8½d; beans, 11d per stone.

FOREIGN.

Hamburg, Saturday.—Market quiet, without material alterations in prices. There is but little demand from the interior. The imports during the week amounted to 7,625 tons wheat, 1,637 tons rye, 2,355 tons barley, 2,657 tons maize. American hard winter wheat, No. 2, on the spot and near at hand, is selling at 28s 6d to 28s 9d; March shipment is held at 29s 3d; Northern spring, No. 2, 28s 6d per 480lb; Walla Walla, about due, 29s 3d per 500lb. Rye firm, 9 15-20, South Russian, March-April shipment, is held at 23s 6d per 480lb. Malting barley quiet. Good Bohemian to arrive per barge is offering at 31s 6d to 33s; good to fine Saale is scarce at 35s to 39s; good Silesian, 27s 6d to 29s per 448lb f.o.b. Feeding barley in better demand: 60-61 Ko. Azow and Danubian, March-April, is held at 18s 3d per 400lb u.f. Hamburg. Maize firm. Mixed American is held at 25s 3d, but meets no attention at this price. Odessa is selling at 21s 6d to 21s 9d; Turkish at 22s 6d to 23s per 480lb.—JOHN TATLOCK.

Paris, Wednesday.—For the moment offers of native wheat exceed the demand, and the tendency ruled dull for good-conditioned wheat, but weaker for average and ordinary sorts. Again millers show no better disposition to purchase than of late; their attitude is rendered even still more reserved by the decline in the Marche de Paris, and consequently but little business was effected, and the few sales transacted were with difficulty concluded at the following rates:—Choice red, 37s 5d to 37s 11d; ordinary, 36s 5d to 36s 11, and white, 37s 5d to 37s 10d per 480lbs. Flour.—The market was dull at the opening, and closed at the following prices:—Feb., 27s 1½d to 27s 5d; March, 27s 5d to 27s 8d; March-April, 27s 8d to 27s 11d; March-June, 27s 11d to 28s 2d, and May-August, 28s 5d to 28s 8d per 280 lbs. Dealings in rye continue quiet, and this should cause no surprise when the great inactivity which prevails in wheat is considered. Here prices were almost nominal, but occasionally with a reduction of 6d to 1s per qr.; buyers at 26s 1d and sellers at 26s 6d per 480lb. Oats have ruled quiet in all directions, and a few cases of lower prices are reported in Beauce and Brie. Here the feeling was very quiet; offers are still most restricted and with no quotable change in values. Barley is generally very quiet, and in the absence of a regular malting demand prices will before long undergo a perceptible decline. England, Belgium, and Germany are making scarcely any purchases, and exports, from this circumstance, are falling off considerably. Here the tendency was supported for grinding and feeding corn, and unaltered for malting sorts. Grinding 16f.50 to 16f.75 (23s 11d to 24s 3d), and feeding 15f.25 to 15f.75 per 100 kilos (22s 2d to 22s 10d per 400lb). Offers of buckwheat are becoming more and more scarce, and as on the other hand the demand is generally good, a certain firmness of prices has resulted, and quotations still stand at 27s per 480lb.—*Dornbusch.*

CORN STATISTICS.

ARRIVALS INTO LONDON.

POULTRY PROVISIONS

Smithfield, Saturday.—A fair demand prevailed for the good supplies on offer. Fowls: Yorkshire, 2s 6d to 3s 3d; Boston, 2s 3d to 2s 9d; Surrey, 3s 6d to 4s 6d; Sussex, 3s to 4s; Welsh, 2s 3d to 2s 9d; Irish, 1s 6d to 2s 6d; turkeys (cocks), 6s to 7s; ditto (hens), 4s to 5s; country ducks, 2s 6d to 3s 6d; geese, 6s to 7s; Bordeaux pigeons, 10d to 1s 2d; feathered, 8d to 10d; quail, 9d to 1s 2d; wild rabbits, 8d to 10d; tame ditto, 10d to 1s 2d each Australian, 8s 6d to 11s per dozen; hares, 2s 6d to 3s; leverets, 1s 9d to 2s 3d; guinea fowls, 1s 9d to 2s 3d; wild ducks, 1s 6d to 1s 9d; widgeon, 1s to 1s 4d; pintail, 1s 6d; teal, 1s; woodcock, 2s to 2s 6d; snipe, 8d to 1s; golden plover, 8d to 11d; black ditto, 6d to 8d. Russian: Ptarmigan, 10d to 11d; capercailzie (cocks), 2s 9d to 3s; hens, 1s 9d to 2s 3d; partridges, 1s to 1s 3d; black game, 1s to 1s 2d each.

HOPS.

Canterbury, Saturday.—Prices continue to harden, having advanced for medium class hops from 10s to 15s per cwt. since December. The principal demand is for hops at from 35s to 50s per cwt, supplies of which are getting scarce.

Worcester, Saturday.—There is no change to report on our market this week; business is quiet, and the only demand is for fine useful hops, which command full prices. Prices continue firm for anything good.—PIERCY AND CO.

FRUIT AND VEGETALBES.

Covent Garden, Saturday.—A fair quantity of vegetables was on offer, but trade ruled slow. Fairly good supplies of fruit were available, and experienced a fair sale. Greenstuffs: Cabbages, 5s to 6s; cauliflowers, 8s to 9s per tally; Brussels sprouts, 2s to 2s 3d per half-sieve; beetroots, 2s per bushel; carrots, 2s to 2s 6d; turnips, 2s to 3s; parsley, 2s to 3s; leeks, 2s to 2s 6d per dozen bunches; borseradish, 1s 3d to 1s 6d per bundle; forced rhubarb, 1s to 1s 6d per dozen bundles; English onions, 7s to 7s 6d per cwt.; Valencia, 10s to 11s per case. Potatoes, 45s to 90s per ton. Fruit: English apples, 4s to 10s 6d per bushel; Nova Scotian, 18s to 24s per barrel; Californian, 7s 6d to 10s 6d per case; Almeria grapes, 15s to 25s per barrel; English, 1s to 2s 6d; Channel Islands, 9d to 1s 6d per lb; Valencia oranges, 7s 6d to 12s; Jaffa, 10s to 12s per case; bananas, 8s to 12s 6d per bunch; pineapples, 1s 6d to 4s 6d each; and lemons, 8s to 18s per case.

COLONIAL DAIRY PRODUCE.

London, Friday.—The short supplies of Australian butter now arriving, owing to the excessive drought in Victoria and New South Wales, are stiffening the market very much, and values have again advanced another 2s per cwt. "Choicest" brands of both Australian and New Zealand are bringing 110s to 112s, while "Finest" fetches 104s to 108s. The "Victoria," which arrived this week, landed 11,008 boxes of Australian, and next week the "Oroya" will bring about 9,623 boxes. The "Rome," which follows, carries only 3,703 boxes. There have been no New Zealand arrivals since last week, but the "Maori" is due in a day or two with 37,000 boxes. The demand for a shilling retail butter is keener than ever, and the supply is very deficient. New Zealand "milled" butter of 1st Government grade has made 96s per cwt., and even more money is asked for "Maori" arrivals. The Copenhagen official quotation has again been raised by 4 kroner, and it now stands at 100 kroner, against 98 kroner last year at this date. The market is very firm in Copenhagen, and there seems every reason to believe that markets will remain firm for some weeks. The cold weather is somewhat checking the demand for cheese, but a fair business is being transacted, especially for goods about 46s to 48s. For "Choicest" goods the demand is quiet. White and coloured are both selling at equal values. The arrival of New Zealand cheese this season to date is very small as compared with last year.—W. WEDDEL AND CO.

WOOL.

Canterbury, Saturday.—Kent fleeces remain at 5½d per lb, with lambs' wool at 4d.

London, Friday.—English, per pk. of 240lb.—Fleeces S. Dn. Hggs., £7 to £8 10s; half-bred hoggs, £6 to £6 10s; half-bred wethers, £5 to £6; Kent fleeces, £5 to £6; Sth. Down ewes and wethers, £7 to £8 10s; Leicester do., £5 to £5 10s. Colonial, per lb.—Vic.—Fleece super, 1s 5d to 1s 7d; scoured good, 1s 7½d to 1s 8½d; scoured average, 1s 6d to 1s 7d; greasy avr. to fair, 10½d to 11½d; N.S.W., scoured avr., 1s 5½d to 1s 4d; greasy average, 8d to 9d; S. Aus., greasy avr., 6½d to 7d; N.Z., scoured avr., 1s 4d to 1s 5d; grease average, 8d to 9d; Cape scred sup., 1s 5d to 1s 6d; fleece average, 7d to 7½d; greasy average, 5½d to 6½d; Natal, scoured, 1s to 1s 1d; greasy average, 6½d to 7d. Crossbreds.—Grs.—Vic. good to supr., 10½d to 11½d; New Zealand fine, 8d to 9d; do. medium, 4¾d to 5¼d; do. coarse, 4d to 4½d.

MANURES.

Liverpool, Friday.—Nitrate of soda continues firmly held on the spot at £10 5s to £10 10s per ton, according to quality and quantity, but as yet little demand is experienced on agricultural account. Sulphate of ammonia is about 2s 6d per ton dearer, and in fair request. Basic slag continues to be inquired for, but there is a difficulty in obtaining deliveries excepting at remote dates, hence some buyers are diverting their orders to the more soluble phosphatic fertiliser, superphosphate of lime. Kainit and East India bone meal in seasonable request. The trade in feeding stuffs is quiet, notwithstanding the cold weather, and prices in some instances tend in buyers' favour. Nitrate of soda, best quality, *i.e.*, guaranteed 95 per cent., pure, in bags, £10 10s per ton; East India bone meal, fair to prime, in bags, £4 1s 3d to £4 6s 3d per ton; Kainit, prime, 23 per cent., in bags, £2 7s 6d to £2 10s per ton; palm nut cake, prime, in bags, £5 12s 6d per ton; linseed cake, American thin oblong, prime, in bags, £7 10s to £7 13s 9d per ton; linseed cake, English, prime, in bulk, £8 15s to £9 per ton; cotton-seed cake, N.A. decorticated, prime, in bags, £7 to £7 5s per ton; cotton-seed cake, English decorticated, prime soft, in bags, £7 10s per ton; cotton-seed cake, English undecorticated, prime, in bulk, £4 15s to £5 per ton; cotton-seed (crushed), 20 to 25 per cent. oil, prime, in bags, £7 5s per ton; maize germ meal, prime, in bags, £6 2s 6d to £6 5s per ton; rice meal, Rangoon, as imported, in bags, £5 7s 6d to £5 10s per ton; Indian meal, coarse to find grinding, prime, in bulk, 13s to 13s 6d per 240lb; linseed, fine bold feeding, in bags, £3 2s to £3 6s per qr, 416lb; D.N.S. brand, superphosphate of lime guaranteed, 25 to 27 sol., in bags, £2 5s to £2 7s per ton; D.N.S. brand, superphosphate of lime, guaranteed, 30 to 31 sol., in bags, £2 10s to £2 12s per ton; superphosphate of lime, guaranteed, 35 to 36 sol., in bags, £3 to £3 2s per ton; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 12s to £1 13s per ton; basic slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, £1 14s 6d to £1 15s 6d per ton; basic slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags £1 17s 6d to £1 19s 6d per ton at the producing depots.—H. JONES LANGAR AND CO.

THE BALTIC.

Standard samples of white aand red wheat from Kurrachee, and of Mutter Pulse from Calcutta can now be obtained at the offices of the London Corn Trade Association.

The week's arrivals at ports of call are 6 wheat ship from California, 1 cargo of Californian barley, and 1 cargo of Valonia.

A special cable to "Beerbohm's List" gives stocks of cottonseed at Alexandria at only 5,550 tons. On this advice the market for cottonseed cargoes closed 2s. 6d. per ton dearer on the week.

Wheat cargoes are sometimes 3d. dearer from the 11th. Sales include: Californian at 29s. 6d.; New York Northern at 29s. 9d.; No. 1 Manitoba at 30s.; Red Walla Walla at 29s. 9d.; Russian Winter at 30s. 6d.; Russian spring at 29s. 6d.; South Australian at 30s.; Victorian at 30s. 9d.; New South Wales at 29s. 9d.; Bahia Blanca (fine medium soft La Plata) at 30s.; No. 2 hard winter at 29s.; White Kurrachee at 29s.; and red Kurrachee at 28s 9d per qr.

Barley cargoes are steady. Crimean has made 18s. 9d.; Roumanian, 18s. 6d.; Californian brewing, 24s. 6d.; Standard, 25s. 6d., special quality.

Oats are 3d. dearer to buy. A cargo of white Baltic, 320lb., made 20s. 3d. on Friday, while 18s. was paid for 304lb. white Libau.

Maize has been very dull, but a cargo of Odessa made 22s. 6d. on Saturday, and one of yellow La Plata made 21s. 9d. per qr. Other cargo sales embrace Ferozpore rapeseed at 40s. 9d., and Bombay linseed at 54s., 60lb., per qr.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The fields have been enjoying a useful repose. The ground is hard with frost in the South of England, while north of the Trent it is mostly under snow. The cold has been severe in Ireland, twenty degrees of frost being registered on three successive nights. But in Great Britain the records have been of about ten degrees, as a rule, and this is not enough to penetrate very deeply into the earth. One cannot exactly measure penetration; it is impossible to say that each degree of frost goes half an inch or a quarter of an inch below the surface. But the destruction of autumn-sown wheat in Canada and Northern Russia, whereby those regions are confined to growing the spring variety, is due to the fact that when zero or 32 degrees of frost is recorded for several days in succession, the frost gets down to the roots of the wheat and kills them. Not since February, 1895, has wheat been killed even in North Britain by this degree of frost. We do not, therefore, anticipate anything but benefit to wheat from growth being completely arrested since February came in. The ploughed land is decidedly helped by the frost and will be in splendid condition for the March sowings of barley.

The wheat and flour markets of the past week have been kept from advancing by the large quantity of wheat on passage, but the stocks are being reduced, and by the end of the month should be so far altered from January as to leave space for any surplus likely to come to hand in March. Of maize less and of barley more than usual is on passage, but the malting barley, which swells the barley total, has its own buyers, and does not cause depression in the feeding kind. Quantities now on passage thus compare with a year ago:—

	1902.	1901.
	Qrs.	Qrs.
Wheat	3,100,000	2,695,000
	Sks.	Sks.
Flour	350,000	355,000
	Qrs.	Qrs.
Maize	475,000	635,000
Barley	675,000	400,000
Beans	7,000	10,000
Linseed	480,000	485,000
Rapeseed	13,000	3,000
Cottonseed	126,000	84,000

The linseed and rapeseed are mostly on passage to Hull, the cottonseed to London.

The imports of the week into the United Kingdom were small of wheat, flour, barley, oats, beans, and peas, but good of linseed, rapeseed, cottonseed, grass-seeds, lentils, and hay. The imports of maize were small as compared with ordinary years, but fully up to expectation at a time when America is not able to ship.

The following are the principal figures for the past week, and for the corresponding week last year:—

	1902.	1901.
	Qrs.	Qrs.
Wheat	184,000	182,000
Flour	76,000	120,000
Breadstuffs	260,000	302,000
Barley	123,000	111,000
Oats	55,000	198,000
Beans	4,500	9,700
Peas	3,800	12,300
Maize	148,000	367,000

The American supply, as compared with a year ago, shows an increase in rye and barley, but a decrease in wheat, maize, and oats.

Total maize shipments from all countries since November 1, the opening of the maize shipping season, thus compare with the same period in the preceding shipping years:—

	1901-2.	1900-1.
	Qrs.	Qrs.
American	523,000	7,328,000
Russian	1,635,000	241,000
Roumanian	2,012,500	634,000
Argentine	522,000	523,000
Turkish (est.)	200,000	—
Total	4,892,500	8,726,000

The deficiency is seen to amount already to 3,833,500 qrs., so that the maize market seems likely to go higher in March and April. The present price of round corn, 23s., is quite a florin lower than the situation would appear to warrant. Farmers and horse owners requiring maize will do well to buy now, for while Russia has increased her shipments from 33,000 qrs. weekly to 243,000 qrs. weekly, American shipments have fallen from 417,000 qrs. to next to nothing. The price of maize at present thus compares with other feeding stuffs:—

	per ton. £ s. d.
Maize	5 7 0
English Wheat	6 10 8
Russian Barley	5 12 0
English Oats	7 0 0
Egyptian Cottonseed	6 10 0
Canadian Peas	6 15 0
Pigeon Beans	8 0 0
Fine Middlings	5 15 0
Red Dog Flour	5 17 6
Feeding Rice	7 0 0

The idea that maize this winter is dear as compared with recent seasons is well founded. As recently as July last both sorts were obtainable at 20s. per qr. But the true comparison is with the other articles suitable for feeding to horses, etc. It will on this comparison be seen that of ten leading staples maize is the cheapest.

The stocks of wheat in the United Kingdom on the 15th inst. were thus estimated:—

	qrs.
English	2,955,000
Foreign	2,790,000
Total	5,745,000
1st January	6,809,000

Barley for malting has been in somewhat improved request, the English samples at 32s. to 34s. are often bright and good. Californian fine Chevalier makes about 31s. for new crop and 27s. for old, while at Liverpool a little Chilian has changed hands at 32s. per qr. Danish and French kinds find a few buyers at 28s. or thereabouts. Barley for seed is being bought at 40s. for ordinary best English and Saale. Hallett's Chevalier can be procured for 36s. to 42s., Garton's "Brewers' Favourite" at 40s. to 41s.; "Standwell" at 42s. to 43s. Oats for seed come at 28s. to 30s. for Garton's "Abundance," 30s. to 32s. for Garton's "Goldfinder," 28s. to 30s. for Webb's "Newmarket," white, and 26s. to 27s. for "Pioneer." Of course, it is impossible to mention many of the types on offer, but at this season we can only reiterate our advice to farmers to act freely in purchasing seed corn of leading seedsmen and of brother farmers noted as good judges of corn. The use year after year of seed grown on the farm is condemned by nearly all the experts; such corn, while often of fine quality, seems to be more predisposed to plant diseases and fungoid pests than is corn from a different county and a diverse stock. So far as we can judge, buying of spring corn for seed is above the average, and promises a somewhat extended area. Seed potatoes to buyers of a good quantity come at £6 per ton for "Ashleaf," and white "Beauty of Hebron," at £4 to four guineas for "Bruce," at £5 10s. for "Challenge," and at six guineas for "White Elephant." Here also a very fair business appears to be on foot.

LONDON TERM MARKET.

This market is held twice a day, except on Saturday, when there is no afternoon call. The market is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals. The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

WHEAT.—Calls.	March. s. d.	June. s. d.
Feb. 10 11 a.m.	6 4	6
4 p.m.	6 4	6 4
Feb. 11 11 a.m.	6 4	6 4
4 p.m.	6 4	6 4
Feb. 12 11 a.m.	6 4	6 4
4 p.m.	6 4	6 4
Feb. 13 11 a.m.	6 4	6 4
4 p.m.	6 4	6 4
Feb. 14 11 a.m.	6 4	6 4
4 p.m.	6 4	6 4
Feb. 15 11 a.m.	6 4	6 4
To-day noon	6 5	6 5

Maize futures are firm at 6s. 8d. to 6s. 9d. per cental.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100 lb. We do not give fractions of a penny per cental. The maize quoted is fair average quality from the United States.

The deposit required from members of the Term Market has been fixed at £50 minimum and 1s. per quarter margin on any purchases above 1,000 quarters.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

HOPS.

London, Monday.—W. H. and H. Le May report:—There has been a considerable clearance of the English growth since Christmas, and the stocks of all kinds are now exceedingly limited, consequently values remain firm at the low range prevailing.

THIS DAY'S MARKETS

MARK LANE, MONDAY.

[FIRST REPORT.]

English wheat at a moderately attended market moved off steadily at previous best terms. Australian was offered at firmer rates; Victorian North Australian rather favoured by buyers as compared with New South Wales. A few samples of North Russian and Polish 1899 wheat topped the market at 33s. 6d. paid, while 31s. 6d. was accepted for 1901 wheat from the same districts. A small supply of Kurrachee white wheat was on offer at 29s. 6d. to 30s. per quarter. The best South Russian winter wheat realised 31s. for 1901 crop, and 32s. for old. Argentine wheat was not on offer. Maize was held for 27s. flat, 24s. 6d. yellow, and 23s. good round. There were hardly any sales of yellow, and those of flat were of a very retail kind. But round corn at 23s. moved off well. Barley was in fair request at full prices, and oats were the turn dearer for all sorts. Split lentils at 14s. per cwt., Roumanian millet at 20s. per quarter, and Riga hempseed at 33s. 6d. per 336lb., were among the minor sales of the day.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED WITH A FIRM TONE. WHEAT AND BARLEY 6d. DEARER ON THE WEEK. OTHER STAPLES WITH IMPROVED INQUIRY AT PRICES ABOVE GIVEN.

THE FLOUR TRADE.

MARK LANE Monday

Holders of London makes cannot as a rule get any advance, but they are increasingly firm holders at full currencies. British country whites make 25s. delivered, and the ordinary types of flour up from East Anglia are rather dearer on the week. Hungarian flour is again 6d. up, 32s. is paid for "P.W.M.O.O.O." and other finest mill brands. It is a pity this branch of the trade cannot hit upon less mysterious hieroglyphics. American flour makes to-day 22s. 6d. to 23s. 6d. for Washburns, finest, 17s. 6d. to 18s. 6d. for "Iron Duke," 18s. to 19s. for "Star," 17s. 6d. to 18s. 6d. for Morrison's best baking flour, and 18s. 6d. to 19s. 3d. for "Ceres." Kansas patents are rather higher from Friday, and Cascadia is tending in the same direction. The market for flour closed with an upward tendency for all the chief types.

THE BALTIC, 1 p.m.

STATE OF TRADE.

All cargoes are a little better held than they were on Saturday, and the tone of trade is appreciably more confident from this hour on Monday last. The prices obtainable to-day show 3d advance on wheat and oats, but no appreciable rise on barley or maize. Oilseed cargoes are remarkably dear.

BUSINESS DONE.

WHEAT.—Californian, 29s 6d, prompt shipment; Walla-Walla, 29s, prompt shipment; Russian Winter, 30s 6d, prompt shipment; White Kurrachee, 29s 9d, April shipment; White Calcutta, 29s, May shipment; Best Manitoba, 29s 9d, March shipment; No. 1 Northern, 29s 9d, March shipment; South Australian, 30s 3d, on passage.

MAIZE.—Argentine, 22s 9d, May shipment; Bulgarian, 23s, March shipment; Turkish, 23s 3d, prompt shipment; Odessa, 22s 9d, prompt shipment.

BARLEY.—Roumanian, 18s 6d, on passage; Odessa, 18s 9d, on passage.

OATS.—Liban 304lb, 18s 3d, prompt shipment; Liban 320lb, 21s, prompt shipment.

LINSEED.—Calcutta, 52s, May shipment; Bombay, 54s 6d, April shipment; Argentine, 51s 3d, prompt shipment; American, 52s, prompt shipment.

SUNFLOWERSEED.—Russian, 12s per cwt, prompt shipment.

COTTONSEED.—Egyptian, £6 8s 9d per ton, prompt shipment.

PROVISIONS

London, Monday.—The arrivals from Ireland last week were 2,564 bales bacon, and from foreign ports 8,157 bales bacon. Bacon.—Owing to the shortness of the arrival of Canadian bacon, there was a firm market for all descriptions during last week. Canadian prices were advanced 2s; secondary Irish, 1s; Danish, 1s to 2s. These advances were brought about simply by shortness of supply, the trade being by no means fast. Irish ranged 50s to 58s up to 61s; Danish, 50s to 56s up to 58s; Canadian, 46s to 52s up to 56s. Butter.—There was only a fair demand for butter generally, and the rise in Copenhagen made Danish very dear. Prices ranged:—Danish, 118s to 120s up to 121s; Colonial, 104s to 108s up to 112s for finest. Lard.—Lard was a quiet market, with very little American on the spot. American pails and boxes, 49s to 50s.

GRAIN AND FLOUR FACTORS REPORTS.

Arrivals of wheat and flour are very small. We have a firmer trade; wheat, 3d. and 6d. per quarter dearer. Flour unchanged. Maize and oats unchanged. Grinding barley 3d. to 6d. dearer.—COVENTRY (Mark Lane).

Milling offals are in fair demand at last Monday's prices. Mills just about keeping dear.—JOHN BAWCOMB AND CO. (Mark Lane).

Flour.—There has been an improved demand to-day, at an improvement of 3d. per sack over this day week, both on spot an dto arrive.—T. S. MEDILL AND SONS (Mark Lane).

Flour.—Trade continues quiet, with values rather in buyers' favour. Grain.—Flat corn continues scarce. Round corn is in small demand at 1½d. per boll advance. Scotch oats are in large supply at easier prices. Grinding beans are held for 3d. advance, but feeding qualities are lower. Oatmeal, oilcake, etc., quiet and unchanged. Mill stuffs dull and lower to sell.—MCKINNON AND MCDONALD (Glasgow).

Flour.—The demand for spot flour continues languid and without any improvement as to prices. Values on spot are as follows:—1st spring patents, 24s. 9d. to 25s. 3d.; 2nd spring patents, 23s. 9d. to 24s. 3d.; American winter patents, 24s. 9d. to 25s. 3d.; extra fancies, 23s. to 23s. 6d. Offals.—Notwithstanding the prolonged severity of the weather, the demand for bran continues dull, and for some qualities rather lower prices have been accepted. — GREENHILL BROTHERS (Belfast).

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market strong and tending dearer, owing to scarcity of seed and diminishing stocks. Decorticated cake and meal unchanged. London and Egyptian cotton cake not so depressed; price looks like reacting. Linseed: Market has been excited all the week, owing to great scarcity and short shipments; about 1s 6d to 2s dearer.

ROBERT AND JOHN HEWETSON.

SEEDS.

London, Monday.—Our market was fairly attended to-day, but business was not active, the severe weather causing dealers to postpone their purchases. English red clover is unchanged, with less offering. White clover is firm, but the demand has slackened. Alsike is strong at last week's advance. Trefoil tends upwards. Rye-grasses show no alteration. Spring tares are in fair demand, with a scarcity of best qualities. Canary seed is dull and drooping. Haricots and blue peas continue quiet, in spite of the cold weather.—JOHN PICARD AND CO.

ROBSON'S CATTLE MART, BELFAST, HELD ON 11TH FEBRUARY.

CATTLE.

Metropolitan Market, Islington.

Monday, February 17th, 1902.

	British.	Total.	Feb. 18, 1901.
Beasts	1460	1460	1400
Sheep and Lambs	8710	8710	8480
Calves	5	5	5
Pigs	120	120	30
Milch cows	40	40	40

Quotations per 8lbs (sinking the offal):—

ENGLISH.

	Inferior.	Second.	First.
Beasts	2 8	3 10	4 8
Sheep	3 4	4 8	5 4
Lambs	5 2	5 8	5 4
Calves	—	—	—
Pigs	2 5	3 10	4 4

Milch cows, per head, £15 to £23.

British arrivals include as follows:—Scotland, 58; Eastern Counties, 642; Midland, Home and Western Counties, 600; Ireland 125.

In the beast market to-day there was a slight decrease compared with Monday last, the supply from Norfolk being shorter. Trade for both prime and second quality was of a slow nature, with a decline in value, particularly for the latter, a clearance of which is doubtful. Butchering cows met with steady inquiry, and made late rates; fat bulls were short in number, but rates easier.

The following are top quotations per 8lb (sinking the offal):—

	To-day.	Feb. 18, 1901.
Scotch	4s 6d to 4s 8d	4s 6d to 4s 8d
Devons	4s 5d to 4s 7d	4s 6d to 4s 8d
Norfolks	4s 6d to 4s 7d	4s 6d to 4s 7d
Lincolns	4s 2d to 4s 4d	4s 2d to 4s 5d
Irish	4s 2d to 4s 4d	4s 1d to 4s 3d
Fat cows	3s 10d to 4s 0d	3s 8d to 3s 10d

In the Sheep Market there was an increase of 1,060 compared with Monday last, amongst which was a good proportion of lambs; for these, however, owing to the cold weather, there was a slack demand, and rates low. Wether sheep were slow of sale at late rates; on the other hand, were firm and steady. The supply included 340 Scotch and 4,460 from the Eastern counties.

Undermentioned quotations are at per 8lb (sinking the offal), and are for the best of each class penned:—

	To-day.	Feb. 18, 1901.
7½ to 8-st. Downs	5s 2d to 5s 4d	5s 8d to 5s 10d
9-st. Downs	5s 0d to 5s 2d	5s 6d to 5s 8d
10-st. half-breds	4s 8d to 4s 10d	5s 4d to 5s 6d
12-st. Lincolns	4s 6d to 4s 8d	5s 2d to 5s 4d
10-st. Down ewes	4s 2d to 4s 4d	—
11-st. half-bred do.	4s 0d to 4s 2d	4s 8d to 4s 10d
5-st. fat lambs	6s 2d to 6s 4d	6s 10d to 7s 0d
6-st. half-bred do.	5s 8d to 5s 10d	6s 6d to 6s 8d

The pig trade was slow, with a decline in value; best small breeds were quoted at 4s 4d per 8lb.

London, Monday.—Large supplies; trade slow. Beef carcases, 4s to 4s 2d; hind quarters, 4s 6d to 4s 8d; roastings, 5s 4d to 6s. Sheep, ewes, 2s 8d to 3s; wethers, 3s 8d to 4s; hind quarters, ewe, 3s 8d 4s; wethers, 5s to 5s 4d. Pigs, large, 3s 4d to 3s 8d; small, 4s to 4s 4d.

St. Ives, Monday.—Beasts 375, sheep 534, pigs 349. Beef, 7s 6d to 8s. Mutton, 7s to 8s 9d. Pork, 6s 6d to 7s 3d; sows, 5s 3d to 6s 3d. Fat beasts, good demand, dearer; stores, slow; fat and store sheep, fair trade; fat and store pigs, sharp trade; milch cows, short supply, good trade, prices £14 to £23.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,154. To-day's supply, compared with Monday last, showed an increase of 471, and consisted entirely of shipments from the United States, trade for which was of a rather slower nature, quality not being up to the average; rates, however, were no lower; a clearance was made at the following quotations per 8lb—offal given in:—Best quality, 4s 7d to 4s 8d; second quality, 4s 3d to 4s 4d. Sheep, 1,030, consisting of consignments from the United States, trade for which was very slow, best small sheep being quoted at from 4s to 4s 2d per 8lb. On Saturday last 1,082 States beasts and 640 sheep were offered for sale; trade for the former was firm at from 4s 7d to 4s 8d per 8lb for the best; seconds quoted at 4s 4d. Sheep trade firm and steady, owing to small supply; best pens made from 4s to 4s 2d. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 667, 4s 4d per 8lb, to dress from 680lb to 720lb; sheep nil.

Liverpool, Monday.—Larger supply of cattle in market; demand slow, and prices lower, especially for middling qualities. Sheep also in larger numbers; trade hardly so good as last week, and top quotation barely maintained. Beef, 6¼d to 5½d per lb; mutton, 8½d to 5½d per lb. At market, 1,503 cattle and 4,915 sheep.

POTATOES.

Goole, Wednesday.—Weather very frosty here to-day. There was a large supply of potatoes on offer, but only a slow demand for Giants and Imperators. Up-to-Dates made up to 52s 6d per ton. The Co-operative price was 5s 6d to 5s 9d per load of 12 stones.

Borough, Saturday.—The market was well supplied, arrivals, however, showing some diminution; but the general tone of the market is slow. Scottish maincrops (Dunbars), 80s to 90s; Reading Giants, 45s; Blacklands Up-to-dates, 45s to 50s; Lincoln Silts ditto, 60s; Gartons, Blacklands, 40s to 45s per ton.

Spitalfields, Saturday.—The market was slow, despite arrivals showing signs of falling off. Quotations:—Best Lincoln Up-to-dates, 60s to 65s; Blackland ditto, 45s to 50s; Wisbech ditto, 50s to 60s; Scotch ditto, 60s; Scotch maincrops (grey soil), 70s; Lincoln maincrops, 80s to 85s; Reading Giants, 40s to 45s; and Blackland Gartons, 40s to 45s per ton.

Hamburg, Saturday.—Seed potatoes are required now for England, and there is a rather active trade doing, although for the present shipments could not be effected, as rather sharp frost continues here. Especially early varieties are in demand. I quote selected quality, hand-picked, seed size:—Early Roses, 2s 9d; Topas, 2s 9d; Silesia, 2s 2d; Bruce 2s 9d; Professor Maercker, 2s 9d; Max Eyth, 2s 9d; Hero, 2s 9d; Magnum Bonum, 2s 9d; Blue Giants, 2s 9d; Daber, 3s; Imperator, 3s; Paulsens July, 3s 1½d; Snowrose, 3s 3d—all per bag of 50 kilos, f.o.b. st. here, bags included. Nett cash in quantities not under 200 bags of each sort.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

At the Islington Cattle Market trade for fat beasts on both market days for prime and second quality was of a somewhat slower nature, this being due to the rather larger supply, for which there was no corresponding increase in the demand, a good many shorthorns on Monday being turned out unsold. The majority of the number on offer as usual at this season of the year, consisted of consignments from Norfolk. Fat butchering cows and bulls met a steady trade, notwithstanding a slacker deman, this being attributable to the smaller arrivals. At the foreign cattle market, though there was an increase in the supply, trade ruled firm, rates comparing more than favourably with those obtained at the Islington market, in several cases 2d. per 8lb. more money being asked and obtained, clearances on the three market days being made. The total number on offer at both markets was 4,345, increase 1,198, consisting of 1,760 British (increase 160) and 2,585 foreign, increase 1,038; these latter comprised 2,452 from the United States and 133 from Canada. The following were the top rates paid per 8lb., sinking the offal, 90-stone polled Aberdeens, 4s. 9d.; 90-stone Polled Norfolks, 4s. 8d.; 100-stone Shorthorn, 4s. 7d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto, 4s. 4d.; 90-stone Irish, 4s. 4d.; 90-stone States, 4s. 9d. to 4s. 10d.; 90-stone Canadians, 4s. 4d. to 4s. 6d.; 90-stone fat cows, 4s.; 100-stone fat bulls, 3s. 8d. The sheep trade was chiefly confined to the Islington Market, and was of a generally dull nature, late rates for wethers were, however, maintained, there being a good demand for ewes and the supply short, the best were quoted at from 2d. to 4d. per 8lb. more money. The total number penned was 9,810, being a decrease of 4,167 as compared with last week. The supply consisted of 8,200 British (decrease 1,990) and 1,610 from the United States, decrease 2,177. Best pens made per 8lb. as follows, sinking the offal, 7½ to 8 stone Downs, 5s. 4d.; 9-stone ditto, 5s. 2d.; 8-stone Scotch, 5s. 2d.; 10-stone Downs, 5s.; 10-stone halfbreds, 4s. 10d.; 12-stone Lincolns, 4s. 8d.; 10-stone Down ewes, 4s. 4d.; 8-stone States, 3s. 10d. to 4s.; lambs, for which there was very little inquiry, were sold with difficulty, the very best being quoted at no more than 6s. 4d. to 6s. 6d. Calves numbered 30 and pigs 50, both trades being of a very nominal description; the best of the former were quoted at 4s. 8d. per 8lb., and the latter from 4s. 4d. to 4s. 8d.

Trade in the West.

The return of cold weather once more has given considerable stimulus to the fat stock trade, and, with only shortened deliveries of beef as well as mutton at most markets, values have generally taken an upward turn. This has undoubtedly been the case with all the bettermost qualities of beef, which now command fully 11s. 6d. per score for all the choicest weights; and mutton, we are glad to say, has also benefited by the increased demand, most of the markets this week closing with prices for fat sheep against buyers to the extent of quite ½d. per lb., if not more, wethers again touching 7½d. to 8d. and ewes 6½d. to 7d. It is almost too early just yet to attempt anything like a forecast of what the lamb trade may be; but if we may judge from the few cross-breds now coming out, and the prices they make, ranging from 74s. to 42s. apiece, the prospect is not so very discouraging after all, as good judges compute most of those selling at quite 9d. per lb. (or very little under). Calves are also an exceptionally fast trade, all the really well-finished lots finding a ready sale at 8d. per lb. (or from about £4 5s. to £6 10s. each); seconds making 6½d. to 7d. Rearers are very much inquired after at most of the chief centres, and anything at all promising is eagerly caught up at high prices. The firmer tone generally in the veal trade has in no way adversely affected the price of pigs, only that, if anything, the inclination of sellers has been to hold out for enhanced rates, which in the majority of cases have been conceded, porkers being now as dear as they have been at any period for a long time past, porkers and light-weight baconers especially so, the former now making 11s. per score and over, and baconers 10s. to 10s. 6d.; whilst the price of slips has been quite in sympathy with the upward turn taken for other classes of pigs. Milch beasts continue, as for some time past now, to be very scarce indeed, especially for good serviceable bullocks, which now sell very freely from £18 to £20 10s. for the best, the more ordinary runs marketing from £14 to £17. Graziers are looking very closely after whatever barreners may be offering at any of the district fairs or markets, as there are a good many just now wanted to make good the depleted stalls at many a farmstead, especially where grazing comes in for special attention. Good bullocks, too, are very scarce; hence the enhanced values they now realise, the best, selling singly, making from £11 to £16 each, this, of course, being specially forward bullocks; the more ordinary grades are scarcely so saleable at prices ranging from £6 to £9 or £10 each.

Trade in Ireland.

The supplies of both cattle and sheep in last Thursday's Dublin market were pretty much on a par with those of the preceding market. There was a very good attendance of buyers, but the opening of the Lenten season and other things united in keeping activity out of the business, except in the case of really prime heavy bullocks and heifers, which realised top rates of last day, and in a few cases perhaps a shade more money had to be given, but all round the market for beef was a lifeless one, and numbers of cattle were left over unsold. It was stated that on the preceding day (Wednesday) at Deptford United States' cattle made from 6½d. to 6¾d. per lb., which is from 60s. to 63s. per cwt. dead weight, or more than could be got for the very primest beasts in Dublin. Prices might be quoted: Prime ox and heifer beef, 56s. to 59s. 6d., and extra lots 61s. per cwt. good second-class beef, 48s. to 54s. per cwt.; other classes from 42s. to 46s. per cwt.; prime veal scarce and worth from 7½d to 8¼d. per lb., but coarse calves brought only from 4½d. to 6½d. per lb.

All classes of sheep were more difficult to turn into money than on the last market, and with the exception of all but aged wethers, they may safely be written down 2s. per head on the week. The sluggishness visible in the home trade was principally caused by Lent, and the export trade is still merely nominal. Best wether mutton made from 6½d. to 7d. per lb.; ewe, 5½d. to 6½d., and inferior sheep from 4½d. to 5d. per lb. Small to medium hoggets from 28s. to 38s., and large heavy do. from 40s. to 54s. each. House lambs, from 38s. to 48s. A large number of sheep did not change hands. The milch cow department was largely supplied by really choice springers were scarce, and brought fancy prices, some of them selling at from £22 to £24 each, but for ordinary cows there was little demand and at very up-and-down prices. The pig market was moderately stocked, and with a fair demand, prices recovered from 1s. to 2s. per cwt., and a clearance was effected. Nice light-weight pigs sold at from 48s. to 50s. per cwt.; heavy pigs from 46s. to 48s., and coarse and inferior from 32s. upwards.

The severe weather which has been experienced in Ireland for the past week or so has quite nipped in the bud any revival there might have been in the store cattle trade, keep being so dear and scarce that no one cares to invest, so country fairs are very slow.

Beef in the South of Ireland is ruling higher, and at Cork market was selling at 1s. per cwt. more money. Sheep are also brisk, and 8d. per lb. is given freely for prime mutton, though 7d. may be put down as the average.

LONDON.

Islington, Thursday.—Supplies of beasts fair; moderate support. Fat bulls, 3s 6d to 3s 8d. Sheep pens were filled to a moderate extent, and with favourable weather conditions cleared early at late rates. 7½ to 8 stone Down wethers, 5s 2d to 5s 6d; 9 stone, 5s to 5s 2d; 10 stone Down ewes, 4s 2d to 4s 4d. Calf trade proved steady, the best on offer making 5s 4d to 5s 6d per 8lb, to sink the offal. Pigs in moderate demand. Neat small porkers, 4s 6d to 4s 8d; extreme, 4s 10d per 8lb, to sink the offal.

COUNTRY.

Basingstoke, Wednesday.—At Raynbird and Sons' Sale Yard there was a fair attendance of buyers to meet a supply of 33 fat beasts, 43 calves, 392 fat sheep, and 62 head of dairy and store cattle, for which the following prices were realised:—Fat shorthorn steers made up to £21 15s; Welsh steers, £17 5s; Kerry cows, £15 10s; shorthorn bulls, £18 15s, and cows, £15; fat calves, 65s to 97s 6d; small, 20s to 45s; fat wethers, 35s to 53s; fat ewes, 39s 6d to 50s; dairy cows, £11 to £22 15s. An under-average supply of fat beasts (mainly shorthorns) met with a good enquiry, and a clearance very nearly made, prime qualities making extreme prices. With a short supply of fat sheep, trade showed no improvement from last week's quotations. Dairy cattle of all classes met a firm trade, and were easily cleared at an advance. Store cattle continues a slow business. Fat calves are a short supply and dear. Ruling values:—Best quality fat beasts, 6¾d to 7¼d per lb.; 2nd ditto, 6d to 6¼d per lb; bulls, cows, and inferior ditto, 5d to 6d per lb; best quality fat sheep, 7d to 8d per lb; secondary ditto and fat ewes, 5½d to 7d per lb; fat calves, 6d to 8d per lb.

Boston, Wednesday.—A small market, and a slow trade. Best beef, 8s to 8s 3d; cow beef, 7s to 7s 6d per stone; stores, £16; in-calf heifers, £18 to £20; heifers, £16 to £18; calves, 55s to 60s; wethers, 8d per lb; hoggs, 34s to 42s each.

Braintree, Wednesday.—Steady trade. Sheep not up to demand. Hogs in short supply and dear. Store hoggets met a good trade. Pens generally small.

Bristol, Thursday.—Good supply of beef; large proportion of middling quality. Best animals sold steadily, 60s to 62s per cwt; secondary qualities, 56s to 57s. Fair supply of sheep; trade steady. Best light wethers made 7¼d to 7¾d per lb; ewes, 5½d to 6d. Moderate number of pigs on offer, baconers realising 9s 6d per score; porkers, 10s 9d. Store cattle rather better demand.

Bury, Wednesday.—At Messrs. Simpson and Sons' auction mart there was a fair average supply of fat beasts, but the quality was rather below the average. A sharp trade prevailed for all qualities, at a trifle over last week's rates, prices reaching up to £26 15s. Several lots of store beasts, and there were plenty of buyers for all the best bred lots. Rather smaller show of fat sheep, and a better trade may be reported for all descriptions. Short supply of fat ewes. Several lots of store hoggets met a better demand. About 180 useful black-faced ewes in lamb, fetched from 45s to 38s per head. Rather short supply of pigs, and for all descriptions there was a sharp trade.

Calne Friday.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of the Back.	Price per Sc. s. d.
6 sc. 10 lbs. to 9 sc. 10 lbs.	2½ in. and under ...	9 6
Under 10 sc.	Not exceeding 2½ in. ...	9 0
Under 11 sc. 10 lb. ...	Not exceeding 2¾ in. ...	8 6
Under 12 sc.	Not exceeding 3 in. ...	

—C. & T. Harris & Co., Ltd.

Cambridge, Monday.—Beast, 274; sheep, 554; pigs, 423; horses, 4. Beef, 7s to 8s 6d; mutton, 4s to 5s 2d; pork, 6s to 7s. Very few store beast to hand. Fat beast a good show, and prices a little better. Fat sheep a fair trade all round; stores only a few lots shown. Fat pigs a good number to hand, and prices better; stores a slow trade all round. Hay, straw, and roots a fair supply, and good prices made.

Canterbury, Saturday.—The teg trade has opened fairly well, but the supply was very short owing to the snow. Some good two-year-old sheep found purchasers at from 38s 6d to 40s per head.

Carlisle, Saturday.—The show of Irish store cattle on the sands was larger than during the past few weeks, about 100 heifers and stripping cows being offered. The cows were a useful, medium-sized lot, but heifers were mostly of a small description. There was a good attendance of buyers, in spite of the fact that the snow and severe frosts which have characterised the past week are against trade. Business was a little better than recently, and prices were as follows:—Heifers, £6 10s to £9 10s; stripping cows, £10 10s to £11 10s.

Dorchester, Wednesday.—Good all-round supplies to-day, and with a ready sale, buyers realised very satisfactory prices. Fat beef keeps one of the best selling things on the market, at 10s 6d to 11s per score for the best; rough contract bullocks and old cows, 10s. The veal trade quite as good as it has been; best calves, 7½d per lb; seconds, 6d to 7d. Mutton a sluggish trade; ewes and wethers, 7d to 7½d per lb; cross-bred lambs, 8½d to 9d.

Dublin, Thursday.—Numbers in Market:—Beasts, 2,262, increase, 35; sheep, 4,285, decrease, 135; calves, 36, decrease, 7. Choicely-finished cattle early sold, realised fully last week's quotations. Later on demand fell off and became sluggish, with the result that morning prices could not be maintained. Rough and unfinished cattle more difficult to sell. Sheep, except the very choicest quality of light weights, in favour of buyers, many rough and inferior lots remaining unsold. Cattle—live weight (best), 32s to 34s per cwt, and in exceptional cases 35s per cwt.; rough sorts, 27s to 31s per cwt. Mutton—dead weight—6d to 7d per lb. Extreme, 7¼d per lb.—GANLEY, SONS AND CO.

Hereford, Wednesday.—Bullocks and cows, 424; calves, 78; sheep and lambs, 867; pigs (fat and sows), 31; Pigs (stores, not more than ten), 272; pigs (stores, more than ten), 129. Prices of stock:—Best beef, 6d to 7d per lb; wether sheep 6½d to 8d per lb; ewes 5½d to 6d per lb; veal 7½d per lb; lamb, 9d per lb; pork, 5½d to 6d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a large number of fat cattle were forward, and an excellent attendance of local and district buyers, including new purchasers from the south coast. Trade ruled brisk throughout, and values were fully maintained for all the best qualities, but half-finished animals were somewhat cheaper. Fat cows were in request, and sold well. The fat sheep pens were well supplied, and the quality showed an improvement. Buyers were well represented, and prices ruled high for all descriptions. Half-breed hoggetts, 52s; Suffolks to 48s 6d; good ewes, from 45s to 52s; grazing hoggetts were scarce and trade slow. An average entry of calves; the best for weaning made 52s to 38s; for killing, £6 10s downwards. The supply of swine was about the same as last week, and with a large number of buyers present, competition was very brisk, and values again ruled in favour of consigners. Store pigs dear, ranging from 32s to 17s. A few lots of grazing cattle were penned, and with a slightly better demand, all changed hands. Several cows were forwarded, and the best were in strong request at an advance from £1 to £2 per head, prices ranging from £22 10s to £14. At the Drill Hall sixty cart horses and hackneys were offered; trade for the best animals was good, London buyers securing several. Numbers at sale and market:—53 horses; 480 beasts; 47 calves; 1,320 sheep; 1,228 swine.

Leicester, Wednesday.—Very full consignments of Norfolk and Lincolnshire fed bullocks, which came to hand in very good condition. Buyers were well represented, and trade ruled active for choice qualities, but secondary sorts were a very dragging business. Choice bullocks made 6¼d to 6¾d per lb.; secondary qualities, 6d to 6¼d; cows, 5½ to 6d; heifers, 6d to 6¾. Sheep were a large supply, and sold with greater freedom, choice light weights making 7¼d to 7¾d per lb.; large sheep, 6½d to 7d, and ewes, 5½d to 6d. Calves were in better demand at 8d to 8½d per lb.

Newport, Wednesday.—Quotations were:—Best beef, 6½d to 6¾d per lb; secondary sorts, 6d to 6¼d; cows, 5¼d to 6d; best wether mutton, 8d to 8¼d; ewes, 6¼d to 7d; lamb, 10d; veal, 8d to 8¼d; porker pigs, 10s 6d to 11s per score, and baconers, 9s to 9s 6d. There was an average supply, and late prices fully maintained. Messrs. Newland, Davis, and Hunt offered about 60 beasts, 200 sheep, and several calves. The beef trade good, up to 6¾d per lb. for best; tegs, 8d per lb.

Norwich, Saturday.—The supply of store beasts was moderate here to-day; the demand was rather more active for the best lots, but prices showed no advance; secondary descriptions were neglected. Fat beasts were in increased supply, and a complete clearance was not made; prices ranged from 7s to 7s 6d and 8s per 14lb, according to quality. Store sheep ruled quiet at late rates, keeping hoggets making 28s to 38s per head. Fat sheep, which were in good supply, were dull at 7s 6d to 8s and 8s 3d per 14lb.

Romford, Wednesday.—Short supply of fat beasts, trade about the same. Best beasts, 4s 6d to 4s 8d; middlings, 4s to 4s 2d per stone. Calves very short supply, trade dear, at 5s 6d to 5s 8d per stone. Sheep in short supply, trade about the same. Best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d per stone. No store beasts on offer. Pig market still closed.

Rye, Wednesday.—Heifers and steers, 4s 6d to 4s 8d. Kent sheep almost unsaleable. Maids and wethers 4s 4d to 4s 6d. Barrens, 3s 6d. Large pigs, 3s 6d. Small ditto, 4s to 4s 4d. Calves, 5s 4d.

Salford, Tuesday.—To-day's supply of cattle, compared with last week, showed a decrease of about 400

head. Owing to this and the fact that American beef at Birkenhead was dearer, a better trade was experienced, and last week's top price was more readily obtained, and in some cases exceeded. There was a smaller supply of sheep. Trade in this department was also better and prices higher, some choice light weights making up to 8½d per lb. An average supply of calves, and a good demand for choice fat ones at rather better prices. Quotations:—Cattle, 4½d to 6½d; sheep, 6d to 8½d; calves, 5d to 8½d per lb. At market—Cattle, 2,657; sheep, 8,134; calves, 143; pigs, 47.

Sheffield, Tuesday.—Another small show of milch beasts. Demand correspondingly slack. Best lots, £19 to £22; secondary quality, £14 to £17.

Shrewsbury, Tuesday.—Numbers offered: 525 cattle; 65 cows with calves; 719 sheep; 84 calves; 58 fat; 127 porket, and 349 store pigs. Beef, cows with calves, pigs, and fat calves met a better and brisker trade. Sheep slow. Quotations:—Beef, 6d to 7d; Mutton, 6d to 7½d, and veal, 7½d to 9d per lb.; porket pigs, 9s 6d to 11s, and bacons, 9s to 10s per score; cows with calves up to £22 10s. Hay up to £5 5s, and clover up to £5 7s 6d per ton.—CROXTON.

Spalding, Tuesday.—A small show of fat beasts, and a good demand. Best beasts to 8s; cow beef, 7s 6d per stone. There was a large show of stores, but a slow trade, though prices were a shade better than last week. Sheep a small show; mutton, 7d to 8d per lb.

Stockton, Wednesday.—There were on offer 134 cattle, 307 sheep, and 269 pigs. A small show of best cattle, and trade dragged at 7s 6d to 7s 9d per stone; rougher kinds, 6s 6d to 7s; young sheep, 7½d; ewes, 5d to 6d; tups, 4d to 5d per lb.

Thame, Tuesday.—There was a limited supply of stock at market, and with an increased attendance of buyers, trade all round showed a marked improvement, every kind of stock offered, with only very few exceptions, being sold, veal being in great demand, the latter making 9s per stone. Mutton has continuously improved in price as compared with the past few weeks. Bacon pigs were scarce and dear. Mr. Bond's sale comprised 50 fat beasts, 110 fat sheep, 60 fat and weaning calves, and 145 fat and store pigs. Fat bullocks made £16 to £22 10s; fat heifers made £14 to £22 12s 6d; fat tegs, 40s to 51s; fat ewes, 39s to 53s 6d; fat calves, £3 10s to £5 15s; cow calves, 21s to 45s; bull calves, 17s to 46s; fat pigs, 11s per score; fat sows to £7 2s; stores dearer.

Wakefield, Wednesday.—A slow trade for both beef and mutton. Beef, which was again dearer, made 7d per lb; secondary sorts, 5d to 6½d; small sheep, 7½d; and other animals varied from 5d upwards. Number of beasts, 1,225; sheep, 3,537.

Wakefield, Wednesday.—Fewer fat beasts were penned, but the bulk of the stock were in capital condition. The beasts comprised Scotch, Irish, Lincolnshire, and home-fed animals. The market in the best department opened rather brisk, but fell away towards the end. The very best animals were rather difficult to sell, dealers asking the very top price, which buyers were not inclined to give. Prime beef made 6¾d; secondary, 6¼d; other sorts, 5d to 6¼d per lb. A better trade was experienced in dairy cattle, but no advanced prices were paid. Best cows, £17 to £22; secondary, £12 to £16. Store cattle were little sought after, the prices quoted being £8 to £15; calving cows, £15 to £23. The few fat calves on offer were cleared at 6d to 8¼d per lb. The increased numbers of sheep had a telling effect on the market, and dealers in not a few cases had to accept less money to effect sales. Nice small sheep were the best to sell, and fetched 7¼d; good medium, 7d to 7¼d; heavy, much inquired after, 6d to 7d; ewes, 6¾d per lb. With fewer pigs on offer, a better trade was experienced. Stores, 25s to 55s each; porkers, 7s per stone; suckers, 15s to 21s each. Official numbers—Beasts, 1,225; sheep, 3,537; calves, 11, and pigs, 159.

Wolverhampton, Wednesday.—Beasts a moderate supply; fair trade. Sheep, good supply; slow trade. Calves, moderate supply; good demand for best. Beef, 5½d to 6¾d per lb.; a few 7d per lb; mutton, 6½d to 8d per lb; veal, 7½d to 9d per lb; pigs (bacon), 10s to 10s 6d per score; porkets, 10s 6d to 11s per score; sows, 8s to 8s 4d per score.

Worksop, Wednesday.—Very fair attendance, considering the weather, and fair show of stock. Best beef, 7s to 7s 6d per stone; secondary, 6s to 7s; best wethers, 7½d; ewes, 5d to 6d per lb.

FOREIGN.

Deptford, Wednesday.—Beast supplies 820 head, being a decrease of 371 as compared with last Wednesday's figures, and comprised shipments from the United States. Trade ruled slow, at 4s 4d to 4s 8d per 8lb, to sink the offal.

Yorkhill, Monday.—The usual weekly sale of United States and Canadian cattle was held to-day, when there were penned in the sheds 225 cattle landed by the Carthaginian (s), from New York, and 256 by the Sardinian (s), from Boston. All were fully up to the usual standard as regards quality, and were very suitable for the requirements of the trade. There was the usual large attendance of buyers from all parts of the town and country; but trade was of a slow character, and the values received were scarcely up to those ruling on the previous Monday. The dead-weight quotations may be given as follow:—States bullocks, best quality, medium weight, 58s per cwt, and for really choice up to 60s; secondary and heavier, 56s; heifers, 54s to 57s; bulls, best quality, to 50s; and secondary and heavier, 46s to 48s. Canadian bullocks, best class, made up to 58s per cwt; heavy prime, 56s; secondary class, down to 54s; and bulls made similar prices to those ruling above.

Yorkhill, Thursday.—A sale of American cattle was held in the morning, when there were in the lairages 295 cattle landed by the Amarynthia (s), from St. John N.B. The majority of the cattle were bullocks, but there was also a number of bulls included in the consignment. There was only a small attendance of buyers, and trade was of a slow character. Small, neat well-fed beasts secured the best inquiry, and fully maintained Monday's prices. Secondary and heavier were very difficult to cash. The deadweight quotations may be given as follow:—Bullocks, best quality, medium weight, 58s per cwt., and a few really choice up to 60s; heavy prime, 56s; secondary and heavier animals, 54s; bulls, best class, to 48s; and secondary and heavier, 46s. At the finish a number were held over for next week's sale.

CHEESE.

Market Drayton, Wednesday.—Finest Cheshire 8d to 9d per lb, other qualities from 5½d per lb.

Glasgow, Wednesday.—The arrivals were small, indeed they will be that onward till the end of the season. There was a fair inquiry for Cheddars and Dunlops at steady values. Cheddars and Dunlops were quoted from 50s to 58s per cwt; New Zealand and Canadians have also been in fair request at previous values.

Newport, Wednesday.—Quotations: Caerphillies, 63s to 70s; fancy dairies, 72s to 73s; inferior, 40s to —s; Derbys, 66s to —s; truckles, 60s to 68s; and Cheddars, 63s to 65s. There was a short supply and a good inquiry for best quality cheese.

Dorchester, Wednesday.—Best makes 52s to 64s per cwt.

EGGS.

Tuesday.—Leeds: Yorkshire, 15s 6d to 16s per 120; Irish, 10s 6d to 13s. Bedale: 10 for 1s. Gainsborough: 10 for 1s. Settle: 11 or 12 for 1s. Spalding: 1d each.

Wednesday.—Barnsley: 8 for 1s. Boston: 11 or 12 for 1s. Hereford: 10 to 12 for 1s; (wholesale) 13. Keighley: (wholesale) 10, (retail) 9 for 1s. Kirbymoorside: 11 for 1s. Knaresborough: 9 or 10 for 1s. Louth: (wholesale) 16 for 1s. Market Drayton: 9 and 10 for 1s. Market Weighton: 11 for 1s. Masham: 11 or 12 for 1s. Northallerton: 9 or 10 for 1s. Stockton: 8 for 1s. Worksop: 1s 10d to 2s per score.

Thursday.—Birmingham: 8 and 9 per 1s. Brigg: 10 or 11 for 1s. Devizes: 12 to 14 for 1s. Kidderminster: 12 for 1s. Penistone: 10 for 1s. Ripon: 9 to 10 for 1s. Scarborough: 9 for 1s. Wellington: 10 to 11 for 1s. Wetherby: 9 or 10 for 1s.

Friday.—Easingwold: 10 to 12 for 1s. Helmsley: 10 or 11 for 1s. Lincoln: 10 or 11 for 1s. Otley: 9 and 10 for 1s.

Saturday.—Appleby: 10 or 11 for 1s. Berwick: 12 for 1s. Carlisle: 7 and 8 for 1s. Doncaster: 10 and 11 for 1s. Grantham: 10 to 12 for 1s. Howden: 10 or 11 for 1s. Lancaster: 6 or 8 for 1s. Malton: 11 to 12 for 1s. Pontefract: 9 or 10 for 1s. Retford: 1s 10d to 2s per score. Richmond: 10 and 11 for 1s. Skipton: 10 and 11 for 1s. Stokesley: 9 or 10 for 1s. Whitby: 9 or 10 for 1s. York: 9 for 1s. Exeter: 10 for 1s. Tavistock: 12 for 1s. Barnstaple: 12 for 1s. Redruth: 9d to 10d per dozen. Lostwithiel: 16 for 1s. Ashburton: 10d to 11d per dozen.

BUTTER.

Tuesday.—Leeds: York lump, 15s to 15s 6d per stone; do. long rolls, 1½lb, 1s 10d to 2s; fresh, in 1lb prints, 1s 3d to 1s 4d per lb; Irish creameries, 104s to 112s; Bedale: In rolls of 24oz, 2s per roll. Gainsborough: 1s 3d per lb. Settle: 1s 2d to 1s 3d per lb. Spalding: 1s 1d per lb.

Wednesday.—Barnsley: 1s 3d to 1s 4d per lb. Boston: 1s to 1s 2d per lb. Hereford: 1s 3d to 1s 4d per lb. Keighley: (wholesale) 1s 2d, (retail) 1s 3d per lb. Kirbymoorside: 1s 2d to 1s 3d per lb. Knaresborough: (wholesale) 1s 9d to 1s 11d; (retail) 1s 10d to 2s per lb of 24oz. Louth: (wholesale) 1s per lb. Market Drayton: Best 1s 3d to 1s 4d; seconds, 1s 2d to 1s 3d per lb. Market Weighton: 1s per lb. Masham: 2s per roll of 24oz. Northallerton: 1s 9d to 2s per roll of 24oz. Stockton: 1s 3d to 1s 4d per lb. Worksop: 1s 2d to 1s 4d per lb.

Thursday.—Brigg: 1s to 1s 2d per lb. Devizes: (wholesale) 1s 1d to 1s 2d; (retail) 1s 2d to 1s 3d. Birmingham: 1s 3d to 1s 5d per lb. Kidderminster: 1s 2d to 1s 3d per lb. Penistone: 1s 2d per lb. Ripon: 2s to 2s 2d per single roll of 24oz. Scarborough: 1s 4d per lb. Wellington: 1s 3d to 1s 5d per lb. Wetherby: 1s 2d to 1s 3d per lb.

Friday.—Easingwold: 1s 2d to 1s 3d per lb. Helmsley: 1s 2d per lb. Lincoln: 1s 2d to 1s 3d per lb. Otley: 1s 10d to 2s per roll of 24oz.

Saturday.—Appleby: 1s 2d to 1s 4d per lb. Berwick: 1s per lb. Carlisle: 1s 3d to 1s 4d per lb. Doncaster: 1s 1d to 1s 2d per lb. Grantham: 1s 1d to 1s 3d per lb. Howden: 1s 2d to 1s 3d per lb. Lancaster: 1s 3d to 1s 4d per lb. Malton: 1s 2d per lb. Pontefract: 1s 3d to 1s 4d per lb. Retford: 1s 3d to 1s 4d per lb. Richmond: 1s 6d per lb. Skipton: 1s 2d to 1s 3d per lb. Stokesley: 1s 2d to 1s 3d per lb. Whitby: 1s 2d to 1s 3d per lb. York: 1s 2d to 1s 4d per lb. Exeter: 1s 5d per lb. Tavistock: 1s 6d to 1s 7d per lb Barnstaple: 1s 6d per lb. Redruth: 1s 4d to 1s 6d per lb. Lostwithiel: 1s 5d per lb. Ashburton: 1s 5d to 1s 6d per lb.

HAY AND STRAW.

Whitechapel, Saturday.—The trade ruled dull at previous prices. Best clover, 95s to 110s; inferior ditto, 80s to 90s; specially picked hay, 115s; good ditto, 108s; inferior ditto, 80s to 90s; mixture and sainfoin, 80s to 100s, and straw, 28s to 40s per load.

Contagious Diseases of Animals.

FEEDING STUFFS.

Hull, Tuesday.—Linseed: The arrivals are 1,365 qrs from Hamburg, 500 qrs Harlingen, 1,100 Riga, 25 Rotterdam; total, 2,990 qrs. Linseed strong. Calcutta, 51s April-June. River Plate, 52s 3d paid for seed afloat for "Edendale," 53s now wanted; later boats afloat, 52s to 50s 6d, according to position; January there are re-sellers at 50s, but shippers' price is 50s 6d; Jan.-Feb. business done at 49s 9d, but 50s the value; Feb.-March, 49s 9d. Cottonseed: There has been very little doing in this article during the last week, and rather lower prices again accepted, with business done spot at £6 3s 9d, February £6 5s, and Feb.-March at £6 6s 3d, whereat the market is quiet to-day. Oils: Exports for the week ending 4th February, 1902:—Linseed oil: 1 Denmark, 2 Germany, 2 Holland, 4 Norway; total, 9 tons. Cotton oil: 135 Belgium, 26 Denmark, 10 France, 178 Germany, 183 Holland, 1 Norway, 15 Sweden; total, 548 tons. The market is firm. Linseed oil: 29s 9d spot, 29s 6d Feb.-April, 29s 3d May-Aug. Cotton oil: 22s 6d spot, 22s 6d Feb.-April, 23s 4½d May-Aug. Crude: 21s 1½d spot, 21s 1¾d Feb.-April, 22s May-Aug. Rape oil: Jamba naked, 24s 9d spot; first quality, naked, 25s 6d spot. Oil seed cakes: Linseed cakes are 2s 6d per ton dearer, and very scarce pending seed arrivals. Cotton cakes are 2s 6d per ton cheaper. Deliveries ex contracts very good, but fresh sales are very moderate.—KEIGHLEY, MAXSTED, AND CO.

London, Thursday.—Linseed: Continued belief in the shortness of crops this year, combined with an active demand, has caused prices to advance. Spot Calcutta-London 58s 6d paid—very little obtainable, passage 55s to 54s 6d, February 53s 9d, March 53s, April 52s, April-June 51s 9d. La Plata January-February 51s. Hull firm. Calcutta April-June 52s 6d paid. La Plata near 52s 6d to 50s 9d, passage 51s 3d, February, 51s. To the Continent, Bombay February-March 54s, April-May 53s. Calcutta, afloat 54s 6d, April-June 51s 3d. La Plata shipping or shipped, 50s 10½d, January-February 50s 6d. Linseed Oil: Excited and a smart advance has again to be recorded. We quote spot in pipes £31 5s, barrels £31 10s, May-August £31 5s, September-December £29 10s to £30. Hull spot naked, £30 15s, March-April £30, May-August £30, September-December, £29. Linseed cakes are firm. We to-day quote London made £8 5s to £8 10s ex mill, American Western £7 7s 6d to £7 12s 6d, Russian £7 12s 6d to £8 2s 6d. Cotton cakes weak, London made £4 7s 6d to £4 10s. Rapeseed is again firmer. Brown Cawnpore, February-March 40s 6d, March-May 40s 6d. To the Continent we quote Yellow Guzerat February-March 40s 3d, March-May 46s. Brown Cawnpore February-March 40s 6d, March-May 40s 6d. Brown Calcutta February-March 37s, April-June 39s 6d. Ferozepore February-March 40s 3d. Jamba, March-May to Hull 32s. Cottonseed: Heavy arrivals and shipments have caused the market to weaken, not much business doing. Spot London £6 6s 3d, afloat £6 7s 6d, February-March £6 8s 9d, April-May £6 10s buyers. Hull spot £6 3s 9d, January £6 5s, February-March £6 7s 6d, April-May £6 10s. Bombay to Hull £4 11s 3d, February-March sellers. Cargoes, February-March £6 11s 3d, April £6 12s 6d.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes: The market is barely supplied with foreign, and, with an improved demand, values continue to harden. Russian offer rather more freely for shipment, while landed lots are firmly held at last week's prices. Americans remain scarce on spot, and 2s 6d per ton dearer on the week. Calcutta made, slightly out of condition, are cheaply offered at £7 5s per ton in bags. London made sell slowly, crushers being unwilling to make any concession in price. Cotton Cakes: Some little improvement has occurred in arrived or near at hand Egyptian, which are now held at 1s 3d to 2s 6d per ton dearer, and the advance seems likely to be maintained, as a considerable quantity has been cleared off the market, and shippers are less anxious sellers. English are about 1s 3d per ton cheaper, but the trade is not fast. Decorticated are without change in value, with meal also unchanged. Rape Cakes: Quiet and unchanged in price. Maize Germ Meal: American for February-March shipment may still be bought at £5 12s 6d, at which, however, there is very little response. English offers sparingly at 2s 6d per ton more money. Rice Meal: There is no change in the position. Rangoon in warehouse moves off steadily at unchanged prices, and shippers are still willing to entertain bids at £4 11s 3d to £4 12s 6d for new crop.

SEEDS

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that the recent spell of wintery weather has naturally somewhat checked the consumptive inquiry for farm seeds, and diminished activity therein has resulted; nevertheless, values all round keep steady, and a healthy consumptive demand is shortly expected. Red clover-seed continues in sufficient supply, and moderate rates for same are accepted. White, meantime, remains scarce and dear, whist alsyke tends upwards. Perennial and Italian ryegrasses are quiet just now. For spring tares former terms are quoted. Linseed is strong at its recent advance, but mustard must be written dull. Mere money meanwhile is asked for rapeseed. As regards canary seed, the movements are erratic and puzzling. Blue peas and haricot beans have been in somewhat improved request.

STOCK AND SHOW NOTES.

By Herdsman.

The Royal Lancashire Agricultural Society's Show will be held in September at Preston, and already a local committee has been formed and a subscription list started. At a special meeting held for this purpose Lord Derby, who is Mayor of Preston, presided, and moved the following resolution, which was carried unanimously:—"That this meeting cordially approves the raising of a sum of £2,000 (at least) in aid of the expenses and prizes at the show, and pledges itself to aid in ensuring the success of the show." His lordship said that, judging by past shows, it was probable that the total expenses in connection with the exhibition would not be much less than £8,000 or £8,500. When the show was held at Liverpool over £2,000 was contributed towards the expenses, and last year, at St. Helens, the sum of £1,500 was raised. He was glad to say that Moor Park had been most kindly placed at the disposal of the society by the Corporation. This was a very material consideration, because Moor Park for the purposes of a show ground possessed advantages which they might have a great deal of trouble in finding elsewhere. They desired to get a good class of exhibitors, and they hoped that people would interest themselves in the matter, so that they might have, as far as possible, co-operation throughout the county. I may add that about £800 has already been promised, Lord Derby himself giving £300.

The Committee of the Denbighshire and Flintshire Agricultural Society have fixed on August 7th as the date for the holding of the Society's Diamond Jubilee Show, which will be held at Ruthvin.

Mr. R. J. Kisby, secretary of the Gransden and District Agricultural Society has informed me that this year's show is fixed for Tuesday, September 30th.

The show of the Darwen and District Agricultural Association, will, as usual, be held on the Saturday before Whitsuntide, viz., May 10th. Anyone interested in the show, and having suggestions as to classes and prizes, or any other matter affecting the interests of the show and exhibitors, are invited to send same to the secretary, Mr. J. Ainsworth, Post Office Chambers, Darwen.

A meeting held at Ipswich Town Hall for the purpose of making preliminary arrangements with reference to the annual show of the Suffolk Agricultural Association, which will be held in that town on June 5th and 6th, a sum of £257 17s. was promised towards the necessary amount required, viz., £500 at the least.

The annual sale of Percheron horses bred by the Hon. H. G. McMillan at Rock Rapids, Iowa, U.S.A., was attended by some record-breaking results. A large number of buyers was present, and the average of over £120 on twenty-four head is exceptionally good for draught horses, and has not been equalled for some years past. The highest price was £300, paid for Seducteur, an animal which holds the highest prize record of any living Percheron stallion, either in the United States or in France. Other prices made were £240 for Peltron, £200 for Condon, and an equal sum for Julien, all stallions with established breeding records. Highest price for mares was £99, paid for Perfection, while several other females fetched closely approximating amounts.

A deputation of the Lincoln City Council has been appointed to meet the Council of the Lincolnshire Agricultural Society, and invite them to hold their summer show of 1902 at Lincoln.

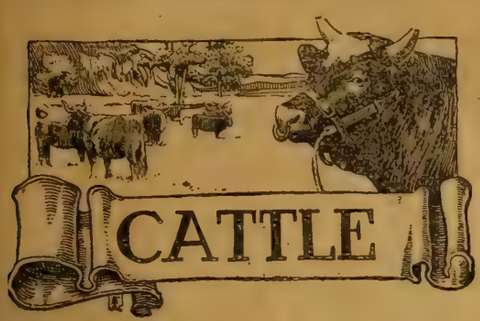
The Sussex County Agricultural Society have decided to hold their show this year at Preston Park, Brighton, on August 14th and 15th, the entries to close on July 10th, with the secretary, Mr F. Burfield Dyer, 2, St. Andrew's Place, Lewes, Sussex.

I have received a copy of the prize list for the North East Agricultural Association's spring show at Belfast on Wednesday, April 30th, and two following days. As in former years, liberal class prizes, as well as numerous valuable special awards, are offered for thoroughbred stallions and polo ponies, heavy and lght draught horses, shorthorn, Aberdeen Angus, Galloway, Hereford, Channel Islands, Kerry, and Dexter, and dairy cattle; pigs and poultry and eggs; whilst there will be milking trials and butter and butter-making contests. The entries close as follows:—Stock, draught horses in gear, harness horses, poultry dairy produce, implements, etc. Single fees Saturday, April 5th; double fees, the following Saturday. Jumping and trotting competitions Wednesday, April 30th. The secretary is Mr. Kenneth McRae, The Ulster Bank Chambers, 37, Dongeal Place, Belfast.

In addition to the above-mentioned awards, there are premiums for thoroughbred stallions and also for bulls. Four premiums of £50 each, from the funds administered by the Royal Dublin Society, under the Probate Duties (Scotland and Ireland) Act, 1880, will be offered for thoroughbred stallions suitable for getting hunters and other half-bred horses. Any thoroughbred stallion duly entered in Weatherby's Stud Book is eligible to enter for these premiums, but only such stallions as are accepted for the register of the Department of Agriculture and Technical Instruction for Ireland, or other stallions standing in the country, or stallions imported into Ireland for service, will be allowed to compete for these premiums. Subject to the foregoing rule, all thoroughbred stallions entered at this show may compete for these premiums. No special entry for the premiums is required, and no extra fee will be charged.

The premiums for bulls will be offered jointly by the County Urban Committee of Agriculture and the Department of Agriculture and Technical Instruction for Ireland, under the Department's scheme for encouraging improvement in the breeds of cattle. Breeders may offer their bulls for these premiums without being charged any additional entry fee. Full particulars of the Department's scheme can be had on application to the Secretary, Department of Agriculture and Technical Instruction for Ireland, Upper Merrion Street, Dublin.

The Oxfordshire Agricultural Society have now issued the prize schedules in connection with their Witney meeting, to be held on May 13th and 14th next, and I see that prizes to the amount of over £1,200 are offered, besides a Blythwood challenge bowl for Jerseys, gold and silver medals. Classes are provided for Shorthorns, Herefords, Jerseys, Guernseys, Kerry and Dexter Kerry, and dairy cattle, Shire and other heavy horses, Hunters, Hackneys, Army Remounts, Polo ponies, jumping and driving competitions, Oxford Down, Hampshire, Southdown, Shropshire, and Cotswold sheep, Berkshire and other pigs, butter, dead poultry, eggs, honey, sheep-shearing, and horse-shoeing. Demonstrations in trussing and cramming poultry, etc., will be given each day. Entries for implements close March 26th, and for stock March 31st. Prize-lists can be obtained of the secretary, A. F. Milton Druce, Estate Offices, 16, Queen Street, Oxford.



The Bath and West and Southern Counties Society offer a sum of £3,296 in money prizes for stock, produce, etc., at their show at Plymouth from May 27th to May 31st. This amount is in addition to medals and plate.

THE GALLOWAY HEIFER, "MAID OF HONOUR," which forms the subject of the above illustration, was bred by Messrs. J. and S. Nivison, Lairdlaugh, Dalbeattie, N.B.; sire "Queen's Messenger," 6,598, dam "Jean 7th, of Lairdlaugh," 13,559. "Maid of Honour" was exhibited at the Smithfield Club's Show last December, by Messrs. T. Biggar & Sons, of Chapelton, Dalbeattie, and it won first prize in the class for heifers not exceeding three years old, and was also awarded the £20 silver cup for the best Galloway in the Show.

There will also be a large display of implements, machinery, and articles of general utility, an exhibition of art-manufactures, horticultural and poultry shows, butter-making, milking, shearing and shoeing competitions, and performances by a military band. Entry forms, regulations, etc., can be obtained of the secretary (Mr. Thos. F. Plowman, Bath), to whom application should be made at once.

A council meeting of the National Sheep Breeders' Association will be held at the Royal Agricultural Hall, Islington, on Tuesday in next week, at which some important business will be transacted. Among other items of the agenda are the following:—To receive the replies from the Southdown, Leicester, and Oxford Down Societies *re* contribution to the costs of the proposed alteration of the memorandum and articles of association; to receive report *re* carriage of rams in crates by passenger train; to receive reply from Board of Agriculture *re* resolution *re* foot-and-mouth disease, passed at the last meeting of the Council; to receive reply from Board of Agriculture *re* report of special committee on sheep scab regulations adopted by the Council on April 2nd, 1901, and forwarded to the Board of Agriculture on April 10th, 1901.

The Use of Cod Liver Oil in the Rearing of Calves.

The experiments commenced by the Yorkshire College, Leeds, and the East and West Ridings Joint Agricultural Council in 1899 on the properties and efficacy of codliver oil as a substitute for cream in calf-rearing were continued during 1900 and 1901. The 1901 experiments were commenced last spring, and are not yet sufficiently advanced for comment, but the 1900 experiments provide material for the report just issued by the above institution:—

"Twelve calves, all about a week old, were purchased between the 19th and 24th March, 1900. They were fed with whole milk twice a day, the allowance per head to begin with being six pints per day. The milk was gradually increased until each calf, when about six weeks old, was receiving eight pints per day. Having reached this age they were weighed on April 28th, and divided into two lots, one lot of four to be reared on whole milk and the remaining eight to have separated milk with a small quantity of cod liver oil gradually substituted for the whole milk on which, up to that time, they had been reared. On May 12th, when the calves were seven weeks old, the eight ceased entirely to get whole milk, and from that date their diet consisted of separated milk and cod liver oil. On the same day the quantity of milk—either whole or separated—for each calf was increased to 10 pints. The allowance of cod liver oil to each of the eight animals had now reached 2oz. per day, and this quantity was maintained. On June 9th the whole milk for each of the four calves was increased to 12 pints per day, and a similar increase was made in the case of the eight receiving separated milk. This daily allowance of milk was continued until September 15th, after which date a gradual reduction was made, and the calves were weaned on September 22nd. As regards trough food all the calves on June 2nd got their first allowance of a mixture of about 1lb. of linseed cake and bran, and as much meadow hay as they cared to eat. The quantity of cake and bran was gradually increased until on September 22nd each calf was getting about 4½lbs. per day. It should be borne in mind that the animals were not allowed out to graze.

From the figures given it appears the whole milk calves again did better than the others; also that the whole milk calves had a better "bloom," and in general appeared to be heavier than those reared on separated milk and cod liver oil, was evident to all who saw them just before weaning. The cost is, however, considerably greater in the first system than in the second.

If the whole milk is valued at 8d. per gallon, then the daily cost of each of the four calves would be 1s., when the maximum allowance of milk was given. If the separated milk is valued at 2d. per gallon, the milk for the eight would cost 3d. per head per day, to which has to be added the cost of the cod liver oil. The price paid for the oil was 5s. 6d. per gallon—containing about 150oz.—so that the cost per head per day for oil amounts to about 1d. The total cost, therefore, for each calf in lot 2 amounted to rather less than 4d per day. The difference in the average weight of the calves in the two lots is therefore not in proportion to the difference in cost.

The experiments, therefore, show that separated milk with a small quantity of cod liver oil, can be successfully employed in calf-rearing, but that better calves result from the much more expensive system of feeding with whole milk. There is, however, a great difference between the amount of fat present in 1½ gallons whole milk, and that in 1½ gallons separated milk with 2ozs. cod liver oil added. If we assume that whole milk contains 3 per cent. of butter fat and has a specific gravity of 1.032, then in 1½ gallons a calf receives slightly more than 7 2-5ozs. fat per day. This is nearly four times the amount of fat supplied to a calf getting 1½ gallons separated milk and 2ozs. cod liver oil. It therefore follows that the cod liver oil calves might continue to get 2ozs. of oil daily for about four times the period during which lot 1 received whole milk before the former had consumed an equal quantity of fat or oil.

Quality of Meat.

A doubt is often expressed as to the beef of animals reared by the help of cod liver oil being equal to that of bullocks that have been reared as calves on whole milk. The three pens of the 1899 experimental calves were all treated alike after weaning, and when about two years old were sold to the Leeds Co-operative Stores. The number of animals in each pen was originally five, four steers and one heifer. As the animals got older the heifer was withdrawn from each pen. One of the steers in pen 1 died when a little over a year old, so that those reared on whole milk were represented by three bullocks, those reared on separated milk and cod liver oil by four, and those reared on separated milk and calf meal by a similar number.

The manager of the Leeds Co-operative Stores examined the carcases, and reported as follows:—"The whole milk beasts killed the worst of the lot: only No. 1 bullock was anything like as good as the cod liver oil beasts. Calf meal beasts opened the best, there being more inside fat or suet, but they were not so good all through as the cod liver oil beasts; these were thicker on the ribs, and on the whole were decidedly the best beef. No. 14, one of the calf meal beasts, killed exceedingly well. They were all good beef and very clear, there being no signs of tuberculosis in any." From this report, therefore, there appears to be small cause for apprehension that the quality of the carcase will be interfered with by giving cod liver oil as a substitute for butter fat in the early stages of the life of the animal. The quality of the meat obtained from the 1900 calves has yet to be determined.

Sale of Sussex Cattle at Hayward's Heath.

The annual spring sale of pedigree Sussex cattle, held at Hayward's Heath, by Mr. Thomas Bannister, took place in his enclosed sale yard on the 7th inst., when the catalogue comprised thirty-three bulls and one heifer, chiefly young animals, from the herds of various well-known breeders. There was a large attendance of buyers, bidding was fairly brisk, and every animal was sold, at an average price of about 20½ guineas. The top figure of the sale was 34 guineas, realised by Mr. Saillard, for his Bewbush Baron 2nd, calved January last year. Below we give a list of the animals which went at 20 guineas and over, the names in parenthesis being those of the sellers:—

Bull Show and Sale at Castle Cary.

A show sale of about seventy pure bred shorthorn, Devon, and Hereford bulls, the property of various owners in the district, was held at Castle Cary on Tuesday by Messrs. Moody and Son, in the presence of a large company of breeders. A sum of about 40 guineas, and two champion cups, were offered in prizes, the judges being Messrs. Hobbs, Tory, and Taylor, and their awards were as follows:—

Bull, any breed, over three years: 1 and champion for best bull in show, Mr. J. Hilliard; 2, Mr. Ashford Lavington.

Bull, any breed, over two and under three years: 1, Mr. J. Day; 2, Mr. T. H. Vallis; r, Mr. G. G. White.

Shorthorn bull, over 15 months and under 24 months: 1, Mr. N. Benjamin; 2, Mr. W. J. Mullins; 3, Mr. G. G. White.

Shorthorn bull, over nine and under 15 months: 1 and reserve for championship, Mr. O. N. Holt Needham; 2 and Mr. Holt Needham's silver cup, Mr. A. J. Mullins; 3, Mr. G. G. White.

Devon or Hereford bull: 1, Mr. S. C. Hayter; 2, Mr. W. T. Havter.

Bull calf under six months: 1, Mr. W. J. Mullins; 2, Mr. G. G. White; 3, Mr. A. J. Mullins.

There was a good attendance at the sale, and some fair prices were realised. The champion bull was purchased by Mr. Tory for 32 guineas, the next highest price being 30 guineas, which sum was obtained for Mr. Holt Needham's first prize-winner. Mr. Vallis's second prize bull went at 26½ guineas, but Mr. Moody's highly commended animal realised a half a guinea more—viz., 27 guineas, whilst Mr. G. G. White's third prize animal sold for 22 guineas; other prices ranged from 20 guineas downwards, this figure being paid for a bull from the herd of the Right Hon. Lord Wolverton.

Store Stock Sale at Shrewsbury.

Messrs. Alfred Mansell and Co.'s February sale of store stock was held on the 7th inst., when the attendance of buyers far exceeded expectation. The sale, as usual, opened with the sheep, for which there was a fair demand. The feature of the sale was the fine display of Polled Angus cattle, which included eight bullocks, from Viscount de Vesci's herd, and which realised from £19 5s. to £22 each. Other prices were as follows:—

Hereford bullocks, £16 to £10 15s.; Hereford yearlings, bullocks, £8 5s. to £7 5s.; Hereford ditto, heifers, £8 17s. 6d. to £8 7s. 6d.; shorthorn bullocks, £12 15s. to £11 2s. 6d.; shorthorn heifers, £10 12s. 6d. to £9 10s.; shorthorn barrens, £11 2s. 6d. to £9 7s. 6d.; Polled bullocks, £15 17s. 6d. to £12 17s. 6d.; cross-bred bullocks, £12 15s. to £9 10s.; cross-bred heifers, £9 15s. to £7 17s. 6d.; black horned bullocks, £13 5s. to £11 7s. 6d.; Welsh runts, £11 7s. 6d. to £7 17s. 6d.

Show and Sale of Shorthorns at Aberdeen.

The annual spring show and sale of Shorthorn cattle was held at the Agricultural Hall, Aberdeen, on Thursday. There was a large number of local dealers present, while buyers for export were well represented. The quality of the older stock shown was not up to the mark, the animals somewhat off colour and weeder, but in the younger classes some very nice beasts were shown, and the quality was better all round. The following is the list of the awards:—

Bulls calved between 1st December, 1900, and 28th February, 1901—1 Wm. Anderson, Saphock; 2 Francis Simmers, Whiteside; 3 Sir Arthur Grant, Bart., of Monymusk; 4 T. F. Jamieson, Mains of Waterton; 5 James Durno, Jackston; 6 Robert Bruce, Heatherwick; 7 Wm. Connon, Nether Coullie.

Bulls calved on or after 1st March, 1901—1 Francis Simmers; 2 Wm. Adam, Baads; 3 P. Bruce, Myreton; 4 Wm. Anderson; 5 A. Watson, Auchronie; 6 and 7 James Durno; 8 Robert Bruce.

Heifers calved on or after 1st December, 1901—1, 2, and 3 John Robertson, Tocherford.

At the beginning the sale was rather slow, but soon pulled up, the hall filling as the sale proceeded. The total number of animals on offer were 138, as against 233 last year, the average this year being £22 7s. 2d., as compared with £23 14s. 6d. last. This year the bulls averaged £22 7s. 5d., while last year 208 bulls averaged £24 9s. 2d. Following are some of the

The second prize bull Count, from Whiteside, made 34 guineas, to Mr. Campbell, Harthill. The third prize bull in the same class, Quicksilver, from Monymusk, was sold at 38 guineas to Mr. Stewart Garbity, Morayshire. The first-prize bull Sentinel, from Sophock, fetched 47 guineas, the buyer being Mr. Brown, of Longhaven. Mr. Jamieson's fourth prize bull Harlaw, sold at 30 guineas, while the sixth prize bull, Stylish Prince, from Heatherwick, went at 25 guineas to Mr. John Duncan, salesman, Aberdeen. The fifth prize calf, Triumph, from Jackston, was a favourite in the ring, and went at 37 guineas to Mr. Adam, Baads, and the first prize calf in the young class, Chief, from Whiteside, fell at 38 guineas to Mrs. Law, New Keig. Coming Archer, the third prize bull from Myreton, took the fancy of several buyers, and was sold at 37 guineas to Mr. Bruce, Bogmuchals. The 4th prize calf fetched 25 guineas, and the second prize bull Deeside Hero, from Baads, 43 guineas, from Mr. Macpherson, Gibston, Huntley. The fifth prize bull Alpine Monarch, sold at 25 guineas to Mr. Manson, Kilblean.

Particulars of Transactions in Store Stock.

Reported to the Department of Agriculture and Technical Instruction for Ireland.

There was but a small supply of store cattle at the fair at Middleton, Co. Cork, on Monday, whilst the supply of sheep was small and demand slow. Prices: Calves, second class, £3 10s.; third class, £2 7s. 6d. to £3. Yearlings, second class, £6 to £7 10s.; third class, £4 10s. to £5 5s. Two-year-olds, first class, £10 to £11; second class, £7 10s. to £9; third class, £6 10s. to £7. Springers, first class, £14 10s.; second class, £12 5s. to £13; third class, £11 2s. 6d. Lambs, first class, £1 10s. to £1 12s.; second class, £1 3s. 6d. to £1 7s. 6d. Over 12 and under 24 months, first class, £1 17s. to £2 3s.; second class, £1 10s. to £1 13s. Young pigs, 8 to 10 weeks old, sold at from 24s. to 27s. each.

Mr. William Chivers, head of the firm of Chivers and Sons, jam manufacturers, of Histon, Cambridge, died on Tuesday morning, aged 50 years.

Show and Sale at Wimborne.

Messrs. T. Ensor and Sons' first sale this year of horses at Wimborne took place on the 7th inst., when the catalogue comprised about 130 horses of all classes, the quality of which was exceptionally good. Some very useful cart horses were brought out, as well as a few choice hunters and harness horses. Trade for the latter class of animals ruled very brisk, and buyers could have been found for a few more good harness horses of the first grade. Cart horses formed the best display seen here since the September sale, but the trade for them ruled slow. The judging was kindly undertaken by Mr. J. S. Passmore (Came) and Mr. Walter White (Milborne Port) for heavy horses; whilst Mr. R. G. Cave (Almer) and Mr. White judged the light horses. In the class for mare or gelding suitable for town work, the first prize of £3 went to a bay gelding, rising 5 years, 16 2, the property of Mr. W. Besant, Bere Regis; sold at 56gs., to go to Chichester. The reserve number, after keen contest between Mr. L. Deadman, of Havant, and Mr. C. J. Waters, West Woodyates, eventually fell to the latter in consideration of age, the former securing the "V.H.C." card with a massive bay gelding, 4 years old, 17.1, this gentleman also taking the premier position in Class II. with a typical lurry horse, whilst Mr. T. Read, Ibsley, was reserve. In the light horses section the prize of £3 for the best saddle or harness horse over 15 hands went to Mr. Clem Tory, Sturminster Marshall, with a nice-quality bay gelding, 5 years, which was sold to go to Southampton, at 50gs. In the next class, for the best saddle or harness horse, not exceeding 15 hands, Mr. H. T. Gay, Scotland Farm, Winterbourne Stoke, was an easy first with a chestnut cob, shown in harness, 6 years old, 15 hands.

On coming to the sale ring the business of the day opened at noon with a few miscellaneous lots at the commencement, which sold remarkably well, scarcely a horse being passed in the first 30 lots. The following were the chief prices:—Heavy horses: Mr. J. Humby, Tarrant Munckton, 43gs.; Mr. T. B. Sprake, Knoll Hill, 35gs.; Mr. W. Besant, 56gs., 44gs., and 38gs.; Mr. Deadman, 58gs. and 35gs.; Mr. W. Munckton, 45gs., 38gs., 36½gs., and 35gs. Two cart fillies from Mr. Chisman, Parley, sold for 63gs Light horses: Two hunters from Mr. Wymer, Chettle House, 89gs.; Mr. G. W. Moody, Stapleton Manor, 45gs.; Mr. C. Tory, 50gs.; Mr. W. Munckton, 40gs.; Mr. H. T. Gray, 36gs.; Mr. Brunt, 35gs.; Mr. B. Barnes, Dorchester, 35gs.

Show and Sale at Carlisle.

The annual Candlemas show and sale of seasoned agricultural, saddle, and harness horses, ponies, and cobs, held at Carlisle by the Hetherington Auction Company, Ltd., took place on the 6th inst., when 140 animals were catalogued, the number being slightly under that of last year's corresponding sale. There was a very large attendance of buyers from all parts, and a good demand for nice, useful farmers' horses was experienced; but secondary qualities were slow to sell on account of the general scarcity of keep and it being soon on in the season.

Appended are details of the prize awards, prices realised, etc.:—

Cart horse or mare, any age: 1, Mr. William Rush, Carlisle, a brown horse, six years old, 62½ guineas, to Mr. Hodgson, Carlatton; 2, Mr. W. Rush, chestnut horse, six years old, withdrawn at 64 guineas; Mr. G. Hodgson, Carlatton, bay horse, five years old, withdrawn at 77 guineas; Mr. Underwood, Luckens, black horse, seven years old, 43 guineas, to Mr. W. Rush. Others entered in the class made from 41 guineas downwards.

Cart horse or mare, under five years old: 1, Mr. J. Underwood, Blackford, bay mare, rising four years old, withdrawn at 54 guineas; 2, Mr. Thomlinson, Jerriestown, bay gelding, rising four years old, 51½ guineas, to Mr. Robson, Fenton; Mr. Little, Bowness Hall, bay mare, rising five years old, withdrawn at 45 guineas. A five-year-old bay, sent by Mr. Thompson, Walby, sold at 56 guineas to Mr. W. Rush, others entered in the class selling up to 51 guineas.

Cart horse or mare, under three years: 1, Messrs. Twentyman, Kirkhampton, brown mare, rising three years, 47½ guineas, to Mr. Bell, Woodfield, Annan; 2, Mr. Little, Bowness Hall, bay gelding, rising three years, withdrawn at 46 guineas; Mr. Whitfield, Wiggonby, 36 guineas.

SHEEP.

The Colonies and Sheep.

In the course of his inaugural address to the students at the Colonial College, Nollesley Bay, Mr. Molden, the new principal, dealt with the subject of live stock as it affected the colonies, as well as farming at home. Sketching out the need there would be for the colonies and other sheep-raising countries to adapt themselves to the changed conditions occasioned by the low price of wool since the modern glut assumed a chronic form, and since cold storing of meat has become such a practical matter, he pointed out that it was highly desirable that those who colonised should understand the scientific laws of breeding, so that in making necessary changes of breed they might avoid the loss which errors would bring about They should also know the characteristic features of the British breeds, so that they would better be able to judge the possibilities of breeds in other countries. It was a great mistake to go abroad without that knowledge, as it was only in England that that and kindred knowledge could be obtained. The large number of students in the college from distant countries showed how desirable those in the colonies and elsewhere felt it was to get the grounding which English farming—the most skilled farming in the world—alone can give. The international character of the college was a valuable feature, for it gave young Englishmen the opportunity of learning much about countries to which they intended to go, and to specially prepare themselves with a knowledge of those breeds which are likely to prove of greatest value.

Experiment in Sheep-Breeding.

A report has been issued of the experiment in sheep-breeding carried out by Professor Winter for the University College of orth Wales at Lledwigan. The experiments, which were commenced in 1899 with the object of ascertaining the most suitable cross for Welsh mountain ewes for the production of fat lambs, were continued at Lledwigan during 1900-01.

In 1899-1900 rams of the Wiltshire, Shropshire, and Leicester breeds were used, and of these the Wiltshire gave the most satisfactory results. The lambs of this cross weighed heavier and fattened earlier than either of the other crosses. The lambs of the Leicester cross were almost as early as those of the Wiltshire, but were deficient in weight. The Shropshire cross weighed heavier, but were slower in maturing than the Leicester cross.

The experiment in 1900-01 was similar to that of the previous season except that a Southdown ram was substituted for the Leicester. Seventy-five small mountain ewes from the same farm in Merionethshire were divided as follows:—Lot I., consisting of 30 ewes, ran with a Wiltshire ram; lot II., consisting of 20 ewes, ran with a Shropshire ram; lot III., consisting of 25 ewes, ran with a Southdown ram. The rams were turned in on October 5th, and were removed on November 30th. From that date until the lambs were sold the various lots were grazed on the same land. The lambs were dropped between March 4th and April 13th. Two ewes served by the Shropshire ram were barren, and there was a dead lamb in each of the other lots. The ewes and lambs were sold as "couples" at the beginning of August to a Manchester butcher. He selected all those that were ready for slaughter on August 5th, the remainder going on September 6th.

It was found that 29 Wiltshire-cross lambs averaged 68lbs. live weight, 18 Shropshire-cross lambs averaged 68lbs. live weight, and 25 Southdown-cross lambs averaged 67lbs. live weight.

The dry season proved unfavourable for the lambs at Lledwigan. They were considerably slower in fattening, with the result that the sales of the different consignments were almost a month later than those of the previous year. They were judged by two experts—a butcher and a dealer—at the beginning of August. As regards ripeness of condition, they decided in favour of the Wiltshire cross, but were of opinion that in this respect they were closely followed by the Southdown cross. The superiority of the Wiltshire cross was less marked than in the previous year. They showed great aptitude for fattening, and possessed the mellow touch and good appearance which are of such great importance in the case of fat lambs, but although several of them were considerably heavier than any of the lambs in the other lots, they were rather uneven, and on the whole there was practically no difference in weight between them and the lambs of the Shropshire cross. The latter undoubtedly improved their position as compared with last season. They were very even in size and character, and with one exception were all selected in the first consignment for slaughter, but from the butcher's point of view they were not equal to the Wiltshire and Southdown crosses. The Southdown cross produced fat lambs of excellent quality, but they were smaller than the other crosses, particularly the earlier lambs. They were, however, nearer to them in weight than their appearance indicated. There can be no doubt that this cross is a good one for small mountain ewes. Apart from the quality of the produce, the fact that the lambs at birth have small heads and light shoulders is a strong recommendation in favour of the cross, as a great deal of the mortality in the case of little sheep is frequently caused by their inability to deliver their lambs.

A further experiment on similar lines is being conducted during the present season.

Royal Dublin Society's Spring Show.

The following is a list of the gentlemen who have consented to officiate as judges at the Royal Dublin Society's Spring Show, to be held at Ball's Bridge, Dublin, on March 15th, 16th, 17th, and 18th:—

Cattle: Shorthorns:—T. H. Hutchinson, the Manor House, Catterick, Yorkshire; J. Deane Willis, Bapton Manor, Codford, St. Mary, Bath. Herefords:—Francis Evans, Bredwardine, Hereford. Aberdeen Angus:—George Bruce, Tuchineal, Cullen, N.B.; George J. Walker, Perlethen, Aberdeen, N.B. Norfolk and Suffolk Red Polled, Ayrshire, and Dairy Cattle, and Extra Stock:—Garrett Taylor, Trowse House, Norwich. Kerry and Dexter:—R. Tait Robertson, Church Farm, Baberaham, Cambs. Channel Island Cattle and Milking Test:—Ernest Mathews, Chequers Mead, Potters Bar.

Pigs:—J. Henebery, Grace Dieu Cottage, Waterford.

Hackney and Harness Horses:—C. Edward E. Cooke, Hinxton Grange, Saffron Walden.

Agricultural Horses and Draught Horses and Vehicles:—John Marr, Cairnbrogie, Old Meldrum (Clydesdales); Garrett Taylor, Trowse House, Norwich (Shires).

Miscellaneous: Butter, Cream, Cheese, and Eggs:—J. Hudson, jun., 50 and 52, Ludgate Hill, London E.C. Home-made Bread:—John Mooney, Eastwell, Palmerston Park, Dublin. Hive and Bee Appliances:—J. M. Gillies, 51, Palmerston Road, Rathmines, Dublin.

Judges for the Oxfordshire Show at Witney.

The following gentlemen will officiate as judges at the Witney Meeting of the Oxfordshire Agricultural Society, to be held on May 13th and 14th:—

CATTLE.—Shorthorn and Family Class: J. P. Terry, Berryfield, Aylesbury. Hereford and Family Class: J. H. Yeomans, Stretton House, Hereford. Jersey: H. C. Webb, Audley End, Saffron Walden. Guernseys and Kerries: G. Titus Barham, Sudbury Park, Wembley.

HORSES.—Agricultural: Thomas B. Freshney, South Somercotes, Linc.; William Horrell, Thorney, Peterborough. Hunters, Polo Ponies, Etc.: W. H. Dunn, Wallingtons, Hungerford; Hon. A. E. Parker, Bangor-on-Dee, Wrexham. Hackneys Etc.: James Hornsby, Laxton Park, Stamford. Remounts: The Right Hon. Viscount Valentia, C.B., M.P., Bletchington Park. Jumping and Driving: The President, W. H. Dunn, James Hornsby, Hon. A. E. Parker.

SHEEP.—Oxford Down: J. P. Case, Binham Abbey, Wighton, Norfolk; W. D. Little, Estate Office, Middleton Park, Bicester. Hampshire: T. A. E. Hayter, Whitchurch, Hants. Southdown: R. Anderson, Cirencester. Shropshire: Charles Coxon, Elford Park, Tamworth. Cotswold and Any Breed: T. R. Hulbert, North Cerney, Cirencester.

PIGS.—Heber Humfrey, Shippon, Abingdon.

BUTTER.—Miss Grace Simmons, Bourton, Wokingham.

DEAD POULTRY AND EGGS.—Will Brown, Theale, Reading.

HONEY.—Rev. F. C. Dillon, Upwood, Abingdon.

SHEEP-SHEARING.—R. Dickens, Newton Purcell, Buckingham.

HORSE-SHOEING.—T. Aubery, 19, Paragon, Bath.

Farmer Charged with Arson.—A well-known Cheshire farmer, named William Griffiths, of Fabley, Knutsford, was on Monday committed to the assizes on a charge of setting fire to his brother's farm buildings. When the fire was discovered Griffiths was seen running away, and he had previously been heard to threaten to burn the place down. Griffiths had had a quarrel with his relatives, and it is alleged that he returned home late and set fire to the pen in which the cattle were lodged. The cattle were saved, but considerable damage was done, the pen being burnt down and the farmhouse damaged.

SOCIETIES.

Southdown Sheep.

A meeting of the council of the Southdown Sheep Society was held at the society's offices, 12, Hanover Square, W., on the 6th inst., Mr. Charles R. W. Adeane (president) in the chair.

The minutes of the last meeting having been read and signed as correct, the General Purposes Committee presented a report of their proceedings on October 31st, which was received and adopted.

On the proposal of Mr. Mathews, the hon. treasurer, it was resolved to invest £100 of the society's funds in 2¾ per cent. Consols, and it was further resolved that the earlier volumes of the Flock Book should be sold at the reduced rate of 2s. 6d. per copy.

A letter having been received from the Royal Counties Agricultural Society concerning the conditions attached to this society's offer of a champion gold medal at their forthcoming show, the council decided to modify the conditions so that the exhibitor of any prize-winning pen of ram lambs should compete for the champion prize with any one of his lambs in the pen.

On the motion of Mr. Drewitt, seconded by Mr. Padwick, it was resolved to make a contribution towards the cost of altering the Memorandum and Articles of Association of the National Sheep Breeders' Association so as to enable foreign and colonial societies to become affiliated.

On the question as to whether the council had any business to bring before the conference of sheep breeders to be held at Carlisle, it was resolved, on the motion of Mr. Cooper, seconded by Mr. Clayton, to send the following resolution for inclusion in the agenda, viz., "That as the prevalence of sheep scab in this country is a great hindrance to foreign trade, this council urgently recommends that compulsory dipping be insisted on by the Board of Agriculture."

Five new members were then elected.

On the suggestion of Mr. Henry Webb it was resolved to insert photographs of the presidents of the society in the forthcoming volume of the Flock Book, and on the proposition of Mr. Adeane the council unanimously elected the secretary of the American Southdown Breeders' Association an honorary member of the society.

The council then adjourned until May.

Champion Prizes.

The council offered champion prizes for Southdowns in 1901 as follows:—(a) Champion prize of ten guineas at the Royal Agricultural Society's show at Cardiff, for the best two-shear or shearling ram. (b) Champion prize of ten guineas at the Sussex County show, for the best ram or ram lamb. (c) Champion gold medal, value ten guineas, at the Bath and West show at Croydon, for the best ram or ram lamb. They have decided to continue in 1902 their offer of champion prizes (a) and (b), whilst as regards (c) the champion gold medal will be offered at the Royal Counties' show, instead of the Bath and West show.

The council offered special prizes for Southdowns during 1901 as follows:—"At shows where open classes are provided for Southdowns, two silver medals will be offered, one for the best male Southdown and the other for the best pen of female Southdowns. (a) The sheep competing must be entered or eligible for entry in the Flock Book. (b) Where classes for pens of ram lambs are provided, the exhibitors of such pens are to have the privilege of competing for the medal with any one of their exhibits. (c) At least one of the judges of Southdowns must be selected from the list issued by the Southdown Sheep Society."

The medals were accepted by the following nine shows—viz., Bath and West (for best pen of females only), East Kent, Essex, Gloucestershire, Norfolk, Oxfordshire, Royal Counties, Sussex (for best male only), and Tunbridge Wells, making sixteen medals in all. Similar arrangements have been made for the coming show season, except that the Bath and West Society will take both silver medals, and the Royal Counties' Society will take a gold medal instead of a silver medal for the best male Southdown.

THE POLO PONY, "THE BEY," shown above, is an Arab of the Tahowi Breed, and the property of Mr. G. Norris Midwood, The Hut, Tabley, Knutsford. Our photograph was taken during the Show of the Royal Society at Cardiff, where "The Bey" won first prize in the class for ponies (Eastern sire) not exceeding 14 hands 2 in. At the Polo Pony Society's Show at Loudon last spring "The Bey" was awarded the second prize in the class for Eastern sires not exceeding 14 hands 2 in.

Annual General Meeting.

The annual general meeting of members was held immediately after the council meeting.

The minutes of the last general meeting having been read and confirmed, the report of the council was submitted to the meeting, and unanimously adopted, on the motion of Mr. Chapman, seconded by Lord Northbourne.

In the course of their report the council stated that the total number of members on the register amounts to 143, of whom four are honorary members and 139 annual members.

The council stated that Sir Nigel Kingscote had accepted their unanimous invitation to hold the position of President-elect, that is, to be president for 1902-3.

Mr. Ernest Mathews (honorary treasurer) presented the statement of the society's accounts for the year 1901, duly certified as corect by the society's auditors, Messrs. Ball, Baker, Deed, Cornish, and Co., and the accounts as presented were adopted.

The income exceeded the expenditure by the sum of £29 17s. 11d., the cash in hand at the end of the year amounted to £159 12s. 2d., whilst the balance in favour of the society stood at £172 12s. 8d.

On the motion of Mr. Cooper, seconded by Mr. Chapman, the vice-presidents were unanimously re-elected.

On the motion of Mr. Mathews, seconded by Mr. Chapman, Sir William Throckmorton was unanimously elected a vice-president of the society.

On the motion of Mr. Chapman, seconded by Mr. Mathews, the twelve retiring members of council were unanimously re-elected. The vacancy on the council caused by the death of Mr. George Hampton was filled by the election, on the nomination of Mr. Allan Cooper, seconded by Mr. Chapman, of Mr. H. M. Simmons, of Eastbourne.

The question having been raised as to the date of issue of the annual volume of the Flock Book, it was felt desirable that the book should be issued to members before the Royal Agricultural Society's show, and the secretary was instructed to ask members to send in their flock returns and sheep entries by the 31st March next, instead of the 30th April, as heretofore. Notice was given of a motion to amend the bye-laws in this respect, making the last date of entry the 31st March, and imposing penalties for entries received after that date.

On the motion of Mr. Henry Webb, seconded by Mr. Cooper, a very cordial vote of thanks was accorded to Mr. Adeane for the excellent manner in which he had conducted the business of the society during his year of office. The proceedings then terminated.

Suffolk Sheep.

The Suffolk Sheep Society's annual meeting was held at Bury St. Edmunds on the 7th inst., the Marquis of Bristol presiding. The council's sixteenth annual report was presented, in which it was stated that during the year 19 new members were elected, and the total number of members is now—Life members 70, annual subscribers 291, honorary members 5—total 366. The statement of accounts showed a balance in hand amounting to £912 7s., viz., current accounts £212 7s., deposit account £700, and a surplus of £1,074 9s. after payment of all liabilities. A good demand for Suffolk rams for crossing purposes was experienced during the year, more especially from the Midland and Southern counties and from Wales, and the prohibition of importation of sheep into Ireland being withdrawn in the autumn enabled a resumption of sales to that country. The export trade was fully equal to that of previous years, the principal shipments being to Canada, Chili, and France.

The Marquis of Bristol moved the adoption of the report and balance-sheet, and said that it was satisfactory to find that though they had not been illiberal in expenditure of their money in order to promote the objects of the society, the providing of awards and premiums, they yet had a substantial balance in hand. He expressed his entire concurrence with the proposal of the council that the successes of the Sufflok sheep should be advertised with a view to their introduction to far-off climes. It would not do for that society, formed as it was to give Suffolk sheep a name and a place amongst the distinctive breeds of sheep in the country, to hide its light, but it must be made known far and wide how the breed was advancing in popularity, not only in Great Britain, but various other parts of the world.

Mr. Hy. Lingwood seconded the motion, which was carried unanimously.

Four new members were then elected, the next business being the election of president.

The Marquis of Bristol said he felt that there was a time for all things, and that the time had arrived when a younger man should be placed at the head of the society. He intimated as much at the last annual meeting, but yielded to the request that he would retain office for another year. The reasons, he urged, last year had strengthened, and he was now glad of being in the position of proposing as president for the ensuing year a gentleman who had taken great interest in Suffolk sheep, and would do all in his power to promote the influence and usefulness of the society. He therefore proposed that his Excellency Earl Cadogan, K.G., Lord-Lieutenant of Ireland, should be president.

Mr. S. R. Sherwood seconded the motion, at the same time expressing regret that the Marquis of Bristol was resigning the presidency, but the society was exceedingly fortunate in having secured the consent of Earl Cadogan to accept the position.

Mr. Hy. Lingwood proposed:—"That the members of the Suffolk Sheep Society much regret the retirement of the most Hon. the Marquis of Bristol from the office of president, and hereby place on record their sincere appreciation of the devoted and willing services rendered by his lordship as president during the past sixteen years." Having been connected with the council from the time this society was formed, he (Mr. Lingwood) could testify to the value of the services which had been rendered by the Marquis of Bristol, whose consent to accept the presidency was of itself an assurance of ultimate success. His lordship had been no mere figure-head, but had been a constant attendant at the various meetings, and always exhibited towards the members that kindly consideration for the feelings of others which was so characteristic of the family of which the noble lord was the head. It was earnestly to be hoped that his lordship might be spared many years to give not only that society, but the various benevolent and other organisations with which he was connected, the benefit of his efforts and varied experience.

Other members spoke in favour of the resolution, which was carried with acclamation. The secretary (Mr. Prentice) remarked that he had had the curiosity to look through the minutes to find out what had been the attendances of the presi-

dent. Up to that date there had been 23 general meetings and 17 annual meetings. Out of the 23 meetings his lordship had been in the chair 22 times, and in addition had presided over 38 council meetings, making a total of 60 meetings under the presidency of the noble Marquis.

His Lordship (who was loudly applauded), in acknowledging the resolution, said he was not conscious of having done anything more than taking a great deal of interest in a particular breed of sheep, and doing his best to help those who also had the same firm belief in the excellent qualities of the same class of animal. His lordship, referring to the proceedings connected with the founding of the society, referred to the services of Mr. Ernest Prentice and others who took part in the proceedings. It had been a great pleasure to him (the Marquis of Bristol) to preside over a body of gentlemen who had given such personal attention to the affairs of the society as the council had done. The society was largely indebted to these gentlemen and to the energy which had been displayed by the secretary for the satisfactory progress which had been made. As the president for so many years, he felt as the figure-head of a good ship, the "Suffolk Sheep Society," and that he might participate somewhat in the success of its voyage, and, he might say, fly on the wheel of its prosperity.

On the motion of Mr. J. Sturley Nunn, seconded by Mr. Slater, Colonel E. W. Baird (Exning) was unanimously elected vice-president.

The Hon. M. G. Tollemache was re-elected hon. treasurer, and Mr. George Blencowe and Mr. R. B. Bond hon. auditors, with thanks for their services.

The Marquis of Bristol, who continued to preside over the meeting, said he had much pleasure in proposing the re-election of Mr. Ernest Prentice as secretary, remarking that the energy and ability which Mr. Prentice had brought to bear in the past in that capacity was well known to them all, and it was to be hoped that he would remain secretary for a long time.

Mr. S. R. Sherwood seconded the motion, observing that Mr. Prentice had been a great friend to the society.

The motion was carried *nem. con.*, and Mr. Prentice briefly thanked the members.

On the proposition of Mr. H. Lingwood, seconded by Mr. Thomas Goodchild, the Marquis of Bristol was unanimously elected as honorary member of the council.

The challenge cups and medals which had been won in the flock competitions were presented by the Marquis of Bristol, the winners being as follow:—Bristol Champion Challenge Cup and gold medal, Mr. Thomas Keeble; reserve and silver cup, Mr. S. R. Sherwood. District A Challenge Cup, Mr. S. R. Sherwood; reserve and bronze medal, Mr. Herbert E. Smith. District B Challenge Cup, Mr. Henry Lingwood; reserve and bronze medal, Mr. Percy Eagle. District C Challenge Cup and silver medal, Colonel E. W. Baird; reserve and bronze medal, Mr. Robert Barclay. District D Challenge Cup and silver medal, Mr. Thomas Keeble; reserve and bronze medal, Messrs. Stanford Brothers. Pretyman Challenge Cup and silver medal (for ewe lambs), Mr. Thomas Keeble; reserve and bronze medal, Mr. Herbert E. Smith.

In District A Mr. Sherwood won the cup outright, having won it three times in four years. In District B Mr. Lingwood had also won the cup three times, and he becomes entitled to hold it permanently, while Mr. Keeble took the Challenge Cup for ewe lambs. These gentlemen were severally congratulated on their achievements by his lordship.

British Dairy Farmers.

A meeting of the council of the British Dairy Farmers' Association was held at 12, Hanover Square, London, on the 5th inst., the Right Hon. the Earl of Warwick (president) in the chair, when six new members and one affiliated society were elected.

On behalf of the Finance and General Purposes Committee, Mr. Page reported that Mr. George Barham had been elected chairman for the year. The balance at bank on January 31st was £690, against which the committee recommended sundry payments. The committee also submitted an estimate of income and expenditure for the current year. With regard to imports of milk and cream into the United Kingdom, the committee laid on the table a return showing that in the four weeks ending December 28th we imported 2,240 cwts. of fresh milk, 342 cwts. of preserved milk, and 800 cwts. of cream, making a total of 3,391, compared with 3,045 cwts. in the corresponding period of 1900. Of condensed milk the imports totalled 62,805, against 78,531 cwts. In the five weeks ended February 1st the imports of fresh milk came to 2,339 cwts. (last year 2,195), of preserved milk 355 cwts. (last year 1,449), of cream 645 cwts. (last year 694), and of condensed milk 84,911 cwts. (last year 87,863).

As chairman of the Education and Journal Committee, Professor Long reported that the society's annual Journal had been published and distributed. They recommended that examinations for the association's diplomas and certificates be held this year on May 21st, 22nd, and 23rd, and on September 10th, 11th, and 12th. The Show Committee reported that Professor Long had been elected chairman for the year, and they made recommendations upon a number of suggestions with reference to the next dairy show to be held on October 7th and three following days.

A brief report was also received from the Conference Committee.

The President announced, with great regret, the death of Mr. Jubal Webb, for many years a member of the council, and a vote of condolence with Mrs. Webb and other members of the family was passed on the motion of Lord Warwick, seconded by Mr. Pocock.

The council then proceeded to consider the recent report of the Local Government Board Departmental Committee on Preservatives and Colouring Matters in Foods.

Mr. Chris. Middleton considered that if preservatives were prohibited it would be impossible for some farmers to send milk long distances in summer. Would not this give a greater opening for foreign milk? He thought a certain quantity of preservatives should be permitted.

Mr. Pocock also saw no objection to a limited amount of preservatives in milk, and this limit might readily be fixed by the authorities. If the Departmental Committee's recommendations were adopted he felt sure the farmers would suffer very considerably.

Colonel Curtis Hayward did not think preservatives ought to be allowed in milk. The risk of "double doses" was considerable.

Mr. F. J. Lloyd moved—"That this council is of opinion that the prohibition of the use of preservatives in milk would prove a serious drawback to dairy farmers, and that a minimum quantity of boric acid should be allowed."

Mr. Ashcroft seconded this motion.

Captain Bellasis thought it quite wrong to put any preservatives in milk. Professor Long also opposed the motion, which on being put to the vote was carried by 9 votes to 6.

It was further resolved that the subject should be brought up for discussion at the general meeting.

Professor Long then moved—"That this council is of opinion that the sale of what is described as milk-blended butter, containing from 24 to 26 per cent. of water, is morally illegitimate; that the name is misleading to the public at large, and that as it is seriously affecting the home industry and the butter trade of the country, an alteration in the law is urgently necessary."

This was seconded by Mr. Chris. Middleton, and after discussion unanimously adopted, and ordered to be sent to the President of the Board of Agriculture.

The general meeting of members was fixed to be held at 2.30 p.m. on Wednesday, March 5th, the council to meet at noon the same day.

Yorkshire Union.

The annual meeting of the Yorkshire Union of Agricultural Clubs and Chambers of Commerce was held at York on the 6th inst.; Mr. J. Newton in the chair. The secretary submitted the report, which showed a balance in hand of £14 9s. 8d. and £15 carried to reserve fund, as against £15 15s. 10d. brought forward from last year.

The Chairman, in moving the adoption of the report and balance-sheet, said that the condition of the Union as regards membership and finance was very satisfactory.

Mr. John White, an ex-president, seconded the motion, which was carried.

Mr. John Allan, the vice-president, was elected president for the ensuing year, and Colonel Legard vice-president. Lord Herries, Mr. J. White, and Mr. J. Newton were re-appointed deputies to the Central Chamber, and the General Purposes Committee was asked to consider the advisability of sending the president for the time being as a fourth delegate. The standing committees were also constituted for the ensuing year. The report was adopted.

Shire Horse.

The Council of the Shire Horse Society met on the 5th inst., at the society's house, 12, Hanover Square, London, W., Mr. V. C. W. Cavendish, M.P. (president), in the chair, when 65 new members were elected.

The secretary reported that he had received 56 further applications from candidates for election, which he would submit to the Council at their meeting to be held during the show. These candidates would receive a ticket for the show as though already elected.

Mr. R. W. Hudson laid before the Council the balance-sheet for 1901, duly certified as correct by the society's auditor, a copy of which the Council ordered should be sent out to each member of the society with the report to the general meeting. The balance on the current account at the bankers' was £3,282 7s 7d.; accounts for payment, £1,083 14s. 8d.; arrears of subscription, £44 2s.

This report was adopted.

Lord Llangattock stated that the editing committee had that morning considered applications for the following prefixes, which they had granted:—

Prefix.	Applicant.
Billingford	Robert Hudson
Firsby	J. H. Smith.
Holbrook	Samuel Sheldon.
Mazemoor (in lieu of Town)	C. M. Moody.
Rigbolt	W. Brown.

The secretary was instructed, in response to an application from Mr. John Dyke, to send a selection of photographs of typical Shire horses to the Mayor of Ottawa and to the Deputy Commissioner of Agriculture, North-West Territories, Canada. This report was adopted.

Horse Show Committee.

The secretary reported that the number of entries received for the forthcoming show was 860, as compared with 667 in 1901, the relative entries being as follow:—1901: Stallions 335, mares 301, geldings 31; total 667. 1902: Stallions 476, mares 343, geldings 41; total 860.

Of these 860 entries there were 508 animals entered for the sale by auction. To accommodate this very large number it had been necessary to make arrangements twih the Royal Agricultural Hall Company to remodel the plan of boxes in the galleries, whereby 160 additional stalls would be provided in same, and in the annexes attached to the galleries, and these, with some minor additions in the other parts of the hall, would enable the Council to accommodate 806 horses.

The horse show committee would, under the circumstances, be compelled to stable all the yearling stallions in stalls, and also all the mares and yearling fillies. Exhibitors would, therefore, recognise the desirability of accustoming their young animals to be tied up and handled.

In view of the large entry for the auction sale, the committee recommended that the horses be offered for sale as follows:—1. Thursday, February 27th, 9 a.m. to 1.30 p.m., mares and fillies. 2. Friday, February 28th, 9 a.m., stallions and geldings.

The parade on the Thursday afternoon to commence at 2.30, and to be restricted to prize-winners and the horses awarded commendations. The report having been adopted, the secretary was instructed to draw the attention of exhibitors to the necessity of giving early notice of the withdrawal of any of the animals which they had entered for the show, so that the horse show committee might be enabled to make the best possible arrangements for the reception of those that would actually be exhibited.

The Council then considered and approved the report to the annual general meeting to be held at the Royal Agricultural Hall, on Thursday, February 27th, and appointed four scrutineers to inspect the voting papers to be sent in by the members for the election of 10 members to fill the vacancies occasioned by the annual retirement of that number from the Council. Further, the names of 20 members were selected for the voting papers.

The Council then adjourned till their meeting at the show.

SOCIETY NOTES.

The balance-sheet presented at the thirty-fifth annual meeting of the Staffordshire Chamber of Agriculture showed that the Chamber was £32 better off than in 1900, and £40 more than in the previous year. The question as to whether the Chamber should amalgamate with the Staffordshire Farmers' Association was considered. Mr. Carrington Smith, for many years chairman of the Chamber, sent a letter on the subject, in which he said: "After the Staffordshire Farmers' Association had been formed, with our county town as its centre, I earnestly tried to bring about its amalgamation with the Chamber, whose centre had been at Stafford for more than thirty years. It was then, and is now, my firm conviction that the eixtence side by side of the two bodies, one called a Chamber of Agriculture and the other a Farmers' Association, is a sign of division, and consequently a source of weakness." Some members spoke against the amalgamation, and no decision was arrived at, the subject being allowed to drop. Subsequently some discussion took place on the local County Council's proposal for the abolition of exemptions for sheep dogs, and the following resolution was carried:—"That, in the opinion of this Chamber, it is very undesirable that the exemption for sheep dogs should be taken away from agriculturists, but that greater care should be exercised in the issue of the exemptions." It was agreed that a great reformation was wanted in regard to so-called shepherd dogs, one member remarking that about three parts of them were no more shepherd dogs than the veriest curs they saw in the streets. They did not want the exemption taken away, but at the same time they would be glad if the authorities would look into this matter closer than they did, and see that the so-called shepherd dogs were shepherd

dogs, and qualified for exemption, and also that they were under proper control.

A profit of £262 2s. 2d. was the result of last year's operations of the Northamptonshire Agricultural Society, and in consequence they were able to wind up the year with the satisfactory balance at the bank of £1,000. During the year 53 new subscribers and two life members joined the society, and 43 ceased by death or otherwise to be members. A cordial invitation had been received from Daventry and district for the show to be held at Daventry this year, accompanied by a promise of a substantial contribution towards the funds, and on the recommendation of the stewards and committee, the society decided to accept the invitation.

A very different result was obtained by a society in the neighbouring county of Bucks—viz., the Royal and Central Bucks Agricultural Association, who lost £55 7s. 1d. during the year, which, the Finance Committee stated, is to be accounted for by the small attendance at the show, which consequently caused a great reduction in the receipts for the stand of at least £25. The receipts of the association from all sources were £1,043 11s. 11d., but including estimated amount to be realised from subscriptions in arrears, the total was £1,067 0s. 11d. The payments from the funds of the association were £1,118 16s., and there were liabilities amounting to £3 12s., making a total of £1,122·8s., there thus being a loss on the year's working of £55 7s. 1d. The second Thursday in September was chosen for the date of the next show, to be held at Aylesbury, whilst the Hon. Walter Rothschild was elected president.

Two important subjects were considered at the annual meeting of the Cleveland Bay Horse Society—viz., (1) a proposed class for Cleveland bays at the Royal Dublin Society's Horse Show, and (2) the provision of selling classes at local shows, with a view to the promotion of interest in the breed. After some discussion it was agreed to leave the second question alone for the present, and as regards the first, the secretary was instructed to write to the Dublin secretary asking if they would provide a class for Cleveland bay stallions, to be shown at their August show, the age to be two-year-old and upwards. A favourable report was presented and adopted, the membership being 80, and the bank balance £84 15s. 11d., while the society's assets were £98 14s. 5d. more than th eliabilities.

In the course of the annual report presented to the members of the Lancaster Agricultural Society it was stated that last year's show resulted in a profit of £11 0s. 3d., which sum will assist in a small way to wipe out the unfortunate loss of £65 5s. 2d. sustained on the 1900 show. The subscriptions amounted to £263 18s. 6d., a falling off of close on £20, but there had been a saving of £15 6s. in the prizes offered for stock crops, etc. The accounts showed that the credit balance in the bank was £142 12s. 2d. This year's show was fixed for August 21st.

At the annual meeting of the Tring Agricultural Society the report presented by the secretary, Mr. F. J. Brown, showed that the Society had had a very prosperous year. Mr. Brown stated that the first show in the new century brought a return of prosperity to the Society, and was a great contrast to the preceding show, which will be remembered as the wet show day. The Society enjoyed a record "gate," both as regards numbers passing the turnstiles and the number of carriages paying for admission. The number of members now on the list is 453, compared with 490 in 1900, 512 in 1899, 454 in 1898, and 390 in 1897. There are not so many arrears of subscriptions owing this year, although there was £90 at the end of 1901; but nearly £20 had been since received, which leaves about £70 owing at the present moment. This, Mr. Brown estimated, would produce not more than £20, which brought the balance up to £617 9s. 5d., against £336 15s. 5d. in 1900—a difference of £280. The turnstiles, award boards, etc., in stock are worth nearly £40. The report was adopted, and Lord Rothschild was unanimously re-elected president.

The council of the Fareham and Hants Farmers' Club, in their tenth annual report, state that the Club shows continued and increasing prosperity. The members now total 272, 27 new members having been elected during the year. The horse show at Petersfield was again most successful in every respect, the net financial result—a profit of £112 4s. 11d.—being rather better than at Fareham in 1900. The council congratulated the club on the continued growth of its financial strength. They had hoped to report that all liabilities had been discharged, but while a number of old outstanding accounts, amounting to upwards of £100, had been paid during the year, there still remained the £50 borrowed from members in March, 1900, and two old accounts, particulars of which had only just been received. Mr. J. H. Hulbert, of Stake Hill Lodge, near Cosham, a generous supporter of the Club, was elected president, and Mr. Whaeley Tooker (president in 1901) vice-president. Sir Frederick FitzWygram has consented to this year's show being held in Leight Park, Havant, and August 28th has been chosen as the date.

The thirty-fourth annual report presented at the annual meeting of the Northamptonshire Chamber of Agriculture showed that the total number of members was 210, of which nine were elected during the past year. The balance sheet was a satisfactory one, there being an increase in the funds in hand from £21 5s. 1d. to £27 0s. 3d. A paper on "The Depopulation of the Rural Districts" was read by Mr. E. Scriven, who, in concluding, moved:—"That, in the opinion of this meeting, more direct encouragement must be given to home producers by discriminating revenue duties on foreign imports equal to the taxation on home-grown food and other productions, in order to develop the resources of the British Empire and provide more work on the land of the country to prevent the further depopulation of rural districts." Considerable discussion followed, but no decision was arrived at, it being agreed to postpone the matter to a future meeting.

Rural depopulation was also discussed at the annual meeting of the Berks and Oxon Chamber, but here a resolution to the following effect was adopted:—"That, in the opinion of this Chamber, one of the means of keeping the labourers on the land is the provision of good cottages placed in gardens not less than a quarter of an acre, and that this Chamber recommends the Government be asked to lend money for this purpose, where necessary, at a low rate of interest; and, further, that a tax on foreign flour would assist in arresting the depopulation of the rural districts." As to the affairs of the Chamber, it may be stated, in the words of the report, that the committee regretted to report a decrease in the number of members, which had now fallen to 72. They, however, much appreciated the efforts the chairman was making to increase the membership by sending a strong appeal to the leading agriculturists in the district to join the Chamber, and pointing out the advantages it might be to them, which they hoped would have the desired effect. The committee were pleased to report that the Chamber had no liabilities, but that there was a small balance of £1 17s. in the hands of the treasurer.

The first year's working of the Mansfield and District Agricultural Society, which was founded in October, 1900, resulted in a loss of over £50. According to the treasurer's report, the total receipts amounted to £444 6s. 10d., which included gate receipts, £61 8s.; grand stand, £9 17s. 6d.; entry fees, £47 17s.; and various tenders for tents, etc., amounting to £38. The expenditure amounted to £515 0s. 3d., and the liabilities of the Society to the bank were £70 11s. 5d. Their assets were: Stand, £5; ropes, etc., £4 17s.; gates, stakes, etc., £3; leaving a total deficit of £57 14s. 5d. In the course of the report mention was made of the Society's first show, which was held on July 24th. The sum of £250 was offered in prizes and drew the satisfactory entry of 327, whilst the high quality of the stock was commented upon by the judges, so that the show was a most successful first venture. It was decided to hold this year's exhibition on Wednesday, July 2nd. The president for the year is Sir Richard Fitzherbert.

The secretary of the Chester Farmers' Club, in presenting the balance-sheet at the annual meeting, said that last year's account, as a whole, showed a loss of £10, and this year's showed a profit of £10. On the foal show account they made a profit of £10 15s., and they had reduced the debit balance on the horse account from £174 13s. 8d. to £155 18s. 6d. That showed a profit on the year of £20, which, with the foal show profit, made a profit roughly of £30. They had to deduct a loss of £20 on the club general account, so that deducting that £20 from the £30 left them a balance in hand of £70 instead of £60 which they had at the end of last year. The profit on the year would have been larger only they had given away £25 out of the funds, which did not refer at all to this year's account. They allowed that out of the horse fund, because their horse, two years ago, met with an accident. Ten new members had been added during the year, and two had been removed by death. The foal show was amalgamated with the Cheshire Agricultural Show, and was in every way a great success.

Messrs. Robert Boby, Limited, of the St. Andrew's Iron Works, Bury St. Edmunds, have issued a new catalogue of their patent grain, malt, and seed cleaning machinery, kiln burners, malt rolls, etc. It is very nicely got up and illustrated, and should prove serviceable to users of the machines described in it. We may mention that Messrs. Boby's patent dressing machine was the one used by the winner of the champion prize for barley at the last Brewers' Exhibition.

IN PARLIAMENT.

HOUSE OF LORDS.

The Remount Question.

On Thursday Lord Tweedmouth called attention to the Hungarian horse question, stating that out of £111,000 paid by the Yeomanry Committee for remounts, £45,000 was gained by various persons as profit. Replying, Lord Raglan said that a thorough and searching inquiry could not be made till the war was at an end. The Earl of Lonsdale narrated his own experience in buying remounts, and said it was astonishing that the proper authorities did not know, after years of experience, what he had been able to find out in about forty-eight hours.

The Earl of Rosebery, who supported Lord Tweedmouth, had in his hand, on rising, an affidavit by the head waiter at the hotel where the arrangement for the purchase of the Hungarian horses was made. This man swore that the members of the Commission contented themselves for the most part with eating, drinking, and driving out. A story was told to this effect. While travelling in Hungary a gentleman said to a native, "I have not seen a bad horse since I have been in this country." "No," was the reply, "they have all been sold to the British Government."

The debate was wound up by the Marquis of Lansdowne, who said it must not be forgotten that the Yeomanry Committee had done a great service to the country, procuring 11,000 men and horses. The real question seemed to him to be whether the horses were good or bad, and on that point the evidence against the animals was more open to suspicion than the evidence in their favour. They had heard the affidavit of the waiter. Never had a more extraordinary piece of evidence been given to Parliament. How it was procured or who paid for it they did not know. They might next have a coutner-affidavit from the boots and a rebutter from the chambermaid. The Government, he assured the House, desired that the matter should be thoroughly cleared up. If there were culprits, let them be punished, by all means, but that was a small affair. The real consideration was that they should place the remount department on a footing that would enable it to cope with any emergency in the future, and that was, he admitted, one of the lessons of the war.

HOUSE OF COMMONS.

Army Remounts.

The subject of remounts for the army in South Africa was debated at great length on the 3rd the matter being brought up on the report of the vote of £5,000,000 for additional expenditure in connection with the war.

Mr. Brodrick said that on Friday last he undertook to make certain investigations with regard to the purchase of remounts, and he thought it would be convenient that he should state the decision at which the War Office had arrived. When at the beginning of December, 1899, there was great pressure in the provision of horses for South Africa, the Government entrusted the purchase to the Yeomanry Committee, which consisted of gentlemen of the greatest experience in all that related to horses. Under the circumstances he felt it rather hard that the member for the Isle of Thanet, who knew well the capacity of those gentlemen for the work with which they were entrusted, should again and again have insisted that there had been an attempt to throw dust into the eyes of the people, and to shelter the Secretary of State from responsibility that rested upon him alone. (Hear, hear.) It would not be denied that there were on the Committee men of first-class knowledge with regard to horses.

Mr. James Lowther: I never challenged that.

Mr. Brodrick admitted that in some respects the work might have been better done, but if a particular contract did not reflect credit on their business capacity that could not be made the ground of a charge against officials of the War Office, who had no part or parcel in the contract. The Yeomanry Committee, after they had made their contract with Mr. Levison, sent out an officer to inspect the horses supplied, and an excellent selection was made for the purpose. The difficulty arose when the contract was nearly coming to an end, and Captain Webb had sailed for South Africa. There were only one or two hundred horses remaining to be examined. Colonel McLean selected Captain Hartigan to inspect them. No one would suppose that it was wise to take over the services of a man who had been serving the contractor. It was said that Captain Hartigan had since been employed as civil veterinary surgeon at Aldershot, and blame had been cast upon General Truman, the Inspector-General, on that account, but the appointment was in fact made by the principal veterinary surgeon. That officer had been called upon for an explanation, and had stated that Captain Hartigan was under circumstances of great pressure appointed without reference to General Truman. He had been

strongly urged to remove Captain Hartigan, but he asked the House to leave the matter in his hands for two or three days for further investigation, and until he had heard what Captain Hartigan had to say in regard to the full disclosure, he professed to have made of his position before Colonel McLean employed him. No imputation whatever rested upon the honour or honesty of General Truman, and he had received from that officer a letter requesting the Commander-in-Chief to hold an inquiry into the conduct of his department during the whole of the war. He thought it extremely desirable that such an inquiry should be held promptly, and an authoritative verdict pronounced on the subject. (Hear, hear.)

An Hon. Member: What sort of inquiry?

Mr. Brodrick: A military court of inquiry. The member for Westminster asked that no further contracts should be made with Housa.

Mr. Burdett-Coutts: I only asked for information as to whether any contract with Housa was now running?

Mr. Brodrick: As I understood my hon. friend's remarks with regard to Housa, they were rather taken by the House as indicating that it was desirable that there should not be further contracts in that quarter. I am open to argument on the subject, but the position is simply as follows:—Mr. Housa received the contracts because he had the largest capacity in Hungary for supplying horses. He was a man of substance and of capital, and had the best buyers in all the best districts. Undoubtedly he made a large profit, but not an excessive one. The excessive profit was made by the other gentlemen, who came in before the contract reached Housa. They could only judge by their own estimate, but in other cases Housa would have to pay £10 or £12 each for the horses, and before they were got on board they would cost another £5. ("No, no!") It could not be said that £22 was an undue profit. ("Oh, oh," and laughter.) Every horse which died on a journey of several hundred miles, or during a detention of three or four weeks, had to be paid for by Housa. Every horse which was not accepted was left on his hands, and if the ship was detained in harbour the expense of delay would fall on him. As a matter of fact, the Austrian Government paid a larger price. The question was whether we secured the animals we required. There was the universal consensus of the officers who examined them, and there was the evidence in South Africa that the Hungarian horses had done well. Housa might have made too large profits at first. He had ordered a most careful investigation in South Africa as to his last contracts, which were in heavy work, and on that would depend whether he was to continue to get contracts. To sum up, he regretted the error of judgment made by Colonels McLean and St. Quintin, but had no power to do more than express his regret. General Truman would stand or fall by the inquiry which was to be made, and Captain Hartigan would be afforded the opportunity of substantiating the evidence he had given, but unless he very distinctly cleared himself of any imputations whatever he would not be allowed to continue his temporary employment at Aldershot. Comments had been passed on the Committee of Inquiry, who, in his opinion, had discharged an unpleasant task well. So long as he represented the War Office he would endeavour that justice should be done, and he did not believe the War Office would suffer, and he was certain the country would be content if where justice was required justice was done.

Sir H. Campbell-Bannerman said they acknowledged the spirit in which the right hon. gentleman had now looked into the matter personally, and the decision to which for the moment he had come in regard to the two principal persons concerned. He did not know whether the right hon. gentleman proposed to postpone the report stage of the vote in order to enable the House to pronounce an opinion upon the conclusions to which he ultimately came, but that would seem the regular course to take. There had been an uneasy feeling in the public mind about the manner in which horses had been purchased in other places than Austria-Hungary, and he would ask the right hon. gentleman whether the Government would not promote an inquiry into the general question of the purchase of horses. (Opposition cheers.) If such an inquiry was to take place, he trusted it would be by a committee somewhat more competent to go fully and dispassionately into the question than the committee which had already dealt with it, and which he did not consider a very strong one for the purpose in view. It was really a little family party—(laughter)—and he hoped that when the next inquiry was made the members of the committee would be entirely independent of the Government, and perhaps more qualified by business experience to conduct the inquiry. (Opposition cheers.)

Colonel Kenyon-Slaney said the right hon. gentleman had accused him of not being a very strong member of the committee because he did not look with sufficient rigour on the iniquities of the occupants of the front bench. He repudiated the suggestion that the committee had been actuated by party motives, and he maintained that in reporting as they did they were simply carrying out the first duty submitted to them. Recalling the debate of Friday, he would like to know if the right hon. gentleman (Mr. J. Lowther) actually used the words "whitewashing committee" in reference to the committee of which he was a member.

Mr. J. Lowther: I applied the term to the committee, meaning that they approached the subject with a view to whitewashing everybody concerned.

Colonel Kenyon-Slaney: Then allow me to tell him plainly that I repudiate that absolutely, and it does no credit to his courtesy or to his perception of right and wrong. (Cheers.) The hon. member for King's Lynn (Mr. Gibson Bowles) had declared that part of the committee's report was disingenuous and dishonest. They were objectionable phrases, and showed not only an extreme want of taste but extreme impertinence. (Cheers and cries of "Oh.")

The last remark caused a heated discussion between the two members named, and the Speaker was appealed to, with the result that the word impertinent was withdrawn as being out of order, because Colonel Kenyon-Slaney said he did not use it in the sense that it was irrevelant, but as a proper expression in reply to the charge of disingenuity and dishonesty.

Mr. Gibson Bowles said the word dishonest was used by him in a perfectly proper and parliamentary sense. The suggestion was not that the excellent committee of all the virtues—(laughter)—was guilty of conscientious dishonesty, but that they had not followed to its logical conclusion the result of the evidence before them. (Hear, hear.) He maintained that the War Office was solely and fully responsible for the doings of the Yeomanry Committee, to whom it relegated its authority for an express purpose, with power to spend hundreds of thousands of pounds voted by that House. When the report on the other horses purchased was before them he believed it would show that unqualified officers were selected to examine the animals, but that those officers were selected for several considerations.

Mr. Brodrick submitted that the hon. member had no right to say that without mentioning names. (Hear, hear.)

Mr. Gibson Bowles would withdraw the observation, but he was informed that a large proportion of the horses were useless when landed, and many more became useless soon afterwards. Large sums of money had been wasted, but the principal ground of complaint was their badness.

Sir J. Blundell Maple said he had seen a sworn document to the effect that Captain Hartigan and Colonel McLean lived together, and that Mr. Housa was often at their little lunches and dinners. He complained of the delay of the War Office in instituting the inquiry after he had placed in their hands all the information in his possession, and he insisted that further investigation on the subject of the purchase of horses was necessary.

Mr. Blake charged the Secretary for War with endeavouring to prevent the House of Commons being informed with regard to the facts by delaying presenting the report of the Committee until the latest moment possible.

Mr. Brodrick interrupted to state that there were two cases pending in the Law Courts, and he was advised he would not be justified in stating the facts to the House earlier.

Mr. Blake maintained that the War Secretary had been guilty of gross neglect of duty, and nothing could be hoped from his further promised inquiry. Although the report of this committee had been in his hands since August, Mr. Brodrick made no inquiry into the remount scandals, and would not do so now if his hands had not been forced by the House. (Radical cheers.)

Mr. Balfour retorted that this was the first time in his experience in which the Secretary for War had been accused of want of energy. A more preposterous charge was never made in that House by any man—(Ministerial cheers)—and a more reckless charge or one more absolutely without foundation it would be difficult to produce from their Parliamentary annals. (Cheers.) His right hon. friend was the most hard-worked man at this moment in the three kingdoms, and because he was not absolutely primed on all the details of transactions which happened twelve months before he was in office, and with regard to which not one penny of the £5,000,000 voted on Friday had anything to do, directly or indirectly, his right hon. friend was charged not only with incompetence, but with an idle neglect of his public duties. The charge was not worth pursuing, and he would say a few words as to the responsibility of the War Office for the duties that were delegated to the Yeomanry Committee. It was said, and said with perfect truth, that no responsibility could be got rid of by delegation, but unless delegation meant some kind of transfer of responsibility what was the use of delegation? If decentralisation did not mean that it meant nothing. (Hear, hear.) Then it would be noted that the charge could not be made against the War Office that it did not look into details. The charge could only be that it appointed an incompetent body to carry out the function. (Hear, hear.) The circumstances under which the Yeomanry Committee were asked to undertake these duties were those which rendered delegation and decentralisation absolutely necessary. This committee was asked to undertake the provision of horses immediately after the disaster of Colenso, when the War Office had thrown upon them the Herculean task of doubling the army—a task the difficulty of which was not sufficiently appreciated. (Hear, hear.) These patriotic yeomen came to the War Office, and said they would provide men, horses, and saddles, and were the Government at that moment to reject this offer? Under these circumstances it was not only most ungenerous to attack the War Office because the delegation was not carried out to the taste of hon. and right hon. gentlemen. (Hear, hear.) The leader of the Opposition had asked whether, as the result of the inquiry into remounts from Hungary had been so unsatisfactory, there was any evidence that remounting operations in other parts of the world were any better. The Government were entirely of opinion that the matter could not be allowed to rest where it was. (Hear, hear.) They thought with the right hon. gentleman that a survey of the whole of this important question must be made without fear and without favour. (Cheers.) They equally clearly held that it would be insanity to attempt it at this particular moment. (Oh, oh.) And why? Because the men who could help with that inquiry were some of them—all of them—up to their eyes at work at this moment in connection with the army in South Africa, and it would be perfect insanity to interrupt their proceedings and cause them to neglect duties which were even more important than giving information to that House. (Cheers.) He hoped that this might not mean a long delay. When the inquiry could be undertaken with public advantage it would be open to question whether it would merge in that larger inquiry which the right hon. gentleman opposite sought. Their sole object would be to get it through with as little delay as possible. He would only enter one caveat at the present stage of their discussion. When the inquiry was made he hoped the body which inquired—whether it be a committee of that House, a departmental committee, or a Royal Commission—would remember that the task practically to be done was to provide in South Africa thousands of miles from the different countries, a quarter of a million of horses, and that no such task had ever been undertaken in the history of the world. (Cheers.) He hoped that any tribunal which went into this matter would judge the difficulties in a fair and equitable spirit, and that when a report was presented to that House they would remember that when this delegation was made it was made under exceptional pressure. (Cheers.)

Mr. Asquith said the right hon. gentleman had failed to appreciate the impression which the debate on Friday had made upon the House and upon the country. The object of those who had taken part in this discussion had been not so much to select a victim as to examine the system and to prevent, if possible, the recurrence of such gross abuses. The taxpayers of this country had been mulcted to the extent of £10 or £12 per horse, and in the House of Commons they were told they must hold no one responsible for it. Under these circumstances what became of the control of the House of Commons? He would say nothing of the extraordinary unpreparedness of the War Office in matters of vital national necessity. An inquiry has been promised, and he hoped the report would be forthcoming without delay.

Mr. J. Lowther said what he had stated on Friday night he stood by. He hoped there would be a complete inquiry into those grave abuses which had been brought to light.

Mr. Labouchere averred that a more utterly, absolutely incompetent set of men in regard to the horse-buying business than the Imperial Yeomanry Committee could not be found on the face of the earth. (Laughter.)

Mr. Churchill could see no reason why an interim inquiry should hamper the progress of the war. On the contrary, he believed it would infuse greater vigour and efficiency into the operations.

Lord A. Compton gave his impressions of the Remount Department in South Africa. He was convinced also that the system was a bad one. An interim report, in his opinion, should not be delayed. It had always been the habit to blame the civil side of the War Office, but in this case it was the military side that was entirely to blame. As far as the War Office were concerned, the selection of General Truman for the Remount Department was a good one.

The House divided, a division being challenged by the Nationalists—

For the resolution	226
Against	64
Majority for	162

The report stage of the Vote was therefore agreed to.

PRICE 6d. (By post, 9d.)

SHOULD BE IN THE POSSESSION OF EVERY

FARMER, LAND OWNER, AND STOCK-KEEPER.

A YEAR'S RECORD OF BRITISH AGRICULTURE.

ENLARGEMENT OF THE

AGRICULTURAL ANNUAL

AND

Mark Lane Express Almanac, 1902.

Portraits of Prize-winning Animals at the Norwich, Birmingham, and Smithfield Fat Stock Shows, 1901.

PRESS OPINIONS.

"The literary contents of the number are of an appropriate and interesting description."—**Field.**

"'Tuberculosis in Animals,' 'Sheep Breeding as affected by the price of Wool,' 'Weeds,' and 'Fruit,' are a few of the numerous articles on various features of agriculture contributed by experts in their subject."—**Yorkshire Observer.**

"Is up-to-date in every detail."—**Lincoln, Rutland, and Stamford Mercury.**

"Reflects the greatest credit. The almanac is excellently turned out, and is full of most useful information for agriculturists. In addition to many important tables, a number of capital articles on stockbreeding, &c., are given. The illustrations of prize-taking stock, &c., are very good."—**Irish Field.**

"In addition to the fat stock illustrations, there is a large number of others of cattle, horses, sheep, pigs, and miscellaneous farm scenes, which together with the reading matter, make up a book of great interest to all associated with the farm."—**Eastern Morning News.**

"Contains some very well written, interesting articles, together with a host of facts and figures relating to the farm and markets."—**London Corn Circular.**

"Gives astonishing value for the price, sixpence. There are a great many special articles by eminent authorities, and an abundance of illustrations."—**Sussex Daily News.**

"Tuberculosis has received much attention during the past year, and is still continuing to do so, therefore the article by M. R. C. V. S., entitled, 'Tuberculosis in Animals on the Farm,' is very opportune and will be read with interest."—**Tonbridge Telegraph.**

"Very neatly got up is the current issue of the MARK LANE EXPRESS ALMANAC, its cover adorned with the portraits of His Majesty the King and the Prince of Wales."—**Farm and Home.**

"The volume consists of 250 pages, and is altogether more than up to its former high standard of merit, while the price remains as formerly."—**Ayr Advertiser.**

"The volume is still sold at the very low price of sixpence, or by post, ninepence."—**Westmoreland Gazette.**

"A useful agricultural almanac."—**Surrey Times.**

"Fully maintains the best traditions of the compilation. In addition to a comprehensive list of facts and figures relating to agricultural practice, it contains an interesting series of articles of definite value to those concerned with questions concerning land cultivation and stockbreeding, and has also a number of contributions which deal in a highly descriptive manner with the ordinary incidents of farm life."—**Manchester Courier.**

"There is a strong list of contributors, and the pictures of varied interest, and will appeal to all lovers of country life."—**Agricultural World.**

"The volume consists of about 250 pages, and is nicely bound in a coloured wrapper, on the front of which appear, in a most artistic frame, portraits of his Majesty the King and his Royal Highness the Prince of Wales."—**Watford Observer.**

"Is to the fore again as a complete record of the past year, with illustrations and particulars of prize-winning animals at all the great fat-stock shows, and features to which an increasing number of agriculturists look forward to every year, and have learned to appreciate very highly."—**Estates Gazette.**

"In addition to the good supply of agricultural articles, it has many pages of tabular matter of constant value for reference by landlord and tenant."—**Yorkshire Post.**

"A large number of illustrations, principally reproductions from photographs, find a place in the almanac."—**Westminster Gazette.**

"A mass of information of the greatest use to farmers and breeders, much of which should also be of service to the same classes in South America and the colonies, to whom we can strongly recommend it."—**South American Journal.**

"'Lobbyist' advocates an Agricultural Party in Parliament and sets forth the outlines of the programme. As to the necessity of such a party he says: 'If it is not called into existence the rural parliamentary interest will confront the growingly extravagant and disciplined demands of the towns—demands which are often brutally avowed to be anti-rural, unorganised, and divided. Suspicion will permeate its councils and weakness be the badge of its ranks.'"—**Hereford Mercury.**

"Is well-known to agriculturists for the variety and usefulness of its information. It need only be said that the issue before us for 1902 does not in any respect fall short of its predecessors."—**Surrey Advertiser.**

"Taken as a whole may be said to be invaluable to farmers."—**Bristol Mercury.**

"Although issued somewhat later than usual, in order to make it a complete record of the past year, and to include illustrations and particulars of some of the principal prize-winning animals at our great fat-stock shows."—**Reading Mercury.**

"Is probably the most up-to-date and practical periodical of its kind."—**Irish Farming World.**

"The statistics, which form an important part of the work, are thus enabled to be made more complete, whilst the addition of about a dozen illustrations—reproduced from the life-like photographs—of the great prize winners at the Smithfield, Birmingham, Norwich, etc., fat stock shows, is a very important one, and will sure to be appreciated."—**Gloucester Journal.**

"For sixpence the farmer may have an encyclopædia of agriculture beautifully illustrated, the compilation of the most practical men in the country."—**Cromer Post.**

"Contains many articles of special interest to all concerned in agriculture."—**West Sussex Gazette.**

"The Agriculturist's favourite."—**Kent Messenger.**

"The list of societies has been made even more complete than last year, whilst the various tables and statistics which have been so much appreciated in previous years have been added to and brought up to date."—**Sheffield Weekly News.**

"To enumerate all the articles would be too great a task, but mention may be made of that dealing with 'Weeds,' by Mr. S. Eames; 'The Harvest of Fruit,' by Mr. J. H. Hollingworth; 'The Census'; 'Town and Country Life.'"—**Grantham Journal.**

"Appears somewhat later than usual, the compilers having delayed its publication in order that it might be a complete agricultural record for the year.—**Lowestoft Standard.**

"'Lobbyist' advocates an Agricultural Party in Parliament, and sets forth the outlines of a programme."—**Lincolnshire Gazette.**

The Largest Manufacturer of Incubators in the World.

Some French Methods of Poultry Keeping.*

(Copyright.)

By Mr. T. R. Robinson, F.S.I.

(Continued from Page 156.)

In the day time the blanket is drawn up, so that they can run in and out of the house as they like. At the end of three and a half or four months they are put into fattening cages and fed artificially. Here we say feed twice a day, but in France they feed three times a day with food something the same as ours, oatmeal or maize meal mixed with water for the first and second meal, and the same mixed with milk for the third meal. This for ten days, then they mix sour milk or whey with all the meals. Then for the last week about ten grammes of fat is used per bird, mixed up with the food. If you want to make your fowls extra-specially good, use one egg for every three birds, and cram the birds with this mixture: milk, egg, and oatmeal.

Here is an approximate price of about what 100 birds may cost:—Meal for four and a half months for 100 birds at, as nearly as possible, 1,000 kilos., averaging about 11s. an English sack, 200f.; milk, 40f.; value of chickens, day old, 30f.; fat, 18f.; making a total of 288f. Roughly, a chicken four and a half months old would cost 3f., taking no account of rent and labour. At Houdan thousands are sold every week, and I have often seen them fetch 4f.50 to 5f. each.

The French not only clean out their foster-mothers and house daily, but they take a syringe, and, with a 1 or 2 per cent. sulphuric acid solution, they squirt all over inside the place. They also burn a little sulphur in the foster-mothers. Sometimes they have a double set of troughs, etc., and when one set is out of use it is thrown into a tank of the sulphuric acid and water. They do not use these for food till after the things have been washed with ordinary water.

Briefly, I may say that they take great precautions against roup and other fowl diseases, and also that in winter they advocate warm food; they occasionally water the ground with sulphuric acid solution, and occasionally dig it up. They like to keep it as free from herbage as possible, for very young stock. They change the birds frequently from run to run. They take the drawers out of the incubators, and lay them in the sun, in order to give them an airing. In response to a question, the lecturer said that the ground would be absolutely safe for young chickens to go upon three days after being washed with sulphuric acid and water, and that as a matter of fact three hours would be quite sufficient, as the ground contains chalk, which neutralises the sulphuric acid.

*A lecture delivered under the auspices of the Utility Poultry Club, by Mr. T. R. Robinson, F.S.I.

Utility Poultry Club's Fifth Laying Competition.

The fifth annual open laying competition of the Utility Poultry Club commenced on October 16th, 1901, and ended on February 4th, 1902—a period of sixteen weeks. The pens each contained from 1901 pullets, and below we append the results and prize-winners:—

Breed.	Eggs.	Total Points.	Order of Merit.
Orpington (Bf.)	72	144	15
Leghorn (W.)	110	220	9
Orpington (Bf.)	93	186	12
Leghorn (W.)	105	208	11
Orpington (Bf.)	164	328	3
Leghorn (W.)	185	362	2
Wyandotte (S.)	124	244	6
Minorca	87	172	14
Wyandotte (G.)	200	397	1
Minorca	34	68	20
Wyandotte (W.)	114	222	8
Leghorn (Bf.)	113	223	7
Rock (Barred)	58	115	17
Ancona	68	135	16
Rock (Bf.)	107	213	10
Ancona	143	281	5
Rock (Blk.)	51	100	18
Ancona	90	178	13
Faverolles	35	70	19
Leghorn (W.)	164	328	3
	2118	—	—

In scoring, an egg weighing up to 1¾ozs. counted one point, above that weight two points. This is a slight advance upon previous competitions which have counted two points at 1½ozs. First prize went to Mrs. H. J. Austin, pen 9, hatched 3rd and 4th weeks in March. Second to Mr. E. A. Jackson, pen 6, hatched April 29th. Third and fourth prizes were amalgamated in consequence of two pens, 5 and 20, each scoring the same number of points, and went to (pen 5) Mr. W. Hambly, hatched February, and (pen 20) Mr. Rouse Orlebar, hatched April. Fifth to Mr. J. W. Giles, hatched February 16th. Sixth to Mr. H. L. Hewitt, pen 7, hatched April 7th.

The first-prize pen, having laid 200 eggs during the contest, becomes entitled to the club's second-class certificate. This has been awarded on only one previous occasion, viz., 1899-1900, when Mr. C. Bird's pen of Silver Wyandottes was similarly successful. These competitions are not given to determine which is the best breed; the club recognises that good laying is a question of strain, and not of breed, and endeavours by means of these competitions to make known those fowls which under a systematic treatment during the four worst months of the year have proved themselves to be good layers.

Annual Report and Year Book.

The Year Book, issued free to the members of the Utility Poultry Club, contains the annual report and balance-sheet of that useful society. The balance-sheet shows a balance in hand of £20, and the increase of 104 in the numbers of paying members testifies to the growing recognition among poultry keepers of the usefulness of such an organisation. Apart from the report, and in addition to the list of members, rules, etc., particulars are given of the arrangements made for granting special prizes, insuring stock against burglary, obtaining working plans of poultry houses, coop, etc., and post-mortem examinations of poultry. There is also a brief account of the work of the club during the past year, a table showing the composition of poultry food-stuffs—a most useful guide to scientific feeding—and some excellent pages of account sheets, together with an egg register for recording the number of eggs laid every day by each pen during the year.

During the National Poultry Show at the Crystal Palace a number of lectures were delivered, under the auspices of the club, by experts on the various branches of hatching, rearing, feeding, marketing, and on diseases, etc., fully in our columns.

It will thus be seen that members of the club derive somewhat substantial benefits from their membership, while it is undoubtedly the fact that the club is doing good work in encouraging the keeping and rearing of poultry for utility purposes.

Scottish Chamber.

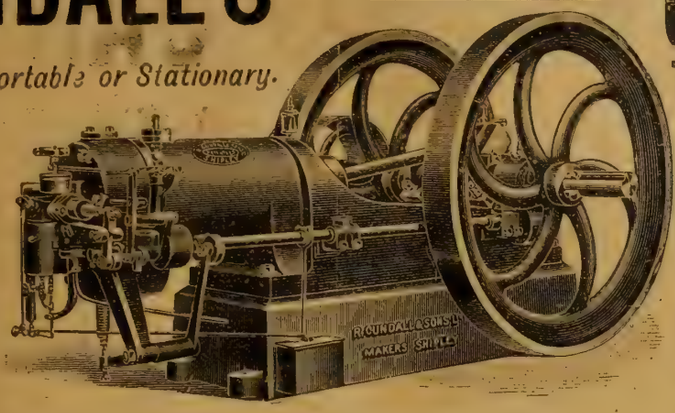
A meeting of the directors of the Scottish Chamber of Agriculture took place at Edinburgh on the 5th inst., Mr. Thomas Elder, Stevenson Mains, presiding. Mr. John Drysdale, Arngibbon, Port of Menteith, reported that he had appeared before a Departmental Committee on butter regulation, and had recommended that there should be a fixed standard of 16 per cent. A system of fraud was being perpetrated just now whereby butter was rechurned containing 24 per cent. of moisture. He thought that a standard of 16 per cent. would cover all honestly-made stuff. The chairman, in conveying the thanks of the chamber, said Mr. Drysdale had taken up a commonsense position.

The secretary (Mr. Isaac Connell) reported that he had received a reply from the Board of Agriculture to the resolution of the Chamber requesting that a departmental committee be formed to inquire into and if possible provide remedies for the present rural depopulation. The reply stated that they would not fail to keep in view the suggestion made. It was, however, pointed out that if such an inquiry were undertaken it would probably be better that it should be entrusted either to a select committee of one or other of the Houses of Parliament, or even to a Royal Commission, rather than to a departmental committee, and that in any case it could not conveniently be set on foot until the complete results of the census were available.

Mr. George Prentice, Strathore, Thornton, initiated a discussion on the desirableness of securing the home dairy market. He admitted the good that was being done by education in butter-making, but what was wanted was that the same quality should be secured. He pointed to what was being done in Denmark and Ireland in the establishment of large creameries, and asked whether the time had not now come when they should encourage as far as possible the commencement of such creameries in districts not in connection with our large populations.

Mr. Andrew Hutchison, Beechwood, Perth, said he thought there was plenty of room for such creameries in Scotland, but at the same time the demand for milk would take up a great deal of their milk supply, and he did not think Scotland was so well adapted for it as Ireland, with its large extent of pasture land and cheaper rents.

It was subsequently remitted to the chairman's committee to bring up a report if they thought fit.



Death of Mr. D. R. Scratton.—It is with regret we announce the death of Mr. D. R. Scratton, J. P., the well-known West of England Agriculturist, which occurred on Monday evening at his residence, Ogwell House, Ogwell, near Newton Abbot, the cause being an internal complaint, for which he declined to undergo an operation. The deceased gentleman, who was 84 years of age, was a well-known and popular figure in the public life, not only of South Devon, but the county generally. He was chairman of the Devon County Agricultural Association, which he founded several years ago, and was chairman of the Newton Board of Guardians, a position which he filled with remarkable regularity and ability up to within a week or so of his demise. The inhabitants of Ogwell have also benefited through the general beneficence of the deceased, who a few years since presented them with, at a cost of several thousand pounds, a free and abundant supply of pure water. His loss will be severely felt throughout the county and the West Country. Mr. Scratton was lord of the manor and principal owner of the soil, having purchased the property in 1869 of Mr. P. G. E. Taylor.

"CUNDALL'S" PATENT OIL ENGINE.

Portable or Stationary.

THE **Most Perfect Power for Threshing, Grinding, Chopping, Pulping, &c**

Contractors to His Majesty's Government.

THE CHEAPEST POWER FOR ACRICULTURISTS.

WHAT USERS THINK AND SAY:—

"I cannot speak too highly of your Oil Engines, and consider them fa the best Engines for Farmers' use."

"You will be pleased to hear that the Oil Engine you supplied me with last May is giving every satisfaction, both as regards work done and cost of running, which latter bears no comparison to the cost of the steam engine which it replaced."

"I do think this is the cheapest and far the best Oil Engine in the market. I fixed on the 'Cundall,' not only as the steadiest running Engine, but also in having more control over it in altering speed and power."

"The 20 B.H.P. Oil Engine we bought from you about a year ago is working satisfactorily. We were fortunate in our decision in selecting your Engine."

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent"-fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,

Exchange Chambers, Liverpool.

VESTA CREAM MEAL.

This, our latest Calf Meal, has been specially made for use with either Skim or Separated Milk, and after the first few days can be used alone.

It is very nutritious, easily digested, prevents scour, and imparts a beautiful sleek s in.

It is one of the richest milk substitutes obtainable, fine health thriving calves are reared on it by the leading breeders of cattle.

It is therefore a *perfect milk substitut*

T. GITTINS, Esq, Wrentnall Farm, Shrewsbury, says

"I am more than pleased with your Calf Meal I consider it excellent in every way"

THE "SVEA" SEPARATOR

The "SVEA" Separator is the Cheapest because it is
THE SIMPLEST, THE STRONGEST,
THE MOST DURABLE, THE EASIEST TO TURN,
A PERFECT SKIMMER, and
HAS THE GREATEST CAPACITY.

The "SVEA" Separator being thoroughly up to date, embodies the following improvements:—

1.—**The Short Bowl Spindle** replacing the usual long one, which so soon gets damaged if not handled with great care.

2.—**The Patented Top Bearing** by means of which the bowl is supported at **both** top and bottom.

This is a special feature of the "SVEA," and is considered a great advantage as contributing to the smoother and easier running of the bowl, also preventing all accidents.

3.—**The Simplicity** of the skimming arrangement consisting of only a few rings or discs (in the small sizes 4) instead of the usual large number.

4.—**The Bowl is easy to take to pieces and clean.** This fact and the small number of the parts to clean will be much appreciated by every one used to Separators.

5.—**The Conical Lugs** on the inside of the Bowl Top make it **impossible for the Bowl to get out of balance** by reason of the threads becoming worn.

6.—**The easy and noiseless motion** effected by the use of Conical Gearing instead of the usual cylindrical one, thus permitting the

7.—**Reduction of friction and wear** obtained by the position of the worm wheel, at an angle of 45° to the worm, instead of the usual right-angled gearing.

8.—The **extraordinary strength** and good workmanship of the machine throughout.

Table of Sizes & Prices

No.	CAPACITY PER HOUR.	PRICE.
1	20 galls.	£9 10 0
2	33 ,,	11 10 0
3	55 ,,	17 0 0
4	75 ,,	23 0 0

The "SVEA" Separator is fitted with an automatic device regulating the inflow of the milk.

The "SVEA" Separator is sent on trial. Carriage paid. No extras.

CONTRACTS.

LONDON COUNTY LUNATIC ASYLUMS.

CONTRACTS FOR MILK.

THE ASYLUMS COMMITTEE of the LONDON COUNTY COUNCIL are prepared to receive TENDERS for the supply of MILK for Twelve Calender Months from 1st APRIL next, to

1. Hanwell Asylum, Middlesex, W.
2. Heath Asylum, Bexley, Kent.
3. Horton Asylum, Epsom, Surrey.

Printed Forms of Tender (upon which alone Tenders will be received) Conditions of Contract, and Estimated Quantities required, may be obtained at the Office of the Asylums Committee, 6, Waterloo Place, S.W., on and after Monday, the 24th February, 1902.

Sealed Tenders must be delivered at the said Office by or before TEN o'clock, a.m., on WEDNESDAY, MARCH 12th, 1902.

Tenders will be opened on the same day and the result will be communicated to successful contractors after 19th March, 1902.

Persons Tendering will be required to declare in their Tenders that they pay such rates of wages and observe such hours of labour as are recognised and in practice obtained at the date of the Tender by the Trade Unions of the district where the work is to be done, and where no Trades Unions exists, such rates of wages and hours of labour as are generally accepted as fair in the trade.

The Asylums Committee do not bind themselves to accept the lowest or any Tenders.

R. W. PARTRIDGE,
Clerk of the Asylums Committee.

London Asylums Committee Office,
6, Waterloo Place, S.W.,
29th February, 1902.

CONTRACTS.

AGENTS WANTED.

MISCELLANEOUS.

SULPHATE OF AMMONIA.—Farmers and cultivators of the soil should give this valuable fertiliser a trial. It is the best artificial manure for grass, wheat, barley, roots, potatoes, &c. One ton of Sulphate of Ammonia contains as much nitrogen and will go as far as 25½ cwt. of nitrate of soda. It is not washed out of the ground by rain, and is not so readily exhausted from the soil as nitrate of soda. Pamphlets of instructions for its use will be forwarded, post free, on application. Present price (free on rail at Sheffield), 11s. 3d. per cwt.; larger quantities specially quoted for. Cheques and post office orders to be made payable to the Manager, THE SHEFFIELD UNITED GAS LIGHT CO., Sheffield.

POULTRY APPLIANCES, &c.

INCUBATORS. How to construct and successfully use a modern Incubator, with working drawings; over 100 pages with illustrated list, post free 4d.—INCUBATOR COMPONENTS MANUFACTURING CO., Stonehouse, Glos. Lists free.

CALWAY'S Circular Hot-Air Chicken Rearer has the largest sale of any Foster-Mother in this country; 30 to 50-chick size, 12s. 6d.; 50 to 100-chick size, 25s.

THE LATEST IMPROVEMENT IN CALWAY'S CHICKEN REARER is the new Lamp. Full particulars free.

POULTRY KEEPING IN THE 20th CENTURY; 1s. post free. Send for a copy; it will interest you.

MAKE your own Poultry Spice. Valuable receipt free. Send stamp for postage.—WILLIAM CALWAY, Gloucester.

POULTRY YARD.—The best money can buy. Reliable Eggs for sitting, and pure bred Cockerels and Pullets, from the following high-class birds with superior laying qualities. Guaranteed unequalled. Breeds—Anconas, Blue Andalusians, Black Minorcas, White, Brown, Buff, and Black Leghorns, Buff and Barred Rocks, Gold and Silver spangled and Black Hamburghs, Buff and Black Orpingtons, Houdans, Langshans, Campines, Dark and Silver Dorkings, Indian Game, Buff Cochins, Light Brahmas. Gold, Silver and Buff Wyandottes, and Aylesbury, Rouen, and Indian Runner Ducks. Eggs, all varities, 4s. 6d. sitting; 50 Eggs, 16s.; 100 Eggs, £1 10s., all guaranteed fertile or replaced free. Ten Cockerels of above varieties, 7s. 6d. and 10s. 6d. each; Pullets 5s. and 6s. each.—Advice gratis. Vacancy for Pupil.—JOHN PARMINTER, Farmer, Southorpe, Stamford

BIBBY'S
"CREAM EQUIVALENT"
for CALVES.
An Ounce of Fact is worth a Ton of Theory.

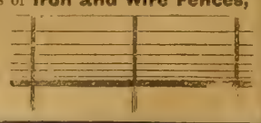
A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

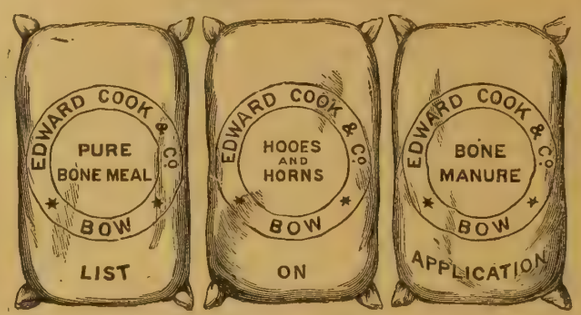
We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent"-fed Calves as having been fed on New Milk.



We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.



SOLE MANUFACTURERS:—
J. BIBBY & SONS,
Exchange Chambers, Liverpool.

SUTTON'S FARMERS' YEAR-BOOK

For 1902

Should be read by all interested in Agriculture.

THE TIMES, in reviewing this Book on February 17th, says:—"'The first seed harvest of King Edward's reign was an excellent one.' These cheering words appear in the preface to the 1902 edition of 'Sutton's Farmers' Year-Book and Graziers' Manual.' They serve to convey to the farmer the satisfactory intimation that in purchasing his seeds during the next few weeks he will be able to obtain what he requires at moderate figures, and at prices lower than he has had to pay in some recent seasons. Clovers and grasses suited to meadows and pastures are first dealt with, and form the subjects of a number of attractive illustrations. Mixtures of seeds for one, two, and three years' ley are given in sufficient detail for the practical man."

POST FREE TO AGRICULTURISTS ON APPLICATION.

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, FEBRUARY 24, 1902.

A NEW FORM OF COERCION. THE VALUE OF EDITORIAL NOTICES (?).

A short time ago the Editor of the MARK LANE EXPRESS received from a well-known firm a communication, enclosing a paragraph, which in substance was nothing more or less than a puff of some particular specialities in which they were interested. Accompanying the paragraph was a memo requesting its insertion in the editorial columns. In common with communications of this character, which are far more numerous in a newspaper office than the public would imagine, the missive was consigned to the waste-paper basket. Subsequently a letter was received from the same firm, stating that unless the paragraph in question appeared in the news columns, their advertisement in the MARK LANE EXPRESS would be discontinued. The reply to this threat was a courteous acknowledgment, explaining that such notices were not inserted in the editorial columns of the MARK LANE EXPRESS, any matter of that nature being confined strictly to the review of catalogues. A reply immediately came back for the advertisement to be stopped, which was accordingly done.

The MARK LANE EXPRESS has never had to feed its advertisement pages through the influence of its editorial columns, the two departments being quite distinct, and conducted without the least partiality. The descriptive accounts of new and improved implements and other farming accessories, scientific and useful researches and experiments, as applied to manures and feeding stuffs, written by disinterested people, and which are published from time to time for the benefit of its readers, have always been a feature of the MARK LANE EXPRESS, but never used as a lever for procuring advertisements or pecuniary gain in other ways.

The MARK LANE EXPRESS, on the verge of celebrating its 70th birthday, occupies a stronger position than ever, and has no need in its old age to enlist the services so kindly suggested of any of its advertisers in the assistance of the editorial department.

SPRING HORSE SHOWS: THE SHIRE.

Once again we are on the eve of the London Spring Horse Shows. To-morrow will find the Agricultural Hall, Islington, filled with animals which have been sent from all parts of the country to take part in the twenty-third annual show of the Shire Horse Society, while in the two following weeks the same building

will be devoted to Hackneys, Thoroughbreds, Hunters, and Polo Ponies.

A record entry has been secured for the Shire Show, the number totalling 860, as against 667 last year and 545 in 1900. The sudden jump in entries is remarkable, the increase occurring principally in the class for stallions. This section shows an increase of 141, geldings an increase of 10, and mares and fillies an increase of 42. To accommodate the very large number, it has been necessary to re-model the plan of boxes in the galleries, whereby 160 additional stalls will be provided; the annexes attached to the galleries have also been re-arranged. These changes have brought about a great economy, but still the authorities found they were compelled to stable all the yearling stallions in stalls and also the yearling fillies. A further change that is worthy of notice is that so great has been the entry of animals to be sold by auction that the sale has been spread over two days. This week it will be found mares and fillies will be sold on Thursday between 9 a.m. and 1,30, while on the Friday stallions and geldings will come under the hammer.

It has long been customary to speak of the reserve, highly commended, and commended cards as "barren honours," but the Shire Horse Society have robbed this phrase of its accuracy, the council of that body, after consideration, having decided that a money prize should accompany these decorations. In future at this show exhibitors of the reserve animals will receive £3 each, highly commended £2 each, and commended £1 each. The total cost to the society of the innovation will amount to upwards of £200, but there can be but little doubt that the institution of these prizes will be warmly welcomed by exhibitors.

FARMERS' IMCOME TAX.

With the income tax at 1s. 2d. in the £, and the possibility of a further increase, it may not be inopportune to consider the position of the farmer in respect of this unpopular impost. Generally speaking, farmers are assessed under Schedule B at one-third of their rent; but they have the option, if they prefer it, of being assessed under Schedule D on their average yearly profits of the three preceding years.

Thus, if the rent be £300 a year, the assessable income is estimated at £100. But incomes under £160 a year are exempt altogether, and therefore if a farmer has no independent source of income, and does not occupy any land or houses of his own, he is not liable to pay income tax unless his rent amounts to £480 a year.

We wonder how many farmers are assessed to the tax, and go on paying year by year, who are really entitled to be exempt? That there are many such we have reason to believe from instances which are brought to our notice from time to time. It may be asked, "How can these things be, if the rent is the basis, and the exemption is fixed by law?" We answer that it is due to the indifference or carelessness with which the average farmer fills up his annual return. On the last page of the return there is a form of exemption or abatement, with explicit instructions that if it is desired to claim relief this form must be filled up, and every source of income, whether arising from the farm or not, must be set forth. If the farmer neglects to complete this claim of exemption or abatement, some surveyors of taxes appear to assume (as they are entitled to do) that he acts advisedly, and that he or his wife has an independent income, which, aggregated with the assessment of his farm, disentitles him to relief. Therefore, in the case we have put, of a rental of £300, although the apparent assessable income is only £100 (which should be exempt), it is assumed that it is not the only income, and as the surveyor has no positive information before him he gives the Revenue the benefit of the doubt, and charges the tax on the £100. Probably he argues that if he is mistaken the farmer will promptly appeal, and then the assessment can be cancelled, or adjusted to the proper amount.

In many cases, however, the farmer, from ignorance or patriotism, has accepted the burden as one of the ills that flesh is heir to, and it is only now that the tax has become so onerous that he is beginning to wake up. We do not say that this custom is universal, as we believe some surveyors give the farmer the benefit of the doubt, unless they have reason to believe that he has some other means of subsistence. The practice appears to vary in different districts, and is probably influenced by the view of the surveyor for the time being responsible for the assessment.

We have recently known several cases in which farmers, who have for years been paying on an assessment in respect of which they have been entitled to total or partial exemption, have not only sought and obtained the relief due to them, but have also obtained a return of tax for the past three years, approaching £20 in amount. Such windfalls, whether large or small, being in the nature of "found money," will surely be very welcome in many homes, and we advise farmers and others who have not already studied the question to consider whether they are not paying more than they should, and whether they also have not a nice little sum banked at Somerset House, only awaiting a proper application for its return.

Not only are incomes of less than £160 totally exempt, but incomes under £400 are entitled to an abatement of £160, and there are other smaller abatements, down to £70, on incomes between £400 and £700. Thus no one whose total assessable income is less than £700 is liable to pay the tax on the full amount, although, as we have shown, the abatement often is not allowed simply because it is not asked for.

But in arriving at the assessable amount, the wife's income must be added to that of the husband, unless she derives such income from a trade carried on apart from her husband. It is one of the inconsistencies of the law that, although it insists that husband and wife are two distinct persons, and deprives the husband of all interest in the property of his wife, yet it maintains that the two incomes are one when it wants to make them liable to taxation. We wonder when this relic of identity of husband and wife will disappear? How much longer will wives submit to this slur on their individuality?

We said at the outset that farmers had the option of being assessed under Schedule D. This is the schedule under which tradesmen and professional men pay on their average yearly profits. In the case of small farmers, with no independent means, Schedule B will be the most convenient basis, as they will be entitled to total exemption without the trouble of keeping accounts. If a large farmer has had a succession of bad years, and can show that he has made little or no profit, it may be better for him to make his return under Schedule D, and so escape assessment altogether, instead of having to pay on one-third of a heavy rent, and then claim repayment. He cannot do this unless he has kept proper accounts, and is in a position to present his balance-sheets to the surveyor of taxes. We should be the last to suggest that farmers should neglect to keep accounts, but we have to face the fact that their book-keeping is frequently defective, and too often non-existent. Rather would we urge the economy of keeping a simple form of farm accounts, for even where a farmer is assessed on his rent, and has paid the tax under Schedule B, he can obtain a return of it, wholly or in part, if he can show that his supposed profits are illusory, and that he has made nothing, or something less than one-third of his rent. Persons desiring to claim a return of tax on this ground can obtain all information from their surveyor of taxes, who will also furnish a printed form of account of profit and loss to be used in support of the claim. The form of balance-sheet is a simple one, and only involves a stock-taking at the beginning and end of the year, and an account of the year's receipts and payments under different heads. On one side there is the value of stock and produce at the beginning of the year, purchases of live stock, corn seeds, feeding stuffs, and manure, rent, tithe, rates, and taxes, labour, and tradesmen's accounts; on the other side, live stock and produce at the end of the year, sales of stock, produce, wool, corn, seeds, &c., agistments, and other receipts. The difference on one side or the other shows the profit or loss.

Farmers desiring further information on this important question are advised to apply to the Secretary of the Board of Agriculture for a copy of leaflet No. 26, "Farmers and the Income Tax," which may be obtained from him free of charge. Letters addressed to him officially are "postage free."

By a Man of Mark Lane.

The Paris "Official Journal" states that, according to the reports of the departmental professors of agriculture, the wheat crop prospects in France are very good in one department, good in thirty-four, fairly good in forty-one, passable in nine, and middling in two departments. For oats the prospects are very good in two departments, good in thirty-one, fairly good in twenty-five, and passable in six.

The receipts on account of Revenue from April 1, 1901, when there was a balance of £5,596,918, to February 15, 1902, were £117,720,202, against £107,365,213 in the corresponding period of the preceding financial year, which began with a balance of £3,517,047. The net expenditure was £171,383,420, against £160,614,314 to the same date in the previous year. The Treasury balances on February 15, 1902, amounted to £8,990,376, and at the same date in 1901 to £2,610,397.

At a meeting of the Royal Meteorological Society held on Wednesday, Mr. E. Mawley, F.R.H.S., submitted his report on the Phenological Observations for the year 1901, in which he showed that as affecting vegetation the weather was chiefly remarkable for the scanty rainfall during the growing period of the year. The deficiency was not confined to any part of the British Isles, but was more keenly felt in the English counties than in either Scotland or Ireland. Wild plants came into flower very late, but not quite as late as in the previous phenological year, which was an exceptionally backward one.

The swallow, cuckoo, and other spring migrants were as a rule rather behind their usual dates in reaching these islands. The crops of wheat, barley, and oats were all more or less above average in Scotland and Ireland. On the other hand, in England, though there was a fair yield of wheat, that of barley and oats was very deficient. Hay proved everywhere a small crop, and especially so in the southern districts of England. Beans, peas, turnips, swedes, mangolds, and potatoes were all more or less under average in England, but either good or fairly good elsewhere. The yield of hops proved singularly abundant. Apples, pears, and plums were below average, especially apples, but the small fruits as a rule yielded well. Taking farm and garden crops together, seldom has there been a less bountiful year.

By a Lobbyist.

The secession of Lord Rosebery from the Bannermanites has a considerable significance to those who are interested in the taxation of land. The causes which lie beneath the surface in connection with this secession are of more significance than are those which are immediately apparent. If my information is correct, Lord Rosebery is opposed entirely to the Radical policy of the taxation of land values. At this moment it is only proposed that the economic principle involved in this Radical proposal should be applied to urban areas. The suggested taxation should, it is advised, provide the necessary taxation for the better housing of the working-classes, and for that improved sanitation which the heroic and eloquent Radicals profess to believe will be the parent of a bettered community. However, it is impossible that, if once applied to the towns, the rural districts can be long exempted. Lord Rosebery is by no means a land nationaliser, and of land nationalisation this proposal may be said to be a kind of illegitimate offspring. He does not believe in any way encouraging the Radical theorists, who dream of a tax of twenty shillings in the pound on rent. He is, in fact, economically a sanitist. Herein lies the real significance of his split from the Bannermanites. Of course, the ineffable "C. B."—by the way, his adulators have, after the current fashion, already begun to dub him "our great and revered leader"—will swim with the extremists. The Roseberians, however, will offer a very rebuking breakwater.

Let me ask my readers if they do not perceive in the debate which has taken place on the rating of site values in towns a rebuke to that fatal apathy with which all concerned in the economic position of the rural districts regard their own weal. This Bill, which Mr. Trevelyan introduced, was confessedly modelled on the minority report of the Royal Commission on Taxation. Now, if that Commission had originally any purpose whatever, it was to equalise the taxation applying to rural areas. I do not say that it was ever intended to exclude urban taxation from the purview of the Commission, but I repeat that the idea in the minds of the authors of the Commission was to equalise the conditions of taxation in rural areas. Which among the bodies affecting to be interested in the weal of the agrarian interest has even sought to embody in a formal measure any suggestion of the Commission which would improve the rating conditions of the country districts? Well, I do not know of one. There have been one or two academic and invertebrate discussions, but that is all. It has been again left to the avaricious politicians of the towns to take advantage of an effect designed principally for the interest of farmers and landlords.

Now, there was an opportunity during the discussion on this Bill which might well have been utilised to the advantage of agriculture. If I understand the measure aright, its purpose was that urban land should not be left in the same category as turnip-fields and pasture-land. It embodied in effect a proposal that a larger part of the rates should be thrown upon the more wealthy districts. It proposed to register the fact that site value is due not to the action of the owner of the land, but to the movement of population. Now, I am not going to urge that this proposal is a justification of the Rates Act; but I do say that if the movement of a rural population to the towns, with its consequent increased building, is a justification for increased taxation, then the migration of that population from the villages is a justification for applying a more sensitive and sympathetic policy to those villages. Do not believe that I for a moment am under the foolish misapprehension that the Radicals would yield this contention. However, advantage might have been taken of the opportunity to press home the assertion that if an enlarged population justifies an increased taxation, then a diminished population justifies if not reduced taxation, at least more sympathetic treatment. But who was there ready to press this point home? Not a soul.

I must congratulate another rural M.P. in the person of Mr. Grant Lawson on his debut as a Minister. Mr. T. P. O'Connor has not too wittily—though, by the way, the Radicals have gone into ecstacies over the feeble point—dubbed him "the triangle of the ministerial band." The description is ludicrously inappropriate. Mr. Lawson revealed, even in the discussion upon this Rating of Urban Sites Bill, that he has a command of sonorous phraseology, antagonistic to, or at least inharmonically bold in comparison with, the tinkle of the triangle. He can tell you that a mild revolution in taxation—and it was a very mild proposal which this Bill proposed—will shoot the world over an economic and socialistic Niagara in as vehement a manner as ever did any man standing at the Treasury table. When Mr. Grant Lawson first entered the House of Commons I hailed him as a man calculated by his considerable abilities to place agriculture under undeniable obligations to him. I am sorry to say that he has not realised my expectation—not certainly because of any diminished ability on his part, but simply because he has preferred to, in a large measure, exhibit that ability in other fields. He has assuredly not forsaken agriculture, but he has not given it that active aid which at least I expected of him. Well, it can at least be said for him that agriculture in its sinister somnolence did not apparently desire any active interference from him on its behalf. But to return to our muttons, as the French would say. Mr. Grant Lawson has made a most creditable appearance, and, when he has got over his natural desire to say smart and resounding things, he will find that the House is appreciative of his intellectual parts.

I am glad to say that what I may describe as the agricultural possibilities which have been suggested by this remount scandal—into whose dramatic and too odorous details I am not going to again penetrate—are now fully appreciated in the House of Commons. There are nigh upon a hundred M.P.'s who are ready and even eager to ask the question, "Why should not England herself reap some of the advantage from the horse-market which the necessities of the army have called into existence?" The remarkable fact is that at the very moment when the wisdom of establishing imperial stud-farms here in England has been suggested, the very same proposal has been made to the Indian Government. The Indian proposal has, however, a greater authority than the English. That proposal emanates from a carefully-appointed commission, whose members in their report contend that it is almost fatal to the safety of our Indian Empire to allow the army to rely upon some ill-regulated and ad-captandum method of supply. The Indian Government should have assured sources of supply within its own confines to which it could resort in the certain knowledge of having its necessities met. This same argument applies in a measure to England.

The Indian proposal is that these stud-farms should be an imperial establishment. That is not the present English idea. The suggestion of the advocates in the House of Commons of a native provision of horse-flesh for the army is rather that it should be left to private enterprise, but private enterprise stimulated by a grant from the Government. Of course, it is apparent that no return could accrue to the proprietors of the farms for some years, and it is urged that it is unbusinesslike to expect these men to incur a huge expense for the mere sake of patriotism. Besides, in the first place, the effort must be more or less experimental in character. It should not be impossible to formally approach the Ministry on the question. Devonshire and Norfolk M.P.'s have revealed a particular interest in the matter. Which among these legislators has the hardihood to formulate a definite scheme? I have reason to know that the Ministry would welcome it. It is possible that, in the imperial and party excitements of the present day, it would not be given an immediate consideration, but I can assure them that Ministerial sympathy would lend it a fertilising character.

By Hordeum.

Sowing.

The hard frost of the past fortnight has followed on a season peculiarly favourable for a fine tilth, so if we get a spell of dry weather we may see a large breadth of barley sown long before we have twelve hours' sun. Much of it will be got in well, and it is a pity we have so little information as to how much this factor contributes to the ultimate success of the crop.

It has been shown, nine seasons out of ten, that early sowing is better than late, especially when quality is desired, and it stands to reason it should be so.

I have already dwelt upon the good results likely to follow careful selection of seed and preparation of soil, but there are other considerations that pay to bear in mind just at this season. Everyone need not, nor could they, if they wished, exhibit at the Barley Show at the Brewers' Exhibition, but every sower of barley this spring can at least take some of the preliminary steps that may mean a very handsome return next October.

For years past there has been a long and steadily growing

List of Rich Prizes

open to growers of barley who gave the matter a little thought in the early spring. This year the schedule is brought out much earlier than ever before, in order that all careful men may look ahead and take the necessary steps to qualify for as many of these prizes as may be offered to their locality.

Some counties have been more favoured than others, to an extent that at one time some districts were loaded down with opportunities, and others had no chance at all, excepting the rather remote one of competing against all England. This year all this is changed, and there is no single county that has not several valuable prizes open to it. Many of these are arranged so that one or two counties only are competing against each other, and as a consequence any grower, or dealer, can know within a little what he is competing against.

County Prizes

in almost every case are supplemented by a wide diversity of other awards, many of which a man can now qualify himself to secure; but he cannot do so in a few weeks time in the same way. Our seedsmen have many of them offered special prizes for years, and whilst many are taken, a greater number remain unallotted. Yet, surely, it must be wiser in the end to use approved seed, obtained from a first-class firm of repute, even if it did not bring in its train the probability of securing high county honours, and the consequent better price that prize barleys always command.

Then the various makers and dealers in all kinds of

Artificial Manures

offer very numerous rich prizes, in such manner that a lot of men may qualify with a strong probability of success.

For instance, Fison and Co. (Ipswich) offer to eight groups of counties no less than thirty prizes any one of which is worth winning. Colchester's (also of Ipswich) do the same for some counties, notably the West Riding of Yorkshire, and many others do the same for different districts. Webb and Sons (Stourbridge) favour certain Western and Midland districts; Crone and Taylor (St. Helens), are more free from restriction, and open to all, whilst mention could be made of several more. But all barley growers should get hold of

one of the schedules of the prize list, etc., now offered, and study out the matter for themselves.

Over twenty medals, thirty silver cups, and upwards of £800 in cash are already offered, and the number of classes has risen from 28 to 44, with every prospect of further increase before the list is finally complete.

Maltsters are this year going more earnestly into the matter, as they realise that improvement in barley gives them a better chance of doing business. Good malt can only be made from

Fine Barleys,

and a big supply of high grade barleys can only be got from neighbourhoods where soil and climate are seized by intelligent men and made to give good results, purely, through proper methods of cultivation being steadily practised. The very best men admit the need for further improvement, and it is cheering to find further encouragement offered to counties not before recognised. Mr. Flinn offers prizes to Ireland; Messrs. Samuel Thompson and Sons to eight West Midland counties, in which they work malt houses; Lord Wenlock again gives to East Yorkshire, and many others too numerous to specify. In fact, the schedule this year runs to no less than twelve pages, and whilst only two donors drop out, their places are very amply filled. Everyone this year can stand a chance if he will act with discretion and diligence.

THE DAIRY.

The Price of Milk.

At a meeting of the Gloucestershire and Somerset Dairy Farmers' Society the following resolution was carried unanimously:—"Resolved that, according to information received from dairy farmers' societies in other parts of the country, and also considering the present increased cost of producing and distributing milk, the council of this society cordially approve of the decision come to by an influential body of dairy farmers of the surrounding district, that a moderate increased price be charged for milk, and are of the opinion that the wholesale and retail milk-sellers of the districts covered by the society are amply justified in seeking to obtain a higher price from the public during the coming year."

On Wednesday North Derbyshire farmers decided to make an advance of 1d. per gallon for milk on and after March 25 next. The chief reason for the change is that cows, it is stated, are costing 2s. 6d. per week more to keep than they were a year ago.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending February 18, 1902:—

NOTE.—The figures for the current Year are approximate only.

I am glad to be able to state that the Right Hon. R. W. Hanbury, M.P., President of the Board of Agriculture, has recovered from the severe chill contracted on the 4th inst., he being able to leave his bed on Thursday.

Home Notes.

The Borough.

Although the demand for hops last week was slightly slower than during the preceding fortnight, sufficient activity prevailed, not only to maintain values, but, in the majority of cases, to improve them. Growers are now practically off the market as regards choice or even good qualities, and if any lots of such grades are available they can be sold without difficulty at full season's prices. Failing these, buyers are condescending to examine and bid for growths, or parts of growths, which have frequently passed under their view, but which they have previously discarded as beneath their notice. The course that the trade appears to be taking is somewhat curious. Merchants are at present inclined to neglect the medium of fairly passable samples, and are giving special attention to the qualities which have hitherto rested unsold on offer at 20s. to 25s per cwt. These hops are now saleable at 30s. to 55s., and last week there was a marked inclination to make bids up to 40s. It is evident that the 1901 crop is being rapidly disposed of, and the general feeling of factors is in favour of the further hardening of values of all descriptions. The present position of affairs certainly indicates a gathering of strength. I can speak of the renewed health of the business with much more confidence than was possible in my last report, and as the hops that are now being handled are doubtless bought for immediate consumption, we may indulge in the pleasant hope that the immediate movement will be sustained, and that brighter times are awaiting the trade.

Imports and Exports.

With the Board of Trade returns for January before me, I am able to bring the figures of our foreign movements nearly up to date and find the following results. We have imported during the season from September 1st, 1901, to January 31st, 1902 from—

	Cwts.
United States of America	62,043
Other countries	20,019
Total	82,062

During the corresponding period of 1900 and 1901 our imports were—

	Cwts.
United States of America	110,336
Other countries	44,644
Total	154,980

It therefore appears that thus far there is a total deficiency of imports this season, as compared with last, of 72,918 cwts. Proportionately the falling off of 24,000 cwts. from the European supply is greater than that from America, although the latter has diminished to the extent of 48,000 cwts, or over 43 per cent. But the contrast between the two seasons is more pronounced, if we take account of the exports, which were as follows:—

	1900-1	1901-2
	Cwts.	Cwts.
English Hops ...	7,941 ...	11,861
Foreign Hops ...	1,109 ...	1,366
	9,050 ...	13,227

By deducting these figures from those given above it will be seen that the balances are:—

1900-1 ... 145,930 cwts. 1902 ... 68,835 cwts.

the actual reduction of the loading of our market therefore being 77,095 cwts., which equals fully 53 per cent.

From these calculations we may safely conclude that the

English crop mainly regulates its own value.

The examination of the returns of other seasons confirms this view, and forces upon us the conviction that English hops are estimated by English brewers from a different point of view than that from which they regard foreign growths, and that consequently English growers possess greater control over the value of their produce than they have hitherto been induced to believe. The imports bogey may be pushed aside with comparative ease and safety, and our planters should, like sensible men, set themselves to the task of regulating the quantity and quality of their annual supplies to meet the position they undoubtedly occupy. It matters not what means are adopted to adjust the supply to the demand. For instance, I am not unwilling to endorse the views of my friend, Mr. Galliers, of Wistaston; Herefordshire, whereby he urges the growth only of the best approved sorts, and the grubbing of the inferior ones. Should this policy be universally adopted, his contention that 50,000 acres will still be required for the sufficient supply, may perhaps be found to be correct. At any rate, we have to face known facts, and "by hook or by crook," the important object of limiting the supply to the actual requirement must be accomplished if our industry is to be maintained in a prosperous and remunerative condition.

Foreign Notes.

My reports concerning foreign markets are this week somewhat meagre and uninteresting, therefore I need not trouble my readers with very lengthy remarks. At Nuremberg business is going on at steady pace, though its volume has rather fallen off during the past few days. The value of any choice hops is fully maintained, and the scarcity of such qualities tends to enhance the present currency. Hallertaus are in good demand, also good Badens and Bohemians; but inferior kinds of any district can be bought at rather less money, as consumers are inclined to neglect them, and inquiries for export to England, which were expected to assist the market in this direction, have fallen off. Business in Belgium is quiet, but without any perceptible reaction from recent advancement of prices. Extremely few hops now remain in first hands, and growers who are still holding are little disposed to sell at current offers.

From America I hear that in many parts of New York State there is an increasing inclination for the reduction of acreage. Many small growers in Decatur (Otsego Co.) will go out of the business, and no new yards have been set, beyond the replacement of exhausted land. In Chenango Co. the acreage will be decreased on the whole, and similar action will be taken in Madison Co. In Schoharie Co. present acreage may probably be maintained, but no increase will take place. From Oregon I have two reports, which refer to the discouragement of growers, who, having only a light crop last year, were not sufficiently remunerated. The situation on the New York market is practically unchanged. Brewers are not active buyers, and export trade is not large. The comparison of receipts and exports of hops for last season and the present continues to show considerable advantage in favour of the former. Current quotations for all grades remain firm at previous figures, and the feeling amongst holders favours increased strength.

Staffordshire.

Mr. J. B. Bull presided at the annual meeting of the Staffordshire Agricultural Society, held on the 25th ult., at Stafford. The report of the committee stated that, notwithstanding the fact that the Newcastle show clashed with the Shrewsbury Floral Fête, it was a financial success. This was attributable more particularly to the result of the action of the sub-committee appointed last year to inquire into the general expenses of the society, with a view to curtailing them as much as possible. The exhibition was held under the presidency of Mr. T. W. Twyford, who took the greatest interest in all the arrangements for the event, and was supported in his endeavours to promote the success of the meeting by the Mayor of Newcastle (Alderman R. B. Mellard) and an influential committee. The town and district responded liberally to the appeal for support, and after providing for the usual guarantee towards the expenses and special prizes the local committee were enabled to hand over a surplus of £16 towards the society's funds.

The total receipts for the year amounted to £3,046, and the expenditure up to December 31st £2,866, showing a surplus of £179. A further sum of £13 was due for prizes awarded at the last exhibition, but not yet payable, leaving a net balance of £166 to the credit of the past year. The society's investments were valued on December 31 at £1,156. During the past year the society had sustained a loss of 64 members by death and withdrawal, while 20 members whose subscriptions had fallen considerably into arrear had been struck off. The society now consisted of 529 members, whose annual subscriptions amounted to £472.

Colonel Shaw Helier moved the adoption of the report. This was seconded by Mr. Wibberley, and carried.

A vote of thanks was accorded to Mr. T. W. Twyford, to each of the vice-presidents, to the treasurer, and to the committee for their services during the year. Mr. J. W. Phillips, of Heybridge, Tean, was elected president of the society for the year, and Mr. T. C. Smith, Admaston, Mr. F. E. Richardson, Bramshall, and Mr. T. Wood, Croxden Abbey, were appointed farmers' vice-presidents. The general committee was reappointed.

It was decided to hold the exhibition this year at Uttoxeter, on August 27 and 28.

SOCIETY NOTES.

The members of the Selby Agricultural Club met at Selby on Monday afternoon to discuss the suggested tax on imported wheat and flour. After some speeches had been made, all of which were in favour of the tax, the following resolution was carried unanimously, and a copy ordered to be sent to the Yorkshire Union of Agricultural Clubs:—"That the members of the Selby Agricultural Club are strongly of opinion that a duty on foreign flour and cereals would be to the advantage of all classes of the community, and that this special meeting of the Selby Agricultural Club requests the President of the Yorkshire Union of Agricultural Clubs and Chambers of Agriculture to call an extraordinary meeting of the Union at the earliest possible moment; to pass a resolution that a deputation from the Union wait upon the Chancellor of the Exchequer to urge upon him the advisability of imposing a duty or registration fee upon flour and cereals, or a duty or registration fee on similar lines, to partly meet the expense of the war, and that all the county members be invited to attend, and the Right Hon. James Lowther, M.P., be asked to address the meeting."

The subject was also discussed at the annual meeting of the Pocklington Agricultural Club held on Monday, and a resolution was adopted urging the Government to impose a duty upon all cereals imported from abroad other than from the Colonies of 2s. per qr. of 480lb., and on all manufactured flour of 2s. 6d. per sack of 20 stones. The report presented by the secretary showed that the club is in a very satisfactory condition. The past year closed with a balance in hand of £28 18s. 6d., although the expenses have been slightly higher than in the previous year, whilst the numerical strength of the club remained about the same.

The closing of the Argentine ports to British cattle caused a considerable loss of revenue to the Kent and Romney Marsh Sheep Breeders' Association last year, for at the annual meeting it was stated that the export certificates in 1901 only resulted in a sum of £1 15s. being added to the exchequer, whereas in 1900 the result was £25 5s. There was also another cause of a reduced revenue, namely—the decrease in the number of rams entered, this also being responsible for a reduction of some £20. Taking the year's working, a loss occurred of £12 5s. 10d. The membership, however, continues to increase steadily. It was decided to ask Major Howard, M.P., to accept the presidency for the year, and Colonel Warde, M.P., and Lieut.-Colonel Pennefather, of New Romney, were made vice-presidents.

The Wetherby and District Chamber of Agriculture celebrated its first anniversary on the 14th inst., when a dinner and the annual meeting took place. The report was a most gratifying one, the membership being shown to number 79, and the accounts revealed a balance in hand of £14 1s. 4d. It was wisely decided to affiliate with the Yorkshire Union of Agricultural Clubs. The chief speaker at the dinner was Sir Robert Gunter, M.P., who referred to the proposal to re-impose a register fee on corn, and said that by this means we could pay off at once the supplementary war vote. Such a fee would not mean protection, but would be a war tax. Bread was at present very low in price, wheat being only 28s. per quarter, and if the price were to go up he considered it would be only the bakers who would profit. At any rate he thought such a tax would do no harm.

A strong committee of the Sussex County Agricultural Society has initiated a movement for recognising the services rendered by Mr. Walter F. Ingram to that society. It is fifteen years since Mr. Ingram, in conjunction with a few other gentlemen, conceived the idea of forming the society, which has now grown to considerable importance as an agricultural society in the country. During the whole of this period Mr. Ingram has acted as Chairman of the Council, which has necessitated a vast amount of work, the Chairman of the Council also being chairman of the various committees and sub-committees appointed. It is suggested that subscriptions should be limited to one guinea, and it is hoped that a ready response will be made. The subscription list is now open, and it is proposed to close it on the last day of March. Cheques should be made payable and sent to either of the joint hon. secretaries, Mr. James Woodhams, Havelock Road, Hastings; or Mr Walter Lintott, the Estate Offices, Lewes.

The Buxton Horse Show Society is, according to the report presented at the annual meeting, now in a more flourishing condition than ever before, having a substantial balance in the bank. The Right Hon. R. W. Hanbury, President of the Board of Agriculture, was elected president for the year, in succession to Mr. Victor Cavendish, M.P., who was heartily thanked for the interest he always takes in the show. September 12 was decided upon as the date for this year's show.

SEVENTH REPORT

ON THE

SUGAR-BEET GROWING EXPERIMENTS

IN

GREAT BRITAIN AND IRELAND.

Carried out and Conducted by

SIGMUND STEIN,

Manager, Sugar Refinery, Liverpool.

In continuing my experiments of sugar beetroot growing in the United Kingdom I have the honour to publish to-day my seventh report thereon. The great progress which has been made in sugar beetroot growing in the United Kingdom can easily be seen by comparison with my previous reports. Practically better results have been achieved year after year, and the farmers who continued these experiments have now nothing to learn from their Continental confrères in the art of sugar beetroot growing.

The same as in previous years, different soils and manures have been used in these experiments, and the variety increased by the distribution of different kinds of seed cultivated under different circumstances.

In regard to the manuring, very interesting experiments have been carried out. By the kindness of Chemical Works, late H. and E. Albert, Agricultural Department, London, I have been enabled to carry out a series of experiments with basic slag supplied free of cost by them. In a number of the experiments, especially in those carried out on light soils, kainit was also applied to the plots dressed with basic slag, and was supplied gratis by the Agricultural Office of the Potash Syndicate. As will be seen from the tables below, the beetroots grown on soils manured with basic slag—or on light soils with basic slag and kainit—show excellent results, and compare favourably with those roots not so treated. I do not think that such extensive comparative experiments in manuring beets with basic slag and kainit have ever been carried out before in this country.

The results received bring me to the strict conviction that basic slag is an excellent manure for sugar beetroots, to be supplemented, specially on light soils, with kainit. The beets benefit by such manuring both in respect to saccharine strength and weight, and I am so encouraged by these excellent results that I shall recommend in future my farmer friends to use these manures. I may say that many of them agree with me in regard to my judgment as to the use of basic slag.

The time of vegetation has been the same as in previous years, viz., from 140 to 200 days. The weather was not favourable for sugar beetroot growing, and the results being so very satisfactory, it must be said that this year's experiments have been the greatest success of any year yet. As will be seen from the table below, experiments have been carried out in all parts of England, Scotland, and Ireland, and great thanks are due to all the gentlemen who supported my experiments, partly in planting and growing sugar beetroots, partly in inducing their friends to do so, and, lastly, in trying to induce others to take an interest in my scheme.

The great success of beetroot growing in the country encourages me to continue same next season, and more so as I have been asked to do so by gentlemen who have planted beetroots this year, and many others who will grow beetroots experimentally for the first time next year.

This year there have been 89 experiments in the United Kingdom, of which there were in—

England	... 57	experiments.
Scotland	... 4	,,
Ireland	... 28	,,

and the result of these experiments is as follows:—

	Average Analysis of British-grown roots, year 1901.	Average Analysis of German-grown roots, year 1901.
Average weight of roots with leaves (in grammes)	1441	1112
Average weight of roots without leaves (grammes)	851	621
Degrees Brix (dry matter)	19.38	17.66
Specific gravity	1.080	1.073
Quantity of sugar in 100 parts juice	17.02	14.76
Quantity of non sugar in 100 parts juice	2.38	2.90
Quotient of purity	87.82	83.53

As figures speak for themselves, I leave it to the reader to draw his own conclusions. Everyone can clearly see the importance of sugar beetroot growing in these islands. After these very successful experiments I do not think there is any doubt about our climate being suitable or about the ability of our farmers for growing beetroots. As I have proved in my previous publications, there is no need to be frightened of not getting sufficient labour in this country for carrying on beetroot growing.

I regret that, in spite of my instructions and warnings, dozens of people sent me beetroots for analysis without any trace of sender's name. All parcels of roots sent me were analysed, but it is impossible to publish the results without having more particulars. I have received many letters from my farmer friends urging me to let them have reports on beetroots sent, but I cannot now do so after such a long time, as I am unable to trace same. I would ask them in future to be very careful in labelling their samples properly, and to put their name and address on every lot, as well as marking and naming the seed. In future roots grown from different kinds of seed must be packed up separately, as they easily get mixed up when sent all together. It is also very important that the leaves should be attached to the roots, and not sent, as in many cases this year, without leaves. I would also beg my friends to send me only properly-washed and clean roots.

As regards the tonnage per acre, the British-grown roots this year, in tons of roots, without leaves, per acre:—

	Tons per acre.
In 1901	19.4
In 1900	19.1
In 1899	16.9
In 1898	16.3
In 1897	16.7

With regard to the amount of juice, the roots contained on an average:—

Juice	93.8 per cent.
Pulp	6.2 per cent.
	100 per cent.

With regard to the contents of glucose, I have only found traces in reference to Nos. 19, 26, 78, and 86.

The sugar beetroot growing question comes in close contact with the sugar question generally, and I am sorry to say we find ourselves in a very critical position this year in this regard. Over-production in beet and cane sugar has brought about a crisis the like of which has never been seen before. Sugar now rules at such a price as to spell ruin to the manufacturer. Of course, such a state of things cannot last long, as there is no manufacturer in the world who will make sugar for the benefit of the consumers only and for his own loss. A remedy will be found very soon, because they will not go on losing money for ever. It is to be hoped that next season will bring about a reduction of beetroot growing on the Continent of from 20 per cent. to 30 per cent., which will certainly counterbalance the accrued stock and visible supplies which are generally carried over from one season to another, and sugar will then attain its proper price, which will enable the manufacturer to the sugar beetroot grower to live and prosper.

Of course, sugar beetroot experiments are not only carried out during a brilliant commercial season, but also those seasons of critical aspects. My experiments are to prove conclusively that sugar beetroots can be grown successfully in these islands, and quite as well as on the Continent of Europe, with as much profit to the British farmer as to the Continental agriculturist.

I will allude to the remarks of the Right Hon. Earl of Denbigh with reference to the beetroot experiments carried out at Newnham Paddocks, in which he stated that, considering the great tonnage of the roots and the satisfactory analysis of same, according to his convictions, sugar beetroot growing can be carried on at a profit by the British farmer. I quite agree with his lordship, and may add that from the correspondence in my possession from many leading British agriculturists that beetroots can be grown in this country to any amount if sugar beetroot factories are established and fair play given to the British farmer, with the same advantages as the foreign sugar producers and manufacturers. British farmers, manufacturers, and capitalists would soon find the way, and would carry on this profitable industry if factories were established.

As I am writing this article an international conference is being held in Brussels to discuss the question of the abolition of sugar bounties, and I hope that same will come to a satisfactory issue; satisfactory to the continental farmers, manufacturers, and exchequers, and also satisfactory to the British farmers, manufacturers, and capitalists.

Let us have fair play; put us on the same footing as the foreigner; let us be at home in our own country; give us the same rights and no less than the foreigner enjoys in this country. Have we no right in our own country to have the run of the market for ourselves? How long shall we suffer and be the laughing-stock of the world? The foreigner comes here and undersells the Britisher, and one industry after another is going to the wall in consequence, for the benefit of continental enterprise, which countries consider the British market as their best.

If we are a free trade country, let us have free trade, but free trade in general, and not a one-sided free trade. Factories have been erected in this country before, but, as I have mentioned in

ANALYSIS OF SUGAR BEETROOT.

my previous publications, these have been failures, the reasons for which I have already explained. There has been blunder upon blunder crowned by mismanagement.

As soon as free trade is established in this country in a proper manner, and we are put on the same footing as the Continental farmers, let us start factories, erect them in proper places, have them properly managed, with a proper supply of sugar beetroots, and capitalists need not fear for their success. We are the greatest sugar consumers in the world, and we can become the greatest sugar producers in the world.

Look at America, from small beginnings the American sugar industry has grown from day to day, and very soon the United States of America will produce 200,000 tons of beetroot sugar per annum. Don't let British enterprise be shattered by American enterprise. Up to now London is the centre of the sugar market of the world; don't let London soon be changed for New York, and be ruled from America. England rules the waves, and must also rule the sugar trade.

We are patriotic enough; let our patriotism show that we can afford and wish to have home industries and home-manufactured sugar. I have mentioned in previous publications what benefits would be derived from the sugar industry if established in this country. How many hundreds of thousands of men, women, and children would find employment year in year out? The engineering, building, and allied trades would all benefit to a large extent. To cover the wants of this country 400 factories would have to be established, and not to mention the great importance from a national political standpoint great benefits to British agriculture would undoubtedly follow from the growing of sugar beetroots.

I have before proved all these assertions by facts from the Continent, where the sugar industry celebrated its 100 years of existence not long ago.

We have everything in our favour in this country, proper climate, labour, educated farmers, capital, consumption, and factories only are needed under effectual organisation. It needs only a few influential gentlemen to bring the scheme forward and its success is assured. I think the British agricultural societies should take the matter in hand, and start a sugar factory to which the farmers should supply the roots.

Let us hope that the time is not far off when we arrive at the same standpoint in regard to the beetroot sugar question, as Germany was at exactly 100 years ago.

Liverpool, January, 1902. SIGMUND STEIN.

Polo Pony Stud Book.

Sir,—I was instructed by the council at their meeting on the 14th inst. to state for the information of owners and breeders of riding ponies that the pamphlet styling itself "The Agricultural Register," with its sub-section, "Imperial Pony Stud Book," has no connection whatever with the "Polo Pony Stud Book" and its annual supplement published at this office, under the authority of the council.—I am, Sir, your obedient servant,

A. B. CHARLTON.

The Polo Pony Society,
12, Hanover Square, London.
February 19th, 1902.

Warping and Warp Land.—A useful article describing Warping and Warp Land is reprinted in the newly-issued catalogue of Scholey's barley, oats, and potato seed. The growers claim that the grains and potatoes cultivated on land improved by warp produce a vigorous and healthy seed, which would prove most useful to farmers as a change. Certainly the numerous testimonials printed help to sustain this contention. Messrs. Scholey's address is Eastoff Grange, Goole, Yorks, whence copies of the catalogue can be obtained.

Advertisement Frauds.—At Spalding on Tuesday a young man named George Cubley, of Gedney, Lincolnshire, was committed to prison for three months, with hard labour, for advertisement frauds. He advertised in the fanciers' papers birds, rabbits, and ferrets; and it was stated by the police that there had been complaints from various parts of the country of the accused receiving money and not supplying the birds as advertised. The Bench described the case as a barefaced swindle, and one of the worst that had ever come before the court.

MONDAY (Feb. 17).—Cold and frosty weather prevailed in most parts of England, but the conditions had become distinctly milder in Ireland. Very heavy rain had fallen in parts of Ireland since Sunday morning, but the Southerly gale which was blowing had almost completely subsided, and in most other parts of the Kingdom the winds were light, the direction in England being chiefly easterly. The weather was colder over Central England during Sunday night than it was during the previous night, the sheltered thermometer at Loughborough, in Leicestershire, registering fourteen degrees. In London the cold was not quite so intense, the lowest temperature being eighteen degrees in the shade and fourteen degrees on the grass.

TUESDAY (Feb. 18).—The changes of temperature were very irregular, and the weather was generally milder than on the preceding day. The winds were mostly very light, and fog or mist was prevalent in many places. Rain was measured at a few of the western stations in the morning, as the result of the fall in the preceding twenty-four hours, but the amounts were small. There was a slight frost in London during Monday night, and the day was again cold, the highest temperature being thirty-eight degrees.

WEDNESDAY (Feb. 19th).—Temperature had risen generally over our islands, although the readings were still much below the average over Great Britain. At eight o'clock in the morning the thermometer was nowhere below the freezing point, but the midday readings, in many parts of England, were very little higher. The weather was again mild in Ireland, and in the south-west the sheltered thermometer exceeded 50 degrees. Rain was measured at a few of the western stations in the morning, as the result of the fall since the previous day; but very little rain fell during Tuesday, although the sky was generally overcast, and fog or mist was experienced in many places.

THURSDAY (Feb. 20th).—Dull and cloudy weather prevailed in most parts of the British Islands, and slight rain fell in many places. Scarcely any appreciable rain was measured anywhere in the morning as the result of the fall since the previous day. There was hardly any frost during Wednesday night, but the temperatures in the morning were slightly lower than on the preceding day, and the midday readings were again generally below 40 degrees over Great Britain. Temperature was rather higher in Ireland than elsewhere, but less so than on Wednesday. The wind was easterly over the entire kingdom, and it was much from the same direction in most parts of Western Europe.

FRIDAY (Feb. 21st).—The air was cold during the morning, but a general rise of temperature occurred during the day, and in the south-east of England rose to about 50 degrees. In the north-east of England the thermometer again failed to touch 40 degrees. The southerly wind, which had set in over Ireland on Thursday, has spread to all other parts of the United Kingdom, and it was increasing in strength on our west coasts. There was a slight frost on the ground in the suburbs of London in the early morning, but in the course of the day the shade temperature rose to 48 degrees, which is higher than on any previous day in the last three weeks.

SATURDAY AND SUNDAY (February 22nd and 23rd).—Rainy and unsettled weather spread over our Islands from the Atlantic during these two days, but the amounts of rain measured were not heavy, except in the South-west, although the fall was general over the entire Kingdom for the first time during the present month. A further increase of temperature occurred, and on both days the thermometer touched 50 deg. in many places. The night temperatures were much higher than of late, and over a large portion of the country they did not fall below 40 and 45 deg. The winds were generally South-easterly, and they were fresh to strong in exposed positions on our coasts.

The directors of the Dumbartonshire Agricultural Society reported that they had now a reserve fund of £57, which, however, might easily be raised to £100. The next show will be held on May 3rd.

THE GARDEN.

Though not so severe yesterday (the 18th) as previously, the frost still holds, and during the last few days skating has been indulged in, even in the metropolis, to an extent unknown for several years past. Fortunately, however, there is little or no wind, and not much fog, so that the conditions generally might be very much worse. The days are lengthening out nicely now, too, and when the frost does break things will no doubt begin to move in earnest, and the spring will be here again "in no time."

But in the meantime, nearly all outdoor work is standing still, as nothing can be done to the ground until the frost is out of it, and if at all of an adhesive nature it ought to remain almost untouched until it dries to some extent. But a few days of "March wind" will soon accomplish this, as it is not at all wet even now, in most places, and only the moisture left by the frost will have to be got rid of. A good sharp spell of frost is one of the greatest of all aids to the gardener on clay lands, as, when the thaw comes after the rough clods have been frozen through, they break down almost like ashes, especially if fairly dry.

Some of the first subjects to be sown as soon as it becomes possible to do so, in the open ground, are onions and parsnips. Both are perfectly hardy, and neither can easily be grown too large, so that the sooner after the present time the seed can be got in the better. Where either a rough or a heavy and damp soil prevails, it is a good plan to provide a quantity of any light and fairly good material, such as old potting-soil, road-scrapings, leaf-mould, and burnt earth, at this season, stored in a shed to keep it dry. Then, if the soil outside does not work well, from any cause, one has only to draw extra wide and deep drills, fill them with the light stuff, treading or rolling it down firmly, and then draw other drills in it, and sow the seed in the ordinary way.

Sowings of horn carrots, radishes, and leeks should also be made on a sheltered, sunny border, as soon as possible, and it is now time to get in some spinach—the round seeded or summer kind—in the open ground. There is time enough for beet yet, but if wanted early a small bed of the Egyptian, or of the improved "Globe" variety, may be sown about the middle of March.

Plenty of peas, including some succession and main-crop varieties, must also be sown on the first opportunity, especially as the severe weather has probably destroyed all the autumn, or earlier, sown rows. Sow some broad beans also, on light land; these must be sown early, or they will probably fail.

As soon as it can be done, all the roots of parsnips, salsify, and Jerusalem artichokes still remaining in the ground had better be lifted and stored, with some light soil or sand, in heaps in some very cool and shady place, as on the north side of a wall or close fence. Here they will remain dormant for some time yet.

See that the pruning and training of peaches, apricots, and other stone-fruits on outside walls are completed, and have the nets, or whatever protection is to be given, all ready to put on directly the first buds expand. If not done already, give them a top-dressing of rich compost, containing plenty of old mortar-rubbish or chalk, with some bone-meal, basic slag, or the like. Figs should be uncovered directly the frost breaks, pruning and training the branches, and top-dressing with the same compost as above.

The trees in a cool orchard-house will soon be in bloom now, and a charming sight they afford, as the blossoms expand very finely under the shelter of the glass. Give air, more or less, as often as possible, but exclude frost and biting northerly winds as much as possible. Keep the atmosphere fairly dry, and see that the soil and roots in the pots or tubs are thoroughly moist.

Get a good batch of hardy annuals sown on fairly warm and sheltered borders as soon as possible now, not forgetting plenty of sweet peas. This applies more to gardens in which a light soil prevails, as with a heavy or damp staple there is no hurry for such things for two or three weeks yet.

Plant bulbs of the stately Hyacinthus candicans, also of tigridias (tiger-flowers—these in warm situations only), and of the early-flowering or Colvillei class of gladioli. On light soils a few of the ordinary gladioli may be planted early next month (March).

Seed of petunias, lobelias, verbenas cannas, coleus, and others may still be sown, but no more time must be lost. Start bulbs of begonias, gloxinias, and achimenes.

B. C. R.

Messrs. Gartons, Limited, of Warrington, have issued a new catalogue of their new and improved breeds of farm seeds. The experiments carried out by the firm have been described in this journal on previous occasions, and the success with which their system of plant breeding is carried out is so well known that all we say here concerning the catalogue is that it contains some striking illustrations of the firm's latest successes, and is worthy the perusal of all agriculturists.

Durham (North-East).

There is little to communicate in connection with farm prospects since my last report. Ever since the commencement of February we have had a continuation of stormy weather, with a considerable covering of snow combined with severe frosts, which has brought all the work on the land to a standstill. With the exception of hay and straw, which are fetching big prices, there does not seem to be any active demand for any other kind of farm produce. The trade in sheep is particularly bad, the worst that has been experienced for many years. The prices of cattle have remained fairly steady. At the commencement of the storm ploughing was well advanced, but if this kind of weather lasts much longer considerable arrears will require to be overtaken.—(Feb. 21st.)

Leicester.

Farming prospects I cannot say any other than very unsatisfactory to the occupier of land grazing or farming. I had a walk of eighteen miles a few days ago. I did not see a single corn stack until I got to the end of my journey. Michaelmas rent days have been fairly got over. I never saw a worse prospect to meet the next. Through the short hay crop, it is consumed, and many are buying from £4 10s. to £6 per ton, some are buying from Lincolnshire oat straw, delivered at £3 5s. per ton. Mangels are going up fast. Turnips after this blast are going rotten. Sheep will come off early and be sent to market to meet an unprofitable price. Spring ploughing is fairly forward, and I have no doubt good seed will be wanted at an advance in price. Several farmers are giving up. Some may have a little left. They consider it the wisest course to take before it is all gone. Farms, most of them, get let at lower rents, on improvements at landlords' expense. — W. C. (Feb. 20th).

Munster.

For the past week we have had wintry weather —hard frost every night—but as I write it is blowing a strong gale from the south, with heavy rain falling. The frosty weather told heavily on the young lambs, which are coming to hand quickly without any losses, but with few couples, although a neighbour of mine has had four lambs from a ewe, and all doing well. Store cattle are healthy, but on account of the scarcity of keep will not be brought out in as good a condition as last year. Both straw and hay are running scarce and dear in market. Not much wheat sown, but where sown looking well. The staple cereal of this province is the oat crop, but last year, on account of the dry summer, it threshed out badly. Gradually the land of the country is laid down to grass, and farmers have to turn to dairy-farming and sheep-raising to pay their way, although the latter system does not appear very promising. The scarcity of labour here, as in England also, threatens a serious difficulty so far as the management of large farms goes.

Beef is now selling at a fair price, making 7d. per lb. Mutton is now selling fairly well, as before Christmas fat sheep were almost unsaleable. Springers are also selling well; there is always a sure demand for this class of cattle here on account of the large number of creameries to be supplied. It is likely that in the near future, through the agency of the new Agricultural Board, the quality of the Shorthorns in this district will be materially improved, as the best bulls at the Dublin Show are purchased and placed at centres in the different counties. The same applies also to the equine department, as the owners of the best sires receive a certain grant for their horses after passing veterinary inspection, and a certain number of mares, which have gone through the same ordeal, get free service from the horses best suited for them on the list. The poultry and swine department are also being attended to. Before this there was no effort made to develop the agricultural resources of the country.—P. F. (Feb. 17th).

Pembroke.

Snow and severe frost; rents, taxes, and labour are much too high. Straw and hay are very little, and if this severe weather should last long it will scarcely hold out against the spring.—(Feb. 19th.)

Foreign Prospects.

FRANCE.—In seasonably cold weather the wheat crop is promising well, and astonishment is generally expressed at the low estimate of the crop published officially.

BELGIUM.—Cold weather has kept the market in Antwerp firm for wheat, which met good demand at full prices.

GERMANY.—Milder weather has succeeded the sharp spell of winter, but as the latter included a good fall of snow wheat and rye crops were fairly protected from frost. White wheat cargoes were in request lately and several were secured with favourable port options.

HOLLAND, like its neighbours, has felt the grip of winter; the closing of the canals practically stopped supplies to Groningen and other inland markets.

HUNGARY.—Higher temperature and rain have cleared away the snow, but no complaints are heard of crop conditions.

ITALY.—Heavy snowfalls in Piedmont and excessive rain in other parts of the upper Peninsula interfere with farm work, but so far no damage appears to have been done to the crops which, in Southern districts, are developing too rapidly.

RUSSIA.—The winter continues to be unusually mild, and as frost did not come to injure the autumn-sown wheat and rye the crop outlook is regarded with satisfaction, particularly as the open character of the season will permit of the early prosecution of spring sowing. In the South rain has fallen.

ROUMANIA.—The condition of autumn sown cereals continues excellent, and farmers are ploughing the land for spring sowings.

BULGARIA.—Recent rain has improved the appearance of the autumn crops, and active preparations are in progress for spring work.

NORTH AFRICA.—Copious rain has fallen over several districts in Tunis, but more is required in the South.

UNITED STATES.—Wheat conditions are not essentially changed, ruling fair to good. The interior movement of grain has increased slightly. Prospective increase acreage of oats. In California further rain fell, but more is wanted South of San Francisco; total to date is 10½in., against 14⅞in. same period a year ago.—*Dornbusch.*

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended Feb. 15, 1902, together with the quantities imported in the corresponding week of the previous year:—

A Farmer's Water Supply Rights.—At Buxton County Court on Monday, Judge Smyley, K.C., gave judgment in the case of John Allatt v. Godfrey Chapman, both farmers, at Hope, Derbyshire, in which plaintiff claimed damages for detention of water supply and sought an injunction to restrain defendant from fouling the stream by placing soapsuds and sewage in it. Plaintiff, said his honour, had established his right to the use of the water from the defendant's land, and was entitled to £5 damage, and granted an injunction restraining defendant from polluting the supply.

Death of Mr. Frederick King.

It is with regret we announce the death of Mr. Frederick King, of the Unity Villas, Wealdstone, an old and valued correspondent of this paper. Mr. King, who was a land valuer and auctioneer, played a most prominent part in public affairs, and with him rests the honour of being the pioneer of the Free Library movement in this country. In 1851, he, with five working-men, met together and arranged details, and founded and opened in 1852 the first public library and reading room at Oxford, and the first in England, which was subsequently rebuilt and opened by the Prince of Wales in 1897. This was not accomplished without strenuous opposition from the Corporation, and leading citizens were bitterly hostile to the scheme, but in spite of this it was carried to a successful issue, and as a result of this example free libraries are to be found throughout the length and breadth of the country. Mr. King was born in 1818 at Fulbrook, his father being then steward to Lord Abingdon, and at the early age of 14 was sworn in as a special constable when the press-gang was rampant, and when 21 years of age he became Chairman of the Oxford Board of Guardians, a position he held for some years. As a land surveyor and auctioneer his business ability brought him an extensive practice, and the knowledge gained led his services to be of the greatest value to Wealdstone. In a very short time the topography of the village was as familiar to him as his own loved city of Oxford, and it was his purpose to improve the condition of the place, which he was well calculated to do, though his ideas, as at Oxford, were considered too Utopian, and the time unripe for such projects. Great highways and engineering schemes he planned at Oxford, but at Wealdstone he mainly devoted his energies to defending the rights of the public. For years he contended that the Mary Pedlar charity at Roxeth had been filched from the people, and innumerable journeys to the Record Office only made him more confident in his contention; then he was attacking the robbers of the public rights at Harrow Weald Common, and only a few weeks since was publicly insisting on a 40-foot right-of-way from Wealdstone to Bushey, and he produced a copy of a musty document he had unearthed at the Record Office in support of his argument. In the political world his reminiscences were of the most interesting character, and to the last his memory rarely failed him. In politics he was an ardent Liberal, a follower and an adherent of the old principles. Latterly his increasing years and deafness have removed him from the public eye, but he was always to be found at the Vestry meetings—and in these days when quorums are a difficulty—his presence was also appreciated and his advice always sought.

heques and Post Office Orders payable to W LLIAM A. MAY, 1, Essex Street, Strand, L ndon.

SUBSCRIPTION RATES:—United Kingdom, one year, 15s.; six months, 7s. 6d.; the Colonies and Abroad, 17s. 6d. per annum.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—We beg to hand you the following report of to-day's market:—Malt: The rather improved demand noticed last week has not been maintained. Barley advanced 3d per qr for grinding. Wheat 3d to 6d dearer on the week. Oats made about 3d per qr more money. Maize improved 3d per qr. Flour firm.—NIXON, GOWER, & Co.

Mark Lane, Wednesday.—The attendance was small, and the market for wheat and flour ruled dull and lower to sell. Maize quiet, and favouring buyers. Oats inactive, and nominally unchanged. Barley quiet. Beans and peas slow, unchanged.

Mark Lane, Friday.—The attendance was small, and business going on was restricted, while the little show of firmness in feeding stuffs during the early part of the week was mostly dispelled. Breadstuffs, generally unchanged. The inquiry for English wheat continues to centre amongst local resorts, and there is very little on offer here, as the town miller affords no inducement to farmers. Quotations maintained. American on spot is quiet, steady, being scarce. Russian remains above the United Kingdom level, and India still fails as an exporter. New Zealand Tuscan, 29s to 30s ex store, 490lb. Flour generally maintained for American brands, patents more especially. Mayblossom (fancy), 33s 6d, and even more for other reputed brands. For first patents, 23s ex store. Of bakers' grades, Iron Duke, 18s 6d; Princess Royal, 18s ex store. Cavendhas, 22s 3d ex store. Town households, 23s 6d; whites 26s 6d per sack delivered to the baker. Top-price town made 28s net, and No. 1 households 21s 9d per sack at the mill door. Whole meal, 172s per ton. Australian patents, 20s ex store, 280lb. Grinding barley firm on spot; none on offer ex ship to come. Odessa, 19s 3d ex quay; Danubian, in same position, 19s. English malting is still mainly moving just now for seed purposes up to 32s. Foreign in sellers' favour. Oats 3d easier as a rule since Friday last. Good Konigsbery, 20s 6d to 21s ex quay. New Zealand ordinary Bluff, 35s to 36s ex store, 384lb. English still very firm. Black Winters 24s to 24s 6d, 42lb; Scotch, weighing the same, 23s to 23s 6d. Flat maize unchanged, and in exhausted supply landed. Round corn 3d to 6d lower on the week for Odessa, at about 21s 9d ex ship to come up, and 22s 3d ex quay. Holders of imported beans and peas remained firm. White Canadian peas out of supply.

COUNTRY.

Ashford, Tuesday.—Wheat was unchanged, and there was practically no seed trade to be done owing to the severe weather.

Banbury, Thursday.—Wheat, red (new), 28s to 30s per qr. Trade firm at late rates.

Birmingham, Thursday.—Moderate attendance; improved trade for feeding stuffs, but demand for wheats unchanged rates, English realising 10s 9d to 11s 3d per bag. Grinding barley 3d cheaper, at 18s 3d to 18s 6d per quarter. Sharpness maize unaltered to 3d per quarter dearer; Plate commanding 23s to 23s 6d per quarter; Sharpness and round, 24s. Sharpness oats and beans unchanged.

Braintree, Wednesday.—Wheat in fuller supply, and trade was fair. Prices:—Reds, 27s 6d to 29s per qr; whites, 29s to 30s. Barley trade small.

Brighton, Thursday.—New white wheat, 29s to 30s; new red ditto, 28s to 29s; barley, 28s to 33s; grinding ditto, 21s to 22s; English oats, 21s to 23s. Quiet trade and small attendance. Black oats 6d dearer. Barley firm. Wheat 6d per qr dearer.

Bristol, Thursday.—Trade has been rather quiet during the week. At our market to-day English wheat was in fair supply, and both this and foreign made fully late rates. Barley unaltered; maize and oats quiet at about 3d lower. Flour unchanged.—GRACE BROTHERS.

Boston, Wednesday.—Wheat, 27s 6d; malting barley, 28s to 32s; oats, 21s; peas, 54s to 56s; beans, 54s; maize, 25s to 24s; grinding barley, 22s to 22s 6d per qr.

Cambridge, Saturday.—During the week trade has been very quiet. Wheat supplies are about on an average, and very little change has occurred in values. The barley supply is falling off, but the demand is very small. At this market to-day there was an average supply of wheat, but the attendance was small, and trade was very quiet, without any change in value. Spring corn is not much in demand, except for clean lots for seed. Prices:—Wheat, red, 27s to 28s, and white up to 28s per 504lb.

Canterbury, Saturday.—Wheat firm, with a slow trade; oats in fair inquiry. White wheat, 28s to 31s; red, 27s to 30s; malting barley, 28s to 35s; grinding, 23s to 25s; white oats, 20s to 24s; black, 20s to 23s; grey peas, 23s to 35s; tick beans, 36s to 38s; Mazagans, 33s to 34s; maize, 25s to 28s per quarter; tares, 8s to 9s per bushel.

Carlisle, Saturday.—Small supply of oats in our market to-day; strong demand at rather more money; 21s to 22s 6d per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—Wheat in small supply, and fully 1d per bushel dearer. Barley also advanced 1d per bushel. Quotations:—Wheat, white, 4s 5d to 4s 7d; red, 4s 4d to 4s 6d per 75lb; malting barley 4s to 4s 1d per 60lb; grinding barley, 3s 4d to 3s 6d per 64lb; beans, 5s 6d to 5s 8d per 80lb; oats, new, 2s 10d to 3s 1d; old, 3s 4d to 3s 6d per 46lb; Indian corn, 12s 9d to 13s 9d per 240lb.

Colchester, Saturday.—Moderate supply wheat here to-day, which sold readily at the full prices of last week. Beans, peas, and oats firm.—FRANCIS & Co.

Croydon, Thursday.—White wheat, 28s to 30s; red ditto, 27s to 29s; malting barley, 28s to 36s; grinding, 22s to 24s; oats, 18s to 21s; beans, 32s to 34s; peas, 29s to 31s. Trade for wheat quiet; prices firm. Oats dearer. Beans and peas no alteration.

Leeds, Tuesday.—America continues in her contradictory attitude, which prevents active buying on the part of millers. Prices of wheat, however, are about 3d dearer on the week for both English and foreign. Barley in small demand, at late rates. Maize, beans, and oats unchanged.—DUNNS AND Co.

Leeds, Friday.—Both English and foreign wheat in slow demand without any change from Tuesday's price, except that Americans slightly favour buyer. Barley firmly held. No alteration in beans, peas, oats, flour, or maize.

Leicester, Saturday.—Fair attendance, with moderate supplies of wheats, which met a steady sale at 28s to 31s per 36 stone. Barley in slow demand. Fine oats sold freely; prices firm.

Leith, Thursday.—Although there is little appreciable change in this market, there is every indication of a better demand taking place during the next few weeks. A very large business is being transacted in bran, grains, and other bye-products, country feeders now buying eagerly. Wheat, Scotch, slow sale favouring buyers. Oats, Scotch, quiet sale, from 19s 6d to 20s 6d; barley, Scotch, quiet sale; foreign feeding, 21s; hard white pease, 37s 6d; beans, all varieties, 33s 6d to 34s. Round maize, 23s to 24s; parcels, with very slight heat, 21s to 22s 6d; damaged, 19s to 20s; millet seed, 19s. Mill offals:—Bran is very scarce, millers only booking small quantities at top prices. Dried grains, 2s 6d per ton up, with more buyers than sellers. Cummings, numerous enquiries have been received for this article from the Continent, and several large lines have been booked during the last few days. Broad bran, 120s to 125s; medium bran, 100s to 102s 6d; sharps, 95s to 97s 6d; parings, 105s to 107s 6d; dried grains, brewers, 97s 6d; distilers, 102s 6d to 105s; cummings, 82s to 87s 6d; oat husks, 45s; meal seeds, 67s 6d, all sacks included.—WILLIAM MACLAY.

Lewes, Tuesday.—New white wheat, 28s to 30s; new brown ditto, 27s to 28s 6d; malting barley, 31s to 35s; grinding ditto, 20s to 24s; oats, 20s to 25s; beans, 34s to 38s; peas, 32s to 37s per qr.

Lincoln, Friday.—Not so large a supply of English wheats, which made about last week's rates. Reds, 28s 6d to 29s 6d; whites, 29s to 30s. Few barleys shown, prices 29s to 30s. Oats a dull sale at late rates. No change in other grain.

Liverpool, Friday.—The market has had a poor attendance of millers, and wheat has experienced a slow demand, only a small trade being put through at an occasional 1d per cental below last Tuesday for American sorts; the exception being Kurrachee wheat, which had a good sale. Flour.—The demand continues very small, but holders on the spot maintain firmer quotations, owing to the higher offers from America. The Liverpool Millers Association make no change in prices. Maize.—Mixed is in better demand, and a fair business doing at unchanged prices. European is also in fair request, but quotations are unaltered. Plate is very steady and experiences a good sale. Barley is idle for malting, but feeding is very steady, and meets some inquiry. Beans firm and 3d dearer, but quiet. Peas steady but quiet at late rates. Oats are firmly held, but only a quiet trade passing for English at late rates. Foreign sorts are firmer, but quiet. Oatmeal steady, but inactive at quotations. Oilcake.—American cakes are the turn easier with a small inquiry. English cakes are in fair request at last Tuesday's prices.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Business very dull at the market to-day. Wheat sold at about last week's price, but the demand only as millers need for present use In barley the operations were not extensive, and former cost with difficulty procured. Oats are a high figure compared with other grain, and the strong tone for them continues. The sales are to consumers, who are compelled to purchase, but dealers are reticent of increasing stock of the article. Maize is much the same as recently. Beans and peas firm, being scarce, especially old sorts, which are in request at full prices. We do not note any alteration in tares, rye, hemp, brank, sergum, or millet.

Manchester, Thursday.—A steady tone, with a hardening tendency is noted in our market. Wheat, both English and foreign, tends against the buyer compared with a week ago, and salesmen in several instances have obtained slight advances. Flour continues quiet, though perhaps on the whole a little more active at steady rates. Firmness is noted in oats, peas, beans and barley. Indian corn is firm, with a quiet trade.

Newcastle-on-Tyne, Saturday.—No change in the price of wheat at our to-day's market; maize of all descriptions in buyers' favour. Beans and peas steady at late rates. No change in barley. A slow demand for oats at last week's prices.—JOSEPH POLLARD AND Co.

Newport, Wednesday.—Wheat firm, and prices tended higher. Maize and other feeding stuffs firm, but prices unchanged. Offals scarce and dear. Flour, fines, 23s per sack.

Newport, Wednesday.—Wheat rather firmer and in favour of sellers. Maize and all other food stuffs firm, and no change; fines, 23s; offals scarce and dear.

Norwich, Saturady.—Wheat was still in fair supply at our market to-day, with quotations similar to last week. Since last week the winterly weather has ended in a rapid thaw with a higher temperature. Wheat, red, 28s to 28s 6d per qr, weight 63lb per imperial bushel. Corn inspector's return for the week ending 15th February, 1902: Wheat, 2,065.6, 26s 6d; barley, 4,340.6, 28s 7d.—J. ARTHUR MILLS.

Northampton, Saturday.—No apparent change from last market day. A slow demand, with a slight reduction in price. Feeding stuffs much wanted. White wheat, 29s to 30s; red, 27s to 29s; barley, 26s to 34s; grinding ditto, 22s to 25s; oats, 18s to 23s; old fine, 24s; beans, 32s to 40s; flour, 21s to 22s; fine, 24s.

Nottingham, Saturday.—Wheat in better supply, and sold freely at previous values. Hardly a sample of malting barley offering by growers; holders held for 1s advance. Oats and beans both scarce, and full rates maintained.—ROBERT HUBBLE.

Peterborough, Saturday.—Wheat to-day sold at last week's prices; rather less supply than last week, but demand was not active. The few samples of barley showing were held for full rates. Oats firm, but quiet.—THOMAS HILL & SON.

Plymouth, Thursday.—Good attendance at our market to-day. Maize, barley, oats, and wheat, all unaltered, last week's prices.—ORLANDO DAVIS AND Co.

Ripon, Thursday.—Samples are being eagerly sought for seed purposes. Best barley makes a trifle more money. Other sorts firm. Wheat, English (new), 28s 6d to 29s 6d; ditto foreign, 29s to 33s; barley, grinding, 22s 6d to 23s 6d; ditto malting, 26s to 31s; oats (new), 21s to 24s; round maize, 24s to 27s per qr; beans, 1s per stone.

Romford, Wednesday.—Small supply of wheat, and samples commanded 6d per qr. advance. Red wheats, 28s to 28s 6d; white wheat, 29s to 30s per qr.

Sheffield, Tuesday.—The attendance at market was better than for some weeks past. Last week's prices ruled in good demand that prevailed for both English and foreign wheat. Oats were quoted 6d per qr dearer on the week. Maize firm, and barley and peas without change. Prices:—Wheat, white, 30s to 31s; wheat, red, 30s 6d to 31s per 50lb; oats, new white, 21s 6d to 22s 6d; new black, 20s to 21s per 336lb; barley, grinding, 22s to 23s; barley, malting, 28s to 32s per 448lb; peas, grinding, 32s to 31s; peas, blue, 53s to 80s; beans, Egyptian, 36s to 36s 6d per 504lb; beans, English, new, 37s to 37s 6d per 532lb; Indian corn, small, 24s to 25s; American mixed, 27s 6d to 28s per 480lb.

Spalding, Tuesday.—Wheat was a firm trade at late prices. Best, 28s per qr. Oats were firm at 21s to 22s. Other artices firm and unchanged.

Stamford, Friday.—Fair attendance of buyers, and the show of wheat was larger. Prices ranged from 27s 6d to 28s 6d; barley, best, 26s to 30s; seed oats 22s to 27s; beans, 24s to 26s. Maize a trifle easier.

Stockton, Wednesday.—Small supply of English wheat, which was 6d to 1s dearer on the week. The foreign wheat trade keeps steady, with only a limited demand. White wheats unchanged. Strong red wheats 6d dearer. Oats and maize unaltered.

Sunderland, Saturday. — Grain in better supply. Wheat rather lower to sell. Barley quiet. Oats steady. Arrivals coastwise: Wheat, 1,009 qrs; barley, 518 qrs; foreign nil.—E. AND F. RICHARDSON.

Wakefield, Friday.—The wheat trade is slow, but exceedingly firm. Holders of foreign insist upon and obtain more money, and even then cannot replace for shipment, Russian limits especially proving out of reach. English being in smaller supply, favours sellers. Barley quiet. Maize 3d per qr lower; other feeding stuffs unaltered.—MICHAEL SANDERSON AND SON.

Winchester, Saturday.—English wheat small demand; prices unchanged; foreign fair inquiry, and 3d advance on all varieties: barley, oats, and maize quiet trade; prices unchanged.—FEAR, COLEBROOK, & Co.

Wisbech, Saturday.—A small supply of grain. Wheat steady at fully late rates, prices, 27s to 28s; oats, 21s to 24s; barley, 26s to 30s; beans, 34s to 38s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a moderate attendance of farmers and dealers. Quotations:—Wheat, new, 12s 6d to 13s per 216lb; oats, old, 15s 6d to 16s; new, 12s to 13s; beans, old, 15s 6d to 16s 6d; new, 14s to 14s 6d per 196lb; barley, 31s to 32s per 448lb; maize, 25s 6d to 26s per 480lb.

Worcester, Saturday.—English wheat offered moderately, and sold at last week's rates. Foreign neglected. Barley, maize, and oats quiet, and occasionally 3d easier.

York, Saturday.—Farmers offered a fair supply of wheat, which sold easily at just a shade over last week's prices. The small quantity of barley on offer fuly maintained late rates. Oats steady; rye, 8d per stone; beans, 11d ditto.

FOREIGN.

Hamburg, Saturday.—Weather milder; the ice in our rivers is gradually disappearing. Trade continues quiet, there being little demand from provincial markets. Prices, however, remain firm, with an upward tendency. The imports during the week amounted to —17,417 tons wheat, 617 tons rye, 3,339 tons barley, 6,811 tons maize. Fine Saale wheat to arrive per barge is offering at 32s 3d per 504lb. American hard winter No. 2 is held at 29s 3d: Northern spring No. 2 at 28s 9d per 480lb.; Walla Walla, April-May-June, at 29s 6d to 29s 9d per 500lb. Rye in better demand and dearer; offers from Russia are scarce; 9 15-20 March-April was sold at 23s 9d to 24s per 480lb. There is some demand for fine Saale barley, but offers of such are very scarce, and 34s to 36s is asked. Finest stout, 38s 6d f.o.b.; good middling quality is held at 31s 6d to 33s per 448lb. f.o.b.; Bohemian to arrive per barge is offering at 31s 6d to 33s; Silesian at 27s to 30s; fine Stovakian on the spot has been sold at 34s per 448lb. f.o.b. Feeding barley in better demand; Danubian and Russian is selling at 18s 3d per 400lb. Sound Odessa and Turkish maize on the spot meets a fair sale at 22s to 22s 6d. For mixed American there are buyers at 24s 9d, while 25s 6d is asked; River Plate April-May, 22s to 22s 6d.—JOHN TATLOCK.

Paris, Wednesday.—To-day's market was pretty well attended by the trade, but for all that business did not show any more animation. The situation of native wheat remains stationary, trade being still just as inactive owing to buyers' reserve. Millers are making no purchases, and this is evidently the principal cause of the dullness, while other reasons are aggravating this condition, viz., the weakness of the foreign centres, coupled with the good appearance of the crops, which the climatic conditions of the last few days have further improved. Millers consequently purchase only from day to day, and evince the same reserve as of late. Farmers on their part make offers at last week's prices, and manifest some resistance to lower their rates. They were, however, compelled in the face of the poor sale of flour to grant a concession of at least 6d. per qr., but the business effected was exceedingly reduced. Quotations are as follows:—Choice red, 36s 6d to 36s 11d; ordinary, 35s 8d to 36s 1d, and white, 36s 11d to 37s 5d per 480lb. Rye continues drooping in all directions, for distilers are no longer purchasers, while the special milling trade, failing an outlet for their flour, exhibits no inclination to make fresh purchases. Here prices were almost nominal, but occasionally with a reduction of 6d to 1s per qr.; buyers at 26s 1d and sellers at 26s 6d per 480lb. Oats continue quiet and offers rather restricted, and their persistent scarcity will undoubtedly have the speedy effect of supporting prices. Here the feeling was very quiet, with no appreciable change in values. Barley remains very quiet. Prices in Beauce vary from 22s 10d to 23s 11d, according to quality. The North is buying in the West at about 23s 3d. Champagne asks 23s 3d to 25s 4d. Here the tendency was supported for grinding and feeding corn, and unaltered for malting sorts, prices being quoted as follows: 17f.50 (25s 4d) for choice and 17f.25 (25s) for good malting; grinding 16f.25 to 16f.75 (23s 7d to 24s 3d), and feeding14f.75 to 15f.50 per 100 kilos (21s 5d to 22s 6d per 400lb.). Offers for buckwheat are becoming more and more scarce, and as the demand keeps generally good, a rather perceptible advance in prices has taken place, and quotations stand at 27s 5d per 480lb.

POULTRY AND PROVISIONS

Smithfield, Saturday.—Supples moderate, slow demand, and only limited sales were carried out. Quotations:—Fowls: Yorkshire, 2s 9d to 3s 6d; Essex, 2s 6d to 3s 3d; Boston, 2s 6d to 3s; Surrey, 4s to 4s 6d; Sussex, 3s 6d to 4s; Welsh, 2s 3d to 2s 9d; Irish, 2s to 2s 6d; turkeys (cocks), 6s 6d to 8s 6d; ditto (hens), 4s 6d to 6s; country ducks, 3s to 4s; goslings, 6s 6d to 7s 6d; pigeons, 7d to 1s; quail, 9d to 11d; tame rabbits, 1s to 1s 3d each; Australian, 8s 6d to 10s 6d per dozen; hares, 2s 9d to 3s; leverets, 2s 3d to 2s 6d; wild ducks, 1s 6d to 1s 9d; widgeon, 1s to 1s 3d; pintail, 1s to 1s 6d; teal, 1s 2d to 1s 4d; woodcock, 1s 6d to 1s 9d; snipe, 6d to 9d; golden plover, 7d to 10d; black ditto, 5d to 7d. Russian game: Capercailzie, cocks, 2s 6d to 3s; hens, 1s 9d to 2s; black game, 1s to 1s 2d; partridges, 1s to 1s 3d; ptarmigan, 11d to 1s; brown hares, 1s 9d to 2s; white, 1s 3d each.

THE BALTIC.

No. 1 Northern Spring wheat for August delivery came on sale on the 21st at 6s. 3d. per cental. We have now, therefore, speculative quotations for the entire remainder of the present cereal year. Wheat for prompt shipment is steady at 29s. 9d. for Californian, 29s. 6d. for Walla Walla, 30s. 3d. for Victorian, 30s. for South Australian, 29s. 9d. for Argentine, and 29s. for No. 2 Hard Winter. Arrived cargoes have made 30s. 6d. for Californian, 29s. 9d. for No. 1 Northern, and 31s. for Russian Winter wheat.

Maize is in fair request for cargoes. Sales have included Roumanian at 22s., Turkish at 23s., Galatz at 22s. 9d., Argentine at 22s., and Caucasian at 22s. 9d. per qr.

Barley is unchanged. A cargo of Californian sold on Friday for 24s. 6d., and two cargoes of Kustendge made 18s. 3d. per qr.

Oats went back on Friday, after a strong period from the Tuesday to the Thursday inclusive. A sale on Saturday occurred at 19s. 9d. for Gothenburg, March shipment.

Other cargo sales have included Egyptian beans at 29s. for May shipment, Canadian peas at 32s. 6d. for March shipment, and 29s. 6d. for Indian poppyseed, also for March shipment.

The arrivals of grain and seed laden vesse's at ports of call for the week were, wheat (1 Melbourne, 1 Portland (O), 1 Tacoma); 1 barley and wheat (San Francisco); total 4.

The sailings of grain and seed laden vessels from ports of call for the week were, 4 wheat (1 Antwerp, 2 Hamburg, 1 Swansea); total 4.

Since January 1st, 1902, the total arrivals have been 22 wheat, 1 flour, 3 barley and wheat, 3 maize, 2 barley, 1 beans, 1 canary-seed; total, 33.

Last year, during the same time, the arrivals were, 21 wheat, 1 flour, 4 barley and wheat, 6 barley, 2 beans, 4 pease, 2 locust beans, 2 canary-seed, 2 Valonea; total, 44.

POTATOES.

Borough, Saturday.—Arrivals heavy, and with no appreciable recovery in the demand, the market remained in a very dull state. Scottish maincrops (Dunbars) quoted 80s to 90s; Reading Giants Blacklands, 45s; Blackland Up-to-Dates, 45s to 50s; Lincoln Silts ditto, 55s to 60s; Garton Blacklands, 40s to 45s per ton.

Spitalfields, Saturday.—Market heavily supplied, and, with buyers reserved, trade assumed a dull and depressed character. Quotations:—Best Lincoln Up-to-Dates, 55s to 65s; Blackland ditto, 45s to 50s; Wisbech (grey soil), 70s; Lincoln maincrops, 80s to 85s; Reading Giants, 45s; and Blackland Gartons, 40s to 45s per ton.

Great Northern, Saturday.—Good supplies were available, and met a moderate demand. Scotch maincrops, 85s to 90s; Up-to-Dates, 70s to 80s; Reading Giants, 45s; Blackland Up-to-Dates, 45s to 50s; Lincoln maincrops, 80s to 90s; Lincoln Up-to-Dates, 55s to 65s per ton; Teneriffe, 14s per cwt; Algerian, 2½d per lb.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Supplies of fruit were on a fair scale, and experienced a moderate demand. Moderate supplies of vegetables met a steady sale. Cabbages, 4s to 6s; cauliflowers, 1s 6d to 2s 6d per dozen; beetroots, 2s per bushel; carrots, 2s 6d to 3s; turnips, 2s 6d; parsley, 4s; leeks, 6s per dozen bunches; horseradish, 1s 3d to 1s 6d per bundle; celery, 12s to 14s per dozen rolls; forced rhubarb, 1s 3d to 1s 6d per dozen bundles; English onions, 8s 6d per cwt; Valencia onions, 10s per case; potatoes, 35s to 80s per ton. Fruit: English grapes, 1s 6d to 2s 6d; Channel Islands, 1s to 1s 6d per lb; Almeria, 15s to 25s per barrel; Nova Scotian apples, 20s to 25s per barrel; Denia oranges, 10s to 24s per case; Jaffa, 10s to 15s; Valencia, 8s to 12s per case; bananas, 8s to 12s per bunch; Canary tomatoes, 4s to 5s 6d per case; pineapples, 2s to 6s each; lemons, 8s to 20s per case.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, London, S.E., report a quiet inquiry for field seeds. Home-grown red cloverseed now offers less freely, and holders, more especially of fine samples, resist any further concession in price. Alsyke and white command former terms, whilst trefoil keeps very steady. Ryegrasses, however, continue to favour buyers. The sale for spring tares has recently been on a small scale. Linseed is scarce, and exhibits a substantial advance. The mustard seed trade has throughout the season been very disappointing. Stocks of Canary seed, both in London and Liverpool, are now in remarkably small compass. The consumption of blue peas and haricot beans has been of late much increased.

WOOL

Canterbury, Saturday.—No improvement in prices, which practically remain at bottom. Kent fleeces 5½d per lb.; lamb wool, 4d; cross-breds, 6d; Southdowns, 7d to 8d per lb.

London, Friday.—English—per pk 240lb—Fleeces S. D hoggs, £7 to £8 10s; half-bred hoggs, £6 to £6 10s; do wethers, £5 to £6; Kent fleeces, £5 to £6; S. Down ewes and wethers, £7 to £8 10s; Leicester do, £5 to £5 10s. Colonial—per lb—Vic., fleece super, 1s 5d to 1s 7d; scoured good, 1s 7½d to 1s 8½d; scoured average, 1s 6d to 1s 7d; greasy average to fair, 10½d to 11½d; N. S. W. greasy average, 1s 3½d to 1s 4d; greasy average, 8d to 9d; S. Australian greasy average, 6½d to 7d; New Zealand scoured average, 1s 4d to 1s 5d; grease average, 8d to 9d. Cape scoured super, 1s 5d to 1s 6d; fleece average, 7d to 7½d; greasy average, 5½d to 6½d; Natal scoured, 1s to 1s 1d; greasy average, 6½d to 7d. Crossbreds—Grs.—Vic., good to super, 10½d to 11½d; New Zealand fine, 8d to 9d; do medium, 4½d to 5½d; do coarse, 4d to 4½d.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Severe weather prevailed from the 17th to 20th inst., but a thaw set in on the 21st, and the week ended with a "southerly wind and a cloudy sky." The markets followed the weather in an almost servile manner, being strong with the frost, but going away on the first breath of thaw. The want of a well sustained winter demand is the trouble of the corn trade at the present moment, as it has been in every February since 1896. Holders should not forget that March, and even April, have in some of thes recent years been as cold as January and February; in fact, we no longer have a medium or spring demand for bread stuffs and feeding stuffs, but experience "a mild winter demand" from the end of October to the middle of May, then passing into summer conditions of small wants from the middle of May to the end of August. September and October are the months when demand is most variable. Last year there were good sales induced by fine but quite chilly autumnal weather. But summer often lasts quite to the end of September nowadays, all the seasons having apparently got later than of yore.

Crop prospects are not so good as a week ago. If the best wheat counties in England are of fine promise, reports from the West and even Midland shires frequently show that the fine start made in December was not continued in January, and that the present outlook is none too healthy. In France the Government report of the 19th inst. is unexpectedly doubtful in its tone. The promise appearently is by no means so good as it was this time last year. Rain has fallen in Eastern Europe, where it is unwelcome at this time of year. In South-Eastern Europe, however, the rains are welcome; it is only rain on top of snow which is injurious, and not much snow is lying in California and Oregon, but the fall is still four inches below the average for the time elapsed since last harvest. In India the week has been rainless, and the prospects of the growing wheat are deteriorating. In Argentina threshings reveal a serious deficiency in the northern and western States, but the yield is excellent in the south.

Supplies of wheat on passage to the United Kingdom are as follow:—

	Qrs.
Californian	2,330,000
Russian	60,000
American	185,000
Indian	136,000
Argentine	140,000
Australasian	505,000
Other Countries	40,000
Total	3,396,000
A year ago	2,920,000

Of flour there are now on passage 384,000 sacks, against 390,000 sacks on 21st February, 1901. The present expectations include 252,000 sacks of American.

Of maize the quantity on pasage is 450,000 qrs., including 400,000 qrs. of round corn. A year ago 625,000 qrs. were afloat, and more than half of it was flat grain. Barley is in good prospective supply.

	Qrs.
Russian	50,000
Roumanian	65,000
Bulgarian	10,000
Californian	440,000
Asiatic	25,000
Total	630,000
A year ago	385,000

No wheat is on passage from Chilé, no barley from Atlantic ports, no maize from India or Australasia. It is rather surprising that neither of these British dependencies ship maize, the climate they enjoy being ideal for maize production.

The imports of the United Kingdom last week were as follow:—

Wheat—227,000 qrs.; a medium supply.
Flour—148,800 sks.; a moderate supply.
Barley—139,000 qrs.; a moderate supply.
Oats—67,000 qrs.; a very small supply
Maize—201,000 qrs.; a fair supply.

Sales of British wheat are about 169,000 qrs., and the equation of supply and demand (breadstuffs) may be thus given:—

	Qrs.
Estimated Requirements	567,000
Estimated Supplies	520,000
Withdrawn from Stocks	47,000

It is estimated that reserves of wheat are now as follows:—

	Qrs.
In Merchants' Hands	2,743,000
In Farmers' Hands	2,786,000
Total	5,529,000

Continental markets show the following changes:—Paris for wheat has declined 9d., Berlin has advanced 6d., Buda Pesth has declined 6d., and Antwerp has declined 6d. In the United States, New York has advanced 5d. on the week. These different voices contradict each other, and have neutralised each other's influence on British trade.

Linseed shipments since January 1st have been as follows:—

	Qrs.
From America	44,000
From India	102,000
From Argentina	699,000
From Russia	45,000
1 Jan.-21 Feb., 1902: Total	890,000
Same time last year	1,077,000

These figures strengthen holders of linseed in this country, where 51s. 9d. is about the lowest figure, the best qualities averaging 10s. above the lowest admitted by the Oilseed Association as fair quality linseed. Thus we may put the linseed average at 56s. 9d. per qr., a decidedly high price. There are 395,000 qrs. on passage, against 502,000 qrs. a year ago.

Rapeseed is in fair request, though there are 8,000 qrs. on passage, against 2,000 qrs. only a year ago. The price asked for fine Gujrat is 45s., while Jamba comes at 32s. per qr. Sunflowerseed gains in favour as an oilseed, and is almost 2s. per qr. of 448lb. up from earlier in the month; 46s. is averaged. The shipments of Sesame from India for January, as reported by letter just to hand, were 499,000 cwt. The price made at Bombay is about 12s. per cwt. Cottonseed is dearer for fixtures than on spot, so it should pay to hold. There is little to be had for spring delivery under 135s. per ton. The quantity on passage is 43,000 tons. Linseed oil is making £32 per ton in casks, rape oil £27 5s. per ton, and cottonseed oil £23 per ton

LONDON TERM MARKET.

This market is held twice a day, except on Saturday, when there is no afternoon call. The market is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals. The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

WHEAT.—Calls.	March.	June.	Aug't.
	s. d.	s. d.	s. d.
Feb. 17 11 a.m.	6 5	6 5	—
4 p.m.	6 5	6 5	—
Feb 18 11 a.m.	6 5	6 5	...
4 p.m.	6 5	6 5	...
Feb. 19 11 a.m.	6 3	6 4	—
4 p.m.	6 3	6 4	—
Feb. 20 11 a.m.	6 3	6 4	—
4 p.m.	6 3	6 4	—
Feb. 21 11 a.m.	6 3	6 3	6 3
4 p.m.	6 3	6 3	6 3
Feb. 22 11 a.m.	6 3	6 3	6 3
To-day noon	6 3	6 3	6 3

Unlike wheat, which, if dull, is remarkably steady, maize is very unsettled, 4s. 5d. being accepted for February and 4s. 6d. for March delivery, while 4s. 7d. is the lowest price accepted for more distant futures.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100 lb. We do not give fractions of a penny per cental. The maize quoted is fair average quality from the United States.

The deposit required from members of the Term Market has been fixed at £50 minimum and 1s. per quarter margin on any purchases above 1,000 quarters.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

SEEDS

London, Monday.—Our market to-day was fairly attended, and the weather being less wintry, more disposition was shown for business. English red clover, being less freely offered, was firmer. White clover steady. Alsike continues strong. Perennial and Italian grasses are quiet and unchanged. Spring tares in moderate request at late rates. Canary seed dull. Haricots and blue peas are rather more inquired for.—JOHN PICARD AND CO.

THIS DAY'S MARKETS

MARK LANE, MONDAY.

[FIRST REPORT.]

English wheat to-day maintained the prices of last week, but foreign sorts were the turn in buyers' favour. South Australian and fine Victorian commanded 30s. 9d., while New South Wales wheat was offered at 30s. 6d., with buyers at 30s. 3d. Some White Kurrachee made 29s. 6d. and red 29s. 3d. per qr. A few lots of finest red wheat from Stettin realised 32s. 9d. per qr. Most lots of round maize were quoted at about 23s. per qr. American made 26s. 6d. The damaged maize on offer at 19s. was a dubious bargain. Some splendid samples of 384lb. New Zealand oats fetched 31s., while a more ordinary type realised 26s. per qr. Turkish at 17s. 9d. were the cheapest oats in the market. English and Scotch were firm, but dull. Barley was quoted 24s. 6d. per standard Californian up to 32s. per Caledonian Chevalier. Barley meal sold fairly well at 19s. 6d. per 336lb. Locust beans, kibbled, made five guineas per ton, and Egyptian lentils, split, went into use at 14s. per cwt.

CLOSE OF THE MARKET.

MAIZE AT THE CLOSE OF THE MARKET WAS WEAKER THAN AT THE OPENING. OTHER ARTICLES WERE VERY SLOW OF SALE, BUT PRICES WERE NOT VARIED.

THE FLOUR TRADE.

MARK LANE Monday

The prices of the leading London makes were substantially unaltered from the 17th. Country whites, despite a liberal supply, were held for 25s., while 22s. commanded a good household type. Hungarian at 32s. was above buyers' ideas. American, with large imports just up the Thames, were 3d. lower from Friday, with 18s. accepted for "Iron Duke" and also for "Gilt Edge." The price of Morrison's bakers' flour fell to 17s. 3d. The only American sort favouring holders was Cascada. Milling offals were slightly lower on the week, and so was maize germ meal. The price of rye flour was 21s. 6d. per sack. Special oatmeal from Berwick realised £15 10s. per ton. Australian and French sorts of flour were neglected; former terms were nominally current.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Wheat cargoes near at hand come 3d. lower, but for futures from April to August are firm. Barley is steady both for malting and feeding, but both oats and maize are 3d. lower for cargoes on passage. Maize is lower, too, for future shipment.

BUSINESS DONE.

WHEAT.—No. 1 Northern Spring, 29s 9d, on passage; New South Wales, 29s 9d, on passage; Argentine, 29s 9d, on passage; White Kurrachee, 29s 3d, on passage; Russian Winter, 30s 6d, on passage; Soft Red Calcutta, 29s, April shipment.

BARLEY.—Novorossisk, 19s, on passage; Odessa, 18s 9d, arrived.

OATS.—White Lebau, 18s 3d, arrived; Odessa 17s 6d, on passage; Konigsburg, 19s 6d, prompt shipment; Turkish, 17s 6d, prompt shipment.

MAIZE.—Argentine, 21s 6d, May shipment; Odessa, 21s 6d, on passage; American, 26s, prompt shipment; Galatz, 22s 9d, prompt shipment.

BEANS.—Barbary, 31s 9d, March shipment.

RYE.—Roumanian, 22s, March shipment.

LINSEED.—Argentine, 51s 9d, March shipment.

PROVISIONS

London, Monday.—The arrivals from Ireland last week were 1,755 bales bacon, and from foreign ports 8,640 bales bacon. Owing to the continued shortness of supplies, there being some 900 bales of Danish less, and the non-arrival of Canadian bacon, due to the delay on the Canadian railways, the bacon market continues firm, and prices were unaltered. Trade, however, was not at all good, and late on Friday prices of Danish on the open market were some 2s easier, Irish ranging from 50s to 52s, up to 61s; Danish ranging from 50s to 56s, up to 58s; Canadian ranging from 46s to 52s, up to 56s. The butter market was practically unchanged, with only a fair demand for butter generally. Danish, 117s to 119s, up to 120s; Colonial, 104s to 108s, up to 112s. Lard market dull. Irish bladders from 50s to 60s. American—The market steady; pails and boxes, 49s to 50s.

GRAIN AND FLOUR FACTORS REPORTS.

Although milling offals are cheap, compared to other feeding stuffs, they move off very slowly, and last Monday's prices are hard to maintain.—JOHN BAWCOMB AND CO. (Mark Lane).

Flour.—A quiet trade, at last week's prices.—T. S. MEDILL AND SONS (Mark Lane).

Small arrivals of wheat; large of flour. A dull trade, with prices unchanged. Round maize, 6d. to 1s. per quarter cheaper. Barley unchanged. Oats 3d. per quarter lower.—COVENTRY (Mark Lane).

Offals.—Bran continues in moderate demand, and there is no change to report in prices.—GREENHILL BROTHERS (Belfast).

Flour.—In spite of small arrivals, flour continues quiet, without much change in value. Grain.—Flat and round corn 1½d. per boll easier. Oats, Barley and Beans unchanged. Peas, owing to fresh arrivals, are 3d. easier. Oatmeal dull. Oilcake steady. Mill Stuffs.—In rather better demand.—MCKINNON AND MCDONALD (Glasgow).

Flour.—There is no perceptible change in spot flour. There is a general expectation, however, as stocks are getting smaller, that prices must very soon advance and come more into line with American quotations. Values on spot are as follows:—1st Spring Patents, 24s. 9d. to 25s. 3d.; 2nd Spring Patents, 23s. 9d. to 24s. 3d.; American Winter Patents, 24s. 9d. to 25s. 3d.; Extra Fancies, 23s. to 23s. 6d.—GREENHILL BROTHERS (Belfast).

FEEDING STUFFS.

London, Monday.—Linseed Cake—Trade quiet, prices unchanged. Decorticated cotton cake and meal 2s 6d lower. Undecorticated continues in fair request at the low prices now ruling. Linseed is extremely scarce on spot, and buyers have to pay full prices for immediate delivery; it is reported no more Plate will be shipped this season.

ROBERT AND JOHN HEWETSON.

Mark Lane, Monday.—Linseed cakes:—Both supply and demand are only on a moderate scale, but with a firm attitude on the part of shippers, values are fully as dear, and in some instances even a slight advance is asked. Russians sell rather more freely at 1s 3d per ton advance in mats, and last Monday's prices in bags. Americans continue to be sparingly offered at unchanged prices. Calcutta-made in bags remain relatively good value, although quotations are also unchanged. London-made are less active, owing to the higher prices now asked by crushers. Cotton cakes:—Some further heavy arrivals of Egyptian have again depressed the market, and prices are with difficulty maintained, although not quotably lower, while English remain quiet but steady at slightly easier prices. Decorticated sell slowly at last week's quotations, and meal 2s 6d per ton less money. Rape cakes: Unchanged. Maze germ meal:—There are still sellers of American at £5 10s c.i.f. for February-March despatch, but there is not much response. English moves off quietly at unchanged quotations. Rice meal: There are sellers of near-at-hand Rangoon at £4 16s 3d to £4 17s 6d, while landed parcels are slightly easier.

HOPS.

Mark Lane, Monday.—W. H. and H. Le May report:—The demand is centred upon the English crop, the price of which is far below that of any other hops in the world, and many consumers are availing themselves of this favourable opportunity to lay in a stock against a possible shortage next crop.

CATTLE.

Metropolitan Market, Islington.

Monday, February 24th, 1902.

	British.	Total.	Feb. 25, 1901.
Beasts	930	930	1,190
Sheep and lambs	7,050	7,050	7,330
Calves	10	10	—
Pigs	—	—	80
Milch cows	80	80	70

Quotations per 8lb (sinking the offal).

ENGLISH.	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 6	3 10	4 8
Sheep	3 8	4 8	5 4
Lambs	5 4	6 0	6 4

Milch cows, per head, £16 to £23.

British arrivals include as follows:—Scotland, 29; Eastern Counties, 523; Midland, home, and Western Counties, 249 beasts; Ireland, 109.

In the beast market there was a shorter supply compared with Monday last, consignments from Norfolk being less, also from Scotland. Notwithstanding this, trade ruled extremely dull, with a decline in value, a clearance will not be effected. Fat butchering cows and bulls, though in light suply, met a slow trade, rates having to be lowered 2d per 8lb; these will be cleared.

The following are top quotations per 8lb (sinking the offal):—

	To-day.	Feb. 25, 1901.
Scotch	4s 7d to 4s 8d	4s 6d to 4s 7d
Devons	4s 6d to 4s 7d	4s 5d to 4s 6d
Norfolks	4s 6d to 4s 7d	4s 5d to 4s 6d
Lincolns	4s 4d to 4s 6d	4s 2d to 4s 4d
Irish	4s 4d to 4s 6d	4s 2d to 4s 3d
Fat cows	3s 8d to 3s 10d	3s 6d to 3s 8d

In the sheep market there was a decrease of 1,520 in the number penned, amongst which was a smaller proportion of lambs; these met with more inquiry, rates being firm, and a clearance expected; for wether sheep trade was steadier in regard to value. Ewes were short in number, and made 2d per 8lbs. more money, and cleared early. The supply included 240 Scotch and 3,870 from the Eastern counties. Undermentioned quotations are at per 8lbs (sinking offal), and are for the best of each class penned.

	To-day.	Feb. 25, 1901.
7½ to 8st Downs	5s 3d to 5s 4d	5s 10d to 6s 0d
9st Downs	5s 1d to 5s 2d	5s 8d to 5s 10d
10st Half-breds	4s 9d to 4s 10d	5s 6d to 5s 8d
12st Lincolns	4s 6d to 4s 8d	5s 2d to 5s 4d
10st Down Ewes	4s 4d to 4s 6d	4s 10d to 5s 0d
11st Half-bred do	4s 0d to 4s 2d	4s 6d to 4s 8d
5st Dorset Lambs	6s 2d to 6s 4d	6s 10d to 7s 0d
6st Half-bred do	5s 10d to 6s 0d	6s 4d to 6s 6d

London, Monday.—Good supplies; trade very slow. Beef carcasses 3s 11d to 4s; hind quarters, 4s 4d to 4s 6d; roastings, 5s 4d to 5s 8d. Sheep, ewe, 2s 8d to 3s; wether, 3s 8d to 4s 2d; hind quarters ewe, 3s 8d to 4s; wether, 5s to 5s 4d. Pigs, large, 3s 4d to 3s 8d; small, 4s to 4s 4d.

St. Ives, Monday.—Beasts 352, sheep 537, pigs 328, beef 7s 6d to 8s 3d, mutton 7s 7d to 9s 4d, pork 6s 9d to 7s 9d, sows 5s 9d to 6s 6d. Fat beast fair demand; stores rather slow; fat and store sheep fair; fat and store pigs good trade, dearer; milch cows short supply, good demand, £14 to £23.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 706. To-day's supply compared with Monday last showed an increase of 448, and consisted entirely of shipments from the United States, for which there was very dull and dragging trade, a clearance being doubtful; the best on offer were quoted at 4s 3d per 8lb; seconds, 4s per 8lb (offal given in). Sheep numbered 288 from the United States, and met with a slow trade at about 4s 3d per 8lb. On Saturday the supply consisted of 1,510, of which 1,214 were from the States and 296 from Canada; trade was fairly steady both in regard to tone and value; the former made 4s 4d per 8lb; seconds, 4s 2d; the latter were quoted at from 4s to 4s 2d. Sheep consisted of 626 from the States, and met a firm trade at 4s 3d per 8lb (offal given in). The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 1,188, 4s 2d to 4s 3d per 8lb, to dress about 720lb. No sheep on offer since February 16th.

Liverpool, Monday.—A smaller supply of cattle in market to-day. Demand slow and prices lower for all qualities, in sympathy with country markets. Sheep supply also smaller, and in consequence a better trade was experienced at full prices. Beef 6½d to 5d per lb.; mutton, 8½d to 5½d per lb. At market, 1,276 cattle and 3,288 sheep.

"The council are gratified to record that from every point of view steady progress and success attend our exhibitions, and that there are unmistakable proofs of their popularity amongst our supporters and friends, as well as amongst exhibitors and the general public." Such was the satisfactory statement of affairs presented by the council of the Derbyshire Agricultural Society at the annual meeting. The balance sheet showed that there was a net profit on the year's working of £27 11s. 6d. The total expenditure was £2,487 12s. 4d., the chief item being £1,286 0s. 6d. in prizes. The income amounted to £2,515 3s. 10d., which included £1,104 3s. 2d., the proceeds of the show, £487 12s. in subscriptions, £345 12s. 6d. in donations, and £542 16s. 2d. in fees; £980 6s. 11d. was brought forward from last year's account, and this sum has now been increased to £1,007 18s. 5d. by the balance profit mentioned above. The cash in hand at the end of the year was £306 15s. 5d., £700 was on deposit, and fees remaining to be collected totalled £5 11s. The total assets of the Society amounted to £1,147 17s. 5d. Ever since the formation of the Society in 1861 the president has been a Duke of Devonshire, the present duke succeeding his father in 1892. He has always taken the warmest interest in the welfare of the Society, so that, naturally enough, he was unanimously re-elected president for this year. September 10th and 11th were selected for the dates of the next show.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

Though the supply of fat beasts of both prime and second quality at Islington was much shorter, especially in consignments from Norfolk, trade was of a very dull nature, owing to a slacker demand, rates ruling from 1d. to 2d. per 8lb. in favour of the buyer, at which reduction a clearance could not be made. On Thursday a few fat Shorthorns were on sale, but failed to find buyers. For fat butchering cows there was less inquiry, sales being governed by last week's quotations, whilst bulls, though short in number, were bought on easier terms. Very few rough cattle on offer, and those that did reach the market were very unsaleable. At Deptford there was a rather larger supply, chiefly from the United States, the majority consisting of middling descriptions. Here trade was also dull, with a marked downward tendency in value, especially on Wednesday. The total number on offer at both markets was 4,589 (previous week, 4,345), consisting of 1,525 British (decrease, 235), and 3,064 foreign (increase, 479). These latter comprised 2,768 from the United States and 296 from Canada. The following were the top rates poid per 8lb. (sinking the offal):—80 to 90 stone Polled Aberdeens, 4s. 8d.; 80 stone Devons, 4s. 8d.; 90 stone Polled Norfolks, 4s. 7d.; 100 stone Shorthorn ditto, 4s. 6d.; 100 stone Lincolns, 4s. 5d.; 110 stone ditto, 4s. 3d.; 90 stone Irish, 4s. 4d.; 100 stone ditto, 4s. 3d.; 90 stone States, 4s. 6d. to 4s. 8d.; 90 stone Canadians, 100 stone fat cows, 4s.; 100 stone fat bulls, 3s. 6d. For wether sheep at Islington trade was dull and heavy, with a slight downward tendency in value, whilst ewes being short in number more than fully maintained last week's quotations. Of lambs there was a good proportion, but these were most difficult too cash. At the Foreign Cattle Market with a moderate supply at an advance of 2d. per 8lb. The total number penned at both markets was 11,351, as against 9,810 during the previous week, the supply consisting of 9,190 British, 1,535 from the United States, and 626 from Canada. Best pens made per 8lb. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 4d.; 8 stone Scotch, 5s. 2d.; 9 stone Downs 5s. 2d.; 10 stone ditto, 5s.; 10 stone halfbreds, 4s.; 12 stone Lincolns, 4s. 8d.; 8 stone States, 4s. 2d. to 4s. 4d.; 10 stone Down ewes, 4s. 4d.; 11 stone halfbreds, 4s.; 5 stone fat lambs, 6s. 4d.; 6 stone halfbred ditto, 5s. 10d. Only 25 calves on the market; trade only nominal. Pigs numbered 140, and met a steady trade, best making 4s. 6d. per 8lb. (sinking the offal).

Trade in the West.

The somewhat protracted spell of wintry weather we are having has so far had but little adverse effect on the store stock trade beyond the fact of compelling stock-owners to dip their hands a little more deeply into their pockets for extra feeding stuffs. With only moderately fair deliveries coming to hand, prices for store cattle have generally ruled a good deal firmer than might have been expected, this being due to the fact that just now there is insufficient stock on the market to meet the prevailing rather heavy demand, especially for dairy beasts, the best of which are selling from £17 to £22, and plainer descriptions from £12 to £16 5s.; in calvers meeting an equally brisk sale at from £9 to £14 10s. Barreners are likewise very saleable, especially the younger class of animals, which are making £22 to £32 per pair, and plainer kinds from £17 to £21; a few two-year-old steers that are offering at some of the markets selling from about £9 10s. to £10 10s. each; yearling steers, £7 to £9 each; yearling heifers, about £5 5s. each. The trade in stock bulls has been better than for some seasons past; taken as a whole, the class of animal finding the most favour with stock-owners being the medium-price bull coming of a good stock, which can be procured at from £10 or £11 up to £16 each; those more particular as to having a special strain giving £18 to £30, this, of course, being for animals very nearly approximating to pedigree strains or that possess special recommendations on the point of purity. And all the bulls on offer at most of the markets have found a quick sale. The hard weather has told more on the store sheep trade than almost anything else; but in spite of this most of the sheep now coming out find buyers, horn couples selling from 49s. 6d. to 56s. 6d.; Down ditto, 49s. 6d.; in lamb ewes, 42s. to 45s.; store Down wethers, 44s. to 47s.; Dorset horn ditto, 35s. to 37s. Fat bullocks continue to meet a brisk demand, the best grades commanding a ready sale at 62s. to 65s. per cwt., and seconds at 57s. to 59s. The calf trade is now in full swing, and the best command satisfactory rates, £4 to £6 10s. each (or 7½d. to 8d. per lb.); weanlings also sell freely, these making 25s. to 46s. each. Mutton is a slightly more saleable commodity than it was, though we can hardly quote ewes as making more than 6½d. to 7d., and best wethers about 7½d., or a trifle over for very choice weights, which occasionally bring 8d.—not more. Lambs are rather a sluggish trade; the best cross-breds make 36s. to 42s. (or about 9d.), and seconds 30s. to 35s. (or 8½d.). Bacon pigs meet a steady demand at 9s. per score, or a little over, but porkers are a much brisker sale at 10s. 6d. to 11s. per score; the demand for fat sows is quieter at 7s. to 8s. per score, according to size and quality. Considering the time of the year, business all round is quite up to sellers' anticipations; in fact, a few particular things realise more money more than they did a short time since.

Trade in Ireland.

In spite of a fairly large decrease of nearly 200 cattle and 600 sheep, business at last Thursday's Dublin market opened very weakly, cross-Channel buyers operating with great caution, consequent on the depressed state of the English markets. Shippers seem determined to hold out against paying the extreme rates of the previous Thursday, and the class of good cattle usually bought by them had to give way a little, and even for very choice beef for the home trade it was difficult to realise last week's price. Second class beef was hard to turn into cash, and it was impossible to effect a clearance, even at the regular prices which were going. Best heifer and ox beef made from 54s. 6d. to 57s. 9d.; and extra choice, 59s. to 62s. per cwt.; good second beef, 48s. to 52s.; and other classes, from 42s. to 46s. per cwt. Trade in the mutton department was equally disappointing. Business was confined almost solely to the local butchers, as the attendance of Belfast, Liverpool, and Manchester was almost nil, and the inquiry almost nominal. Prices all round were weaker than last day, and very up-and-down rates had to be accepted where owners were anxious to sell. Well-finished lightweight mountain wethers met with a fairly good sale, and were finally held for late rates, but second class and rough sheep moved off very slowly, the dullness being largely due to the arrival of big consignments of Scotch sheep, and a clearance could not be effected. There was only a limited inquiry for lambs, and prices were somewhat easier. Prime wether mutton made from 6½d. to 7d. per lb., choice Cheviots making ½d. per lb. more; ewe, 5½d. to 6½d., and rough sheep from 4½d. to 5d. per lb. Lambs sold at from 36s. to 40s. each. Prime veal is still scarce, and choice was worth from 7½d. to 8d. per lb., but rough sold at from 4½d. up. The number of cattle in market was 2,067, and of sheep 3,720. Choice springers and new milch cows were in demand at good figures; the former making at from £20 to £22 each, and the latter a couple of pounds less. Medium and inferior cows met with a sluggish sale. The store cattle trade was merely nominal; no one being anxious to buy. With hay and other feed scarce and dear. With a limited supply of pigs, and an unusually large attendance of buyers, trade in the hog market opened briskly, though at no advance of price. As the day wore on, however, the supply increased, and competition became sluggish, so that in the end it was with difficulty that a clearance was effected. Nice light weight pigs made from 48s. to 50s. per cwt.; heavy bacon pigs, 46s. to 48s.; and coarse, from 30s. to 40s. per cwt.

LONDON.

Islington, Thursday.—Only moderate supplies to hand, and met with fair request at steady prices. Fat bulls, 3s 4d to 3s 8d. Arrivals of sheep were on a very small scale, and experienced a fair demand, prices being firm to occasionally dearer. 7½ to 8-stone Down wethers, 5s 4d to 5s 6d; 9-stone ditto, 5s 2d to 5s 4d; 10-stone Down ewes, 4s 2d to 4s 4d; and 9-stone ditto, 4s to 4s 2d. Calves steady, the best on offer making 5s 4d. Pigs unaltered. Neat small porkers, 4s 4d to 4s 6d per 8lb to sink the offal, Total supplies:—65 beasts, 450 sheep, 20 calves, 10 cows, and 20 pigs.

COUNTRY.

Ashford, Tuesday.—Best beef made well up to 12s a score without any difficulty. Small Downs and half-breds 5s to 5s 4d a stone. Veal still very dear. Average supply of pork.

Basingstoke, Wednesday.—At Raynbord and Sons' Sale Yard there was a good attendance of buyers to meet a supply consisting of 41 fat beasts, 69 calves, 532 fat sheep, and 68 head of dairy and store cattle, for which the following prices were realised:—Good young fat beasts made up to £25; a very good Angus bull made £22; shorthorn bulls, £18; fat calves, 70s to £5; small, 15s to 50s; prime quality fat sheep realised from 38s to 50s 6d; 12 months old ditto from 35s to 47s; fat ewes from 34s 6d to 48s; fat sucking lambs, 37s; store tegs, 34s 6d; dairy cows from £10 to £22 15s. The show of fat beasts included some well-grazed local shorthorns and other breeds, which were readily cleared, the best making an advance on last week's figures. A fuller supply of fat sheep and lambs, and a good demand for the best quality tegs and for fat ewes. Many of the half-fat sheep met a poor trade, and were difficult to dispose of, except at store prices, and a clearance was not effected. With a full supply of dairy cows on offer, a ready clearance was made, with a firm trade for all best descriptions. Store cattle are still a very slow business. Fat calves are scarce and dear. Ruling values:—Best quality fat beasts, 6¾d to 7¼d; second ditto, 6d to 6¼d; bulls, cows, and inferior beasts, 5d to 6d per lb; best quality sheep, 7d to 8d; second ditto, 6d to 7d; fat sucking lambs up to 10s; old ewes, rams, and inferior sheep, 5d to 6d per lb; fat calves, 6d to 8d per lb.

Braintree, Wednesday.—At Messrs. Balls's auction mart the trade in bullocks was good and the supply plentiful. Sheep sold at advanced prices, and hogs showed an upward tendency. The pens were full.

Bridgewater, Wednesday.—There was a full supply of mutton, which met a very backward sale. The supply of beef on offer was moderate, but best qualities still maintained a good price. There were very few store cattle on offer.

Bristol, Thursday.—Very large supply of beef to-day, chiefly of secondary quality; trade slow, best animals making 60s per cwt; secondary qualities, 54s to 56s. Mutton plentiful; business dull, light wethers fetching 7¼d per lb.; heavy wethers, 7d; ewes, 6½d. Large number of pigs on offer, baconers realising 9s 6d per score; porkers, 10s 9d. Little inquiry for a few store cattle in market.

Boston, Wednesday.—Good show of store cattle; fair trade. A good show of sheep. Strong stores, £14 to £16; in-calvers, £18 to £20; heifers, £16 to £18; calves, 55s to 60s each; best beef, 8s to 8s 3d; cows, best, 7s to 7s 6d per stone; best wethers, 8d to 8½d; ewes, 7d to 7½d per lb; hogs, 36s to 40s each.

Calne. Friday.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of the Back.	Price per Sc. s.	d.
6 sc. 10 lbs. to 9 sc. 10 lbs.	2½ in. and under ...	9	6
Under 10 sc.	Not exceeding 2¾ in....	9	0
Under 11 sc. 10 lb.	... Not exceeding 2¾ in....	8	6
Under 12 sc.	Not exceeding 3 in. ...		

—C. & T. Harris & Co., Ld.

Cambridge, Monday.—Beasts, 229. Beef, 7s to 8s 6d; sheep, 519; mutton, 4s 4d to 5s 4d. Horses, 3. Small show; store beasts nearly all sold; fat beasts a fair show and good trade; fat hogs a better trade all round. Stores, only a few lots shown, and trade slow. Market closed for pigs. Hay, straw and roots a good show, but trade not very brisk.

Canterbury, Saturday. — Rather more cattle on offer, but trade slow. Tegs from 27s 6d to 33s 6d, and two-year-olds from 38s 6d to 44s; old ewes about 28s; in-lamb ewes, 33s to 43s per head.

Carlisle, Saturday.—Fair supply of cattle on the sands, chiefly of the better class of heifers. The attendance of buyers was not large, and trade moved slowly. Small heifers, £8 to £10; better sorts, to £14 10s.

Dorchester, Wednesday.—The fat bullock trade has lost none of its features of buoyancy, the best qualities of beef readily making 11s per score, and secondary grades 10s to 10s 6d. Calves met a very small sale at prices, as a rule, ranging from £4 10s to £6 15s for best, or quite 8d per lb., those not quite so ripe or well finished selling at 6½d to 7d. Mutton is still meeting a very subdued sale, and we must quote wethers as making 7d to (in a few cases) 7½d, but ewes only make 6d to 6½d. Cross-bred lambs sell comparatively better than sheep, the general range now being from 34s to 40s each (or 8¾d to 9d per lb). Pigs continue to meet a brisk sale, porkers being in active request at 46s to 68s each (or 10s 6d to 11s per score), and baconers, 70s to 88s (or 9s 6d to 10s).

Dublin, Thursday.—Numbers in market:—Beasts, 2,067, decrease, 195; sheep, 3,720, decrease, 565; calves, 44, increase 8. Consequent on bad trade across Channel the market opened very dull, and demand continued slow all day. Last week's prices were not maintained, even for the best qualities, and the rougher descriptions were difficult to move at proportionably lower rates. The very best and most suitable sheep barely maintained late rates; other sorts lower and a bad finish. Export trade almost nil. Cattle, live weight (best), 31s to 34s per cwt.; rough and inferior sorts, 27s to 31s per cwt. Mutton, dead weight, 6d to 7¼d per lb.

Dumfries, Wednesday.—Large supplies, which met a good demand at fully late rates. Horned bullocks made up to £19, polled bullocks to £20, polled heifers to £13, Ayrshire cows to £14, Galloway bulls to £18, and cross cows to £16.

Hereford, Wednesday.—Bullocks and cows, 557; calves, 61; sheep and lambs, 796; pigs (fat and sows), 36; pigs (stores, not more than ten), 204; pigs (stores, more than ten), 113. Prices of Stock.—Best beef, 6d to 7d per lb; wether sheep, 6¼d to 8d per lb.; ewes, 5¾d to 6d per lb; veal, 7¼d per lb; lamb, 9d per lb; pork, 5¾d to 6d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report larger supplies of fat cattle, the majority of which came to hand in excellent condition. Distant and local buyers were in strong force, and a sharp trade resulted at from 8s 3d to 9s per stone. Fat cows sold well up to £21, and were mostly purchased for the Midlands. Fat sheep were well represented, but trade was slow, and prices ruled in favour of buyers. Choice Suffolk hoggets to 57s 6d; do shearlings to 55s; Suffolk ewes to 51s; grazing hoggets sold without alteration. Several calves were offered; the demand was not strong; the best for weaning, 55s to 38s; fat calves, 75s to 57s. An average number of fat swine on offer. Competition was very brisk, and the recent high rates fully maintained, ranging from 7s to 8s per stone. Sows in request up to £10. Stores short and dear, from 31s to 15s 3d. About 30 cows and heifers were penned, and a large attendance of buyers, those fresh calved or near making excellent prices. Prices ranged from £16 15s to £12 10s. Some useful lots of grazing cattle were forwarded. There was rather more enquiry, and all were disposed of. Numbers at sales and market:—Beasts, 648; calves, 49; sheep, 1,419; swine, 1,086; horses, 13.

Leicester, Wednesday.—Large consignments of home-fed bullocks came to hand, but they were rather out of condition. Choice lots had an active sale, but secondary met with little attention. Choice bullocks made 6¾d per lb, secondary 6¼d to 6½d, cows 5d to 6d, and heifers 6¼d to 6¾d per lb. Sheep were a large supply, and sold readily at 7¼d to 7¾d per lb for choice qualities; large sheep 6½d to 7d per lb, and ewes 5¼d to 6d per lb. Calves were in active demand at 8½d to 8¾d per lb.

Newport, Wednesday.—Good supply met with a brisk trade, and a clearance was effected. Best beef 6½d to 6¾d, seconds 6d to 6¼d, cows 5d to 6d; mutton, wether 7¾d to 8d, ewes 6d to 6¼d; veal, 8d to 8½d; pigs, porkers 10s 6d to 10s 9d, bacons 9s to 9s 6d.

Newport, Wednesday.—A very good supply all round, a large number of buyers, and brisk, keen trade in best quality cattle and sheep. Best beef, 6½d to 6¾d; seconds, 6d to 6¼d; cows, 5d to 6d; sheep (wethers), 7¾d to 8d; ewes, 6d to 6¼d; calves, 8d to 8¾d; porker pigs, 10s 6d to 10s 9d; baconers, 9s to 9s 6d per score.

Norwich, Saturday.—Supply of store beasts pretty good, and best lots in good demand. In store beasts a pretty good trade was passing at 7s 6d to 8s per 14lb. Store sheep in rather small supply; late rates were gene-

rally maintained. Fat sheep made 7s 9d to 8s 6d per 14lb.

Romford, Wednesday.—With a large supply of fat beasts, trade was very slow. Best animals, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in very short supply; trade dear, at 5s 4d to 5s 8d per stone. Sheep in about average supply; trade about the same. Best sheep, 5s 4d to 6s 6d; middlings, 5s to 5s 2d per stone. Few store beasts on offer; slow demand. Pig market still closed.

Salford, Tuesday.—There was a larger supply of cattle and sheep. Trade ruled slow, and prices were in favour of the buyer. There was a large show of calves and a dull trade, with the tendency of prices against the seller. Quotations: Cattle, 4½d to 6½d; sheep, 6d to 8½d; calves, 5d to 8d per lb: At market: Cattle, 2,234; sheep, 8,374; calves, 166.

Sheffield, Tuesday.—Small show of milch beasts. Best lots were in brisk demand, making up to £22: secondary lots moved slowly at £16 to £18 10s.

Shrewsbury, Tuesday.—Numbers offered:—340 cattle; 83 cows with calves; 571 sheep; 128 calves; 53 fat; 174 porket, and 505 store pigs. Larger supply of store cattle with a fair trade generally. Fat calves made high prices. Quotations:—Beef, 6d to 6½d; mutton, 6½d to 8d, and veal, 8d to 9d per lb.; porket pigs, 9s 6d to 10s 9d, and bacons, 9s to 10s per score; cows with calves up to £23 10s; hay up to £5, and straw up to £5 5s per ton; clover, £4 17s 6d.—B. R. CROXTON.

Spalding, Tuesday.—A better supply of beef, and a decided improvement in the trade. Best ox beef, 8s to 8s 6d per stone; cow beef, 7s 6d to 7s 9d. A larger supply of stores, but trade rather slow. Cows in demand. In the sheep market a small show. Wethers, to 7d; ewes, 5d to 5½d per lb.

Stockton, Wednesday.—There were on offer 133 cattle, 3 calves, 295 sheep, and 215 pigs. A small supply of best cattle, and trade slow but firm at 7s 9d to 8s per stone; rougher kinds, 6s 6d to 7s; sheep, 7½d; ewes, 5d to 6d; tups, about 4d per lb.

Thame, Tuesday.—The good prices realised for stock during the past few weeks had the effect of bringing out a large supply of fat beef from a considerable distance around. The beef was of excellent quality, but trade was a little easier, especially for mutton. Veal and fat hogs being scarce and very dear. There was again a large attendance of buyers, and a clearance effected. Mr. Bond's sale comprised 84 fat beasts, 151 fat sheep, 60 fat and weaning calves, and 108 pigs. Fat bullocks made £16 to £22 10s; fat heifers, £14 to £22 17s 6d; fat ewes, 38s to 53s 6d; fat tegs, 35s to 46s 6d; fat calves, £3 to £4; cow calves, 21s to 45s; bull calves, 14s to 51s; fat pigs, 11s per score. Fat sows to £9 3s. Stores dear.

Wakefield, Wednesday.—About an average supply of beasts, but a smaller show of sheep, and trade somewhat slow. Best beef 6¾d, other sorts 5d to 6½d; young sheep 7½d, heavy animals 6d to 7½d; ewes and tups, 5d to 6d. Number of beasts 1,241, sheep 3,637.

Wolverhampton, Wednesday.—Beasts: A fair supply; moderate trade. A good supply of sheep; slow trade. Calves in small supply; good demand. Beef, 5½d to 6¾d per lb, a few 7d per lb; mutton, 6d to 8d per lb; veal, 7½d to 9d per lb; pigs, bacon 10s 6 dto 11s per score, porkets 10s 6d to 11s per score, sows 8s to 8s 6d per score.

Worcester. Saturday.—Moderate supplies of cattle and sheep, but pigs continue in good supply. Beef slightly firmer, and fat calves in demand. Beef, 6d to 7d; mutton, 6d to 8d; and veal, 7d to 8d per lb; pigs, 9s to 10s per score.

Worksop, Wednesday.—Very good show and trade, especially for sheep, which made a trifle more money, beef being slightly easier. Best beef, 7s to 7s 6d; secondary, 6s to 7s per stone; best wethers, 7d to 7½d; ewes, 5d to 6d per lb.

FOREIGN.

Deptford, Wednesday.—Beast supplies amounted to 400 head, being 420 less than available on Wednesday last, and consisted of shipments from United States. Despite the light supply, trade ruled very slow, owing to quality being very poor. Prices realised varied between 4s 2d and 4s 5d. 505 United States sheep went at 4s 4d per 8lb to sink the offal. 250 beasts were not shown.

Yorkhill, Monday.—The usual weekly sale of United States and Canadian cattle was held to-day, when there were on offer just over 200 animals, principally bullocks. Only a small proportion of them were up to the usual standard of quality, the remainder being rough in finish. There was the usual attendance of customers, both wholesale and retail. Small, neat, well-fed bullocks secured the best demand, and realised 10s more a-head on that ruling last week. Secondary and heavier were slower to cash, and experienced a drop of 2s a-head on the values ruling at the previous sale. Bulls were in better demand than a week ago, and realised high prices. The deadweight quotations may be given as follow:—States bullocks, best quality, medium weight, 58s to 60s per cwt: heavy prime, 56s; secondary and heavier, 54s; bulls, best class, to 50s; and secondary and heavier, 46s to 48s. Canadian bullocks, best class, medium weight, realised 56s per cwt, and for really choice up to 58s; heavy prime, 54s; secondary and heavier, down to 52s; and bulls made similar prices to those ruling above.

EGGS.

Wednesday.—Barnsley: 8 for 1s. Boston: 12 for 1s. Colne: 2s 6d per score. Goole: 11 for 1s. Keighley: 9 for 1s. Kirbymoorside: 11 to 12 for 1s. Knaresborough: 9 or 10 for 1s. Louth: 16 for 1s. Market Weighton: 12 for 1s. Stockton: 8 for 1s. Worksop: 1s 8d to 1s 10d per score.

Tuesday.—Bedale: 10 for 1s. Gainsborough: 10 for 1s. Settle: 10 to 11 for 1s. Spalding: 13 for 1s.

Thursday.—Brigg: 10 to 12 for 1s. Driffield: 12 or 13 for 1s. Penistone: 10 for 1s. Ripon: 10 or 11 for 1s. Scarborough: 9 for 1s. Wetherby: 9 or 10 for 1s.

Friday.—Derby: 8 or 9 for 1s. Easingwold: 11 or 12 for 1s. Grimsby: Austrian, 5s 10d to 7s 6d; Styrian, 6s 1d to 8s 11d; Egyptian, 4s 10d to 5s 2d; preserved, 6s 1d to 7s 6d per 120. Helmsley: 10 or 11 for 1s. Leeds: Yorkshire, 14 6d to 15s 6d per 120; Irish, 10s 6d to 13s; Danish, 8s 3d to 9s 6d; ditto reds, 5s 2d to 5s 8d. Leyburn: 11 for 1s. Lincoln: 10 or 11 for 1s. Whitchurch: 10 or 11 for 1s.

Saturday.—Appleby: 10 or 11 for 1s. Berwick: 11d to 1s per dozen. Carlisle: 8 or 9 for 1s. Doncaster: 9 or 10 for 1s. Grantham: 10 to 12 for 1s. Howden: 10 for 1s. Lancaster: 8 to 9 for 1s. Malton: 12 or 13 for 1s. Retford: 1s 10d to 2s per score. Richmond: 10 or 11 for 1s. Skipton: 9 o 10 for 1s. Stokesley: 9 or 10 for 1s. Pontefract: 9 for 1s. Whitby: 10 or 11 for 1s. York: 9 for 1s.

OATMEAL.

Mark Lane, Feb. 24.—Midlothian dull at £14 15s; Aberdeen at £12 15s; rolled oats, £14 10s; Aberdeen oat flour, £13; Deeside Canadian oatmeal, £12 10s, coarse; all per ton.

FEEDING STUFFS.

London, Thursday.—Linseed: Resellers, becoming nervous at the market pausing, pressed forward seed on the market, which caused prices for these positions to decline. Spot and near Calcutta to London are scarce, the nominal quotation for the former is 59s 6d, passage 55s to 54s 6d, February 54s 6d, March 54s, April 52s 6d, April-June 52s. La Plata Feb.-March 52s 3d. Hull quieter. Calcutta April-June 53s 3d. La Plata, passage 54s to 52s, Feb.-March 52s. To the Continent, Bombay Feb.-March 55s 9d, April-May 55s 3d. Calcutta, April-June 53s. La Plata Feb.-March 52s. Linseed oil, after a further advance, has experienced a slight reaction, but closes firm at the decline. We quote spot in pipes £32, barrels £32, May-August £31 10s, Sept.-Dec. £29 15s. Hull spot naked, £30 15s, March-April £30 10s, May-Aug. £30 7s 6d, Sept.-Dec. £29. Linseed cakes are firm. We to-day quote London-made £8 5s to £8 10s ex mill, American Western £7 7s 6d to £7 12s 6d, Russian £7 12s 6d to £8 2s 6d. Cotton cakes quiet, London-made £4 7s 6d to £4 10s. Rapeseed quiet. Brown Cawnpore, Feb.-March 40s 9d, March-May 40s 6d. To the Continent we quote Yellow Guzerat March-May 46s 3d. Brown Cawnpore Feb.-March 40s 6d, March-May 40s 9d. Brows Calcutta Feb.-March 38s 6d, April-June 40s 3d. Ferozepore Feb.-March 40s 9d. Jamba March-May to Hull 32s 3d. Cottonseed: The market has been quiet. Spot London £6 10s, February £6 11s 3d, March £6 11s 3d, April-May £6 12s 6d. Hull spot £6 7s 6d, Feb.-March £6 8s 9d to £6 10s, April-May £6 12s 6d. Bombay to Hull, importers ask £4 17s 6d for Feb.-March but the value is about £4 10s. Cargoes, Feb.-March £6 13s 9d, April £6 15s.—THE PRODUCE BROKERS' COMPANY, LIMITED.

Hull, Tuesday.—Linseed: The arrivals are 1,392 qrs from Hamburg, 120 qrs Harlingen, 750 qrs Libau, 80 qrs Rotterdam; total, 2,342 qrs. Linseed during the week has ruled strong and advancing, but closes a shade weaker. Calcutta, shippers ask 53s 9d for April-June to Hull, but there are re-sellers at 53s 3d, and buyers at 53s. River Plate, 54s has been paid for seed arrived; afloat boats are worth from 53s to 52s, according to position, and business has been done in both Jan.-Feb. and Feb.-March at 52s. Cottonseed: The market has been without activity, but values show about 2s 6d per ton advance all round owing to paucity of offers. Spot, passage, and February sold at £6 6s 3d to £6 7s 6d, and March advanced to £6 8s 9d. A little April-June done at £6 10s, and the tone to-day is quiet in all positions. Oils: Exports for the week ending 11th February, 1902—Linseed oil: 1 Germany, 6 Norway, 5 Turkey; total, 12 tons. Cotton oil: 171 Austria, 75 Belgium, 28 France, 179 Germany, 164 Holland, 5 Sweden; total, 622 tons. The market is quiet. Linseed oil: 30s 9d spot, 30s 6d Feb.-April, 30s 6d May-Aug. Cotton oil: 23s spot, 23s 6d May-Aug. Crude: 21s 9d spot, 22s 1½d May-Aug. Rape oil: Jamba naked, 24s 9d spot; 1st quality naked, 25s 6d spot. Oil seed cakes: Linseed cakes steady, and not plentiful; cotton cakes rather firmer, with a somewhat better demand.—KEIGHLEY, MAXSTED, AND CO.

WATERLOO ROUND FEEDING CAKES, £6 12s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 12s 6d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 10s PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 15s 0d PER TON. ALL F.O.R. HULL.

MOLASSINE FEEDING MEAL, packed in bags, of 1 cwt. each. Price per cwt., 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex, and F.O.R. Liverpool. A sample lot of 6cwt., in 4 bags of 1½cwt. each, delivered free to any station in England on receipt of remittance for £2 11s 0d

BUTTER.

Tuesday.—Bedale: 1s 9d to 1s 11d per roll of 24oz. Gainsborough: 1s 3d per lb. Settle: 1s 2d to 1s 3d per lb. Spalding: 1s 1d per lb.

Wednesday.—Barnsley: 1s 2d to 1s 3d per lb. Boston: 1s 2d to 1s 6d per lb. Colne: 1s 2½d per lb. Goole: 1s 2d per lb. Keighley: 1s 2d per lb. Kirbymoorside: 1s 2d to 1s 3d per lb. Knaresborough: (wholesale) 1s 9d per roll of 24oz., (retail) 1 s10d to 1s 11d. Louth: 1s per lb. Market Weighton: 1s per lb. Stockton: 1s 3d to 1s 4d per lb. Worksop: 1s 3d to 1s 4d per lb.

Thursday.—Brigg: 1s 1d to 1s 3d per lb. Driffield: 1s per lb. Penistone: 1s 2d per lb. Ripon: 1s 10d to 2s per single roll of 24oz. Scarborough: 1s 4d per lb. Wetherby: 1s 4d to 1s 5d per lb.

Friday.—Derby: 1s 3d to 1s 4d per lb. Easingwold: 1s 2d to 1s 3d per lb. Grimsby: Danish, 120s to 122s per 112lb.; Dutch, 114s to 116s. Helmsley: 1s 3d per lb. Leeds: Danish, 118s to 122s per 112lb.; Irish creameries, 106s to 114s; Colonial, 104s to 112s; York lump, 15s to 15s 6d per stone; ditto long rolls, 1½lb., 1s 10d to 2s; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb.; Leyburn: 1s 8d to 1s 10d per roll of 26oz. Lincoln: 1s 2d to 1s 3d per lb.

Saturday.—Appleby: 1s 1½d to 1s 3d per lb. Berwick: 9d to 10d per lb. Carlisle: 1s 3d to 1s 4d per lb. Doncaster: 1s 1d to 1s 4d per lb. Grantham: 1s 2d to 1s 3d per lb. Howden: 1s 2d to 1s 3d per lb. Lancaster: 1s 3d to 1s 4d per lb. Malton: 1s 2d to 1s 3d per lb. Retford: 1s 3d to 1s 4d per lb. Richmond: 1s 5d to 1s 6d per lb. Skipton: 1s 1d to 1s 2d per lb. Stokesley: 1s 2d to 1s 3d per lb. Pontefract: 1s 4d per lb. Whitby: 1s 2d to 1s 3d per lb. York: 1s 2d to 1s 4d per lb.

COLONIAL DAIRY PRODUCE.

London, Friday.—The demand for Australian and New Zealand butters of the "Choicest" quality continues unchanged, and is likely to do so for some time owing to small supplies. Although the "Rimutaka," from New Zealand, docked yesterday, and the "Maori" only three days before, thus bringing a double supply on to-day's market, yet, as the next vessel, the "Tokomaru," is not due for nearly a month, this extra amount will be easily absorbed, and will not depreciate values. Prices for ordinary "Choicest" brands remain at 110s to 112s but "Fancy" qualities of New Zealand make 114s. "Finest" grade is also firm at last week's figures. There is more difficulty than ever in obtaining a really sweet butter to retail at a shilling, and consequently New Zealand "milled" butter is in demand at 94s to 100s. Cheese.—There is little change to report in the cheese market, but certain indications point to an advance shortly. Stocks are much lower than last year, and arrivals are also deficient.—W. WEDDEL AND CO.

CHEESE.

Newport, Wednesday.—A good demand existed for best qualities, which were all cleared. Quotations:—Caerphillies, 66s to 70s; fancy dairies, 72s to 74s; Cheddars, 60s to 65s; Derbies, 66s to 68s; truckles, 60s to 66s.

Glasgow, Wednesday.—There were scarcely any arrivals of cheese this week. The inquiry was moderate for all classes, and as stocks are now getting into small compass prices were in sellers' favour. Cheddars and Dunlops were quoted from 54s to 60s per cwt. Canadian and New Zealand parcels were in moderate demand at previous prices.

MANURES.

Liverpool, Friday.—Reports from many parts of the provinces show that a thaw has set in, and there is now a decidedly increased inquiry for fertilisers which had hitherto been retarded by the land being unworkable owing to the severe frosts. Nitrate of soda is still quoted at £10 5s to £10 10s per ton, according to quality; demand fair. Basic slag continues in request, but many producing depots are so full of orders that deliveries are taking three or four weeks. There is a seasonable demand for superphosphate of lime, kainit, and bone meal at unchanged values. A rather better inquiry is experienced for feeding stuffs, and the market is firm, excepting for rice meal, which can be bought, spot or forward, at easier rates. The following are to-day's values:—Nitrate of Soda, best quality, *i.e.*, guaranteed 95 per cent. pure, in bags, £10 10s per ton; East India Bone Meal, fair to prime, in bags, £4 1s 3d to £4 6s 3d per ton; Kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; Palm Nut Cake, prime, in bags, £5 15s per ton; Linseed Cake, American thin oblong, prime, in bags, £7 10s to £7 12s 6d per ton; Linseed Cake, English, in bulk, £8 15s to £9 per ton; Cottonseed Cake, N.A. decorticated, in bags, £7 2s 6d to £7 6s 3d per ton; Cottonseed Cake, English, decorticated, in bags, £7 7s 6d to £7 12s 6d per ton; Cottonseed Cake, English, undecorticated, in bulk, £4 12s 6d to £4 17s 6d per ton; Cottonseed Cake (crushed), 20/25 per cent. oil, in bags, £7 5s per ton; Maize Germ Meal, in bags, £6 2s 6d to £6 5s per ton; Rice Meal, Rangoon, as imported, in bags, £5 7s 6d per ton; Indian Meal, coarse to fine grinding, prime, in bulk, 13s to 13s 6d per 240lb; Linseed, fine bold feeding, in bags, £3 2s 6d to £3 5s per qr, 416lb; D.N.S. Brand Superphosphate of Lime, guaranteed, 25 to 27 sol., in bags, £2 5s to £2 7s per ton; D.N.S. Superphosphate of Lime, guaranteed, 30 to 31 sol., in bags, £2 10s to £2 12s per ton; Superphosphate of Lime, guaranteed, 35 to 36 sol., in bags, £3 to £3 2s per ton at the producing depots; Basic Slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, nominal; Basic Slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, nominal; Basic Slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, nominal.

HAY AND STRAW.

Leeds, Tuesday.—A quiet trade is reported in the warehouses for hay and straw, at firm prices. Meadow hay, 8d to 8½d; clover hay, 8d to 8½d; wheat straw, 6d to 6½d; oat straw, 6d to 6½d; rye straw (retail), 8d to 8½d per stone.

Manchester, Wednesday.—Hay, 6½d to 7½d; clover, 6½d to 7½d; straw (wheat), 6½d; straw (oat), 5½d to 6d per stone.

Lincoln, Friday.—Hay, 70s to 85s; clover, 70s to 80s per ton at the stack; straw, 40s to 45s at the stacks, and 50s to 52s 6d per ton, baled and on rail.

Whitechapel, Saturday.—Heavy supplies, slow demand, and only a limited business resulted. Prices, however, were unchanged. Best clover, 95s to 110s; inferior ditto, 80s to 90s; specially picked hay, 115s; good ditto, 108s; inferior ditto, 80s to 90s; mixture and sainfoin, 90s to 100s; and straw, 28s to 40s per load.

HOPS.

Canterbury, Saturday.—Fair amount of trade in progress, and the market is getting very bare of better-class hops. Values remain unsatisfactory. Healthy brown hops are selling fairly evenly at from 25s to 30s per cwt.

Worcester, Saturday.—There has been more trade doing on our market this week, and a fair quantity of hops has been weighed over the public scales, but only the better qualities command attention, and the prices for these remain very firm.—PIERCY AND CO.

Live Weight Quotations.

A profit of £148 was the result of the year's working of the Herefordshire and Worcestershire Agricultural Society, according to the report presented at the annual meeting on Wednesday. The balance in the bank was stated to be £347 5s. 4d., and the finance stewards had therefore placed an additional £200 to the deposit account, bringing that up to £971. Sir John Geers Cotterell, The Garnous, near Hereford, has accepted the presidency, and Mr. W. M. Haywood (Hereford) and Mr. A. Dudley Clarke (Stourport) have been made vice-presidents. The show this year will be held at Hereford about the middle of June, the site being, it is understood, the racecourse.

STOCK AND SHOW NOTES.

By Herdsman.

The Committee appointed by the Devon Cattle Breeders' Society to consider the best means of furthering the interests of the breed of Devon cattle at home and abroad recently reported that they were of opinion that a corresponding secretary should be appointed by the society to write articles on the breed in home and foreign papers, and recommended that the society make a grant for doing the work. At the last meeting of the council of the society this report was considered, and it was decided to empower the committee to spend £50 in the manner in which they thought would best further the interests of the breed.

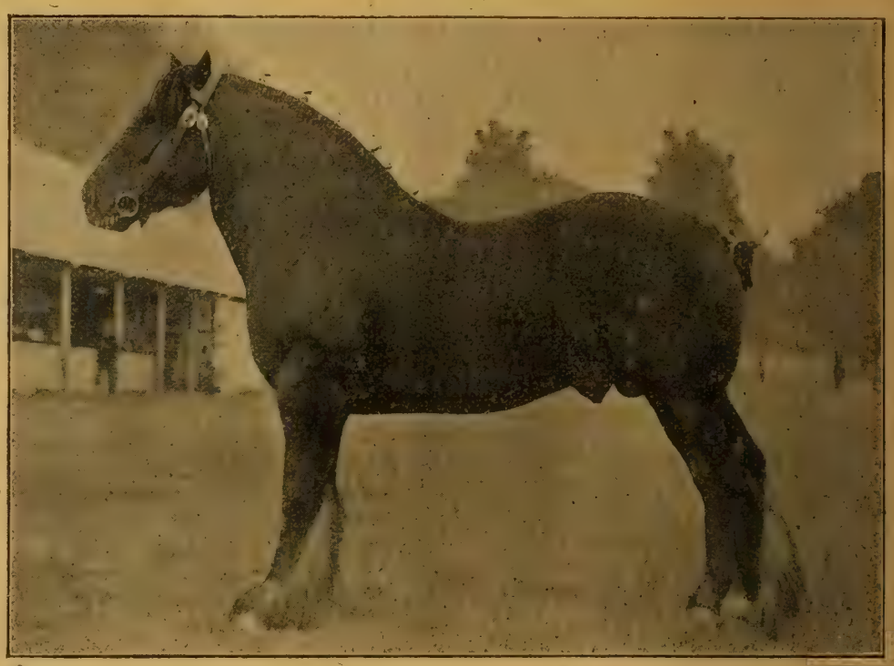
The well-known herd of Mr. G. F. King, Chewton Keynsham, Bristol, will be well represented at the Birmingham Shorthorn Bull Sale and Show on March 5th, 6th, and 7th. The ten bulls that are to be sent include several prize-winners, among them being the champion Chewton Victor 76343, a splendid stock-getter and winner of many prizes, while a young calf deserving attention is Chewton Favourite, which comes of a renowned milking and prize-winning strain. The three heifers to be forwarded are all fine animals, two being from the renowned Countess milking tribe, and the other of the Favourite strain. All are by a bull often seen in the prize ring, Chewton Oxford Cornelius 74223, a winner of five firsts in 1900, and a get of Cornelius 8405, a bull that fetched 200 guineas for exportation to the Argentine.

Mr. King is also sending five grand young bulls to the Bristol Bull Sale and Show tomorrow (Tuesday), including Lord Bruce 79236, a rich roan, calved April 17th, 1900, which won the following prizes last year:—Second and reserve for Shorthorn Society's prize, Somerset County, v.h.c. Bath and West of England Show, third Wiltshire County, first in sweepstake, and second Gloucester County, first North-East Somerset, second Evercreech, first Frome, second Tredegar Show, Newport, beating ten of the best bulls shown in 1901, including the Royal and Bath and West winners. He is very active and a sure getter, and in good hands will bid well for the winner at the next Royal Show. Altogether the Chewton herd has won a thousand prizes. It is interesting to observe that Mr. King received from his Majesty a fine hamper of game recently. It will be recollected that his Majesty the King purchased the fine white bull Crystal Prince at Mr. King's sale in 1896.

The third annual show of the Mid-Sussex Horse Show Society will be held at Oathall Park, Hayward's Heath, on Wednesday, August 6th, the last day for entries being Thursday, July 24th. Prize schedules and entry forms may be had on application to the secretary, Mr. James Wood, Broad Street, Cuckfield.

Mr. N. F. Davin, assistant secretary of the Mallow (County Cork) Agricultural and Show Society, informs me that the society has arranged to hold a horse, cattle, and dog show on Wednesday and Thursday, July 9th and 10th next.

The German official "Law Journal" recently published a decree by which paragraph 21 of the law relating to slaughtered cattle and meat inspection will come into force on the 1st of October, 1902. The paragraph says: "In the dressing of meat for the market, no material or method of procedure which may impart to it qualities prejudicial to health shall be applied. It is forbidden to import meat prepared in such a manner from abroad or in any way to bring it on the market." The penalties for infringing this provision will come into force at the same time as the regulation itself. The same journal also published a notification that the provisions of paragraph 21 of the Meat Inspection Law apply to the following materials as well as to preparations containing such materials. Boric acid and its salts, formaldehyde, the hydroxides, and carbonates of alkali and alkaline earths, sulphurous acid and its salts, as well as hypo-sulphurous acid and its salts, hydro-fluoric acid and its salts, salicylic acid and its combinations, and chloric acid and its salts. The same applies to colouring matter of all kinds, except as regards the giving of a yellow tint to margarine and the colouring of sausage skins, in so far as this application does not run counter to other provisions of the law.



Wednesday, July 23rd, has been chosen by the Wadebridge District Agricultural Association as the date of their show this year, which will be held at Wadebridge.

Some remarkable sales were effected at the Kansas City sale of Herefords held on January 28th to 30th. As usual, the consignments to the sale came from well-known breeders in many States, while the attendance of buyers was extremely large, and drawn from all over the country. If the result of this sale is any criterion of the season, breeders of white-faces have a happy outlook before them. The feature of the event, from a price standpoint, was the sale of the thirteen-months'-old Good Cross, son of imp. Improver and The Grove Maid XXII., bred by Mr. Sotham, Chillicothe, Montana, which was bought, after spirited competition, by the Wabash Stock Farm Company, of Indiana, for £799.

The top of the female section was Happiness, bred by Mr. C. Graves, of Bunker's Hill, Indiana, which sold for £460 to Carruthers Bros. The total made by 184 head was £12,575, an average of £68. The best all-round prices were secured by the contingent from Weavergrace, bred by Mr. T. F. B. Southam; of these animals the twenty-four bulls averaged £97 10s., and the twenty-seven females £58 10s.

The herd of pure bred Jersey cattle belonging to Mr. J. Carson, of Crystalbrook Farm, Theydon Bois, Essex, has outgrown the accommodation of the farm, and it has therefore been decided to sell unreservedly the three and two-year-old and yearling heifers bred on the farm, the sale to take place on Friday, March 14th, at Crystalbrook Farm. The herd was started in 1895, purchases being made from Lord Rothschild and Mrs. McIntosh's celebrated herds, and with a view of laying the foundation of a good, sound herd, some of the highest bred, healthiest and richest milking cows were selected from the best breeders on the island. Among these was the famous cow Gamboge's Pride, winner for five years in succession of butter test prizes and medals in Jersey. Her daughter, Gamboge's Pride II., won the silver medal in the March test and the E.J.C.S. bronze medal in the May test of the R.J.A.S. Show, Jersey, 1901.

On March 20th the same auctioneers will dispose of a large number of Lady de Rothschild's Jerseys, at The Rookery, Aston Clinton, near Tring. Notwithstanding the private sales of some of the animals to home breeders, as well as to Australia and South Africa, the herd has outgrown the accommodation, so it has been resolved to sell all the prize-winners, a number of cows, and the whole of the three, two, one-year-old heifers, and young bulls; in fact, virtually the entire herd, excepting the older cows, retained as a dairy for the establishment, and the small calves born since the first of September last. As is well known, Lady de Rothschild's herd has been established from the best herds in this country, and an excellent testimony to the good judgment displayed in selecting the animals is shown by the prize-winning record of the herd. First prizes have been won four years in succession, since 1898, at the London Dairy Show, as well as one second, one third, and a Blythwood bowl, while other prizes have been won at the Tring, Northampton, Sussex, and Royal Bucks Shows. Last year the herd took quite an exceptional position, winning 30 prizes (16 of which were firsts), one champion, two Blythwood bowls, and five reserves for championships and bowls. The sale includes the whole of these beautiful prize-winners, among which may be mentioned Lady Rowena and Mystery, first and second at the London Dairy Show, Jolly Brown, Longueville Brownie IV., Carol, Suspense, Mistletoe, Peace, Virtue, and Wild Rose; also the bull Regulator, highly commended at the Royal Counties Show, Weymouth, who has been in service.

THE SHIRE STALLION illustrated above is Desford Combination, 17,934, sire Stonewall, 15,375, dam Hindlip Bonny Girl, 18,331, by Hitchin Conqueror, 4,458, bred by and the property of Messrs. W. and J. Thompson, Barron's Park Stud, Desford, Leicester. At the Royal Show at Cardiff, Desford Combination won first prize in the class for shire stallions foaled in 1898, and the Champion Gold Medal of the Shire Horse Society, for the best shire stallion in the show. This stallion was also exhibited at the last show of the Shire Horse Society, and here, too, won first prize in his class, and was reserve for the £20 cup for the best young stallion. We see that Desford Combination is entered for the show which opens to-morrow, and it will be interesting to see how he fares on this occasion when he will have to compete with 49 others.

The Shire Horse Show.

Record Entries.

The first of the spring Horse Shows at the Royal Agricultural Hall, Islington, opens to-morrow (Tuesday), when the Shire Horse Society will be in possession, the show, as usual, closing on Friday. This is the 23rd Annual Show of the Society, and it promises to eclipse all its predecessors, for the entries received this year reach the record total of 860, the previous largest number being 667 last year, so that the increase is truly a remarkable one, and is a striking testimony to the popularity of the shire horse and its society. The increase occurs principally in stallions, which number 476, as compared with 335 in 1901, an increase of 141; the geldings show an increase of 10, and the mares and fillies an increase of 42. The totals for the three sections are:—Stallions, 476; mares and fillies, 343; geldings. 41; the entry of mares and fillies constituting another record. Below we give a table showing the entries in the various classes for this and the preceding three years:—

	1902.	1901.	1900.	1899.
Stallions, 1 year old	74	46	54	53
,, 2 years old	127	86	65	63
,, 3 ,,	120	88	73	76
,, 4 ,,	50	35	42	37
,, over 4 and under 10 years, under 16.2	28	24	29	20
,, over 4 and under 10 years, 16.2 and over	65	35	45	39
,, 10 years old and over	12	20	20	17
Fillies, 1 year old	61	53	47	58
Mares, 2 years old	89	73	52	69

Exhibitors.

Amongst the exhibitors this year are Lord Barnard, Earl Bathurst, Earl Beauchamp, K.C.M.G., Duke of Buccleuch and Queensberry, K.G., Sir T. Fowell Buxton, Bart., Lord Calthorpe, Earl of Camperdown, Mr. Victor Cavendish, M.P., Congested Districts Board for Ireland, Mr. F. S. W. Cornwallis, Earl of Coventry, Mr. Fred Crisp, J.P., Mr. J. P. Cross, Earl of Derby, K.G., Capt. W. H. O. Duncombe, Earl Egerton of Tatton, Sir Henry Ewart, K.C.B., Sir Walter Gilbey, Bart., Mr. A. Grandage, Hon. Robert Hardinge, Mr. Alexander Henderson, M.P., Capt. Heywood-Lonsdale, Lord Hindlip, Mr. A. J. Hollington, Lord Hothfield, Mr. R. W. Hudson, Lord Iveagh, K.P., Mr. J. W. Kenworthy, Lord Llangattock, Sir J. Blundell Maple, Bart., M.P., Lord Middleton, Mr. Philo L. Mills, Sir Oswald Mosley, Bart., Mr. P. Albert Muntz, M.P., Hon. R. P. Nevill, the Duchess of Newcastle, Mr. John Parnell, Mr. Charles T. Part, Earl of Powis, Hon. N. Charles Rothschild, Lord Rothschild, Mr. Leopold Salomons, Earl Spencer, K.G., Lady Wantage, the Duke of Westminster, Sir W. H. Wills, Bart., and Mr. R. A. Yerburgh, M.P.

Class Prizes.

The total value of the prizes offered for competition amounts to £2,007, all of which is given by the Society, and is an increase of £460 as compared with last year. The classes have been arranged on precisely the same lines as in 1901, viz., seven for stallions, seven for mares and fillies, and three for geldings, but additional prizes have been given in all classes which obtained more entries in 1901 than in 1900, whilst it has been decided to award to the exhibitor of every reserve animal the sum of £3, of every highly commended animal the sum of £2, and of every commended animal the sum of £1 (gelding classes excepted). It is anticipated that these bonuses will absorb a sum of from £200 to £250, and we feel sure exhibitors will welcome the idea as a pleasurable innovation, providing as it does for the first time in the history of shows, some monetary recognition for the owners of all horses outside the prize-winners, which may be considered by the judges to be worthy of notice. In no class are less than four money prizes given, whilst as many as eight, nine, ten, and eleven money prizes are given in certain classes.

Champion and Special Awards.

The Society offers a challenge cup, value one hundred guineas, for the best stallion in the show, and a challenge cup, value fifty guineas, for the best mare or filly, either cup to be won twice by the same exhibitor before it becomes his absolute property. Three other cups are offered by the Society for stallions, and three for mares, viz.:—£25 cup, for the best stallion in the show; £20 cup, for the best stallion in classes 1, 2, and 3; £20 cup, for the best stallion in classes 4, 5, 6, and 7; £25 cup, for the best mare or filly in the show; £10 cup, for the best filly in classes 8, 9, and 10; £10 cup, for the best mare in classes 11, 12, 13, and 14. A £10 cup is also given for the best gelding exhibited. Gold medals, each of the value of fifteen guineas, will be presented to the owners of the champion stallion and of the champion mare, and gold medals, each of the value of ten guineas, to the owners of the stallion and mare placed reserve for their respective championships.

Breeders' Prizes.

The prize-money set aside for breeders has also been largely augmented, the same number of prizes being given in each class (geldings excepted) to breeders as to exhibitors. Thus in each of the fourteen classes for stallions and mares the breeder of the first prize animal will receive £10, and the breeders of all the other prize-winners will receive £5. In the three classes for geldings the breeders of the first prize animal and of the second prize animal will receive £5. The total sum set apart for prizes to breeders is £595, as compared with £360 at the previous show.

Judging.

In judging the horses the order of the catalogue (which is shown in the table given above) will be duly followed. The judges will commence their duties at 8.30 a.m. each day, and will select not more than 25 horses in any one class for examination by the veterinary inspectors. The preliminary examination will be made throughout all the classes for stallions before the judging for prizes commences, and similarly with the classes for mares and geldings.

At the commencement of the judging of the stallions, and again at the commencement of the judging of the mares, the stewards will decide by ballot which two judges shall take the first class in each section. The second class will be taken by one of these two, and by the third judge, and so on in rotation. This system provides an automatic change of judging, and ensures that no judge shall act in more than two successive classes. In the event of any difference of opinion between the two judges acting, the third judge will be the referee.

The Sale.

Owing to the large number of entries received, the sale will this year extend over two days—Thursday and Friday. On the first the mares and fillies will be sold from 9 a.m. to 1.30 p.m., commencing with the yearling fillies; whilst on Friday the stallions and geldings will be disposed of, the sale commencing at 9 a.m. with the yearling stallions. The entries comprise 308 stallions, 181 mares and fillies, and 19 geldings, the ages being as follows:—Stallions: 60, five years old and upwards; 26, four years old and upwards; 88, three years old and upwards; 93, two years old and upwards; 41, one year old. Mares: 53, five years old and upwards; 19, four years old and upwards; 36, three years old and upwards; 53, two years old and upwards; and 20 fillies, one year old. As usual, Messrs. Sexton, Grimwade, and Beck will be the auctioneers.

The show will open on Tuesday and Wednesday at 8.30 a.m., and on Thursday and Friday at 9 a.m., and will close each day at 6 p.m. The price of admission on Tuesday will be 2s. 6d.; on the remaining days of the show 1s. The whole of Tuesday will be occupied with the judging, and on Wednesday the judging of any classes left over from the previous day will be proceeded with, at the conclusion of which the champion prizes will be awarded. A parade of horses will be held if found practicable.

On Thursday the sales of mares and fillies will commence at 9 a.m., and a parade of the prize-winning and commended animals at 2.30 p.m., whilst the annual general meeting of members will be held in the Council Chamber at the hall, under the presidency of Mr. V. C. W. Cavendish, M.P., at 12.30 p.m. Friday, as mentioned above, is reserved for the sale by auction of stallions and geldings.

A farm seed catalogue for the spring of this year has come to hand from Mr. W. Wyatt, of Cupar and Perth. It is mainly taken up with descriptions of clover and grass seeds, to which Mr. Wyatt has given considerable attention, and the results of the many experiments he has made with them are given in the prescriptions of seeds for the various purposes that have proved so singularly successful.

Devon Cattle Breeders' Show and Sale.

On Wednesday last there was the usual annual assembly of Devon Cattle Breeders in the Cattle Market at Exeter for the eleventh show and sale of pure-bred Devon cattle. There was a capital entry of 76 bulls, of which it might be said none were exceedingly good or any very weedy; they were of very fair average quality and suitable for service with any farmer's herd. The morning was given up to judging, which was entrusted to Mr. C. N. Skinner, of Hawkhurst, Bridgwater, who evoked most favourable comment as to the manner in which he performed his duties. Class was for the best bull calved in the year 1900; sixteen entered the ring. From the first it was seen that Mr. William Lutley's Sir Alexander by Mr. Alfred Bowerman's well-known bull Sir Walter, must take first place; he had an excellent back and loin, well-sprung ribs, and excellent shoulders, and was heavily fleshed; its only weak point being its head. Second to him was placed the Honourable Claud B. Portman's Minor, a well-put-together one, showing much quality. The third prize went to that well-known prize winner, Mr. Alfred Skinner, with Fancy's Pride of Pound, a very useful type of bull that some thought worthy of being a step higher, but the judge favoured youth. Mr. W. H. Gibbing's bull, sired by Chestnut, was placed reserve; he was a trifle uneven, but otherwise very growing. Highly commended was given to Mr. E. C. Norrish's Sandford Good Luck, and commended cards to Mr. William Lethbridge's Wood Gentleman and Mr. T. Trickey's Masterpiece.

The next class for the best bull calved in the year 1901, though larger in point of entry, was a rather tricky one for the judge, who had some varying types to select from the small models and others of a more weighty type. He selected for first place a smart youngster inclined to be a trifle goosey at the end, but otherwise, if small, was very full of quality; this was Mr. Alfred C. Skinner's Pound Mormon. Second prize was given to a different type, more weighty; this was Mr. William Kidner's Flower Boy II., a very level, sizeable, well-brought-on bull. Third prize was given to Mr. Charles L. Hancock's Commissioner, which possessed a good sirloin well covered, but a trifle light behind. Fourth prize was awarded to Mr. Samuel Kidner's Bickley Opal, a long bull a little inclined to be leggy, but one with size about it. Mr. Robert Cook was reserved with a very useful bull by Beauty's Duke. Highly commended was given to Mr. Alfred C. Skinner's Pound Gentleman, and a commendation to Mr. W. Trick's Duke of Raddons.

As usual, the sale was conducted by the Messrs. Risdons, the official auctioneers to the Devon Cattle Breeders' Society, the sale being opened by the veteran Jan Risdon, who has held the sand-glass over so many of the Red Rubies o' the West. Mr. E. C. Norrish's, Sandford, Good Luck, went to Mr. Pearse, at 22 gns.; Mr. A. C. Skinner's Fancy's Pride of Pound was selected by Messrs. Witheycombe and Watts at 25 gns.; Mr. W. Lethbridge's Wood Gentleman found a new owner in Mr. Henry North at 25 gns.; Mr. T. W. Smith's Ford Detective was bought by Mr. Franks at 17 gns.; the Hon. Claud B. Portman's Minor was secured by Mr. Westcott at 31 gns.; whilst Mr. John Tapp's bull went to Mr. C. Norman at 17 gns.; Mr. T. Trickey's Masterpiece fell to the bid of Mr. Stanbury, at 19 gns.; Mrs. Harriet Davis's bull found a buyer in Mr. Page at 18½ gns.; Mr. William Edbrooke's Ashbrittle's Lord went to Mr. Somers at 20 gns.; Mr. Robert Cock's bull by Beauty Duke was secured by Mr. Baker at 25 gns.; Mr. William Lutley's bull, Sir Alexander, which took the first prize, became the property of Mr. J. Rawle at 33 gns.

In the young bull class Mr. William Kidner's Flower Boy was bought by Mr. W. Lanyon at 42 gns.; Mr. William Brent's Groomsman passed to Mr. Webber at 20 gns.; the Hon. E. W. B. Portman's Hestercombe Joe found a new owner in Mr. Harris at 20 gns.; Mr. A. C. Skinner's Pound Gentleman; Mr. Charles L. Hancock's Commissioner went to Mr. Hebditch's bid of 35 gns.; Mr. William Kidner's Dumpty's Darling found a buyer in Mr. John Tapp at 30 gns.; whilst the Hon. E. W. B. Portman's Hestercombe Woodman went to Mr. Greenham at 19½ gns.; the Hon. Claud B. Portman's Middling Looks was transferred to Mr. Harris for 21 gns.; Mr. A. C.

Skinner's Pound Norman went to Mr. Morgan's bid of 27 gns.; whilst Mr. W. Trick's Duke of Raddons ebcame the property of Mr. Walter at 21 gns.

In the class for bulls sent for sale only the following exceeded 25 gns.:—Mr. William Copp's Royal Mint; Mr. T. W. Smith, at 26 gns.; Mr. John Rawle's General, to Mrs. Davis, at 28 gns.; Mr. J. L. Cornish's Lawyer, purchaser Mr. Rawle, at 35 gns.; Mr. Samuel Kidner's Bickley Naturalist, buyer Mr. J. H. Grose, at 27 gns.; Mr. A. C. Skinner's Chancellor of Pound, 32 gns., Mr. Dingle; Mr. Robert Cock's bull, by Lord Stanley, 32 gns.; Mr. A. C. Skinner's Pound Dragoman, Mr. Gooding, 27 gns.; and his other bull, sired by Lord Chevethorne, 33 gns., Mr. Madever; Mr. Charles L. Hancock's 39 gns., Mr. Merson; and Mr. Edward Badcock's bull, sired by Chestnut, went to Mr. Pearse, at 31 gns. This year there were more bulls sold over 20 gns. than under, a most satisfactory feature, and nearly every bull offered was sold.

Aberdeen Angus Show and Sale at Perth.

The first, and perhaps the most important of the spring sales of pedigree stock cattle in Scotland took place last week at Perth, the occasion being the thirty-eighth annual show and sale of Aberdeen Angus cattle by Messrs. Macdonald Fraser and Co. These annual sales of Aberdeen Angus and shorthorn cattle have become of great importance to breeders and dealers of cattle in Scotland, for they are generally recognised as the most convenient method of bringing breeders and dealers together with the most advantageous results to both. As in the past few years, separate weeks were arranged for the two breeds, the Aberdeen Angus being disposed of on Tuesday and Wednesday last—the cows and heifers were sold on the first day and the bulls on the second—whilst the shorthorns will be similarly dealt with this week. The sales are this year held under more fortunate conditions than those of the two previous years. It will be remembered that in 1900 the Irish authorities prohibited the importation of all British stock, in consequence of the existence of foot-and-mouth disease in the south-east of England, and for the same reason the English consignments were excluded from the sales at Perth, whilst last year another outbreak of disease in East Anglia led to the exclusion of stock from this side of the Border, and with that guarantee the Irish Privy Council allowed Scottish animals to be admitted, but the foreign ports remain closed. On this occasion the country has happily a clean bill of health, and there will be perfect freedom in the movement of animals purchased at the sales, for on Tuesday it was officially announced that the Government of Argentina, being satisfied by the British Government that there was no disease in the United Kingdom, had agreed to again open the Argentine ports, which have been so long closed, to cattle from Great Britain. For the two weeks' sales nearly 1,000 head of stock were entered.

The entries of Aberdeen Angus were not so numerous as last year, but the disparity between the numbers of animals actually on the ground was comparatively small. The total number of animals catalogued stood at 528, made up of 144 cows and heifers and 384 bulls, as against 409 bulls and 213 cows and heifers, a total of 622 last year, and a total of 656 in the year before. The decrease in the total was very largely due to the falling off in the entries of yearling heifers, which only numbered 63, as compared with 123 in 1901. In the bull section consignments were sent by 88 individuals, an increase of 5, and the female classes represented 40 herds, a decrease of 4. Practically all the leading breeders of polled Angus stock in Scotland, and several in the North of England, were represented. In the bull section the largest numbers were forwarded by Sir George Macpherson-Grant, the Earl of Airlie, the Earl of Strathmore, Mr. Fletcher, of Letham Grange, Mr. Whyte, Spott; and Mr. Whyte, Inverquharity, who each sent 10 or 11 animals; while in the female section Mr. M'Kelvie, Kirknewtown, entered no fewer than 16, the next largest consignment, numbering 11, being sent from Gadgirth by the trustees of the late Sheriff Orr Paterson.

The Show.

The judging, which was undertaken by Messrs. L. Beaton, Cullen House, Cullen; J. J. Cridlan, Maismore Park, Gloucester; and Wm. Stewart, Nether Blairock, Cullen, was completed on the first morning, the work occupying about three hours, the contest in several instances being very keen. The difficulty of the task that fell to the judges is indicated by the fact that some of the animals that were not well placed in the prize-lists subsequently brought much better prices in the sale ring than their more successful rivals in the show. The quality of the stock as a whole was very good, the younger animals being specially meritorious; indeed, those classes, in both bulls and heifers, have seldom been surpassed at the Perth sales. The two-year-olds were not quite so strong as they have been seen in some former years, but they comprised a number of serviceable and well-bred animals. The winner here was Duchess VIII., belonging to Mr. Wilton Milton of Noth. She is a daughter of Hengist of Pitpointie, a first prize Highland Society winner, and is a heifer with nicely-turned ribs. Mr. Chalmers, of Aldbar, came second with Mantle, by Euroclydon, a fine type of heifer, and promising to make a very good cow. She was rather at a disadvantage in being so heavily in calf. Mr. Fettes, of Corskie, came third with Jacinth, a thick, low-set heifer, perhaps slightly easy over the top, but with a nice neck. A neatly-built, pretty, little heifer sent by the trustees of the late Sheriff Orr Paterson came next. In the class for yearling heifers the first place was taken by a thick, handsome animal by Marvel of Addie out of Matilda IV., of Aldbar, the property of Mr. Chalmers (Aldbar). Mr. Robertson (Mains of Fordie) was second with Duchess XIII., a heifer of a different type, being low set, very symmetrical in appearance, and having a good head and nice top. The third ticket went to Mr. M'Conachie (Ardoch, Cullen), for a heifer that was a good deal favoured outside the ring. Curiously enough, the heifer that received only the highly-commended ticket—Eulima, belonging to Mr. Robertson (Mains of Fordie)—brought the highest price realised at the sale—viz., 77 guineas. Perhaps she is not quite so big as might be fancied, but her other qualities and her fine breeding told greatly in her favour. Mr. Robertson also carried off the commended ticket with Daisy of Fordie, another stylish heifer, and, like the other, a get of Lord Sirdar of Addie.

A striking feature of the bull classes was the great success of the Ballindalloch herd, Sir George Macpherson Grant being not only first in both classes, but also carrying off the cup for the best three bulls of the breed. In the older class Sir George came well to the front with Evictor, a bull with a beautiful head and nice long quarters. The next two tickets went to Mr. M'Laren (Auchmaguie) for a well-bred pair. Sir George Macpherson Grant was fourth with Jeshurun, another of the Ericas, and half-brother to the first prize taker. He is a little open in the shoulders, but has a nice level back and capital quarters, and he was a favourite with many round the ring. The bull calves were a little difficult to place in order of merit, but eventually the Ballindalloch herd again asserted itself, Sir George being first with Margrave, another son of Eblito, and of the Matilda family. Opinion differed among the spectators as to the placing of the second and third bulls, but the judges ultimately gave the preference to Mr. Chalmers (Aldbar) for Elmslie, a very neat and promising specimen out of a dam by Enthusiast of Ballindalloch. Sir George had a close third in Encome of Ballindalloch, another son of the fine breeding sire Eblito, whilst the fourth ticket went to Mr. Grant (Advie Mains) for Lord Archer, a symmetrical and well-proportioned bull. The silver cup for the best three bulls was awarded to Sir George Macpherson Grant for his first bull in the older class, and his first and third bull calves. Mr. M'Laren (Auchnaguie) got the reserve ticket with his second and third bulls in the older classes, and a bull calf by Delamere, which was not placed.

First Day's Sale.

As previously mentioned, only the females were disposed of on Tuesday, and although there was a big company present at the sale, bidding was by no means brisk. There was a good trade for really meritorious heifers, and they brought very satisfactory prices, but a large proportion of middling and inferior stock sold at from 13 guineas to 18 guineas, and only 46 animals, or a little more than a third of those dispased of, brought as much as 20 guineas. As regards the averages, it may be mentioned here that yearling heifers averaged £21 15s. 1d., as compared with £17 16s. 8d. last year; cows brought only £22 10s. 7d. as against £23 7s., and two-year-old heifers £24 18s. 6d. as compared with £28 2s. 7d. a year ago, but the general average for the day was better to the extent of a guinea. The highest price of the day was 77 guineas, as compared with 101 guineas last year, the former sum being paid by Mr. Findlay, of Aberlour, for Mr. Robertson's Eulima 13th which was very highly commended in the class for heifers calved after December 1st, 1900.

The first prize yearling heifer from Aldbar was only started at 25 gs., and she sold at 51 gs. to Mr. Bainbridge. Mr. Robertson's second prize heifer was purchased at 28 gs. by Mr. Speid (Forneith), whilst the third prize taker, from Ardoch, went at 33 gs. to Mr. Calder (Newcastle), but Ena of Advie, which was not placed, realised 72 gs. the purchaser being Mr. Findlay, who also bought Edna of Advie at 45 gs., Heather Honey of Selaby at 47 gs., and Lady of Gadgirth at 38 gs. The first prize two-year-old heifer, from Milton of Noth, sold at 55 gs. to Sir James Duke, of Laughton; the second prize taker, from Aldbar, went at 38 gs. to Mr. Claude Ralston; the third heifer, from Corskie, brought 47 gs., the purchaser being the Earl of Crawford and Balcarres; and the fourth heifer, from Gadgirth, sold at 50 gs. to Mr. Smith Sligo, of Inzievar. The best of the cows was an Erica, belonging to Mr. M'Kelvie, Hatton House, Kirknewton, and she was bought at 46 gs. by Mr. Claude Ralston. The total proceeds of the day's sale amounted to £2,632 7s. for 116 head of stock, as compared with £3,528 for 163 animals last year. Below we give particulars of the sales at 20 guineas and over, the names in parentheses being those of the consignees:—

		Gs.
Rubesta (Mr. W. Shaw Adamson)	Mr. Whyte	21

Melita (ditto)	Mr. Kennedy	23
Panikula (ditto)	Mr. J. Kennedy	25
Duchess 8th (Mr. H. Wilson)	Sir James Duke	55

Second Day's Sale.

The attendance of buyers at the second day's sale, when the bulls were offered, was, as usual, larger than that on the first day, a large number of English and Irish breeders and dealers being amongst the company, and they made a good many purchases. There was an entry of 384 bulls, which was 28 less than last year, but there were fewer animals absent than on that occasion, when the English consignments were excluded, and only 77 were not accounted for in the sale list, the total number disposed of being 307, as compared with 280 last year. Business began soon after nine o'clock, and notwithstanding the expedition with which it was carried through it was some time after four o'clock till the last animal was sold—a continuous stretch of fully seven hours, during which a brisk competition existed, especially for the outstanding animals. The feature of the sale, as of the show, was the magnificent appearance made by the Ballindalloch herd, of which eight representatives were sold, and of these only three fell below 100 guineas. One of the lower-priced ones was sold for exportation to the United States, where he will no doubt maintain the reputation of the stock from which he comes. Last year Sir George Macpherson Grant realised the very creditable average of £118 1s. for seven animals, but on the present occasion, with eight animals, he far out-distanced this record, his average reaching the splendid figure of £154 7s. The excellence of this result is greatly enhanced by the fact that the lot included one animal that brought the relatively small price of 70 guineas, another that passed out of the herd at 50 guineas, and a third which went at 46 guineas. The top price realised was the splendid sum of 360 guineas, exactly the same figure that was brought by a Ballindalloch bull at the same sale two years ago, and which constituted a record price at these sales. The animal which thus enabled Sir George to repeat his record was Evictor, which was an easy first in his class on the previous day. His sire was the same as the majority of the other Ballindalloch bulls offered, namely, Eblito, the fine bull which was taken to America by Colonel Judy last year, and which he sold the other day on the other side of the Atlantic at the phenomenal price of £1,820. Bidding for Evictor began at 100 guineas, and proceeded rapidly by bids of 10 guineas, the price at which he was knocked down being reached in a few minutes. The purchaser was Colonel Smith Grant, and the bull will now join the Auchorachan herd. The next highest price obtained was 210 guineas, and two bulls changed hands at this figure, one of them being Encombe of Ballindalloch, which was third in his class on the previous day, and which went to Major Reid, Auchterarder House, after a smart competition; the other being Elmslie, belonging to Mr. Chalmers, of Aldbar, and which was second in the class for younger bulls. Curiously enough, the purchaser in this instance was Sir

George Macpherson Grant, the popular proprietor of the Ballindalloch breed. Next in order in the matter of price came the Ballindalloch Ellendale, which went to Mr. Calder, Newcastle, for 200 guineas. From the same herd Mr. Grant, Finlarig, took Edward R. at 140 guineas, and Mr. Hamilton, of Sundrum, got Margrave at 100 guineas. Lord Strathmore was well represented at the sale by the Glamis herd, from which 10 animals were sold, the average price obtained being £42, the highest figure reached being 75 guineas for Alonso, which went to Mr. Robertson, Mains of Fordie. Lord Rosebery had entered four bulls, but they were all absentees. The Cortachy Castle herd was well represented, no fewer than nine animals being sold, at an average of £23 14s. 10d. But, next to Sir George Macpherson Grant, the best average was secured by Mr. M'Laren, Auchnaguie, whose figure ran to £63 14s., his highest price being 81 guineas for Mandaro, which was second in his class on the previous day. Mr. Robertson, Mains of Fordie, got 90 guineas for Lord Sirdar of Advie, the sire of several of the winners at the show, and his average stood at £40 5s. 10d. The total of the day's sale was £8,319 3s., and the grand total for the two days £10,951 10s.

Below we give a list of the animals which realised 25 guineas and over, the names of the sellers being given in parentheses after the animal's name:—

		Gs.
Midas (the Earl of Airlie)	Mr. Annand Balfour	25
Sir Geriant (ditto)	Mr. Purvis, of Kinaldy	25
The Pretender (ditto)	Mr. D. Smith Murroes	30

Show and Sale of Aberdeen Angus at Aberdeen.

The annual spring show and sale of Aberdeen Angus Cattle at the Agricultural Hall, Killybrewster, near Aberdeen, was held on Thursday. There was a heavy entry of cattle, the numbers entered for the sale being in excess of recent years, and the quality of the stock all round was considered fully up to the average. The gross entries consisted of 250 bulls and 37 cows and heifers, or a total of 287. The exhibits, which were drawn for the prizes, comprised a number of animals of good outstanding merit. In the senior class of bull calves Mr. M'Pherson (Mulben) was first with Carolus, a beautiful big smart-looking calf, but was closely followed by Mr. Wilson's President of Coynachie. Mr. Grant (Wester Elchies) was third and fourth. In the young class of bulls Mr. M'Pherson (Mulben) again took the lead with Middleman, a thick-fleshed bull, Mr. Wilson (Coynachie) being again second with Norman of Coynachie, and Messrs. Smith (Dockington) were third with a sweet well-haired calf named Tennyson. There was a fair show of heifers, the winner being Sir J. F. Clark, the second and third awards going to Mr. P. Forbes.

At the sale there was a large attendance of buyers, and business started briskly, but was confined chiefly to local buyers, and, as compared with the prices realised last year, there was a considerable fall, amounting to £1 14s. 6d. in the case of bulls and £1 9s. 2d. for cows. The highest price obtained was 60 guineas, at which figure a Ballindalloch bull calf was sold by Sir Geo. Macpherson Grant to Mr. Hugh Wilson, Milton of Noth. The sixth prize calf, also from Ballindalloch, went to Mr. Duff, of Hatton, for 50 guineas, and the first-prize heifer was bought for Lord Rosebery at 35 guineas. The total sum realised for 258 animals was £5,745 12s., the average being £22 5s. 4d. Below we give a summary of the sale, and we may mention here that last year 208 bulls made an average of £24 9s. 9d., the general average for 223 head—males and females—being £23 14s. 6d.

SUMMARY.

	Average.	Total.
229 bulls	£22 15 3	£5,212 14 6
3 cows	29 15 0	89 5 0
3 two-year-old heifers	16 19 0	49 7 0
23 one-year-old heifers	17 2 10	394 5 6
258 head	£22 5 4	£5,745 12 0

The Late Mr. J. P. Apperley's Herefords.

The late Mr. J. P. Apperley's celebrated herd of Herefords was disposed of at the Stone Farm, Withington, near Hereford, on Thursday. The herd is one of the oldest in the county, and is so well known that naturally a large company of buyers was expected, and their expectation was realised. In Vol. III. of the Hereford Herd Book (the first volume in which cows were entered) there were no fewer than twenty-one entries of cows from the Withington herd, in the name of Mr. J. P. Apperley and his father, the late Mr. W. H. Apperley, who had retained a portion of the old herd. Mr. J. P. Apperley returned to Stone House, and the two herds were amalgamated. Previous to the publication of Vol. III., Messrs. Apperley, father and son, possessed a good herd of Herefords at Liver's Ocle.

At the luncheon held prior to the sale Mr. J. W. Smith, who presided, said, in the course of a short speech, that in Mr. Apperley they had a man in whom he might call a real agriculturist and a typical country gentleman. He was a real home man—fond of his home, proud of his farm and his little estate; and he had reason to be proud of it, for he and his ancestor had lived and occupied that place for something like 200 years. He thought they would agree with him that he could have been no mean farmer and no mean judge of stock. The cattle to be submitted for sale that day—he would not say they could not be rivalled—but very few could excel them. They were good hardy cattle, with plenty of size and substance, and he did not know of a herd more rent-paying in its character. Their lineage was long, and they had everything to recommend them. It would be a sale without reserve.

The sale was conducted by Mr. Walter Pye, and was a fairly successful one, but no big prices were realised, as the following list of animals sold at 20 guineas and over will show:—

COWS AND CALVES.

Highland Cattle Society's Show and Sale.

The eleventh annual show and sale of pedigree Highland bulls, held under the auspices of the Highland Cattle Society of Scotland, took place at Oban on Thursday, and proved to be one of the most successful of the series. The weather being favourable, there was an unusually large attendance of buyers, but the supply of animals—they numbered 114, or an increase of 22 on last year's total—was in excess of the demand, as only 76 animals found purchasers. The show and was divided into three classes, and brought together the largest number of animals of this breed ever exhibited at any one show. Mr. MacDiarmid, of Castles, Lochawe, was judge, and from the large number of animals shown and the almost uniform excellence of the exhibits, especially in the second and third classes, his duties were unusually difficult. In the aged class there have been as good bulls shown at Oban, but in the two-year-old and yearling classes there has never been brought together so many animals of decided merit, from which it was evident that the operations of the Highland Cattle Society are distinctly improving the breed. In the aged class, for which there were nineteen entries, the first prize winner was Calum Man, a bull with a remarkably successful history. He has been a frequent winner at Highland and agricultural shows, and at the Oban sale as a two-year-old he was bought by Mr. Mackenzie, of Farr, for £120, but on Thursday he only realised £76. The second prize winner, bred by the Duke of Sutherland, and shown by Mr. Campbell, of Shiness, was also a bull with a good prize record, and he made £70. In the two-year-old and yearling classes the numbers exhibited were 33 and 28 respectively, and they were considered a particularly good show.

The prizes were awarded as follows:—

Bulls, calved before 1st January, 1900: 1, Mr. W. D. Mackenzie, Farr Daviot (Calum Ban of Athell); 2, Mr. J. R. Campbell, Shinness, Lairg (Ben-a-Bhraggie); 3, Mr. Archibald Turner, Kilchamaigg (Adhollach X.); hc, representatives of the late J. Stewart, Ensay (Ben Dunabheg); hc, representatives of the late Donald Graham, Tinthrev (An Gaidheal Molach); c, Mr. J. R. M. MacDonald, Largie (Somhairle).

Two-year-olds: 1, Mr. J. S. Blair, Melfort (Denovan); 2, Mr. J. MacDonald, Duntulm (Duntuilmarithid); 3r, Mr. J. Campbell, Kilberry (Iasgaire); hc, Mr. J. Campbell, Tullich (Macacuraidh); hc, Mr. J. MacDonald, Duntulm (Fear Abheallach); c, Mr. J. R. Campbell, Shinness (Suilven).

Yearlings: 1, Earl of Southesk (Caledon); 2, Mr. MacNaughton, Barguillean (Domhnuill Molach II.); 3, Mr. W. D. Mackenzie, Farr (Alastair of Farr); vhc, Earl of Southesk (Valerius); hc, Mr. Buchanan, Duntanachan (Dughall Buidhe); c, Messrs. Campbell, Kentra, Islay (Antileach).

The sale took place in Mr. Corsering's auction mart, at the conclusion of the judging. As previously mentioned, there was a large attendance, but a slow trade. For the better class of animals, however, there was a good demand, and the Congested Districts Board were, as last year, large buyers, taking off 15 bulls. The top price of the sale was obtained by Mr. Campbell, Kilberry, for his Iasgaire, third prize taker in the two-year-old class, which was secured by Mr. Thomas Bullough for the fold which he is forming at Fasnacloich, the second highest, £110, being given by Mr. W. D. MacKenzie, of Farr, for Mr. Blair's Denovan. In the aged class the top price was got for Calumban, a seven-year-old, which was secured by Mr. Martin, of Dunlossit, at £76. The second price (£70) was got for the winner of second honours, Ben a Bhraggie, which was bought by Mr. Simon Mackenzie, Lochboisdale. In the year-old class the best price, £55, was given by Lady Gordon Cathcart for the Earl of Southesk's Valerius, and the second highest, £40, by Mr. Bryce Allan for Mr. MacNaughton's Domhnuil Molach. The average price in section 1 was £28 7s. 7d. for 23 bulls, an increase of £6 1s. 1d. on last year's average. In section 2 (two-year-old) for 33 bulls the average was £20, a decrease of £1 5s. 8d., and in Section 3 (yearlings) the average for 20 bulls was £20 9s., an increase of £2 6s. 7d. After the bull sale a draft of 16 heifers and cows from the well-known Ardtornish fold of Mr. T. Valentine Smith were disposed of, realising for three-year-old heifers from £8 10s. to £19; cows, from £16 to £33. This being the first occasion on which female animals were exposed at the spring sale, the result was considered satisfactory, and it is intended to continue the experiment in future years.

Sale of Endale Herefords.

Considerable interest was centred in the sale of the late Mr. Edward Yeld's Hereford herd, at Endale, near Leominster, on Monday, conducted by Messrs H. F. Russell and Sons. It will be remembered that on August 28th, 1900, the herd was offered for sale by auction, and out of 60 animals put up, some 20 were bought in, and these were now offered, and it may be mentioned have met with a better sale than on the last occasion. A reference to the pedigrees recorded in the catalogue showed that the animals possessed the purest and most fashionable strains of blood, being descended from the celebrated Wintercott, Leen, Stocktonbury, and Twyford herds. They combined great individual merit with high parentage, and were of good size, nice character, and symmetry. The success which has for many years attended the Endale exhibits in the R.A.S.E. and other showyards is so widely known that further comment would be superfluous. The result of the sales is given in the list below. Previous to the sale of the Herefords, Mr. Frank Russell disposed of the implements, effects, and sheep, which sold at good prices.

Sales of Live and Dead Farming Stock.

In consequence of Mr. A. E. Mansell having decided to settle in Tasmania, a dispersion sale of the whole of his valuable farm stock at Harrington Hall, Shifnal, was conducted on Thursday by Messrs. Alfred Mansell and Co., auctioneers, Shrewsbury. The stock comprised 476 sheep, including 96 Shropshire ewes and 380 fat wethers, and 215 head of cattle. As was anticipated, there was a very large attendance of buyers and dealers from all parts of the country, and there was a spirited sale throughout. After an early luncheon, an adjournment was made to the sale ring, where the selling of the stock was carried out by Mr. Alfred Mansell. The sheep, which were of excellent quality, sold very well, and some good prices were realised. Ewes in lamb made from 43s. to 53s., and fat sheep from 32s. to 46s. The cattle trade was good, and there was some keen competition amongst the buyers for the best animals. The prices ranged from £6 to £22. The highest price obtained for the horses was 33 guineas, others sold down to 9 guineas.

On the 14th inst. the same auctioneers disposed of the farm stock of Mr. William Thomas, the Beam House, Montford Bridge, who has decided to relinquish farming pursuits. Amongst the animals offered for sale were 75 pure bred Shorthorn dairy cattle and 245 pedigree Shropshire sheep, representing the renowned Beam House flock. There was a very large attendance, but the sheep trade was not very grand, owing to the severe weather lately experienced and the shortness of keep. Nevertheless, some good prices were realised. Stock rams made up to 5 guineas, shearling rams 5½ guineas, shearling ewes 64s., and breeding ewes 80s. The trade for Shorthorn cows and heifers showed an improvement on that for sheep. The best prices were 36 gs., 28, 32, 26, 21, 20, and 23; heifers, 35 gs., 28, 23, 21, and 17½. Bulls made 30 gs., 22, 21, 19½, and 19. There was a good demand for horses. The highest price was 52 gs. for a roan mare; the other prices included 40 gs., 36, 33, 30, 28, and 26. Cart colts sold well, the highest prices being 27gs, 24, 20, and 18½.

HORSES.

Sale at York.

Messrs. Walker and Sons' second February sale of horses took place at their repository, York, on Thursday, when they had a catalogue of nearly 70. There was a good attendance. The principal feature of the sale was the disposal of the entire stud of Mr. H. R. Pease, of Beverley. The best prices were obtained for Barnetby, a chestnut gelding, 6 years old, who realised 135 guineas, and Molescroft, a chestnut mare, 5 years old, 50 guineas. A bay gelding, the property of the executors of the late Mr. J. Iveson, realised 72 guineas, and Pinwire, a chestnut mare, the property of Mr. C. E. Clark, 60 guineas, a number of other horses selling up to 50 guineas. The principal prices were as follows:—

	Gs.
Dark grey gelding, 6 years, 16.1 h.h.	41
Havoc, bay gelding, rising 6 years, 16 h.h.	40
Opposer, dark brown horse	45
Pinwire, chestnut mare, 6 years this time, 16 h.h	60
Bay mare, 6 years	42
Molescroft, chestnut mare, 5 years, 15.3 h.h.	50
Barnetby, chestnut gelding, 6 years, 16 h.h.	135
Dark brown gelding, about 7 years, 15.1 h.h.	35
Dark bay mare, 4 years, 15 h.h.	37
Roan gelding, 5 years, 15.2 h.h.	35
Dark chestnut gelding, 5 years, 15.3 h.h.	45
Brown gelding, 6 years, 16 h.h.	40
Black gelding, 5 years, 16.1 h.h.	41
Brown mare, rising 6 years, 15.3 h.h.	43
Bay gelding, 5 years, 16.2 h.h.	72

SOCIETIES.

Hunters' Improvement.

Captain H. Heywood-Lonsdale (vice-president) occupied the chair at a meeting of the council of this society, held on the 13th inst., at 12, Hanover Square, London, W., when 41 candidates were elected as members of the society, while the secretary as members of the society, while the secretary reported that there were 23 candidates for election at the next meeting of the council.

Finance Committee.

Lieut.-Col. Hon. W. H. Allsopp (chairman) presented the report of this committee, showing that the balance at the bank was £1,583 6s. 2d., the secretary's receipts since January 1st being checked and found correct; the arrears of subscriptions, £27 6s. Accounts amounting to £845 12s. were passed for payment. The report was adopted.

Editing Committee.

Hon. Alexander Parker (chairman) reported that Volume 9 of the Record of Hunter Mares and Sires had been duly registered at Stationers' Hall. The committee dealt with several entries made for the show, one of which (entered in class 2) they had been obliged to refuse, as it did not comply with the conditions laid down for that class. This report was adopted.

Horse Show Committee.

Mr. James Joicey (chairman) presented the number of entries for the forthcoming show as follows:—

	1902.		1901.
Thoroughbred stallions	119	..	113
Hunter sires and colts	37	..	28
Hunter mares and fillies	53	..	83
Hunter geldings	129	..	90
Chargers	58	..	75
	402	..	389
Entries in the polo pony section	198	..	141
	600	..	530

The produce of seven qualified sires were entered to compete in the produce class, namely, Chibiabos, Four Poster, Pantomime, Swallowfield, Toscano, Withernam, Yard Arm, each stallion having at least three produce entered in the young stock classes. The report was adopted.

Vice-President.

The chairman informed the council that the vice-president selection committee had met that morning, and they unanimously recommended that Sir Walter Gilbey, Bart., be asked to become vice-president (*i.e.*, president in 1903). The report of the committee having been adopted by the council, Sir Walter Gilbey thanked the members present for his nomination as vice-president to the members at the annual general meeting. He hoped that during his years of office the society might be enabled to still further stimulate the cause of horse breeding, and do something to stop the ever-diminishing number of horses in this country.

Selection Committee of Candidates for Council.

The secretary reported that the committee had met on January 16th, when they had selected from the nominations sent in by members of the council the names of 16 members, and in their selections they had endeavoured as far as practicable, to nominate candidates from counties and districts with little or no representation on the council. They proposed that the names of the following gentlemen should be sent out on the voting papers:—Barlow, E. H., Yorks; Foster, Col. W. H., Lancashire; Heywood-Lonsdale, Captain, J.P., M.F.H., Oxfordshire; Holt-Needham, O. N., Somersetshire; Jolliffe, Dr. W. J., Isle of Wight; King, J. Russell, Oxfordshire; Mann, R. J., Shropshire; Mashiter, E. T., M.F.H., Essex; Nickisson, J. L., Berks; Philipps, J. W., Pembroke; Saunders, Clervaux Morley, Devon; Smith, S. Lee, Kent; Springfield, T. O., Norfolk; Tindal, C. W., Lincs.; Wilson, H. M., M.F.H., Cheshire; Withers, Henry, Middlesex.

The secretary was instructed to send the names out to the members with the report of the council and the statement of accounts for the past year.

Registration of Stallion Committee.

Mr. J. P. Cross on behalf of the committee, stated that the returns from the owners of mares served by the stallions registered on the list in 1901 were incomplete, and therefore the committee did not propose to submit any statement to the council till the foaling season was over. In future the returns should be collected annually in June. He further reported that applications had been made for the registration of three further stallions. This report was adopted.

Soundness of Stallions.

A resolution was submitted from the Devon County Council urging that legislation should be introduced, empowering county councils to prohibit

the use for hire within their districts of stallions suffering from hereditary disease.

Sir Richard Green-Price said that this was a new departure for county councils, and that they must give the credit to the Devon County Council for first moving in this matter. The idea was excellent, but he did not think that they had the means to give effect to their resolution. In his opinion this should be a constitutional question. Nothing short of a Royal Commission would meet the case of stopping the ever-decreasing number of horses in Great Britain and Ireland, and it would be incumbent upon the Government to act upon their report. He thought that this society might pass a resolution calling the attention of the Government to the urgency of the matter, and recommending them to take evidence as to how the diminution of home-bred horses could be remedied. The time was opportune, as public opinion had been roused over the question of Army remounts, and it would be better that the money which went to the foreigners should go into the pockets of the British tenant-farmer. There was no necessity to specially appoint a Royal Commission, as they had the requisite machinery in the present Royal Commission on Horse Breeding, and he thought that the society should urge upon the Government, either by deputation or otherwise, to do something in the direction he suggested. Unless this was done it would be soon impossible to persuade the breeders to go in for light horse-breeding. He had ideas upon the subject how it might be done, but this was not the occasion to broach them, but whatever was done should be done at once, as it would take at least six years before the country would reap the advantages of any scheme put in operation.

Sir Walter Gilbey said that he thought that the suggestion of the Devon County Council was excellent, but that it was impossible to carry it out.

It was eventually resolved that a letter should be written to the Devon County Council thanking them for the suggestion put forward by them, and pointing out that the society itself was endeavouring to give effect to the principle by inviting owners to register their thoroughbred stallions after inspection and examination by a qualified veterinary surgeon.

The council then adjourned.

Smithfield Club.

A meeting of the council of the Smithfield Club was held at the Royal Agricultural Hall on the 5th inst., the Right Hon. Earl Spencer, K.G., president, in the chair.

The minutes of the previous meeting were approved and signed.

The Veterinary Inspector's report on the health of the animals exhibited at the late show was read.

The stewards reported the result of the inquiries in the dentition cases at the late show, and also recommended the following alterations in the prize list:—

Class 9.—No. 65, to which 3rd prize was awarded, not having been slaughtered in accordance with Rule 33, the 3rd prize of £5 be awarded to the reserve, No. 60, exhibited by Miss Alice de Rothschild.

Class 18.—No. 125, 2nd prize winner, not having been slaughtered, the prizes of this class be awarded as follows:—2nd prize, £10, to No. 126, exhibited by Mr. George Willsher; 3rd prize, £5, to No. 129, exhibited by Mr. J. D. Fletcher.

On the motion of Mr. W. Newton this report was adopted.

The following committees, as provided by the Articles of Association, were appointed, viz.:—

Finance Committee.—Clare Sewell Read, J. Bowen-Jones, Jonas Webb, J. P. Case, Edney Hayter, A. C. Skinner.

Stock Prize Committee.—Earl Winterton, James Biggar, J. J. Cridlan, Henry Dudding, G. S. Grant, William Newton, W. Reid, H. P. Ryland, S. Spencer, Clement Stephenson, J. Stratton, J. P. Terry, A. P. Turner, Henry Webb, J. Wortley.

Selection Committee.—Sir Walter Gilbey, Bart., Sir Jacob Wilson, W. Cooper, A. Egginton, Hugh Gorringe, Richard Stratton.

Implement Committee.—Alfred Crosskill, A. F. Milton Druce, H. D. Marshall, J. E. Ransome, Henry Smith, Garrett-Taylor.

Carcase Committee.—F. Redman, G. Adams, W. S. Ferguson, J. Lindsey, C. W. Tindall, J. Treadwell.

General Show Committee, consisting of the chairman of the foregoing committees and the stewards.

In pursuance of notice, Mr. W. S. Ferguson moved:—"That, instead of giving the judges a lump sum of £7 each in payment of their expenses, irrespective of the distances they may be from London, that in future, or until any other alteration may be considered desirable, the judges shall receive first-class railway return fare from their respective stations, and in addition a sum of £3," and in doing so said the present system of paying all judges of stock a fee of £7 was quite an anomaly. In the case of judges living near town the £7 paid was practically a fee, whilst in the case of others who came three or four hundred miles or more the sum allowed did not cover expenses. He felt it was a great honour to judge at the club's show, and that the gentlemen elected to act as judges did not require a fee for their services, but would be perfectly satisfied with their expenses, and he thought an allowance of £1 per day for three days, with return first-class railway ticket, would be a sufficient remuneration, would be more equitable, and would save the club upwards of £60 per annum.

Mr. Clement Stephenson seconded the motion.

Mr. W. Cooper moved as an amendment the previous question. He thought the present system had worked satisfactorily.

by Mr. Ferguson was a fair one as to whether it was not better to pay the judges *pro rata* according to the distances they came. There was some injustice in the present system, as a judge living in or near town made a profit, whilst the judge from a distance loses. He thought they should look if there was not something in the argument that it was a good principle to pay the judges equitably, instead of a lump sum, which did not operate in all cases anything like equitably.

Mr. W. Reid supported the principle of Mr. Ferguson's motion, but was of opinion that the amount to be paid in addition to the railway fare should be £5, and if Mr. Ferguson would alter his motion to £5 he would support it.

Mr. Garrett Taylor, in seconding Mr. Cooper's amendment, maintained that the present system had worked admirably in every way, and they had always been able to obtain the services of most excellent judges from the north. This was the first time he had heard of any complaint.

Sir John Gilmour said he felt sure they would all desire to put everyone on an equal basis, and a sound footing, and it appeared to him that by paying every man's actual expenses in bringing him to the spot, and then something, whether it be £5 or £3, to every judge, they would be upon the same footing.

Mr. Cridlan, in supporting Mr. Ferguson's motion, thought it was an injustice that a judge, say from Inverness or Ross-shire, should be brought to London to judge classes of cattle and not receive a sufficient sum to pay his railway fare, whereas gentlemen from Kent, Middlesex, Essex, or somewhere near London were paid a sum which was practically a fee.

The amendment for the previous question was the n put and declared to be lost.

Mr. Reid then proposed as a further amendment that the sum to be paid in addition to the railway fare be £5, and this was seconded by Mr. J. P. Terry.

Mr. Ferguson would not like the judges to come with a view of making a profit out of the club, and considering the honour attached to the office, he thought £3 and railway fare was quite enough, but to meet the wish of the meeting he would be disposed to make a compromise and make it £4.

Mr. J. Bowen-Jones thought that before voting the Council ought to know what the exact financial effect of this proposition would be.

The president stated that he believed that, taking the average of the last two years, Mr. Ferguson's original motion would mean a saving of about £60, and, if £5 were paid, an addition of about £12 or £15 to the present payment, and if £4 a saving of £15 or £20.

Sir Walter Gilbey and Mr. Alfred Crosskill supported Mr. Reid's amendment, which on being put to the meeting was declared to be lost.

Mr. Ferguson's motion, with the substitution of £4 for £3, was then put and carried.

Communications from (1) Mr. Sanders Spencer, suggesting a graduated scale of entry fees, detailed report of dentition cases, and carcase classes for pigs; (2) South Devon Herd Book Society, with reference to classes for South Devons; (3) English Kerry and Dexter Cattle Society, respecting abolition of small cross-bred classes; (4) Mr. H. W. Stilgoe and Mr. J. H. Dean, respecting prizes for sheep; (5) National Pig Breeders' Association, suggesting carcase competitions for pigs, were referred to the stock prize committee.

The next meeting of the Council was fixed for Wednesday, March 5th.

Shropshire and West Midland.

A very satisfactory report was presented at the 27th annual meeting of the Shropshire and West Midland Agricultural Society. It stated that one of the most pleasing features of the year was the great increase in the entry fees, the aggregate for 1901 being £999, as against £795 for 1900, or an increase of £204. The £795 in 1900 was the record up to that period. The gate money, grand-stand receipts, and sale of cheap tickets for last year's show amounted to £561 5s. 10d., compared with £476 6s. 9d. in the previous year. Two life members and 89 annual members were elected before the show in 1901, but owing to rather more than the average of resignations from various causes, and to the fact that many subscriptions for 1901 were still outstanding, the list only showed an increase of £9 11s.—£537 1s. for 1901, against £527 10s. in 1900. Since the show 42 new members had been elected. The donations were £639 11s. 6d., against £467 1s. 3d. in 1900, or an increase of £172 10s. 3d. The exhibition for 1902 would be held on Thursday and Friday, June 5th and 6th. In the balance-sheet it was shown that the receipts amounted to £2,994 7s. 6d., and the excess of receipts over expenditure amounted to £11 9s. 11d. Over £1,689 had been expended in prizes, cups, trophies, etc.

Mr. J. Bowen-Jones, in moving the adoption of the report, said he thought it would be satisfactory to the members of the society to find that the gate receipts, etc., last year amounted to £561, against £471 in the previous year. That result was due in some measure to the system pursued of selling cheap tickets before the show—a system which he hoped they would continue, for it would bear good fruit in future. Mr. Bowen-Jones called attention to the date which the Council had fixed for the next show—June 5 and 6. He said it was a most difficult thing, this year, to settle the date for holding the show, because the Coronation had interfered with the arrangements of some of the larger shows, including the Royal, the Bath and West of England, the Worcester and Hereford, and the Royal Counties. It was almost impossible to fix the show on any other dates, except in the Derby week, or postpone it until the second week in July, and the Council considered that far too late to hold a successful exhibition in Shropshire. Those were reasons which had induced the Council to fix those dates.

The report was adopted.

The Chairman proposed that Lord Barnard be president for the ensuing year. This was seconded by Mr. R. Preece (Cressage), and carried with acclamation.

Captain Dickin proposed that Mr. S. Meeson Morris (the Mayor of Shrewsbury) be vice-president. Apart from the fact of his being Mayor of Shrewsbury, he thought they could not have a better man as vice-president than Mr. Morris. He could not say more than that, and he was sure what he had said would meet with their approval. Mr. Butler Lloyd seconded the motion, which was carried. A vote of thanks to Mr. M. Hulton-Harrop, the retiring president, was carried amid applause, as were also several other votes of thanks.

Hackney Horse.

Meetings of the council and committees of the Hackney Horse Society were held on the 5th inst., at 12, Hanover Square, London, W., Baron W. von Schroder, in the unavoidable absence of Mr. Wrench, occupying the chair. Fifty-four new members were elected, and two Societies (Bognor Horse Show Society and Wisbech and District Horse Society) affiliated.

The Selection Committee submitted a list of 30 names thoroughly representative of Hackney and pony interests, and the council voted for 20, whose names will appear on the voting paper shortly to be issued to members for the election of 10. Details connected with the scrutiny of votes, etc., were finally settled.

Baron Schroder proposed that Sir Gilbert Greenall, Bart., be asked to consent to be the nominee of the council for the position of president-elect for the ensuing year, to follow Sir Walter Gilbey in the office of president. Sir Gilbert Greenall's name met with hearty approval by all members present.

The horse show report, which was presented on behalf of Sir Walter Gilbey (chairman), showed that the total entry for the forthcoming show was 493, compared with 484 in 1901, and 464 in 1900. Slight alterations were made in the programme of judging for Wednesday, March 5th, and it was agreed to judge one of the harness classes before the champion cup, taking the two remaining harness classes immediately after, and concluding the afternoon by a parade of stallions. Various details were settled concerning the offer of medals.

Mr. John Rowell (chairman of the Editing Committee) reported that the new volume of the Stud Book was being rapidly issued by the printers. The committee had considered a suggestion that the Society should issue export certificates for geldings, but they were not prepared to assent to it, feeling that the Society is first of all a breeding society, and that it was doubtful whether a gelding certificate would always accompany the horse from hand to hand, as in the case of a stallion or a brood mare.

The exclusive right to the following prefixes was granted to the various applicants:—

Prefix.	Applicant.
Fulford	Walter Blakey.
Southorpe	Thomas M. Bentley.
Stanley	James R. Crowther.
Terregles	Charles E. Galbraith.
Rowhook	C. B. Toms.

The Finance Committee reported that the balance in the bank was £2,063 10s. 1d., and accounts were passed amounting to £691 6s. 6d. The committee had received the usual audited statement of accounts, which showed the Society to be in a flourishing and prosperous condition. The report was adopted.

The council considered and passed, with a few minor alterations, the draft of their report to be presented to the annual meeting of members at the show. The council then adjourned until Wednesday, March 5th.

PRICE 6d. (By post, 9d.)

SHOULD BE IN THE POSSESSION OF EVERY

FARMER, LAND OWNER, AND STOCK-KEEPER.

A YEAR'S RECORD OF BRITISH AGRICULTURE.

ENLARGEMENT OF THE

AGRICULTURAL ANNUAL

AND

Mark Lane Express Almanac, 1902.

Portraits of Prize-winning Animals at the Norwich, Birmingham, and Smithfield Fat Stock Shows, 1901.

PRESS OPINIONS.

"The literary contents of the number are of an appropriate and interesting description."—**Field.**

"'Tuberculosis in Animals,' 'Sheep Breeding as affected by the price of Wool,' 'Weeds,' and 'Fruit,' are a few of the numerous articles on various features of agriculture contributed by experts in their subject."—**Yorkshire Observer.**

"Is up-to-date in every detail."—**Lincoln, Rutland, and Stamford Mercury.**

"Reflects the greatest credit. The almanac is excellently turned out, and is full of most useful information for agriculturists. In addition to many important tables, a number of capital articles on stockbreeding, &c., are given. The illustrations of prize-taking stock, &c., are very good."—**Irish Field.**

"In addition to the fat stock illustrations, there is a large number of others of cattle, horses, sheep, pigs, and miscellaneous farm scenes, which together with the reading matter, make up a book of great interest to all associated with the farm."—**Eastern Morning News.**

"Contains some very well written, interesting articles, together with a host of facts and figures relating to the farm and markets."—**London Corn Circular.**

"Gives astonishing value for the price, sixpence. There are a great many special articles by eminent authorities, and an abundance of illustrations."—**Sussex Daily News.**

"Tuberculosis has received much attention during the past year, and is still continuing to do so, therefore the article by M. R. C. V. S., entitled, 'Tuberculosis in Animals on the Farm,' is very opportune and will be read with interest."—**Tonbridge Telegraph.**

"Very neatly got up is the current issue of the MARK LANE EXPRESS ALMANAC, its cover adorned with the portraits of His Majesty the King and the Prince of Wales."—**Farm and Home.**

"The volume consists of 250 pages, and is altogether more than up to its former high standard of merit, while the price remains as formerly."—**Ayr Advertiser.**

"A useful agricultural almanac."—**Surrey Times.**

"Contains many articles of special interest to all concerned in agriculture."—**West Sussex Gazette.**

"There is a strong list of contributors, and the pictures of varied interest, and will appeal to all lovers of country life."—**Agricultural World.**

"The volume consists of about 250 pages, and is nicely bound in a coloured wrapper, on the front of which appear, in a most artistic frame, portraits of his Majesty the King and his Royal Highness the Prince of Wales."—**Watford Observer.**

"Is to the fore again as a complete record of the past year, with illustrations and particulars of prize-winning animals at all the great fat-stock shows, and features to which an increasing number of agriculturists look forward to every year, and have learned to appreciate very highly." — **Estates Gazette.**

"In addition to the good supply of agricultural article, it has many pages of tabular matter of constant value for reference by landlord and tenant."—**Yorkshire Post.**

"Fully maintains the best traditions of the compilation. In addition to a comprehensive list of facts and figures relating to agricultural practice, it contains an interesting series of articles of definite value to those concerned with questions concerning land cultivation and stockbreeding, and has also a number of contributions which deal in a highly descriptive manner with the ordinary incidents of farm life."—**Manchester Courier.**

"The volume is still sold at the very low price of sixpence, or by post, ninepence."—**Westmoreland Gazette.**

"'Lobbyist' advocates an Agricultural Party in Parliament and sets forth the outlines of the programme. As to the necessity of such a party he says: 'If it is not called into existence the rural parliamentary interest will confront the growingly extravagant and disciplined demands of the towns—demands which are often brutally avowed to be anti-rural, unorganised, and divided. Suspicion will permeate its councils and weakness be the badge of its ranks.'"—**Hereford Mercury.**

"A large number of illustrations, principally reproductions from photographs, find a place in the almanac."—**Westminster Gazette.**

"'Lobbyist' advocates an Agricultural Party in Parliament, and sets forth the outlines of a programme."—**Lincolnshire Gazette.**

"The Agriculturist's favourite."—**Kent Messenger.**

"To enumerate all the articles would be too great a task, but mention may be made of that dealing with 'Weeds,' by Mr. S. Eames; 'The Harvest of Fruit,' by Mr. J. H. Hollingworth; 'The Census'; 'Town and Country Life.'"—**Grantham Journal.**

"Appears somewhat later than usual, the compilers having delayed its publication in order that it might be a complete agricultural record for the year.—**Lowestoft Standard.**

"A mass of information of the greatest use to farmers and breeders, much of which should also be of service to the same classes in South America and the colonies, to whom we can strongly recommend it."—**South American Journal.**

"Is well-known to agriculturists for the variety and usefulness of its information. It need only be said that the issue before us for 1902 does not in any respect fall short of its predecessors."—**Surrey Advertiser.**

"Taken as a whole may be said to be invaluable to farmers."—**Bristol Mercury.**

"Although issued somewhat later than usual, in order to make it a complete record of the past year, and to include illustrations and particulars of some of the principal prize-winning animals at our great fat-stock shows."—**Reading Mercury.**

"Is probably the most up-to-date and practical periodical of its kind."—**Irish Farming World.**

"The statistics, which form an important part of the work, are thus enabled to be made more complete, whilst the addition of about a dozen illustrations—reproduced from the life-like photographs—of the great prize winners at the Smithfield, Birmingham, Norwich, etc., fat stock shows, is a very important one, and will sure to be appreciated."—**Gloucester Journal.**

"For sixpence the farmer may have an encyclopædia of agriculture beautifully illustrated, the compilation of the most practical men in the country."—**Cromer Post.**

"The list of societies has been made even more complete than last year, whilst the various tables and statistics which have been so much appreciated in previous years have been added to and brought up to date."—**Sheffield Weekly News.**

The Largest Manufacturer of Incubators in the World.

Quantity of Food for Fowls.

"A question very often asked is," says Mr. P. J. W. Marx, in an article on "Poultry Food and Fattening," which appears in the recently-issued Journal of the British Farmers' Association, "how much food should be given to a score or a hundred fowls per day, but no practical man will commit himself to a definite answer. The time of the year, the manner in which the fowls are kept, the character of the ground over which they run, the quality of the food supplied, the condition of the fowls themselves, and their breed, are factors to be considered in the quantity of food given.

For popular guidance, fowls should be fed until they are just short of having had enough. Proper feeding is not to be done in a hurry or heedless fashion, the warm breakfast excepted; only in rare cases will this be overfed, and the feeder will not commit a great error if he doles out the supply to each flock or pen, and passes on to the next. Corn must be dealt with differently; the feeder should scatter the grain about until he notices the fowls begin to be a little particular which corn they should eat, or run from place to place in search of something better, and then with a few (depending on the number of fowls) final handfuls, the fowls may be left.

If fowls are in pens, and every particle of food has to be given to them, feeding should be more frequent and less at a time; the fowls should always be on the look-out for food. Overfed fowls stand sleeping or moping about, and are dull and listless; fowls in good order are always on the move, bright, and full of energy. Again, poultry which run over land full of worms and insects need less food than if they are kept on land poorer in animal life. Then when the fowls are coming to lay, or are laying, summer drought, or a long winter's frost, more has to be given. The large, heavy breeds will eat more than the light, active ones. An Andalusian or a Leghorn may be well fed on a quantity of food insufficient for a Plymouth Rock or an Orpington. In no case should fowls, until they can, turn away from their food; every particle should be picked up, and not a grain left for sparrows. The first feed should be given with daylight in winter, and between six and seven o'clock in the summer. The slight feed of hard corn can follow in about an hour in winter, and about nine or ten o'clock in the summer. Then the final supper of hard corn should be given early enough on a winter's afternoon to enable the fowls to eat it, have a drink, and go to roost while it is still light. In summer, from five to six is a convenient time; fowls go early to roost and are early risers. Mixing various grains together is not desirable. The system of using one kind of grain for a time, then changing to another, then to a third, or even back to the first is preferable. While variety in the corn diet is well worth studying, there does not seem any necessity to change, because it may somewhere be written down that fowls should have a change of corn every week. If the fowls are doing well, it is unlikely a change of food will make them do better, and the successful system of feeding may be continued until they flag.

The Fastern's E'en horse fair at Fyvie, Aberdeenshire, took place yesterday in clear, cold weather, with the ground partially covered with snow, and the roads sheeted with ice. Close on 500 head of horses were stanced, a full average, the great proportion being grouped in dealers' hands. Business was generally considered very stiff, farming work being generally pretty well forward, and trade dull in towns. Even the heaviest class of horses were reported more affected in value than usual. Nevertheless an extensive trade was done all over. Heavy young Clydesdales made £60 to £82, and as high as £90 was reported for consignments southward. Generally, three-year-olds realised £40 to £55; two-year-olds, £30 to £40; and yearlings, £18 to £30. Roadsters and cobs were a moderate sale, the bigger class making £25 to £45; medium sizes, £16 to £25; and small ponies £8 to £15. There was a large representation of both local and south dealers, and several studs of the northern were mostly cleared out at prices supposed to be in purchasers' favour, as an improvement is anticipated when the busy season comes in.

Lame Horses for Exportation.—At the Southwark Police Court on Wednesday Henry Hazletine, horsekeeper, of Warner Street, Borough, was charged with cruelty to a horse.—Inspector Rogers, of the National Society for the Prevention of Cruelty to Animals, said he saw prisoner leading a horse in Tooley Street that morning, and as it was very lame on the near hind leg, he gave him into custody. Prisoner remarked that it was his own horse, and he was taking it to the docks for shipment abroad.—Inspector Rogers: This animal was for the sausage-making trade.—Prisoner was fined 40s. and £1 1s. costs, with the alternative of a month's imprisonment.—There were similar charges against Wm. Munns, carman, of Broadwall, George Adams, of Gravel Lane, and Arthur Gunn.—Inspector Rogers said that in each case the horse was very lame, and the prisoners admitted that the animals were to be shipped abroad from a wharf in Tooley Street.—Samson Gosbee, horse-dealer, of Pepper Street, Borough, was summoned for allowing the three men to take the horses out, he, it was alleged, being the owner.—Munns was fined 20s., Adams 10s. and 10s. costs, and Gunn 10s. and 10s. costs. Gosbee was fined 40s. and £1 1s. costs, in Munns' case, and was sentenced to 14 days' imprisonment on each of the other two summonses, the terms to run concurrently.

IN PARLIAMENT.

HOUSE OF LORDS.

Army Meat Contracts.

On Thursday the meat contracts question was raised by Earl Carrington, who wanted all available papers laid. He quoted Mr. Bergl's estimate that the Cold Storage Company had made six millions sterling out of its business transactions with the Government during the past two years.

Lord Raglan declined to produce the tenders asked for, as it would cause great annoyance to any firm to have thrown in their teeth the rates they had quoted to his Majesty's Government.

Lord Lansdowne said the question was, not whether the Cold Storage Company had made "very large profits indeed"—which he thought perfectly possible—but whether the contract with them was not the best that could have been made under the circumstances. He added that the Government remained of the opinion that an inquiry into the matter would be improper and inconvenient at the present time.

Lord Tweedmouth gave notice of his intention to move for a joint committee to inquire into the War Office arrangements for the outfit and maintenance of the troops in South Africa. Earl Carrington's motion was then negatived without a division.

HOUSE OF COMMONS.

Milk and Butter Adulteration.

On Monday General Laurie asked the President of the Local Government Board whether his attention had been called to the report of the public analyst for the borough of Paddington for the quarter ending 24th June, 1901, in which it was stated that, on a conviction for adulteration of milk by adding 22 per cent. of water, the magistrate inflicted a fine of 5s.; and, in view of other similar prosecutions by local authorities for adulteration of milk and butter which had either failed in consequence of the terms of the contract or other such reasons, or had resulted in either only the imposition of costs or modified fines, whether he could, by legislation or by other means, enable the local authorities to enforce the law against adulteration, especially of those articles in constant demand among the humbler classes.

Mr. Long: I have not received the report referred to in the question. I have no authority to intervene in the manner suggested, nor does it appear to me that I can undertake to promote legislation on the subject. I may specially point out that it must remain in the discretion of the magistrates whether a fine should be inflicted in any particular case, and, if so, what the amount should be.

Ratings of Urban Sites.

On Wednesday Mr. Trevelyan moved the second reading of the Urban Site Value Rating Bill, which, he said, would effect a fundamental alteration in our system of local taxation, and open up a source of revenue which had hitherto been largely neglected. The Bill was founded upon the report presented by the Local Taxation Commission, and the rate would be levied on the annual value of all land as distinct from the value of the buildings upon the land. It would be charged upon the present tenants, but in the case of future tenancies, the tenant would be entitled to deduct from his rent the half of the rate levied on the site value. The total amount of the new rate would be limited to two shillings in the pound on the site value, and the proceeds would be devoted to municipal purposes.

The rejection of the Bill was moved by Mr. Griffith-Boscawen, and seconded by Mr. Ridley.

Mr. Haldane thought the Bill wise and moderate. Mr. Cripps held that no case had been made out for putting a tax on site values. Mr. Fletcher Moulton spoke in support of the taxation of land values, but Mr. Vicary Gibbs held that the difficulty as to existing contracts was insuperable. Sir E. Grey held that the Bill, though a piecemeal one, was practical and just.

Mr. Grant Lawson, on behalf of the Government, opposed the Bill, which, he said, was put forward by those who advocated repudiation of contracts, spoliation of minorities, and general chaos. The question ought to be dealt with by the Government, and the Government intended to deal with it, though he could not say when.

Sir William Harcourt contended that the principle of the Bill was a just one, and that the country was determined that the matter should be grappled with.

On a division, there were:—

For the Bill	158
Against	229
Majority against	71

Remounts.

In reply to a question by Mr. J. A. Pease, on the 7th inst., Mr. Brodrick said that the number of horses captured in South Africa was reported by Lord Kitchener to be 89,705, and about 25,000 of these had been reported as commandeered or purchased. In that number of captures all horses were enumerated and not merely those taken for military purposes. The numbers purchased from other countries for South Africa between 1st October, 1899, to the 31st December, 1901, were as follows: — United Kingdom, 59,800; South America, 25,872; United States of America, 77,101; Canada, 11,304; Hungary, 23,935; and Australia, 20,015. In South Africa the total number of horses and mules purchased was approximately 228,000. The figures for horses could not be immediately separated from mules. The publication of the exact prices had always been declined. Any statement as to the average price would be taken at once to be the lowest price the dealers would ask.

On the 11th inst. Sir Blundell Maple asked the Secretary for War whether he could say how much money was paid during the years 1899, 1900, and 1901 for the call on horses in case of war; how many horses were requisitioned and bought; and whether the horses were claimed through the Remount Department; and would he state whether some firms who had received money for some years had had no requisition made upon them.

Mr. Brodrick: The sums paid as retaining fees for the financial years 1899, 1900, and 1901 to date, amount to £15,707. The number of registered horses which were requisitioned and bought during this period was 6,350. The horses were claimed through the Remount Department. Some firms who had received retaining fees had no requisition made on them because their horses were not of the stamp required for the special conditions of service in South Africa.

Sir J. Blundell Maple asked whether the horses were examined yearly to see whether it was worth while for the country to pay the fee.

Mr. Brodrick: Yes, sir, they are examined.

Mr. Labouchere asked the Financial Secretary to the War Office whether he could state now many horses had been sent under contract with the War Office from Argentina to South Africa, and what was the contract price paid to Messrs. Houlder per head for their transport across the sea.

Lord Stanley: The number of horses was 25,872. The average contract price per head paid to Messrs. Houlder for sea transport was £14 5s. 3d.

In reply to a further question by Mr. Labouchere, Lord Stanley said a discussion took place with Mr. Vickers in reference to a proposal to deliver 2,000 Hungarian horses at Capetown at £35 each. This was subsequently raised to £49 15s., it being found impossible to provide the horses at the lower price, but no contract was entered into with Mr. Vickers at one sum or the other. Nothing is known of his alleged communication to Colonel St. Quintin. A contract was subsequently entered into with Messrs. Van Laun and Co. for the supply of transport for all the horses purchased for the Imeprial Yeomanry in Hungary in full cargoes on first-class British steamers from Fiume or Trieste at £26 5s. 4d. per head for the first 1,500, and £28 per head for all over that number, inclusive of the supply of fodder, water, fittings, attendants, and insurance to Capetown, and also victualling and transport of attendants from Szabadka to the ship.

Army Meat Contracts.

On the 13th inst. Lord Stanley, in reply to several questions, said the persons named by him in connection with the formation of a company to carry out Mr. Bergl's contract had undertaken to procure the incorporation of such a company and to find the required capital. Registration had been applied for at Pretoria, but the notification had not yet arrived at the War Office. The capital of the company was £650,000. No communication of any sort or kind took place between the Government and Mr. Rhodes or anybody professing to represent Mr. Rhodes before Mr. Bergl submitted his tender for the meat contract. A number of firms who might possibly compete for the contract were invited to call at the War Office to obtain any information they required before tendering. Over thirty attended, among whom was Mr. Bergl, and the same information was supplied to them all. (Ministerial cheers.) He was not aware that any cattle captured in South Africa had been sold by auction or private tender to the Cold Storage Company, but in the contract just made captured cattle would be utilised wherever possible to reduce the quantities required of the contractor.

Established 1808. *Telegrams*—"Peck, Wigan."

The Treatment of the Break Stock.

Trade in home-made flour has been very dull and lifeless during the past fortnight, prices in many parts having been reduced 6d. per sack. Bakers have only been buying from hand to mouth, but in many cases stocks are low, and they will have to come into the market soon. Owing to the cold weather of all sorts of offals continue to go off well at very remunerative prices. Medium bran has been making as much as £5 10s. per ton, and broad bran is making £6 5s. up to £6 10s. per ton. So great is the demand that many millers have been grinding wheat for the sake of the offals, which has a cheapening tendency as regards flour. English wheat has been offered rather more freely, but most of it is not in such good condition as it has been, while odd parcels have been coming to the mills in a very indifferent state. The weather is, no doubt, the cause, and therefore an improvement may be expected with improved climatic conditions.

The Plansifter.

The plansifter does not seem to be making much headway in British mills, although it can be very advantageously used in scalping and grading the break stock. At the same time, some millers are using the machine for making all the separations in the mill, even to dressing the flour. The writer would not employ it for the latter purpose, but he knows good millers who are so using it. In fact, there is scarcely a machine used in modern flour mills to-day about which such a diversity of opinions is held. Odd members of the trade swear by it, and profess they can do better work with it than with any other machine; the great majority of millers who possess plansifters only use them at the head of the mill, and refuse to be allured into adopteing them as flour dressers; while there are others who prefer other appliances for treating the break stock. That the process of scalping, grading, and dusting stock for purifiers is a very important one, whatever machines are used for the purpose, no miller will deny.

The success of the process, to a very great extent, depends upon the way in which the wheat is broken down, but given good shaped middlings, reasonably free from break flour, the work of the scalpers is much facilitated. Good-shaped, granular middlings cannot be made on dull rolls, and therefore the roller man should keep an eye to the latter, with a view to having them re-grooved when they become dull. Six months will often be found long enough to run rolls without re-fluting, although some millers work them for nine months before sending them to the milling engineer's works. It has unanimously been decided that

the saw tooth is the best

for the wheats milled in this country, and that the most satisfactory way to run rolls in relation to each other is with the face of the fast roll to the back edge of the slow roll. This gives exactly the treatment required, while the grooving of the corrugations at about an angle of 15 per cent. to the plane of the axis of the roll spindle is conductive to the making of the best-shaped stock for purification.

All feeds going to and coming from rolls should receive constant attention, so that any little variation may be seen and rectified. If the rolls are sharp, and correctly set for the different kinds of stock under treatment, there will be less break flour and that of a better quality. For a straight grade flour, however, it matters little about the quantity of break flour, provided the stock is ground and not squeezed. The use of differential and angle of grooving are intended to produce a shearing action upon the stock, for while the slow roll is holding the fast one is pulling. A piece of indiarubber the size of a wheat berry, when subjected to this treatment, would stretch some distance, but as the wheat berry will not do this it breaks.

The angle of grooving has another effect also, in that it prevents the interlocking of rolls, which is sometimes the case when the grooves are cut parallel to the axis. If cut at an angle of from 10 deg. to 15 deg. the teeth of the two rolls cross each other, and the action upon the stock is

Like that of a Pair of Scissors

or shears. By lay experience these have been found to be the best conditions for grinding, and if they are carried out upon perfectly clean, thoroughly-conditioned wheat, the first step in what has really become a most scientific process will have been properly taken. But the careful treatment of the break stock must not end with the rolls; the grading and dusting are equally important. The more sizes into which the middlings are graded, in reason, the more perfect will be the result achieved. In small mills it will be found unnecessary, probably, to make more than three—semolina, middlings, and dunst—which would go to three separate purifiers, unless, however, the dunst is rolled—a practice which is often carried out. In large mills seven or eight, or even more, sizes may be made with advantage, and then the operator of the purifiers can set his air-draughts to act with good effect on each size. The machines used for separating the break stock are of less importance, provided the type used is the best of its class.

Sieves and Centrifugals.

The writer has already criticised the plansifter, and the other machines generally used are rotary sieves, centrifugals, and inter-elevator reels. The reel is old-fashioned and has not enough capacity. The inter-elevator reel is a kind of compromise between that machine and the centrifugal, its best use being on dirty stock, because it has just sufficient action to separate the flour without making more from the fine middlings. Probably more mills are using rotary sieves for scalping than any other machine, the incline being about one inch to the foot and the throw of the eccentric a little more than one inch—in some cases one and a half inches. Such scalpers should have two sieves, and then with the tail-over three very satisfactory separations for future treatment can be made. The centrifugals which are used for scalping are of a distinct type from the old machine of that name, in that they are of much smaller diameter—about two feet—while the beaters are very adjustable. In spite of their supposed roughness upon the stock they are doing excellent work in the mills in which they are being used for the treatment of the break stock.

MILLER-FARMER.

New Agricultural Patents.

Specially compiled for *Mark Lane Express* by Mr. G. D. Howard (Hughes, Son, and Co.), patent agent, 38, Chancery Lane, London, of whom all information relating to patents, designs, and trade marks may be obtained free of charge.

180.—Thomas Edmund Rowe, of Northwich, for "improvement in the mechanism of one way plough, whereby the alternative movements of the implement may be put in and out of action in one movement."

25,967.—Joseph Israel, of Holborn, London, for "an improved roller mill for cereals."

Estd. in the year 1833. | **ROYAL ANIMAL MEDICINE MANUFACTORY, 22, DORSET STREET LONDON, W.** | Beware of Imitations.

THE "SVEA" SEPARATOR

The "SVEA" Separator is the Cheapest because it is

THE SIMPLEST, THE STRONGEST,
THE MOST DURABLE, THE EASIEST TO TURN,
A PERFECT SKIMMER, and
HAS THE GREATEST CAPACITY.

The **"SVEA" Separator** being thoroughly up to date, embodies the following improvements:—

1.—**The Short Bowl Spindle** replacing the usual long one, which so soon gets damaged if not handled with great care.

2.—**The Patented Top Bearing** by means of which the bowl is supported at **both** top and bottom.

This is a special feature of the "SVEA," and is considered a great advantage as contributing to the smoother and easier running of the bowl, also preventing all accidents.

3.—**The Simplicity** of the skimming arrangement consisting of only a few rings or discs (in the small sizes 4) instead of the usual large number.

4.—**The Bowl is easy to take to pieces and clean.** This fact and the small number of the parts to clean will be much appreciated by every one used to Separators.

5. **The Conical Lugs** on the inside of the Bowl Top make it **impossible for the Bowl to get out of balance** by reason of the threads becoming worn.

6.—**The easy and noiseless motion** effected by the use of Conical Gearing instead of the usual cylindrical one, thus permitting the

7.—**Reduction of friction and wear** obtained by the position of the worm wheel, at an angle of 45° to the worm, instead of the usual right-angled gearing.

8.—The **extraordinary strength** and good workmanship of the machine throughout.

Table of Sizes & Prices

No.	CAPACITY PER HOUR.	PRICE.
1	20 galls.	£9 10 0
2	33 „	11 10 0
3	55 „	17 0 0
4	75 „	23 0 0

The "SVEA" Separator is fitted with an automatic device regulating the inflow of the milk.

The "SVEA" Separator is sent on trial. Carriage paid. No extras.

S. P. & S. "SAFE & SURE"

VETERINARY SPECIALITIES.

PATENT DUPLEX LAMBING AND FARROWING FORCEPS.

No breeder of Sheep or Pigs can afford to be without them, as they repay trifling cost tenfold first time used.

To Masters of Hounds, &c., will be found equally invaluable for Bitches, and *this size of dog generally*. Approved of by eminent veterinary authorities; hundreds were sold last season, and gave great satisfaction.

"INVICTA BLACK MIXTURE."

For exhaustion and after-pains in foaling, calving, and lambing. A powerful Anodyne and Anti-spasmodic for Gripes, Fret or Colic in Horses; Tonic, Alterative, and Astringent in Scour or Diarrhœa, Dysentery, and Debility in Horses, Cattle, and Sheep. 1s. 9d. per bottle 1 doz. case, £1.

"VIRIDOLIN" (Regd.).

A powerful Antiseptic for dressing in lambing and calving. Extensively used as a general healing agent for wounds of every description in all animals. Invaluable for Humours in Cows' and Ewes' Udders, &c. 2s. and 5s. per bottle; or ½-dozen 2s. bottles in case, 10s. Ointment may also be had, 2s. 6d. and 3s. 6d. per pot.

"RED ANODYNE EXTRACT."

For Inflamed Udders in Cows and Ewes it is invaluable. For Cows and Ewes in difficult parturition, it stops Heaving and prevents Gangrene or Mortification. Used both for external use as a lotion, and for internal administration. 2s. and 5s. per bottle. Special instructions for use in lambing and calving on 5s. bottle.

"YELLOW DRENCH" (for Sheep).

For Chills, Colds, Fevers, Red Water, Costiveness, Cleansing after Lambing, Swollen Udder, &c. In packages, 1 dozen, 3s.; 6 dozen, 17s.; and 12 dozen, 33s.

TENDERS.

EDMONTON URBAN DISTRICT COUNCIL.
TENDERS FOR OATS.

THE Edmonton Urban District Council invite TENDERS for the SUPPLY and DELIVERY of OATS at the Edmonton Sewage Farm, or at the Cemetery, Church Street, Lower Edmonton, for the period between the 31st March, 1902, and the 30th September, 1902, or the 31st March, 1903, at the option of the Council.
Forms of Tender and full particulars may be obtained of Mr. G. EEDES EACHUS, Engineer to the Council, Town Hall, Edmonton.
It will be a condition of contract that the firm whose Tender is accepted shall pay to all workmen in their employ not less than the trade union rate of wages in force within the District.
Tenders, endorsed "Tender for Oats" (with samples), to be delivered at my office not later than 12 o'clock (noon) on Tuesday, the 11th day of March, 1902.
The Council do not bind themselves to accept the lowest or any Tender, and any person whose Tender may be accepted will be required to enter into a proper contract with bond, and to supply sureties, to be approved by the Council, such contract and bond to be prepared, executed and completed in every respect, at the expense of the Contractor.
By order, WM. FRANCIS PAYNE,
Clerk of the Council.
Town Hall, Edmonton,
February 27th, 1902.

TENDERS.

TO CORN MERCHANTS.
BOROUGH OF HAMPSTEAD.
The Council of this Borough invite TENDERS for the supply of HORSE PROVENDER for six months from 1st April, 1902. Forms of Tender may be had and full particulars obtained on application to the Borough Engineer, at the Town Hall. Tenders to be delivered at my office by 5 p.m. on Thursday, 6th March.
No Tender will be received unless accompanied by £10 in cash or bank-notes (not to be enclosed) as an evidence that the Tender is made bona-fide; the amount to be returned if Tender not accepted, but to be retained in the other case until contract is duly signed. In the event of a Tender being withdrawn the deposit will be forfeited.
The expenses of preparing and stamping contract to be paid by the contractor.
The Council do not bind themselves to accept the lowest or any Tender.
By order, ARTHUR P. JOHNSON,
Town Hall, Town Clerk.
Hampstead, N.W.
February 25th, 1902.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J.A. is now booking orders. N.B.—Polled Angus or West Highland Heifers and Black-faced Gimmers, Ewes, Wedders, and Lambs for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

CATTLE FOR WINTERING.—J. A. will be glad to receive orders for the purchase of Cattle, which, owing to the shortness of straw in Scotland, can now be bought cheaply. A good profit should be the result either for feeding or wintering.

CATTLE AND SHEEP FOR WINTERING. E. GOODWIN PREECE, Live Stock Agent and Exporter, Shrewsbury, will be glad to receive orders for the PURCHASE of CATTLE and SHEEP, which, owing to the shortness of winter keep in the West of England, can now be bought very cheaply. A good profit is assured either for feeding or wintering.

Several lots of Shropshire and Clun ewes, Shropshire, Oxford and Lincoln rams, and cattle of various classes on sale, which can be seen by appointment.

Address, Portland House, Shrewsbury.

PUBLICATIONS.

SULPHATE OF AMMONIA.—Farmers and cultivators of the soil should give this valuable fertiliser a trial. It is the best artificial manure for grass, wheat, barley, roots, potatoes, &c. One ton of Sulphate of Ammonia contains as much nitrogen and will go as far as 25½ cwt. of nitrate of soda. It is not washed out of the ground by rain, and is not so readily exhausted from the soil as nitrate of soda. Pamphlets of instructions for its use will be forwarded, post free, on application. Present price (free on rail at Sheffield), 11s. 3d. per cwt.; larger quantities specially quoted for. Cheques and post office orders to be made payable to the Manager, THE SHEFFIELD UNITED GAS LIGHT CO., Sheffield.

COD LIVER OIL.—To merchants only.—HUGH HIGHGATE & CO., Oil Refiners, Paisley, N.B.

COW MILKER! COW MILKER! The Celebrated self-acting Cow Milker supersedes hand labour. Milk each cow in four minutes effectually. Price 6s. each delivered.—Circular, with testimonials, on application, N. BUCHANAN, 9, Sandon Place, Sheffield.

VESICO SUDORIFIC.—No Blemish! No Rest! No Cradle! Vesico Sudorific is the quickest, safest, and most famous cure for Splint, Spavin, Ringbone, Sidebone, Capped Hock and Elbow, Curb, Windgall, Tumours, and for Strengthening the legs of Horses. Price 2s. 6d. or 5s., of Chemists, or post free, GREGORY & CO., Temple, Bristol.

BEST & CHEAPEST MANURE for all farm and garden crops, "NATIVE GUANO," a safe and reliable fertiliser, and an effectual remedy for fly, slug, wire-worm, &c.; price £3 10s. per ton in bags, 2 ton lots carriage paid, 1 cwt. paid to any station in England on receipt of P.O. for 5s. Extracts from 26th annual collection of reports: Native Guano for Grass, Grain, and Root Crops. G. Dickson, Selby: "Oats and barley did well Heavy crop of cattle cabbage. Highly satisfied." E. Stanford, Warnham: "Clover good. Stopped fly on turnips. A good manure." H. O. Habberfield, Forestfach: "Oats 60 bushels per acre. Mangolds, best crop I ever had. Very pleased." W. Price, Hardwick: "A cheap and good manure for clover and swedes." J. Knight, Wisbech St. Mary: "Very good crops of mangolds and potatoes. Biggest and finest potatoes I ever had." W. Allsopp, Bloxwich: "Mangolds the finest crop ever seen on the farm. Swedes excellent." G. W. Gilbert, Boultham: "Cannot speak too highly of it for wheat; answers well for grub and wire-worm." J. Powell, Lulsley: "Hops, a very good crop."—Orders to the NATIVE GUANO CO., LIMITED, 29, New Bridge Street, London, E.C., where TESTIMONIALS FROM ALL PARTS AND FOR ALL CROPS MAY BE OBTAINED. AGENTS WANTED.

"Ideal" Lubricating Oil.
Reliable and cheap (2s. per gallon). Never freezes or gets sticky, therefore the best for general purposes and particularly for Roller and Ball Bearings. Catalogue free from Local Agents or direct from Importers
F.C. SOUTHWELL & CO. 75, Southwark St. London, S.E.

SUTTON'S FARMERS' YEAR-BOOK
For 1902
Should be read by all interested in Agriculture.

THE TIMES, in reviewing this Book on February 17th, says:—"'The first seed harvest of King Edward's reign was an excellent one.' These cheering words appear in the preface to the 1902 edition of 'Sutton's Farmers' Year-Book and Graziers' Manual.' They serve to convey to the farmer the satisfactory intimation that in purchasing his seeds during the next few weeks he will be able to obtain what he requires at moderate figures, and at prices lower than he has had to pay in some recent seasons. Of mangels the Prizewinner Yellow Globe is specially deserving of attention, and in connection with it we notice an admirable photograph taken on one of the farms at Lockinge, the property of Lady Wantage. Of swedes, the Magnum Bonum, the Champion, and the Crimson King carry their own recommendations with them. Views of field-crops of the Centenary turnip growing in Northumberland, of the Perfection green-top turnip growing in Dumfriesshire, and of the Imperial green-globe turnip growing in Berkshire, show clearly the shapely form and the heavy yield of these well-known varieties.

STALLION SELECTION.

THE magnificent Shire Horse Carnival of last week was truly one on which breeders may heartily be congratulated, both on account of the immense popularity the Shire Horse Society has acquired and the sterling excellence of the material brought out, giving evidence of a most unmistakable nature that there has been of late a considerable levelling upwards amongst studs in general, and that the breed is extending itself more widely and attracting to itself a greater share of public favour than at any former period. Little did Mr. Frederick Street think when, in the paper he read on "Cart Horses" at the Farmers' Club in March, 1878, he pointed out the necessity of a stud book for the breed and the establishment of a society to manage its affairs that he was throwing out an idea destined to fructify to such enormous magnitude. In the paper alluded to Mr. Street expressed himself thus:—"The Clydesdale and Suffolk breeders have started Stud Book Associations, and I hope that before this meeting closes a determination will be come to establish one for Shire horses. It is an acknowledged want, and never let it be said that breeders of horses of that description are indifferent to pedigree." Private stud books had been kept before, and some exceedingly high prices made of celebrated sires, some of which Mr. Street mentioned in his paper. As these were realised so early, it may be of public interest to quote them:—Honest Tom, £500; Prince of the Isles, £800; Young Samson, £750; Paragon, £600; the two-year-olds King Tom and Marvellous, £500 each; and British Wonder, £550. Mr. Street also stated:—"Two years since Mr. Stokes refused 1,000gs. for Young Champion, own brother to Mr. Statter's celebrated horse of the same name."

One of the chief needs for the new organisation proposed by Mr. Street in 1878 was that farmers might be able to make sure of getting the services of stallions of pure lineage. The canny Scotch had adopted Stud-book Register with their Clydesdales many years previously, as well as the Glasgow Stallion Prize Show for the hiring of stallions. This was clearly shown by Mr. Finlay Dun in the discussion on Mr. Street's paper. He said:—"It was a wonderful and most satisfactory sight to see collected at Glasgow during the show week upwards of 200 splendid stallions, exhibited there before the representatives of about 40 different stud associations, which caused the best-bred, best-constitutioned, and most symmetrical of the horses to go for the season into the various districts of the country." Mr. Dun further stated that the Glasgow Clydesdale Show had been then in existence for twenty years. The last show, held on the 5th of February of this year, was stated to be the 42nd, but as there were only 130 entries, the number exhibited would appear to be less than in 1878. Possibly the rapid and very great extension of the Shire-bred variety has had the effect of diminishing the numbers of the Clydesdales, although their best judges state that in a combination of high quality to grand forms they have improved greatly to what they were formerly. A telling example of how potent is the influence of certain family Clydesdale lineage is afforded by the fact that the stallion Baron's Pride, still in his prime, has no fewer than twenty-two sons

all having been hired by district horse clubs and societnes for service this season.

At the time of the formation of the Shire Horse Society, the Clydesdale threatened to be the whale to swallow up Jonah. The characteristics of the two breeds had been so intimately assimilated by the frequent employment of Clydesdale stallions on shire mares that only experts could detect any difference in the two breeds. One horse was actually exhibited at a Scotch show as a Clydesdale, and subsequently at an English one as a Shire horse. Captain Heaton, in the discussion on Mr. Street's paper, thus expressed himself: "He feared that unless something were done their Scotch friends would completely knock their legs from under them. They all knew that Scotchmen often came to England to carry back with them hundreds of Shire-bred mares, hence they derived many of the characteristics of th latter." The late Mr. Lawrence Drew, who bred more Clydesdale show winners than any other stud owner of his day, persistently blended the two breeds, and was accustomed to declare the best Clydesdales to be those possessed of a considerable intermixture of Shire blood. There cannot be the slightest doubt that there was great advantage in crossing the two breeds, greater activity of limb, and perhaps more quality, being imparted by the Clydesdale, whilst the Shire-bred could give massive substance, strong bone, and more powerful muscular development. Some farms naturally require lighter framed horses than others, and the Suffolk is considered for activity to surpass even the purest bred Clydesdale.

Farmers do not always consider the character of their land, however, in the selection of their cart mares when they have to perform the dual service of breeding foals as well as tilling the soil. Good shire foals have brought such high prices in recent years since H.M. the King and several distinguished noblemen bred Shire horses and made them so popular, that if the pastures are at all fitting, the Shire horse breed is given preference to, whether the land be heavy or light. The show of the Shire Horse Society offers them the several advantages of exemplifying what are the best lines of breeding and those calculated to prove most remunerative, the opportunity of being brought into contact with the owners of the prize-winning horses, or their agents, while the large number of animals now entered for the auction, these being of both sexes, and of all ages, causes it to be far easier than formerly for anyone either to enter the lists as a breeder or to improve the stud already possessed by the selection of a better sire.

Then there is the important enterprise of producing stalwart geldings fit for street work, one calculated to suit many farmers far better than competing in the higher branches of cart-horse breeding. There has been a gradual increase in the numbers of geldngs at the shire horse show until, from 16 five years since, they this year reached to the respectable figure of 41. The system of which the late Lord Wantage set the example of buying young geldings to train to the collar, and, after working them two years, selling them to brewers, etc., when just in their prime, might be followed remuneratively by not a few farmers who are unable to pursue breeding.

The question is often asked, why farmers do not go in more for half-bred horses adapted for army remounts, and the reply generally given is that it pays them better to breed cart foals. There are, however, lands not at all well adapted for breeding heavy horses, which might be appropriated to the object if the Government were more liberal in the purchase money, and were to take them off the hands of breeders a year younger than the present age limit. Moreover, the services of the King's premium thoroughbred stallions, to be selected at the show next week, ought tob e exclusively for the advantage of the tenant farmer section of the community. At present country gentlemen in general get the benefit.

By a Man of Mark Lane.

In the House of Lords on Monday Lord Tweedmouth moved for the appointment of a joint committee to inquire into all contracts and purchases made by the War Office in connection with the war in South Africa. After a somewhat heated debate, in which Lord Selborne, the Earl of Rosebery, the Marquis of Lansdowne, and the Prime Minister took part, the motion was defeated by eighty-eight to twenty-five votes.

At the conference of the dividing friendly societies, held at the Queen's Hall on Tuesday, a resolution was adopted expressing unqualified approval of the old age pension scheme drawn up by its executive committee, and urging all freindy societies to use every legitimate means to bring about legislation in the direction indicated. It was also resolved to seek an interview with some Minister, with a view to laying the scheme earnestly before His Majesty's Government.

The receipts on account of Revenue from April 1, 1901, when there was a balance of £5,596,918, to February 22, 1902, were £122,777,324, against £112,948,213 in the corresponding period of the preceding financial year, which began with a balance of £3,517,047. The net expenditure was £173,371,819, against £162,813,713 to the same date in the previous year. The Treasury balances on February 22, 1902, amounted to £10,931,098, and at the same date in 1901 to £7,078,998.

A special meeting of the Yorkshire Union of Agricultural Clubs and Chambers of Agriculture will be held at the Agricultural Club House, Pavement, York, on Saturday next, at 11.30 a.m., to consider the desirability of requesting the Chancellor of the Exchequer to receive a deputation from the above Union urging the advisability of imposing a duty or registration fee upon foreign flour and cereals, or a duty or registration fee upon similar lines, to partly meet the expense of the war. I may mention here that, in consequence of unforeseen official business preventing Mr. Hanbury from visiting York on Thursday, March 6th, the annual dinner of the Union has been postponed from March 6th until Saturday, March 8th, when the dinner will be held at the De Grey Rooms, York, at 1.30 p.m. (instead of 1 p.m.).

The delegates to the Sugar Conference have come to an understanding, and have entrusted the Belgian Government with the drafting of a Treaty, the terms of which are to be considered by the delegates to-morrow (Tuesday). It is stated that the Treaty will provide for the suppression of all bounties, the fixing of a surtax of six francs, and the establishment of a permanent committee to arbitrate on all sugar questions.

According to the District Officers' reports on the rice-crop prospects on the 31st December, 1901, in the fourteen chief rice-produ-cing districts of Lower Burma, the area under rice cultivation is 6,482,657 acres, being an increase of 21,008 acres over the area reported in December last, mostly due to revised figures from the Pegu district. The anna estimate is practically not altered.

Sugar Beet Experiments.

Sir,—The report by Mr. Sigmund Stein on the growth of sugar beet is most interesting, and must convince most people that sugar beet can be grown in England quite good enough for the manufacture of beet sugar, but I have often been asked if the sugar beet would deteriorate by being kept.

To show whether this is the case I have had some of the roots that were grown last year, and stored in the ordinary way, again analysed by Mr. Sigmund Stein, and the result is most satisfactory.

The roots sent for analysis were fair average ones, but they are rather heavier than those sent in October last. The average weight now is 983 grammes, as compared with 923 in October. The dry matter has increased from 18.80 to 21.60. The quantity of sugar in 100 parts of the juice from 16.50 to 19.00. The quotient of purity from 87.76 to 87.96. The quantity of sugar in 100 parts of the roots from 15.80 to 17.00.

There is, in fact, a substantial gain all round in the analysis of the roots at the present time as compared with what it was in October last, but, of course, some part of this may be on account of the roots not having been quite fully matured when they were taken up in October, but in this case it will be only necessary to store them for a time, when the full value of the roots will be brought out, and this would be a decided advantage, if we had a cold, wet season.—I remain yours faithfully,

HENRY H. CAVE.

Estate Office, Rugby,
February 24th, 1902.

Mr. T. Morris Prosser, secretary of the Monmouthshire Chamber of Agriculture, has forwarded us a list of the intended meetings of that Chamber during the remainder of this year, at which, as has been the case at former meetings, subjects of interest and importance to agriculturists will be discussed. The dates and places of meeting are as follows, the time in each case being 2.30 p.m.:—Tuesday, March 25th, Chepstow; Monday, April 21st, Usk; Monday, May 26th, Monmouth; Tuesday, October 28th, Abergavenny; Thursday, November 27th, Blackwood; Wednesday, December 31st, Newport. The annual meeting will be held at Chepstow, on Tuesday, January 27th, 1903, at 12 noon, and a general meeting after dinner, at 2.30 p.m.

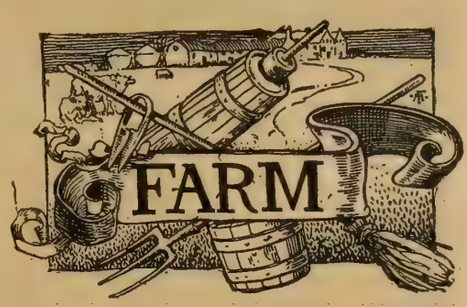
By a Lobbyist.

Mr. Hanbury had a striking evidence of his personal popularity on returning to the House of Commons after his illness. A sympathetic remark from a fellow Member induced a chorus of appreciative "Hear, hears." As a fact, the House honestly likes a man who is anxious to do good work. The Minister for Agriculture is still thought of as an administrator, with, as he was once described, "a complete thirst for added responsibilities." If that thirst is at this moment unsated, the fact is held to be due to a cadent and not to any intention on the part of the right honourable gentleman. His lot is just now cast in times when the Legislature has only an eye for the lurid and the scintillating — for legislative spectacles which are accompanied by the dire monotony of death and war. Mr. Hanbury certainly looks as if his illness has, to use a queer phrase, done him good. He is burly and bold, and has a colour worthy a son of the soil himself. Apparently he is in good spirits. Would that he could exhaust those spirits, or something more fascinating and useful than the dull and dreary round of official routine.

A distinguished Roseberian has thrown a somewhat interesting sidelight on the hate which is now being so plenteously lavished on Lord Rosebery by certain members of the Radical family; and this side-light has a direct interest for my readers. Lord Rosebery has hopelessly offended the Manchester School—perhaps, the most selfish school that ever intruded itself into into British politics; and that not merely by reason of his attitude towards the war and his refusal to regard England as the Mad-Moloch of Europe, desirous only of an eternity of Little Republics for breakfast, but also because of the fact that he is in some degree a suspect towards that Manchester-reverenced fetish, Free Trade. You will probably recall that when his lordship addressed the members of the Liverpool Corn Exchange he suggested that Free Trade might have been responsible in some indirect way for the ills that have befallen agriculture, and the agrarian and corn interests. He did not in any way decry Free Trade, and he did not for a moment suggest the re-imposition of the Corn Laws; he did not even hint a disbelief in the virtues of Cobden and of Bright. But this was enough. These Manchester Schoolites have hitherto gone about lisping this Liverpool phrase, not as though, I must confess, they loath it, but rather as a delicate morsel singularly palatable to the tongue; and their janissaries in the press have added insinuations which, in their persistence, cannot but suggest a further doubt in Lord Rosebery's loyalty to the faith of Gladstone. Mr. Chamberlain is hated by these men because he has frankly advised the adoption within the Empire of the Zollverein policy. I should not greatly wonder if in the near future we hear the malignant enemies of Lord Rosebery linking him with Mr. Chamberlain as the arch-enemy of Free Trade.

I am bound to say that I have found in the House of Commons nothing but appreciation of the character of the Government committee which has been appointed to inquire into the state of our neglected forests in particular and into the condition of forestry in Great Britain in general. The Minister for Agriculture had many suggestions presented to him of men who should be associated with this important investigation. A whole army of amateur foresters were anxious to place their services at the disposal of the Government, and to help to reveal to an indifferent country how the art of afforestation is dying out. These seductive suggestions Mr. Hanbury wisely resisted, and he has provided for us instead a committee composed largely of experts, but just having that infusion of outside common-sense which may tend to relieve some of their suggestions of the spirit of technical pedantry. Mr. Munro-Ferguson, M.P., who is to be the chairman of the body, has not intruded his knowledge of forestry upon the world; but I happen to know that he has for years given the subject a good deal of attention, so far as it affects Scotland. He is, indeed, a most excellent woodcraftsman, and has done much to stimulate its study among his brother landowners in Scotland. It is a most excellent committee, admirably representative of the Empire, and predestined to advise the increase of educational facilities for the study of forestry and a more sympathetic attention to our woodlands.

For the moment the question of organising a disciplined method of supplying the army of the Empire with an adequate number of horses rather hangs fire. Do not understand from this that the matter is in danger of being abandoned, and that the idea of establishing horse-farms in England is a mere Midsummer day-dream. It assuredly is not. The British politician, however, has a keen scent for a scandal, and when he has his nose upon the trail naught can divert him from it. At this moment he has a veritable surfeit of trails offered him, and he will not be satisfied until he has run his quarries to their shelter. However, I am able to say that the well-known British gentlemen who have taken the matter in hand are not by any means willing to allow the matter to drop. It is not without significance that, since they have been suggesting to the War Office that it would be possible to secure a considerable number of horses from the agrarian districts of England if a practical system of preliminary grants-in-aid were adopted, the Canadian Government has shown an increasing disposition to stimulate the establishment of horse-farms in the Dominion, and the Australian Government has conveyed an assurance that our Federal Empire at the Antipodes was designed both by Providence and by man for the cultivation of horseflesh. Neither will these rival appeals operate to discourage the Englishmen who have taken up the matter. There is a lull in the movement, and I believe it to be a wisely-conceived lull. The public, envenomed as it is at this moment by scandals and scandal-inquiries, would give a practical scheme but scant attention. We want for this purpose an atmosphere less charged with electricity.



I have only to emphasise what I last week said as to the success of Mr. Grant Lawson in his role of Minister. This week he has appeared in the capacity of lieutenant to Mr. Walter Long, in connection with the London Water Bill; and he has spoken with a force, a cogency, and a sequence which have undeniably impressed the House. Like many another young Minister, he is still under the impression that it is his duty to seek to captivate the House of Commons by epigrams and by corruscating phrases. When Mr. Grant Lawson speaks in his own natural manner he will be an even greater success as a Front Bench man. He is an ideal country gentleman brought to politics, and his native ability is reinorced by that genial bluffness which never fails to lay hold of the sympathies of the House. It says something for him that he has already found favour with the caricaturists. Men like "F. C. E." would not heed him had he not created an impression. Mr. Grant-Lawson is not the kind of man to be intoxicated by his success. Still, I would have him a little more as he is, say, at home; I would have him carry a breath of the country-side to the Front Bench. That Bench will be the more fragrant for it.

Our List of Shows.

THE "MARK LANE EXPRESS" POCKET BOOK AND LIST OF AGRICULTURAL SHOWS.

Our list of Agricultural Shows is this year issued in the form of a pocket book, of a convenient size, which, in addition to containing the Show Fixtures for 1902, includes a large amount of useful information, consisting of Railway Rates for Stock, tables, etc. The Pocket Book consists of 72 pages and cover, and is of a size eminently suitable for the purpose for which it is intended. A vacant page for memoranda faces each page of the Show Fixtures, and this arrangement will be found of great use, enabling readers to easily and quickly make a note of any prospective engagements.

Copies of "The Mark Lane Express Pocket Book and List of Agricultural Shows" may be obtained on application at the offices, 1, Essex Street, Strand, London, W.C., the only stipulation being that ½d. stamp for each copy required is forwarded to cover the cost of postage.

British Forestry: Departmental Committee.

The Right Hon. R. W. Hanbury, M.P., president of the Board of Agriculture, has appointed a Departmental Committee to inquire into and report as to the present position and future prospects of forestry, and the planting and management of woodlands in Great Britain, and to consider whether any measures might with advantage be taken, either by the provision of further educational facilities or otherwise, for their promotion and encouragement.

The committee consists of the following gentlemen, viz.:—Mr. Ronald C. Munro-Ferguson, M.P. (chairman); Sir John F. L. Rolleston, M.P., Mr. Edward Stafford Howard, C.B., a Commissioner of his Majesty's Woods, Forests, and Land Revenues; Professor W. Schlich, C.I.E., Ph.D., Professor of Forestry, Royal Indian Engineering College, Cooper's Hill; Colonel Frederick Bailey, R.E., Lecturer on Forestry, Edinburgh University; Professor John R. Campbell, B.Sc., an Assistant Secretary to the Department of Agriculture, and other Industries and Technical Instruction for Ireland; Mr. John Herbert Lewis, M.P.; Mr. George Marshall, and Dr. William Somerville, an Assistant Secretary to the Board of Agriculture. Mr. Reginald H. Hooker, of the Board of Agriculture, isthe secretary to the committee.

Charlock Spraying Experiments among Corn Crops.

Some interesting results are given in the report of the results of Charlock spraying experiments carried out by the Technical Instruction Committee of the Lancaster County Council. The report written by Mr. F. P. Walker, states that Charlock is rightly regarded as one of the most troublesome weeds of the farm. It is only too plentiful in every part of Great Britain, and it is called by different names, according to the district in which it occurs. Ketlock, Kedlock, Yellow Weed, and Wild Mustard are examples.

Charlock does both direct and indirect harm when growing amongst the corn. The damage it does directly is easy to be seen and understood, but the indirect harm it works is insufficiently recognised as yet.

Among the indirect injury done by Charlock may be stated that it acts especially as the food and breeding place of the turnip flea-beetles before the ordinary cultivated food crops of the same great family as the Charlock are ready for their attack.

Time of Spraying.

The best time at which to spray Charlock is when it is about two to three inches high. At this stage the rough leaves are well developed, but the stem has not become woody. Another point which was particularly noticed is that the Char-

lock is more easily destroyed where the land is in good condition and the young Charlock is making rapid growth. Although it is undoubtedly better to spray the Charlock in this young stage, it does not follow that the spraying is not more or less effective even when the Charlock is in a much more advanced condition. It is shown that in some cases towards the end of May the Charlock was in full flower, and was growing so strong that it completely hid the corn crops. The Charlock was knee deep when sprayed, and the weather was calm and hot. In a few days after spraying the several farmers reported that, in the case of the copper sulphate solutions in particular, the Charlock was almost destroyed. The same remarks applied to the iron solutions, though in a less degree. Further examination, about a fortnight after spraying, revealed the fact that where the Charlock had not been completely destroyed, that which was left had stopped growing, and used up its energies to produce a few capsules of seeds at the top of the plant. This result is well seen if the illustrations on page 10 be examined. The barley and oats had received no check, and after spraying rapidly grew away from their enemy.

In the majority of cases when the demonstrations were given the weather was fine, calm, and warm. An inspection of the summary of results shows that when such weather prevailed the results were satisfactory, especially in the case of the rough-leaved Charlock, and proves conclusively that under such conditions the eradication of Charlock from corn crops is possible by means of spraying.

When, however, rain in any quantity followed within a short time of the spraying the results were not satisfactory, and prove that the spraying of Charlock in unsettled weather may not have the desired effect. This is one of the distinct drawbacks to the more general adoption of the method. It is also preferable to spray on a calm day; on a windy day the fine spray is not deposited on the leaves so evenly.

There are two kinds of Charlock — the true rough-leaved variety and the smooth or slate-leaved kind. After spraying at the different centres it was found that the rough-leaved kind had been destroyed by the spray, while the smooth-leaved variety had not generally been killed, though in some cases it had been considerably weakened, especially when sprayed in the very young stage. It is important, therefore, that each farmer should know what kind of Charlock grows on his land.

It would be well to state advantages and disadvantages of the use of sulphate of copper as compared with the use of sulphate of iron, as found from the demonstrations. The advantages of sulphate of copper are:—

(1.) It can be got and preserved in very fine crystals; this enables it to dissolve very quickly and in small quantities of water.

(2.) Small quantities per acre are necessary, and this causes no loss of time in waiting for it to dissolve.

(3.) It is much pleasanter to work with than sulphate of iron.

(4.) It is more destructive to the Charlock than sulphate of iron.

The disadvantages of sulphate of copper are:—

(1.) It is more expensive than sulphate of iron.

(2.) Unless bought from men of reputation it is liable to be adulterated very largely with green vitriol.

(3.) Copper sulphate solution eats holes in ordinary iron buckets; wooden buckets, therefore, ought to be used.

The advantages of sulphate of iron are:—

(1.) It is considerably cheaper per cwt. than sulphate of copper.

(2.) It is not so liable to adulteration.

(3.) It is said that in some cases it may be directly beneficial to the crop.

The disadvantages of sulphate of iron are:—

(1.) From four to five times the quantity per acre are required as compared with sulphate of copper.

(2.) It cannot be kept in very fine crystals without deteriorating; for this reason it takes a very long time to dissolve in the field, and thus occasions loss of time in waiting for it to dissolve.

(3.) It is a dirty, disagreeable substance with which to work.

(4.) It is not so destructive to the Charlock as sulphate of copper.

The cost of spraying per acre varies according to proximity of water supply, cost of material and labour in any particular district. Under favourable conditions, however, and using 15lbs. of copper sulphate, at 30s. per cwt. per acre, in 50 gallons of water, the cost should be about 3s. 4d. to 3s. 6d. per acre

The Borough.

I am happy to be able to report that business has continued to be fairly brisk during the past week. Indeed, for this time of year the number of transactions is exceptional, and factors have found very little difficulty in selling hops of all qualities at prices that show unmistakable signs of gradual hardening. The establishment of a stronger tone induces many holders to be very firm, and several lots have been withdrawn from offer. This action has naturally created a keener desire for business amongst buyers, and it is pleasant to feel that our commercial atmosphere is brighter in every direction. As the spring days lengthen, and sunshine increases its intensity, it is more than probable that we shall also experience a higher degree of warmth in our trade, and that the close of our season will be much better than its opening.

The Absorption of the 1901 Crop.

is practically secured, as it is reckoned by experts that at least 90 per cent. of the growth has now passed out of planters' hands. The sale of so large a proportion of so heavy a yield, at this early date, has probably never been before accomplished, especially when such an important part of it was at first pronounced to be unsaleable because of inferiority of quality. I ventured to express an opinion in November last that when brewers had culled out all the best parcels, and put them into cold stores for future consumption, they would take over the lower grades for immediate use with their "running beers." This forecast has been and is being realised. The course of the trade is in a general sense traceable on the lines I then sketched. The disposal of so many hops is in itself satisfactory, as we may now be certain that the market will not be loaded with any unsold balances of this crop, as it has been under similar circumstances in past years. But new conditions must not be forgotten, and even though I may risk the charge of tautology, I venture to emphasise previous remarks, and would earnestly remind growers that

Consumption does not Keep Pace

with the business done. Brewers are now taking the hops over, and will continue to do so, but only because prices are abnormally low. They do not need them for immediate use, but intend to hold them in reserve to provide for future contingencies. Cold storage provides them with security against deterioration, and therefore gives them control of future business, if they are not thwarted by the determination of growers to curtail future supplies. The paramount necessity of this policy on our part must be my excuse for still insisting upon it. If English growers could be organised into a compact army for self-defence their standard might be inscribed "Multum in parvo," Much (quality) in small (quantity). Until this principle of action is recognised and put in force, there is but little hope for our future prosperity or permanence. An old friend (a grower for 30 years), writing me last week, says that he should like to assist my efforts relative to the hop industry. He grows none but the best selections, and aims to achieve high condition rather than a big crop. Consequently he has nothing to complain of with respect to his average financial results. He thinks that if all growers acted on the same lines, not only would foreign hops be kept out of the country, but that any surplus we might produce would be taken up by foreign brewers. My friend is certainly declaring the good news of salvation for the English industry in thus giving us his experience. It is within the grasp of every English planter, if they will only profit by it, and organise themselves for its universal establishment.

Nuremberg.

A steady and fairly active demand is maintained in this market. Brewers are buying to the extent of some 200 bales per day, and in addition a small export trade for England has assisted the strong tone that is current. Some lots have also been shipped to America. Local consumers are naturally anxious to secure choice samples, but by their absence are compelled to accept lower grades, for the best of which full prices are readily obtainable. Some good Russians have been sold as high as 100s., and ordinary Hallertans, Badens, and Galicians have realised 105s. to 110s. The outlook of the trade is distinctly in favour of advanced values, as the demand for the spring brewings becomes developed.

France.

The planters in Burgundy have addressed M. Jean Dupuy, Minister of Agriculture, calling his attention to the depressed condition of their industry, and demanding an increase of the import duty on hops from 30 centimes to 45 centimes per lb. The Minister, in his reply, admits that the planters have passed through a trying period, and acknowledges that their case is deserving of the careful consideration of his department. He points out, however, that the difference in quality between Bavarian and Burgundian hops is sufficiently marked to render the former indispensable to brewers of light beers, and also mentions that the London market, which previously absorbed a large proportion of the Burgundian crop, is now closed to their produce to a considerable extent. The official letter concludes with the usual vague assurances of sympathy and promises of consideration, but no tangible comfort is conveyed to the aggrieved hop-growers. It appears that the methods of application are about the same in Republican France as in Monarchial England.

Belgium.

The trade is full of strength, based upon further small advances in values, and upon steady demand for consumption, which promises to continue. In the country market, the few growers who are holding hops are absolutely firm in their refusal to accept anything less than they are asking. Stocks in first hands are reduced to a minimum, and many dealers find difficulty in covering their contracts with consumers. On the Brussels Bourse the speculative market is also active, with a very firm tone. It therefore appears probable that much higher rates will be quoted in the early future.

America.

My information this week is only fragmentary, as my usual correspondents have sent me no reports; but I hear from other sources that the trade in New York is healthy, and is improving both in volume and value. Further reshipments have been made from England, and on the Pacific coast a distinct advance of prices has taken place, consequent upon active demand for home consumption. All these facts point to the probability of increased strength, and I expect that my next advices will enable me to refer to an important general upward movement in quotations.

Mr. Hanbury on the Work of the Board of Agriculture.

The Right Hon. R. W. Hanbury, M.P., the President of the Board of Agriculture, was the principal guest at the Taunton Farmers' Club's annual dinner, held at Taunton on Saturday. He replied to the toast of "His Majesty's Ministers," and in the course of his speech said that he regarded it not only as a pleasure, but as a duty, to go about the country, for there was no department of the State which he thought ought to do more to make itself known to those whom it represented. He wanted farmers to feel that the Agricultural Department was human after all, and he wanted them to realise that he wished to get rid of red tape as far as he possibly could, and to make the Department thoroughly practical and useful. As long as he was at the Board of Agriculture, his object would be to see that the English and Scottish farmers had exactly the same assistance as was given to the Irish farmers.

With regard to agricultural education, he was not disposed to hand that work over to the Board of Education, but he thought a great deal might be done in the elementary schools by co-operation between his own Department and the Board of Education, because they desired that the education given in those schools should be more of a country nature, and that it should not give the pupils a distaste for country life and make them only too anxious to run off to the towns.

Referring to the remount question, the right hon. gentleman said he thought the British farmer should know exactly what the wants of the War Office were. The British farmers had a right to expect that the War Office should let them know what horses, and how many, it wanted. They should also be afforded information concerning the estimates of foreign crops and what markets in foreign countries were open to British produce.

With respect to adulteration, he was determined to use every effort to see that the Acts were carried out, not only in the country, but in the large towns, many of which did not want to see them carried out. There were certain powers which the Board of Agriculture held in reserve, and if he found that the large towns did not do their duty in protecting the interests of the farmers and consumers, then the Board of Agriculture would step in and do the work which the local authorities ought to do. He considered the present milk standard was high, and that it did not give fair play to the ordinary farmers. In conclusion, Mr. Hanbury strongly advised farmers to bring about a more efficient combination in their own interests.

By Hordeum.

The Beer Duty.

Suggestions are being made in influential quarters that the present mode of determining the beer duty is a mistake, and that the excessive dilution of beer by brewers must be stopped in the interest of the Revenue.

There can be no doubt whatever that in the interest of consumers, as well as a safeguard against the further watering-down of duty, that the sooner this step is taken the better; in fact, very few reforms are open to the Chancellor of the Exchequer which can give him the power to benefit others, whilst fulfilling his first duty, viz., protecting the Revenue. Every step he takes is beset with difficulties from some interest or other, and in this instance, also, it will be certain to be opposed; but, looked at widely and fairly, we have reached the stage when it may be asked, should the basis of charge of beer duty be

Quantity or Quality?

Everyone now knows that when the malt tax was supposed to be repealed it was simply reimposed in another form, as the basis of charge remained upon the actual quality or yield of the materials used, and consequently upon the materials. It has been incontestably proved that the quantity of beer made has nothing to do with the amount of duty charged, and consequently it is a complete misnomer to call it a "beer duty." It is nothing of the sort.

Beer-drinkers are finding out that, as more profit is secured by the brewer when he reduces the quantity of malt used, in a twofold way he is being rapidly carried to the point where he pays a higher price for an inferior article. The reduction of the 4lb. loaf to 2lb., or of ell-wide cloth to 18in., is precisely on all fours with such a dodge, excepting that ignorant rustics can detect the two latter frauds, whilst very few can say if in beer the amount of malt and hops used is persistently decreased.

When five barrels of beer are made for the same cost for materials and duty as four, it is obvious the duty is made a source of profit more easily than the materials.

The Official Minimum

of duty is the charge upon four barrels of beer, or, say (disregarding minor allowances), 31s., and this any very ordinary malt can give. Such malt costs, presumably, very little more, when we find the average market price of barley at 27s. per quarter. If the brewer likes to make five barrels of beer instead of four, the cost for materials is nearly the same, and other charges are only slightly increased, but the charge for duty is precisely the same; it is perfectly stationary. Five barrels of a specific gravity of 1.044 are charged the same as four barrels at 1.055, and it follows that whilst in the one case the duty is 7s. 9d. per barrel, in the other it is only just over 6s. 2d. The Revenue officials collect 1s. per barrel more than when the duty was 6s. 9d. per barrel, but the brewer gets from his customer 1s. 6d. in its place. In other words, he makes a

Profit of 50 per Cent.

upon the additional duty he collects. It used to be the fashion for brewers to claim that they paid the duty, but as they disproved their claim through undue dilution. Consumers at last are realising that the duty falls Somerset House now keep up the contention. Consumers at last are realising that the duty falls upon them, and not only do they pay it, but in addition they are callled upon to contribute a farther sum, often amounting to 50 per cent. or upwards, to the brewer, which enhances his profits.

Now, there is another side to this question, and it is a very serious one. Will any alteration of duty further prejudice the interests of those concerned with the materials used by brewers upon which duty is levied? Malt pays more duty than sugar for the simple reason that the standards fixed by the authorities for sugar-use favoured that article. 224lb. of sugar or 256lb. of glucose or varying amounts of other malt substitutes are charged the same duty as 336lb. of malt.

The Differential Duty

has always been calculated by brewers when determining the relative costs of malt and sugar, just as there is always the allowance made for the value of grains in favour of malt. The really practical question is, will it be to the benefit of barley-growers if for the future the basis of charge is no longer the *quality* of the materials brewed, but the actual *quantity* of beer made or sold? Should every 36 gallons of beer or beerine consumed pay a uniform charge of 7s. 6d. regardless of its initial strength or gravity?

No one can doubt, if he knows the subject, that had the charge been so fixed twenty years ago, we should not have reached the extreme amount of dilution now all too common. This means the use of more material than is now employed, and it also means the removal of the cruel charge upon quality of material the present method inflicts. Were superfine malts not excessively charged, as they are at present, there would be greater encouragement given to all brewers to use better-grade barley.

IN PARLIAMENT.

HOUSE OF COMMONS.

Potatoes for the Troops.

Lord Stanley, replying to Mr. Mansfield, on Tuesday, said that no German potatoes had been sent to South Africa by the War Office. Local orders given in the past by the military authorities in South Africa had led to the supply of some foreign potatoes, but such orders had ceased. There was, therefore, no reason to suppose that there were any quantities of foreign potatoes still to be delivered.

Aids to Irish Agriculture.

On Tuesday, Mr. Wyndham, in reply to a question by Mr. Sheehan, said the Department of Agriculture in Ireland approves of County Councils including in their schemes under the Agriculture and Technical Instruction Act provisions suitable to rural conditions, such as the encouragement of cottage gardens, poultry-keeping, swine-breeding, bee-keeping, and instruction in domestic economy The Department also aids with loans of capial the establishment of agricultural banks. Labourers can participate in the seed and manure trials instituted by the Department, but seed is not distributed free, and is only supplied for the purpose of experiment. The Department contemplate an extension of the schemes applicable to cottiers.

Notice of Motion on Local Taxation.

On Tuesday, Mr. Purvis gave notice for that day four weeks to call attention to the incidence of local taxation, and to move a resolution.

Milk-Blended Butter.

On Thursday Mr. O'Shaughnessy asked the President of the Board of Agriculture whether he was aware that considerable quantities of a material known as milk-blended butter were now made by working milk into butter by a mechanical process whereby the amount of water in the original butter was increased from a relatively small proportion up to 20 or 25 per cent.; and that quantities of foreign butter thus treated were sold monthly; and what steps he would take to prevent this practice.

Mr. Hanbury: I am aware, I regret to say, of the facts mentioned in the question. The legality of the sale of such an article as butter is before the law courts, and I must await their decision before I can properly deal with the subject by an amendment of the law or otherwise. As soon as I have been able to consider the evidence and the report of the Departmental Committee I will fix a standard.

On Friday, Sir. E. Strachey asked the President of the Board of Agriculture whether, in view of the decision of the High Court (King's Bench) given last Wednesday, quashing, with costs, the conviction of Messrs. Pearks and Co., Ltd., for selling milk-blended butter, he could take any further steps to prevent the sale of this article, or whether, after the decision of the High Court, legislation would be required to enable its sale to be stopped.

Mr. Hanbury: The decision given last Wednesday was on the point of whether sufficient notice as to the quality of the article sold had been given to the purchaser. Another appeal is pending on the further and, perhaps, more important point as to whether this milk-blended butter comes within the terms of the Margarine Act. Until a decision has been given in this case—and I expect it will be given early in March, I can express no opinion as to the necessity for legislation or otherwise.

WATERPROOF SHEETS

FOR

THRESHING MACHINES, PORTABLE ENGINES, MILLER'S, CARRIERS, LUGGAGE CART COVERS,

AND ALL PURPOSES.

Illustrated Price List and Samples Post Free.

Waterproof Oil Sheets at 1/6 and 1/8 per square yard.

Chemically-Dressed "Peck" Cloth at 1/11 per square yard, complete with tie cords, lettering, &c. Thoroughly seasoned, ready for immediate use.

J. H. PECK & CO., LTD., WIGAN.

Established 1808. *Telegrams*—"Peck, Wigan."

Blended Butter: Result of Appeal.

In the King's Bench Division on Wednesday, before the Lord Chief Justice, Mr. Justice Darling, and Mr. Justice Channell, an appeal was heard in the case of Pearks, Gunston and Lee v. Houghton. As is well known, Messrs. Pearks are grocers, and the question raised had reference to their blended milk butter, which has been the subject of prolonged litigation. The appellants were charged on July 12, 1901, at Richmond, under section 6 of the Sale of Food and Drugs Act, with having unlawfully sold to the prejudice of the purchaser half a pound of butter which was not of the nature, substance, and quality demanded, because it had had water added to it to the extent of 7.8 beyond the usual limit of 16 per cent of water natural to butter. The penalty inflicted was £20 and costs. The proceedings against the Appellants were taken by the Respondent (Mr. Houghton, an Inspector under the Sale of Food and Drugs Act), who caused a boy to purchase on his behalf, at Messrs. Pearks, Gunston, and Co.'s shop, in Richmond, half a pound of 1s. butter for the purpose of analysis, which immediately after the sale was handed over to him in Appellants' shop. The public analyst certified that the sample contained 23.8 per cent. of water, which was 7.8 per cent more water than the extreme limit of 16 per cent., the natural moisture in butter. The butter was wrapped in two pieces of paper, and on the inside one there was printed in large type the words, "Peark's Butter," and underneath, in much smaller type, a statement that the butter was blended with pure English full cream milk by new and improved machinery, whereby it retained about 20 to 24 per cent of moisture. In a frame on the wall behind the butter counter in the Appellants' shop there was a printed notice, in large letters, to the same effect as the notice on the wrapper, stating that the butter sold in the establishment was blended with pure English full cream milk, whereby it retained about 24 per cent. of moisture.

The Richmond Justices were of opinion that the printed matter on the inside of the wrapper was in its terms inaccurate and misleading, and, on that ground, was not a sufficient notice by

label within the meaning of another section of the Act—Section 8—inasmuch as it stated that the result of the blending was to "retain" in the butter about 20 to 24 per cent. of moisture, whereby it acquired delicacy of flavour, whereas the only result was to "add" 7.8 per cent. of water to the extreme limit of 16 per cent. natural in butter. For the like reasons, the notice on the wall of the shop was found not to be a sufficient notice; and the Justices were also of opinion that, as the butter was delivered in a piece of plain opaque paper, which, until removed, effectually concealed the inside wrapper and the printing upon it, and as the Respondent did not, in fact, read the printing, and did not purposely abstain from so doing, and having regard to the nature of the article asked for, and to the fact that his attention was not called to the printing inside the wrapper, this did not constitute a notice by label supplied at the time of delivering the article to the person receiving it within the meaning of Section 8. The questions for the opinions of the Court on Wednesday were therefore (1) whether the inside wrapper in which the butter was delivered was a sufficient notice by label within Section 8 of the Act; (2) whether upon the facts stated there was sufficient notice otherwise than by label to the purchaser of what he was purchasing; and (3) whether, upon the facts stated, there was any evidence that the excess of water in the butter was added fraudulently to increase the bulk or weight.

The Lord Chief Justice, in giving judgment, said the case was certainly not stated in a satisfactory way, and he did not want to express any opinion to the effect that if what was sold had been sold as butter, and nothing more had been said about it, there would not have been an offence under the 6th Section. But that was not, in his opinion, the way in which they ought to deal with the case. Taking the facts most strongly against the Appellants, the butter purchased was asked for as "half a pound of one shilling butter." If it should turn out that there were various classes of butter in Messrs. Pearks' establishment, his conclusion would have been different, but he understood that the Appellants were selling one sort of butter only viz., this blended butter. He therefore did not intend his decision to apply to a case where a man put up this kind of notice and sold different kinds of butter. The really important question in this case was whether, upon the facts stated, there was sufficient notice otherwise than by label, and he had come to the conclusion that this could not be taken to be the sale of one of many classes of butter; but it was a purchase of Pearks' butter, meaning the same thing as was described in the notice. That being so, he thought they were bound by the authorities to hold that it had been brought to the knowledge of the purchaser that the article sold was a blended one. If that was so it could not be said that the thing was being sold to the prejudice of the purchaser. It was good law and common sense that a man who was told he was buying butter blended with something else could not be said to be prejudiced. Nothing misleading in the notice could do away with the broad statement that the butter sold was in accordance with the notice. In this case, therefore, he came to the conclusion that there was no evidence that the butter was sold to the prejudice of the purchaser, and when once that was established, the question of the fraudulent addition of water did not arise at all. He could see no evidence, however, that the water was fraudulently added.

The other learned Judges concurred, and the appeal was allowed, and the conviction quashed, with costs.

New Agricultural Patents.

Specially compiled for *Mark Lane Express* by Mr. G. D. Howard (Hughes, Son, and Co.), patent agent, 38, Chancery Lane, London, of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

3,295.—Jacobus Johannes Ernst Bekker and Robert Harvey, of Glasgow, for "Improvements in and relating to mills for grinding sugar cane, and like grinding purposes."

3,413.—John Richardson, of Manchester, for "An improvement applicable to lawn-mowing machines."

3,480.—Joseph Woodford and Robert William Graham, of High Holborn, London, for "improvements in hand sheep shears."

Patents Sealed.

18,936.—E. D. Bell, of London, for "food preparations."

19,081.—E. W. Petrie and R. Cunliffe, of Lancashire, for "Drying yeast, grain, peat, etc."

Watery Milk.—At the Mansion House Police Court, on Wednesday, John Williams, a dairyman, of Jamaica Road, Bermondsey, was fined £20 and costs for having on two occasions supplied to customers milk which was adulterated with added water to the extent of 17 and 12 per cent. respectively. The prosecution was instituted by the City Corporation.

PRACTICE WITH SCIENCE.

Manuring Experiments in Hampshire.

Professor Gilchrist, B.Sc., Director of the Agricultural Studies at Reading College, attended a meeting at Botley recently, and gave a lecture on the trials with manures which have been conducted in the Botley district, under the auspices of the Hampshire County Council, with the co-operation of the Botley and South Hants Farmers' Club.

Professor Gilchrist said he might remind the meeting that these trials were started in the autumn of 1897 as the result of a discussion in connection with the Botley Farmers' Club, and they had been carried out under the supervision of the club, in co-operation with the Hampshire County Council, the supervision having been actively undertaken by Mr. Jenkyns and Mr. Blundell. The supervision had involved a great deal of work, because it meant seeing that the crops were sown and harvested, that the manures were applied, the plots marked off, the produce weighed, and the results properly recorded. It was arranged to carry out a four-course rotation, the rotation being:—Mangels 1898, wheat 1899, hay 1900, and oats 1901. The manures were applied so as to last for the rotation, except on plot 5. The soil was a useful loam, fairly deep, and suitable for most crops; the subsoil was similar, but lighter in colour, with a considerable amount of gravel—in some parts of the field it was almost clay, in other parts it was lighter. In 1897 the crop was trifolium, unmanured, and cut green and carted off; in 1896 it was potatoes, which received 30 loads an acre of farmyard manure. They found land which had been treated in the same way for four or five years previously, and they had therefore a fairly good start for these trials. The results of the manures they applied were noted not only in the immediately succeeding crops, but in the four years afterwards. They decided not to use farmyard manure, not because they did not think it would give a good result, but in consequence of the discussion at the meeting of that club when it was wisely pointed out that to use farmyard manure would be misleading simply because it was so variable. On plot 4 no manure was applied during the four years, the land being merely cultivated. The plots in each instance were one acre in measurement.

Values of Nitrate of Soda and Sulphate of Ammonia.

On plot 1 the dressing was 2 cwt. nitrate of soda, 4 cwt. superphosphate, and 4 cwt. kainit. Here, then, was a complete dressing of artificial manures containing the three ingredients—nitrogen in the form of nitrate of soda, phosphates in the soluble form of superphosphate, and kainit, a potash manure. They put similar manuring on plot 2, but half the nitrogen was in the form of nitrate of soda, and the other half in the form of sulphate of ammonia. If they took up an agricultural paper they would fine on one page an advertisement stating that nitrate of soda was the best manure and gave the best results, whilst on another page there would be a similar claim in respect to sulphate of ammonia; but the fact was that these two manures were the principal nitrogenous manures, and it depended very much on the conditions of the land and climate as to which would give the better result. Generally speaking, in the south of England, especially the south-east, nitrate of soda, because of a dryer climate, gave the better result—this was not always so, but it was as a general rule. In this instance where they substituted 1 cwt. of ammonia for 1 cwt. of nitrate of soda they got an increase of a ton; it was strange he should say this, because he had been arguing the other way, but they had trials on Mr. Lee's farm at Fareham, and in that case where they used 2 cwt. nitrate of soda to 4 cwt. each of superphosphate and kainit the result was 20 tons 16 cwt. of mangels, and where 1 cwt. of sulphate of ammonia was substituted the weight of the mangels was 18 tons 18 cwt., or nearly 2 tons less. At the same time, sulphate of ammonia judiciously used, especially in a rather damp season, gave very good results; in a wet season it was likely to give a better result than nitrate of soda; and all through for mangels nitrogen was most important.

When nitrogen of soda was used it was advisable to apply part at the time of sowing the mangel, not before, and to keep back the bulk to use in two top dressings after the mangel had appeared aboye the ground. But in applying it as a top dressing it was advisable not to apply it on a dewy morning if the sun was likely to come out soon after, because it might injure the leaf of the young plant. The blank patches in fields of mangel were sometimes caused by nitrate of soda having injured the plant. If sulphate of ammonia was used it was not advisable to apply it as a top dressing, but to apply it at the time of sowing in the ground. Whilst not wanting to put the merits of manures as against each other, he again said that in this district probably the

Most Useful Manure for Mangels

was nitrate of soda. The cost of dressing plots 1 and 2 was in each instance 38s. On plot 3 the same manures were used as on plot 1, but 4 cwt. of common salt was used in addition. Mangels were cultivated from a wild seashore plant, and the plant had still some of its wild tastes—it seemed to like salt, and for that reason a small dressing of salt was applied at the time of sowing. It was not advisable to apply salt at the time they applied the potash manure—a month or two before—because it would wash out if rain came, and it was better applied just before sowing the mangel. On plot 3, instead of producing 16 and 17 tons odd, as in the case of plots 1 and 2, the result was a crop of 20 tons 6 cwt. Coming down to plot 5 the same manures were applied as on plot 1, only part of the superphosphate and part of the kainit was kept back till the autumn of 1899, so as to assist the young seed—the clover and grass seed—for the crop of 1890, and in that case the crop of mangel was lighter, but the hay crop was naturally heavier.

On many farms it was advisable not to apply all the manure to the root crop, but to keep back part of it for the young hay crop. If there was a good deal of clover, and the manure took the form of potash and phosphates applied in the autumn to the young clover plant after the corn had been removed, as a rule the clover crop would be considerably heavier. If they increased the amount of clover root in the soil the clover collected nitrogen from the air, and there was a better chance for the cereal crop that followed; in other words the heavier the crop of clover the better was the condition of the ground to obtain another crop. Some Canadian experiments had shown that a good crop of clover would collect the equivalent of about five cwt. of nitrate of soda per acre—even the roots themselves collected as much nitrogen as was equal to two cwt., or even more, of nitrate of soda.

Then coming to plot 6, they had

An Interesting Result,

viz., the same manuring with the exception that, instead of four cwt. of superphosphate, they had six cwt. of basic slag. This was a phosphate manure, the same as superphosphate, but it did not, as a rule, act so quickly, and they found that borne out—the cost was 41s. per acre, as compared with 38s., and the result was 15 tons 9 cwts. of mangels. They obtained the benefit, however, in other corps later on in the rotation. On plot 7 they again had an interesting result—a result he almost hesitated to put into words, and yet it came out. On plot 7 they had 2 cwt. of nitrate of soda, and 6 cwt. of basic slag, but no kainit; it was the only plot, with one exception, on which no kainit was employed, and if plots 6 and 7 were compared there were only 6 cwt. less mangels without the potash manure. Right through they found the potash manure had not been very effective.

Plot 8 was Mr. Blundell's plot. Mr. Blundell was a prophet in 1897; he remembered when they were discussing the subject Mr. Blundell got up and asked why they did not have a mixture of manures which should only cost about £1 an acre, or not much more, and see how that compared along with the other plots, and he promised him they would try it. On plot 8 they had 1½ cwt. of nitrate of soda and 2 cwt. each of superphosphate and kainit, at a cost of 23s. 3d., and the economical result for the four years was very good, showing a net gain of £4 14s. 5d. The highest net gain was £4 18s. 6d. on plot 7, and that on plot 8 came next. This certainly bore out the contention of Mr. Blundell that it was a mistake to apply too much manure if they wanted to get an economical result—that they could grow a heavy crop by heavy dressings of manure, but beyond a certain point it did not pay, especially at present prices, to manure too heavily. In other words, if they could get a very high price for their produce—as in the case of the Channel Islands for new potatoes—then it paid to manure heavily, but when they took the prices they had to deal with at the present time they very soon came to the margin of profit in manuring, and for that reason the more economical manuring was very often the most profitable manuring. It was remarkable that the result of plot 8 gave more mangels the first year, with the same manures applied in smaller quantities, than the result of plot 1, the weights being 16 tons 8 cwt. 64 lbs., as against 16 tons 4 cwt. 32 lbs.

These were the results so far as the mangels were concerned, and looking simply at these results one would come to the conclusion that plot 3 had given the best return, but it would be found that plots 7 and 8 at the end of the rotation, supposing any farmer had been manuring them, would have given the best results on the four years. He was, however, under the impression that plot 6, which was nitrate of soda, basic slag, and kainit, adding common salt as well, was the plot which would have given the best results in the long run.

Coming to the wheat of 1899; red wheat (2½ bushels per acre) was sown on the plots in November, 1898. In this crop, again, where the same manures were applied to plots 1 and 8, the lighter dressing on the latter gave the better result. These two plots gave more wheat than any of the others—the potash evidently told on

the wheat, although if they compared plots 6 and 7 there was actually more wheat without the potash. It was not a good year for wheat, and it was much spoiled by the sparrows; the average crop was about two quarters an acre. The wheat was sown down with seeds in the spring of 1899, and the young plants looked well on all the plots in the autumn of that year. The best result on this crop was given by the manures applied to plot 5, part of which had been reserved for the young seeds. Of the cuttings of hay in 1900 the heaviest, 3 tons 3¼ cwt., was cut on plot 5, where part of the manure was reserved, and the next best, 3 tons 1¼ cwt., was on plot 7, and it was nearly as good, 2 tons 18¾ cwt., on plot 6, which had the potash as well, but on plot 8 it was not so good, 2 tons 10 cwt., although that was better than plot 1, which was 2 tons 1¼ cwt.

Coming to oats; in 1901, the fourth crop of the rotation, the unmanured plot yielded 6 qrs. 0 bus. 36 lbs.; plots 1, 2, and 3 gave about an average of 4 bushels more, or about half-a-quarter more four years after the application of manures—roughly speaking, the increased value of the crop was some 9s. per acre. But now the marvellous staying powers of basic slag came out, there being over a quarter more both on plots 6 and 7, there being actually 7 qrs. 7 bus. 2 lbs. on plot 7. Again, on plot 8 the yield of oats was 8 qrs. 2 bus. 6 lbs. He thought, however, that Mr. Blundell would agree with him that the results on plots 7 and 8 pointed to the soil being somewhat naturally better than the other plots. (Mr. Blundell: Yes.) He did not want to modify what he said; there was no doubt as to the success of the smaller dressing, but he thought they must discount something on plots 7 and 8 on account of the greater inherent capabilities of the soil.

In calculating the

Value of the Respective Increases

mangels were valued as for home consumption at 8s. a ton, wheat at 26s. a quarter, hay £3 a ton, and oats 17s. a quarter. The net gain worked out as follows:—Plot 1, £1 3s. 4d.; plot 2, £1 7s. 10d.; plot 3, £2 12s. 9d.; plot 5, £2 14s. 5d.; plot 6, £3 6s. 2d.; plot 7, £4 18s. 6d.; plot 8, £4 14s. 5d. One could not take results like these and dogmatise on them; one must always use common sense in the choice of manures, but he thought they would agree that the valuations were not high, the cost of the manure was the actual price at which it could be bought and delivered at Botley Station, and when they worked out the figures they found that in all cases after allowing for the manures there was a profit. In planning these experiments they did not attempt anything out of the way; they wanted to get typical dressings which had given different results in different parts of the country, and to see how they would compare in this district when pitted against each other. The results proved that they could not have their cake and eat it, and if they obtained a good result in one crop it would be lighter in another; but the results also showed that they could manure so that four years afterwards they would have fairly good results from the different manures. The satisfactory results on plots 7 and 6 indicated that, on the whole, basic slag had been the most lasting and economical manure in these trials.

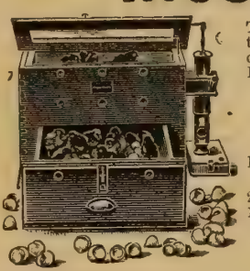
As far as potash manure was concerned, the results were doubtful, but it was fair to say that, taking into account other experiments in the district in which he had taken part, in many cases potash manure would give a good result. They could not, however, depend on a potash manure in the same way as they could on phosphatic and nitrogenous manures. In some cases there was already plenty of potash in the soil, and potash manures acted sometimes in a curious way, and occasionally did harm as well as good. When used, it was well potash should be applied a month or two before the crop was put in, so that it might get thoroughly mixed with the surface soil. The geological formation on which the soil of the Botley district rests is the Bracklesham beds; these were beds of clay and sand, very intimately mixed with each other, changing quickly, with a subsoil of different colours, but on the whole they gave a useful sandy loam soil, and, generally speaking, were a fairly good soil. Professor Gilchrist then went on to give the results of some

Trials with Manures at Fareham

in 1897. The best result was given with the following manures per acre:—One hundredweight nitrate of soda, one hundredweight sulphate of ammonia, four hundredweight superphosphate, and four hundredweight kainit; this gave twenty-five and a half tons of mangel. Sixteen tons of farmyard manure only gave about 20 tons, and the same dressing of artificial manures as applied on plot 2 at Botley gave somewhat under 17½ tons. In the Fareham district, where they did without phosphatic manure, and applied neither superphosphate nor kainit, the crop was reduced to 17 tons 15 cwt., and without potash manure the crop was as good as where potash manure was applied.

To be continued.

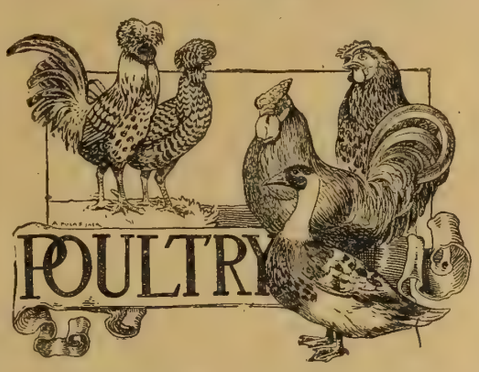
CHICKENS ALL THE YEAR ROUND
BY USING
Hearson's Patent
CHAMPION INCUBATORS.
Manufacturers by Appointment to
H.M. THE KING.



The CHAMPION INCUBATOR has now been before the world over **20 years,** and has achieved a reputation which eclipses all competitors.

Address—**CHAS. HEARSON & CO.,**
"D" Department, Ltd.,
235, REGENT ST., LONDON, W.

AWARDED THREE PRIZE MEDALS FOR THE BEST INCUBATOR, DAIRY SHOW, 1898, 1900, 1901. SEVEN OTHER GOLD AND SILVER MEDALS IN ENGLAND AND CONTINENT, 1901



TAMLIN'S . .
NONPAREIL
PATENT **INCUBATOR**

This is the only Incubator that ever hatched 95 per cent. in Competition for Hatching results open to the World.
Guaranteed Automatic.
Best planished Copper Tanks.
Packed ready for immediate use.

200 EGGS from ...	£5	15	0

TAMLIN'S SELF-SUPPLYING LAMP
Patent No. 20,182.
Which automatically supplies itself with oil the whole time of hatching. **4s.** extra. Testimonials. Hatching 100 per cent. Over 1,000 Letters of Thanks received for Results. Write for our Catalogue, post free.
W. TAMLIN SOLE MANUFACTURER **RICHMOND, SURREY**
The Largest Manufacturer of Incubators in the World.

Treatment of Newly-Hatched Chicks.

Chickens when first hatched want feeding generously at least five or six times a day for the first week, as the little crops will not contain much at a time. Probably many people are not particular enough over this, as it must be remembered that young animals are always provided with the most suitable food in the way of mother's milk, but young chickens when they are hatched are not supplied with anything like this. Some people begin to give them bread and milk for the first few days. When this is the case, they usually find the chickens go off quickly, frequently two or three dying out of ten within a week or ten days, more particularly when they scald the bread with the milk, as this often brings on violent diarrhœa.

If cold milk is poured upon stale bread it does not affect them in the same way; but we never trouble about bread and milk at all, as it is not necessary. They certainly want nutritious food, and it is natural for them to have a little animal food although this is not necessary, and as a perfect food we recommend biscuit meal, that has a little granulated meat mixed with it, just soaked in warm (not boiling) water, and not made too wet. Where cottagers have not the advantage of the biscuit meal, they should toast bread crusts, fairly hard, and then soak them in water. It is always the best to squeeze all the water out, so that it is just moist.

Groats or coarse oatmeal should always be given to them, and during February and March a little hempseed, as that is stimulating; and if people have valuable chickens and want to get them on, a little linseed, uncrushed, given to them, is very nutritious, and will keep the chicken in vigorous health. A few canary seeds, for a change, will help chickens when they are not getting on well.

Where people can give them a little meat the first wek or ten days, fresh meat cut up fine, that usually makes them very lively; but after they get a fortnight old, to save trouble, they might have a little granulated meat, but this must be given very very sparingly, as it is salt, and hundreds of chickens die from diarrhœa because of this. They are very fond of it; if mixed with a little meal, they will pick it all out, so therefore they should not have much. One teaspoonful, before it is soaked, is enough for 15 chickens when they are a fortnight old, at a time.

Many people give their chickens rice as soon as they are hatched. This makes a good change, but they ought not to have too much, and it should be boiled and then left, so that it soaks up the water. This is one of the cheapest foods for chickens. When chickens are young and doing well on the food they are having, it is wise not to change the food entirely; if so, they frequently have diarrhœa.

Whenever they get this, a little dry rice should be given them twice a day, as this, as a rule, stops it all immediately. The first fortnight, novices without experience should always notice the vent or back passage, as this often gets blocked up, and causes great pain and sometimes death. The fluff is matted together with excrement, and this must be dealt with before anything can pass. We have had scores of chickens sent to us for post-mortem, which have had nothing through them for two or three days; these chickens must be in great pain.

If chickens have cramped toes—that is to say, the toes doubled and contracted under the foot—a small piece of wood should be cut out (the same shape as the foot), of deal or a twig cut from the hedge. This should be wrapped round with cotton wool, fastened with thread or silk, and the foot bound to it with a piece of cotton wool on top of the toes and tied up carefully, so that the thread is wrapped round the toes and the wood. The warmth from the cotton wool causes the blood to circulate freely, and the bird is all right again very soon, and in three days the toes become perfectly straight and the chickens can walk. Thousands of young chickens might be saved in this way from being crippled. This can only be done where people bring up a few, or where ladies have plenty of time to do it, but it pays well in the end.

What Waterglass Is.

There have been a number of inquiries received lately as to nature of waterglass, which was recommended in these columns for the preservation of eggs, and we print here for the information of our readers a brief description of the substance and its uses.

The name waterglass is applied to both the silicate of potash and the silicate of soda. Its uses are too many to give in a short account. It can be obtained in several strengths and qualities, e.g., weighing 13¾lb., 15lb., 17lb., and nearly 19lb. to the gallon. The last is almost solid, and is prepared specially for the export trade.

I, along with several friends, have used it for the past two years for preserving eggs, and have found it all that can be desired for the purpose. We find the 17lb. to a gallon and purest quality the most economical for the purpose. It is a very stiff liquid, colourless, odourless, and almost tasteless. It has no injurious effect on either the skin or the clothing

For preserving eggs I mix 1lb. (one pound) waterglass with 1 gallon (10lb.) of water. It will mix with cold water, but it is more quickly done with hot. When cool, I fill any suitable vessel of wood, earthenware, iron, or tin, about one-third full with the prepared solution and put the eggs in as collected until full, leaving about one inch of liquid above the eggs. The vessel may be kept in a cellar or storeroom, and the eggs taken out as required, whether for use or sale

When taken out they should be rinsed in cold, or aired, water and wiped dry. I have not found that it makes any difference whether the vessel is kept in a cool cellar or in a room that varies considerably in temperature. I have tried both.

When the eggs are put in the waterglass solution quite fresh, they will come out at the end of six or twelve months in just as good condition. I am aware that this is a strong statement to make, but it has been, not in one case only, but in many.

There is another point in its favour that should be of use to your readers. The shell is harder and the contents are not affected by exposure afterwards, like a fresh one. About the end of July last year I took an egg out of the waterglass after having been in about three months and placed it in a window facing south-west for over a month, and then broke it in the presence of a friend; we could not detect any signs of its having been at all affected by such exposure.

This makes it possible for egg-producers far from good markets to preserve their eggs during a plentiful season until winter, when a better price may be obtained, as eggs preserved in waterglass will bear transit by post or rail better than even new-laid eggs.

South-Eastern College and Experiments in Surrey.

At a recent meeting of the executive committee of the Redhill Agricultural Society, a letter was read from Principal Hall, of the South-Eastern Agricultural College, Wye, relative to the suggested acquisition of some suitable site in the neighbourhood of the society to be set apart for field experiments, the college paying the expenses. A sub-committee, consisting of Messrs. W. Clifton, A. R. Cragg, H. Harker, and A. Holm, jun., was appointed to meet the principal, and at a conference since held between them, it was arranged, on behalf of the college authorities, to co-operate with the society in connection with carrying out the proposed object. It was decided at the conference to experiment on crops of maize and mangold, Mr. Harker kindly undertaking to place at their disposal for the purpose a field opposite Gatton Park, on the Merstham highway. It is anticipated that the institution of these experiments will prove, not only of considerable interest, but also of much practical value to the farmers of the district.

Gloucestershire Chamber.

At the annual meeting of the members of the Gloucestershire Chamber of Agriculture, held at Gloucester on the 25th ult., a satisfactory balance-sheet was presented, it showing a surplus of £16 3s. 6d.

The retiring president (Mr. Hawkins), in expressing his thanks to the members for the assistance which had been rendered to him on all occasions, said the Chamber had grown in strength, and he trusted in wisdom also, during his year of office; and with such an excellent man as Mr. Hanbury at the head of the Board of Agriculture, they had reason to hope that matters connected with agriculture would be well looked after in the future. Mr. J. D. Birchall, who was vice-president during last year, was formally installed as president; and Mr. H. W. Bruton was unanimously elected vice-president.

Subsequently a discussion took place on agricultural education, the subject being introduced by Mr. J. C. Medd, of Cirencester. In the course of an instructive address, Mr. Medd said in other countries agricultural education was one of the most prominent features in the educational system; and if our farmers were to compete successfully with those of other countries they must have similar advantages. Two years ago the Agricultural Education Committee was formed, and this committee had formulated a scheme for agricultural education. At the present time farmers complained that it was difficult to get men to do thatching, hedging, to make ricks, and to do other things; and in some countries instruction was being given in these subjects, and would do more than anything else to check the depopulation of the rural districts. They could not, of course, teach children in elementary schools farming, but they could break the ground, as it were, and foster a liking for rural pursuits. It was quite useless to teach boys shorthand and typewriting whose lives were to be spent in such occupations.

Mr. J. H. Jones, past-president of the Chamber, supported Mr. Medd's views, and moved:—"That this Chamber is in full sympathy with the aims of the Agricultural Education Committee, and urges upon the Board of Agriculture the importance of organising and extending its educational work, for which purpose it is essential that much larger funds be placed at its disposal."

This was seconded by Mr. Muir, and carried.

Monday (February 24th).—The weather was very unsettled over our Islands, and rain again fell in many places. Rain was measured in the morning, as the result of the fall since the preceding day over the entire kingdom, but the amounts were mostly small. South-easterly winds were again prevalent, but they were, for the most part light. It was only on our east coasts that the temperature fell below 40 degrees during Sunday night, and the thermometer during the day was everywhere above the average.

Tuesday (February 25th).—Rain fell again during the day in many parts of our Islands, and the weather was generally unsettled. Fog was very prevalent in the English Channel, and there was a good deal of mist over the greater portion of England. Rain was measured in the morning, as the result of the fall in the preceding 24 hours, in nearly all parts of the kingdom, but the amounts were not large. The winds were everywhere easterly; and, although the barometer was much below the average, the mercury was rising generally. The day was fairly warm over England, and in Ireland the temperatures exceeded 50 degrees.

Wednesday (February 26th).—The weather was fine in most parts of Great Britain, but rain was again falling at some of the Irish stations. Rain was measured in the morning as the result of the fall in the preceding twenty-four hours, over the greater portion of our islands, but the amounts were everywhere small. The wind was still easterly, and a moderate gale was blowing in the South of Ireland. Temperature was lower than on the two or three preceding nights over Great Britain, but the sheltered thermometer was nowhere below the freezing point on Tuesday night, while in Ireland the thermometer in many places did not fall below forty-five degrees.

Thursday (February 27th).—Rainy and unsettled weather prevailed in most parts of our islands, and a south-easterly gale was blowing in places on our north-west coasts. Exceptionally heavy rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, at places in the west, and smaller amounts were general. The temperature had risen over England, and in the southern districts the thermometer exceeded fifty degrees.

Friday (February 28th).—Cloudy weather prevailed over our Islands, and showers were again experienced in several places. Rain was measured in the morning at all except a few of the Northern and Eastern stations, but the amounts were mostly small. The winds were Southerly except in the North, where the Easterly wind was still maintained, and the force was light, except on our North-west coasts. At several places in the West the lowest temperatures during Thursday night did not fall below 45deg., and in the South and West the midday readings exceeded 50deg.

Saturday and Sunday (March 1st and 2nd).—The weather has been changeable during these two days, and rain fell in many parts of the country, although in places there was a good amount of bright sunshine. Cyclonic disturbances continued to pass north-eastwards, in close proximity to our west coasts, and on Sunday a shallow subsidiary disturbance traversed the south of England. The principal fall of rain occurred in the north and west, but on Sunday sharp showers were experienced in the south of England. Temperature was generally high for the time of year, and the highest readings on both days exceeded 50 degs. over a large portion of the Kingdom.

Death of a well-known Scotch Agriculturist.—The death was announced at the Dalkeith Palace Home Farm, on Tuesday, of Mr. James Deans, for nearly half-a-century agricultural manager to the Duke of Buccleuch. The deceased was a well-known figure among agriculturists, and famous as a breeder of Leicester sheep and Shorthorn stock. His services as judge were in regular requisition at agricultural shows throughout Scotland. He was a member of the Committee of the Dalkeith Agricultural Society, and a native of Berwickshire. He was aged 80, and leaves a widow.

THE GARDEN.

The sharp spell has fortunately passed away, and the milder weather will enable out-door work of all kinds to be got on with again.

One of the first things to be done is to get a good batch of peas sown, especially as the severe weather experienced recently will probably have destroyed any autumn or early-sown rows. Second early or succession and main crop varieties may be sown now, as well as first-early kinds, so get a good assortment in, some on warm borders, and others in the open. Take care to dress the seed with red lead if either mice or birds are apt to be troublesome, and sow the seed thinly in wide drills. At the same time, some broad beans should be sown, including both a good form of the long pod and one or two of the broad Windsor kinds.

Plant a good breadth of early potatoes also on some sheltered border; even if a previous planting has been made, more should be got in now. Rhubarb roots should be divided and planted out at once, in deep and rich ground, of course, as they are already starting to grow. And get the root-cuttings of seakale in without delay.

Sow a small bed of asparagus seed, if any roots are likely to be wanted either next year or the following season. Get a good batch of early cauliflower plants out on a warm border; also some lettuces, and sow more seed of both. Both rhubarb and seakale may be forced in the open ground now.

Finish pruning and training vines in the open air at once, as they will soon be starting into growth now, and once the sap has begun to move the use of the knife will be followed by "bleeding." Where the pruning of gooseberries and currants is left till the last moment, as some do where birds are apt to take the buds, this also should be completed at once, but we regard this as bad, or at least faulty, practice, and much prefer to prune at the proper time, and keep the birds off by means of dressings of soot, lime, etc.

Complete the cleaning of out-door strawberry beds, so as to be all ready for the annual top-dressing of manure at any time. There is no hurry for this yet, as a rule, though on light, warm soils, where the crop is naturally early, it may be put on very shortly. On soils at all deficient in potash a good sprinkling of kainit will be found highly beneficial. This had better be given at once, and at the same time apply a little superphosphate or bone meal, which is always useful.

Bulbs or roots of ranunculi, anemones of sorts, and early gladioli of the G. Colvillei section (such as the Bride, etc.), must be planted at once. A few of the ordinary kinds of gladiolus may also be got in on a warm border of light soil, and the bed or beds be prepared to plant the main batch towards the end of the month. These showy bulbous subjects enjoy a deeply-worked and rich soil, but it should be fairly light, or "free," and good drainage is essential; place the bulbs 4in. or 5in. deep, and 8in. to 10in. apart.

Get carnations of all kinds planted out at once. For these the soil should be good, but by no means over-rich or rank; such fertilisers as burnt earth, old mortar or lime rubbish, leaf mould, etc., are, as a rule, preferable to much strong animal manure, but where a light and "thin" or poor staple prevails a good coat of well-decayed stable or cow manure had better be worked in well down below the plants. Always plant firmly.

"Mark Lane Express" Diary.

Bucks (Central).

We have had just a nice refreshing rain upon the break-up of the frost, enabling us to get on with the ploughing; but the land is scarcely dry enough to get to planting. It enables us to get the ewes and lambs on to the pastures, they having been kept pretty much to the lambing pens until the frost went. They have made great inroads in the hay and root stacks during the frost. We are now about two-thirds through the lambing of a very heavy fall of lambs, with some losses of ewes and a few lambs. Triplets have been quite of common occurrence; very many doubles, and one four, all living. During the frost much thrashing and dung-carting has been done, but the price of wheat is still very bad. Beef is not so dear as it was, although it is expensive to make. Mutton is getting scarcer, and a little better in price. Milk is still scarce, and very expensive to keep up the supply, as milch cows are very bad to get, and cake and other feeds dear, excepting wheat.—J. T. (Feb. 26th).

Cornwall.

We have just passed through a spell of dry, frosty weather, and it has proved very beneficial to the land that has been ploughed, so much so that there is every promise of a good seed bed, and, on some farms, with favourable weather, oats will soon be sown. Winter provision for the stock has diminished very much during the cold weather, and it will be a serious question how to provide food for the next two or three months. The lambing season has been favourable, on the whole, very good percentage of twins, and not many losses. This district is not particularly early in this respect, and on many farms they do not commence until the first week in March. Some fields of winter oats are looking splendid, and will give fine pasturage for the flocks. Those who fatten their lambs find that nothing forces them better than a good field or two of oats, and a good crop at harvest is often reaped after they have been eaten with the sheep, nearly all through March month. Prices are just as they have been for some weeks past; a fair demand for good beef, mutton very bad trade, and stock (except for the very best) but little demand.—W. E. H. (Feb. 25th.)

Dorset (West).

I have little to say regarding farming bnsiness, except that work has been practically at a standstill for a fortnight through the severity of the frost, a little dung-carting being nearly all horses could work at. Wet has now set in, and the cultivations will still be hindered. I have heard of two or three fields of barley being sown in some very light sandy soil. The young wheat is not generally over strong, but doubtless with rain and open weather an improvement will soon be perceptible.

Good dairy cattle are selling at fair prices, and very fresh young barreners are picked up, whilst rough cattle are not selling at all well. The store sheep trade is very quiet, and fat sheep are not making remunerative prices for the feeders. An early spring will be gladly welcomed, as both hay, straw, and roots are getting into narrow compass. —G. S. (Feb. 27th).

Durham (East).

Farm prospects are considered fairly favourable in this district. The recent very severe weather was not altogether unwelcome. Vegetation has not been more than checked, and farmers were enabled to complete carting of manure and other work. Ploughed land will have received the full benefit of frost pulverisation, and should the weather in March be favourable, spring corn will be sown under good conditions. Farmers have not threshed wheat freely, prices being so disappointing; perhaps more barley and oats, which meet a better demand at rather more remunerative figures. Straw and hay are both selling very well. Straw in some districts is quite scarce. Turnips, where protected, have not suffered, and are good value, but potatoes are a dull sale and cheaper.—E. and F. R. (Feb. 28th.

Gloucester.

The present month must have been one of the driest Februarys known in the district. The early part ploughing was carried on under favourable conditions, but later King Frost held sway for nearly a fortnight, which enabled the carting of manures from the yards.

The wheat and bean plant does not appear much affected by the frost. This is accounted for from the fact that we had no high winds during the frost, which generally plays sad havoc with the beans' plant.

All kinds of tillage are well forward, and, weather permitting, spring seeding will be early accomplished. Stock generally are looking healthy, which may be accounted for from the dry lying they have had in the pastures during the whole winter. Hay is getting very scarce, and an early and warm spring is the great wish of the Agriculturaliste of the district. Favourable accounts come from the flockmasters of the Cotswolds, as from most other districts.—B. R. (Feb. 27th.)

Lincolnshire (North).

The spring must be coming, although only about 10 days ago, a temperature of 1 below zero, Fah., was registered by a Kew thermometer at Brigg. The scene is now changed, both visually and mentally, for the sun shines, the lambs skip and run into their old bacon boxes, pretending they are cold, when out they come again.

Then we are asking neighbours if they have any good seed corn. I have 50 quarters of fresh coming, and I daily expect 45 tons of Scotch Up-to-Date Potatoes, and so hope is eternally springing as ever. My neighbours are also obtaining seed, and the weather may dry with this wind, and the drill may run.

Turnips are dreadfully scarce, and good pieces of swedes will make all you could ask for them; indeed, the ram breeders must have them.

Consequently mutton is very low indeed, people must sell, even at 6½d. per lb. for fat hogs in the wool; I have known 1s 2d.

Personally, I have good swedes, and am going to await a rise, which must take place sooner or later.

Wool is the lowest price on record. Neighbours, however, who possess 10 years, have now to be half; what a price to keep to. Perhaps when I write again I shall have more cheerful news.—North Lindsey (Feb. 26th).

Somerset (Cheddar).

During the severe frost of this month it was found necessary to supply the cattle more liberally with fodder, and the hay stacks being but small at the beginning of winter, consequently what remains of it now occupies but a small space. The calves from the down calving dairy herds at the weekly auctions are fetching food prices, but I hear that abortion is prevalent in some herds, and many owners of such herds being under the impression that the malady is not infectious, therefore do not take the precaution to isolate the patient and use disinfectants by way of endeavouring to check the likelihood of its affecting other cows, which doubtless is resorted to by all the most enlightened breeders of cattle. The lambing season is now in full swing; the frost caused the death of a few weakly ones, but twins are fairly numerous, and the ewes have generally sufficient milk for the requirements of their offspring.—A. L. O. (Feb. 28th.)

Somerset (West).

The spring-like weather that we had through the middle of January was taken advantage of by many to sow barley, those having suitable land ready, that sowing is now just breaking ground, and very little chance since have we had for sowing, the weather becoming changeable—the end of January, snow, etc., for a week, then nearly three weeks of frost, very seasonable; the frost gave out a week ago, since which unsettled, although for the most part mild and spring-like. Vegetation seems again to spring into life, the grass growing and taking away the brown, dead appearance caused by the frost, and giving the country a new life of green. The ploughing and tillage part of farm work is some weeks in arrears, and we must have more settled weather before speed can be made. It seems that a chance must not be neglected, with the uncertain conditions of our climate. As yet there is no time past for spring sowing, if weather clears up in a few days. The winter is passing away, and so are the roots and hay, on most farms. Live stock of all kinds are in fair health, and the lambing season coming through with little loss. Wheat does not pay to grow much of, only on wheat land, and where near a township, that the straw may be sold to advantage. I used to grow 70 or 80 acres, but last autumn only planted 13 acres, 10 of which I have again ploughed up for barley, the plant becoming thin; and if wheat does not pay to grow, can anyone say what will pay to grow with certainty? It is almost beyond myself to reply to without conditions.—A. B. (Feb. 28th).

Westmorland.

February has well sustained its traditional character of "fill dyke either with black or white," only we have had rather an unpleasant preponderance of the latter. The first few days were fine and pleasant, followed by a succession of most bitter cold days and intense frost, which quickly rendered all standing pools of water, including the lakes, sufficiently strong to afford hundreds of young children and robust young people the finest opportunity of enjoying themselves in the winter season that they have had for many years. On the other hand, it has made a serious inroad upon the short crop of hay and straw, and enhanced the price of both, especially the latter. The displenishing sales of stock and crop held where changes of tenancy have taken place are now all over, and the result has been an agreeable surpise to all retiring tenants, as any reduction in price of live stock has been more than recompensed by the increased value of unconsumed crop all round. The root crop, mangle excepted, is all but exhausted, and has proved a very bad paying crop where consumed by sheep, and a very profitable one where consumed by fattening cattle, especially by those who were in a position to buy in the autumn. Outdoor labour was generally in a forward condition up to commencement of last month, but with the exception of carting, it was all but suspended. March has opened fine, and the teams are again busy all round. The price of oats, is, especially seed samples, higher than it has been for several years. Notwithstanding this circumstance, there is a feeling of gloom among farmers generally, which it is difficult to account for, and I hear from manure and cake agents that orders are few and most difficult to place, which is a very significant circumstances.—T. B. (March 3rd.)

Worcester (South).

We have had more and sharper frosts during the month just ending than during the rest of the winter. Since the break-up of the frost, rain has prevented any work being done on the land. Had it kept dry, a good deal of corn would have been planted this week in good condition, as work on the land was forward.

The short crop of roots is getting used up, and sheep-keep will be short. Unfortunately, the trade for fat sheep is very bad—the worst trade I ever knew in February. Cattle have wintered well, and meet a good trade for both fat and stores. Hay and straw is getting scarce, but, with a favourable spring, will last out. One cannot say much as to corn prospects, excepting that there is no winter proud wheat now, and probably some of the winter beans that were very forward may have been damaged by the frost. Wheat trade very bad; past all hope. A fair demand for spring corn for planting at better prices.—J. W. D. (Feb. 27th.)

Foreign Prospects.

FRANCE.—With rain and higher temperature, the autumn-sown crops are progressing favourably, and farmers are busy preparing for March sowings.

BELGIUM.—No complaints are made of the crop outlook.

HOLLAND.—There is nothing in crop conditions to influence trade opinion one way or the other.

GERMANY.—Slight frost was experienced early this week, but a large area of the crops is protected by snow.

RUSSIA.—In Southern and South-Eastern districts weather has turned to frost, and as the fields are exposed it is feared that damage to the crops has ensued.

HUNGARY.—Weather wet and milder. Crops present a satisfactory appearance.

NORTH AFRICA.—Recent rainfall in Algeria has proved very beneficial to grain crops.

UNITED STATES.—With the disappearance of snow the outlook for the wheat crop is regarded more hopefully than was the case a month ago. The condition is mostly fairly good, but the crop is lacking in the high vigour necessary to withstand adverse influences. Rainfall in California has increased to 13¼in. from 10½in. in week before, compared with 17⅝in. in corresponding period last year.—*Dornbusch.*

We have pleasure in welcoming the reappearance of Messrs. Sutton and Son's treatise on the laying down and management of lawns, bowling greens, putting greens, and cricket grounds. This book, which is published by Messrs. Simkin, Marshal, and Co., Ltd., of London, at 1s., deals in a comprehensive manner with the subjects indicated above, and will be found of great use by all those having in their care lawns or greens, either large or small. There are few more attractive features in a garden than a stretch of lawn, provided that it is kept in good order; while, on the other hand, an untidy or patchy lawn is a positive eyesore, and an ever-present witness of sloth, carelessness, or lack of judgment. There is no excuse, however, for persons allowing the latter description of lawn to exist when they have such an ever-ready guide to success in the book under notice. The book can be obtained from the publishers or from Messrs. Sutton and Sons, Reading.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: We have had a slow trade during the past week. Barley: Grinding quiet. Wheat: Steady at fully late rates. Oats: Rather dearer on the week. Maize: Unchanged. Flour: Dull.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—The attendance was small, and the market for wheat and flour ruled dull and generally 3d lower to sell. Maize quiet unchanged. Barley steady, quiet and without change. Oats meet with more inquiry at steady rates. Beans and peas quiet.

Mark Lane, Friday.—Movements were devoid of significance, while the little business passing in most cases proved rather against sellers, and only a small attendance was present. Home-grown wheat unaltered to-day, but the turn easier since Friday last, with local resorts still fairly supplied, and there is very little showing here, as London millers retain indifference. Whites range at 29s to 30s 6d per qr, as to sample; while good reds of extra strong quality would fetch 29s 6d per qr. American descriptions frequently 3d easier during the above-named period. Russia continues above the level of this market, and India still fails as an exporter. River Plate is not offering. New Zealand long berry, 29s 6d to 30s; short berry, 28s to 29s. Flour steady, although again quite featureless, with granaries well supplied. Patents rather more freely offered. Fancy patents, 23s 6d upwards. Of firsts, Pillsbury, Golden Lily, etc., 23s. Bakers' grades unaltered. Iron Duke, 18s 6d, ex store; Cascadias, 22s 3d. Town households, 23s; whites, at 26s per sack delivered to the baker. Top-price town made 28s net. No 1 households, 21s 9d cash at the mill door. Whole meal, 172s per ton. Grinding barley remains steady, while in moderate supply. Odessa, 19s ex quay, and none ex ship. Malting generally maintained, and samples suitable for seed continue to move. Oats 3d to 6d lower on the week, but Russian offers are now less plentiful. F.a.q. Libau, 18s 3d to 18s 9d per 381b ex quay; 40lb Libau, inferior, 20s up to 21s 6d for extra bold. Good Konisberg, 21s ex quay. New Zealand ordinary Bluff, 25s 6d to 26s 6d per 504lb ex store. English very firm. Black Winters, 24s to 24s 6d per 421b; grey Winters, 23s to 24s per 421b. Maize dull at the recent decline established in round corn. Mixed American nominal. White exhausted ex granary, without anything on offer ex ship. Holders of imported beans and peas remain indifferent in face of continued small supplies. Egyptian splits, 23s 6d; Mazagans, 22s 6d ex mill, 320lb; New Zealand, 37s to 38s per 504lb ex store. Of peas, Maples, 25s 6d to 30s 6d per 5041b ex store; white Canadian, ex granary, nominal at 37s.

COUNTRY.

Ashford, Tuesday.—Wheat: Business quiet, without material alteration in value. Barleys: Inquiry limited at about recent prices. Oats steadily maintain values. Beans and peas continue dear. White wheat, 28s to 30s 6d. Brown wheat, 27s to 30s. Malting barley, 26s to 32s. Grinding ditto, 22s to 25s. Black oats, 18s to 21s. White ditto, 20s to 24s. Old beans, 33s to 35s. Grey peas, 35s to 36s.

Ashford, Tuesday.—White wheat, 27s to 29s 6d; red, 27s to 29s 6d; malting barley, 32s to 35s; English grinding barley, 20s to 22s; Mazagan beans, 33s to 34s; tick beans, 35s to 36s; flat maize, 29s; round maize, 25s to 26s; grey peas, 32s 6d to 34s; new black oats, 20s to 24s; new white oats, 19s to 24s; flour, 23s; seconds, 24s; households, 27s; whites, 28s per sack.

Banbury, Thursday.—Wheat, red (new), 28s to 30s per qr. Small show of corn; farmers busy on land; leaving prices about as before.

Birmingham, Thursday.—Quiet market. Wheats unchanged, English realising 10s 6d to 11s 3d per bag. Maize unaltered to 3d per qr lower; Plate making 23s, and round 2s 6d per qr. Sharpness grinding barley unchanged to 3d dearer. Sharpness English black oats, 21s 6d to 22s; whites, 22s to 23s 6d. English beans, 3d per bag dearer.

Boston, Wednesday.—Wheat, 27s 6d; malting barley, 28s to 31s; oats, 21s 6d; peas, 45s to 53s (blue); beans, 33s 6d; maize, 23s; grinding barley, 23s

Braintree, Wednesday.—A steady trade, with prices unchanged. Not a great offering.

Brighton, Thursday.—New white wheat, 28s to 29s; new red ditto, 27s 6d to 28s 6d; barley, 28s to 33s; grinding ditto, 21s to 22s; English oats, 21s to 24s. Wheat unaltered. Slow trade at last week's prices. Small attendance.

Bristol, Thursday.—There has been but a small amount of business passing since our last. At to-day's market English wheat was in fairly good supply and unchanged in values foreign also unaltered. Maize and oats 3d lower. Grinding barley without change. Flour, prices keep about the same, with a little more enquiry.—GRACE BROTHERS.

Bristol, Thursday. Very little doing since last week. English wheat in fair supply to-day, and sold at about last week's prices; foreign firm at late rates. Grinding barley unaltered. Maize and oats about 3d lower. English wheat, 27s 6d to 28s 6d; American, 30s to 32s. Grinding barley, 18s to 18s 9d. Oats, Irish black, 19s 3d to 19s 6d. Maize, round, 22s to 22s 3d.

Bury, Wednesday.—Wheat was a dull, dragging trade, with no quotable change in value. Reds or whites, 27s 6d to 28s 6d per qr. Barley—The only trade left is from a few buyers of average descriptions, which remain steady, with only a retain demand, at 28s to 33s per qr. The trade in higher qualities is virtually over for the season; grinding sorts firm at 21s to 24s per qr. Oats scarce and firm, at 21s to 25s per qr. Maize 3d lower on the week, at 23s 6d to 24s per qr. Lentils quoted at 32s 6d per 504lbs. Linseed cakes firm, at £8 15s to £9 per ton. Bran steady at £5 10s to £5 15s per ton.

Cambridge, Saturday.—During the week trade has been without animation. Supplies are smaller, but appear to be equal to requirements. At this market to-day there was rather less wheat on offer, but millers were able to supply their wants at last week's prices. Wheat: Red, 27s to 28s; white, up to 28s per 504lb. Trade for malting barley is nearly over. A small trade doing in seed lots. Oats were in good supply, prices steady. Beans firm.

Canterbury, Saturday.—Wheat prices rather weak. White, 28s to 31s; red, 27s to 30s; malting barley, 28s to 35s; grinding ditto, 23s to 25s; white oats, 20s to 24s; black oats, 20s to 23s; grey peas, 33s to 35s; tick beans, 36s to 38s; mazagans, 33s to 34s; maize, 25s to 28s per qr; tares, 8s to 9s per bushel.

Carlisle Saturday.—There was a small supply of oats in our market to-day, and big attendance of buyers of seed grain. Oats were fully 9d per qr dearer than last week, 21s 6d to 23s 6d per 336lb. There is every indication of a good trade being done during the next few weeks in fine oats.—THOMAS ROBINSON.

Chester, Saturday.—Full prices were maintained for all classes of English wheat. Indian corn in good demand, and foreign beans 3d per qr dearer. Quotations: Wheat (white), 4s 5d to 4s 7d; red, 4s 4d to 4s 6d, 75.b. Malting barley, 4s to 4s 1d, 60lb. Grinding barley, 3s 4d to 3s 6d, 64lb. Beans, 5s 6d to 5s 8d, 80.b. Oats (new), 2s 10d to 3s 1d; old, 3s 4d to 3s 6d, 46lb. Indian corn, 12s 6d to 13s 3d, 240lb.

Chichester, Wednesday.—The market was fairly attended, but the tone of business was distinctly quiet. Wheats in slow demand at late rates. Feeding stuffs firm, but unaltered in values.

Colchester, Saturday.—Much less wheat offering, poorer trade, and in some cases 6d per qr advance was obtainable. Beans and oats steady.—FRANCIS AND CO.

Croydon, Thursday. White wheat, 2.s to 29s. Red ditto, 27s to 28s. Malting barley, 28s to 35s. Grinding, 22s to 24s. Oats, 18s to 22s. Beans, 31s to 33s. Peas, 29s to 31s. Trade for wheat dull, prices lower. Oats firm. Beans and peas no alteration.

Glasgow, Wednesday.—There was a fair attendance at our market to-day. Wheat and flour are about unchanged, with little business passing. Indian corn and round maize small trade, with prices favouring buyers. Home and foreign oats dull at late rates. Canadian peas steady, but quiet. Barley unchanged. Grinding beans quiet, and rather dearer. Bran and thirds steady, unchanged. Oatmeal steady, but dull.—GIBSON AND CLARK.

Ipswich, Tuesday.—Wheat supply was moderate, and trade quiet, but fairly steady, at last week's prices of 28s 6d to 29s 6d per qr. Barley—The trade for the higher qualities, which are now very scarce, is all but over There is still a small business passing in medium descriptions, at 28s to 33s per qr., but this trade also is getting smaller each week; foreign grinding sorts steady. Maize about 6d per qr. lower on the fortnight at 22s 6d for round. Oats, beans and peas all in small supply, and very firm. Millet offered at 19s 6d per 504lbs. Linseed cakes very firm, at £8 10s to £9 per ton. Red clover seeds rather slow. Bran unchanged, at £5 10s per ton.

Leeds, Tuesday.—The change to mild, damp weather combined with the drop in America, rather upset the equanimity of the trade. Millers are not in a humour to either buy or bid, although holders of wheat would make a slight concession to induce business. Barley quiet, without change. Maize, beans, and oats rather easier.—DUNNS AND CO.

Leeds, Friday.—Slow trade in both English and foreign wheats, without any change from Tuesday's prices, except that Americans slightly favour buyers English malting barley the turn higher. Maize, beans, peas, oats, and flour all firmly held.

Leicester, Saturday.—Very fair attendance, with moderate supplies of home-grown whites, which sold slowly at 28s to 31s per 35 stone. Barley in slow request. Fine oats in good demand.

Lewes, Tuesday.—New white wheat, 28s to 30s. New brown ditto, 28s to 29s. Malting barley, 32s to 35s. Grinding ditto, 20s to 24s. Oats, 21s to 26s. Beans, 34s to 38s. Peas, 32s to 36s per quarter.

Leith, Friday.—Trade during the week has been very dull, and there is little change to chronicle on that of last week. Owing to the scarcity of prime, sound maize, the spot prices may be written 6d. up. Wheat Scotch, slow trade prices easier. Oats, Scotch slightly better demand at late rates; foreign oats from 19s. to 21s. 6d.; barley Scotch, slow trade at 6d advance; foreign feeding, 21 hard white pease, 37s. 6d.; beans all varieties, 33s. 6d. to 34s.; round maize, 23s. 6d. to 24s.; parcels with very slight heat, 21s. to 22s. 6d.; damaged, 19s. to 20s.; millet seed, 19s. Mill offals: Unchanged from last week with a fair amount of business passing. Broad bran, 120s. to 125s.; medium bran, 97s. 6d. to 102s. 6d.; sharps, 95s. to 97s. 6d.; parings, 105s. to 107s. 6d.; cummings, 82s. 6d. to 87s. 6d.; dried grains, brewers', 9s. 6d.; distillers', 102s. 6d. to 105s.; oat husks, 45s.; mealy seeds, 67s. 6d.; all sacks included.—WILLIAM MACLAY.

Lincoln, Friday.—Small supply of English wheats, which sold at last week's rates. Reds, 28s 6d to 29s 6d; whites, 29s to 30s. Barleys confined to seed lots. Oats a slow sale at barely late rates. Beans, peas, and maize firm.

Liverpool, Friday.—The market has had a moderate attendance, and wheat experiences a fair trade at prices about unchanged from Tuesday. Flour: Foreign is extremely slow, winters being generally 6d lower. The Liverpool Millers' Association make no change in their quotations, and report a moderate business. Maize: Mixed is quiet, but firmly held for 3d advance; European quiet, but steady at unchanged rates; Plate has a moderate inquiry, but quotations are unchanged. Barley: Brewing is idle and prices are nominally unchanged; feeding slow, unchanged. Beans firmly held, but inactive. Peas are firm, with a fair inquiry, the turn dearer for Canadian. Oats are firmly held, but only a moderate inquiry at late rates for English; foreign grades are unchanged, with only a small demand. Oatmeal steady; prices unchanged from last Tuesday. Oilcake steady, with a fair demand, although the tendency for American is rather easier.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Decidedly dull trade to-day: Wheat will not move off freely; sales were about as last week. Barley displays no particular change. Oats keep up well, and exceeds in proportion cost of other grain. Maize is feeble, except for the flat mixed American, which seems to be comparatively rare. Not any alteration in the value of other sorts of feeding material.

Newcastle-on-Tyne, Saturday.—Wheat at our to-day's market ruled quiet at unchanged prices. Maize slow sale, and 6d per 480lb below last Saturday's prices had to be accepted to make sales. Beans and peas were held for last week's prices; demand, however, was slow. Oats a quiet demand, but without any alterations in values. Barley unchanged.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—No alteration from last week. Slow demand, supply limited. Feeding stuffs much wanted. Flour very quiet, and difficult to sell. White wheat, 28s to 30s; red, 27s to 29s; barley, 26s to 34s; oats, 18s to 23s; fine, 24s; beans, 33s to 40s; flour, 21s to 22s; fine, 24s.

Norwich, Saturday.—There was a smaller supply of wheat at our market to-day, with a steady trade at late rates. Finer weather has prevailed during the past week, with bright sunshine. Wheat, red, 28s to 28s 6d per qr, weight 63lb per bushel imperial. Corn inspector's return for the week ending February 22, 1902: Wheat, 2,175, 26s 7½d; barley, 3,329-2, 29s 5½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat very small supply, which sold readily at last week's full rates. No barley offering from growers; needy maltsters paying a good 1s advance. Oats and beans: But few offering, and values well maintained.—ROBERT HUBBLE.

Sunderland, Saturday.—Moderate show of grain. Wheat sold at about last week's rates. Spring corn unaltered. Arrivals nil.—E. AND F. RICHARDSON.

Newport, Wednesday.—Dull trade and no change in prices.

Peterborough, Saturday.—There has been a smaller supply of wheat at market, but no improvement in the demand, trade being slow, without quotable change in value. Barley maintained the recent advance on the little offering. Fewer oats shown and prices steady.—THOMAS HILL AND SON.

Plymouth, Thursday.—Average attendance at our market to-day. Maize 3d lower. Barley and oats firm, prices as last week. Wheat steady.—ORLANDO, DAVIS, AND CO.

Reading, Saturday.—The wheat supply to-day was rather better than of late, and a fairly brisk trade took place, quotations being very firm, and practically the same as at recent markets. Barley was in average supply, and, the demand being good, recent rates were readily obtained, while for oats, which met only a dragging inquiry, there was no variation in prices.

Ripon, Thursday.—Oats firm at last week's prices, and much sought for seed. Maize a slow trade. Fair attendance. Wheat, English (new), 28s 6d to 29s 6d; ditto, foreign, 29s to 33s; barley, grinding, 22s 6d to 23s 6d; ditto, malting, 26s to 31s; oats (new), 22s to 24s; round maize, 24s to 26s per qr; beans, 1s per stone.

Romford, Wednesday.—Wheat was a slow trade at barely last week's prices. Small supply on offer. Red wheat, 28s to 28s 6d; white wheat, 29s to 30s per qr.

Rye, Wednesday.—White wheat, 27s to 29s; red wheat, 27s to 29s; tick beans, 34s to 38s; Mazagan beans, 33s to 36s; long pods, 32s to 34s; grey peas, 32s to 35s; blue peas, 45s to 60s; white oats, 21s to 25s; black oats, 21s 6d to 26s; winter oats, 21s to 23s; English barley, 29s to 33s.

Sheffield, Tuesday. The attendance has been poor, and the variations from last week's prices have been only slight. Sellers of English and foreign wheats firm at late prices. The demand for maize and beans was moderate at last week's rates. Oats and barley unchanged. Quotations:—Wheat, white, 29s 6d to 30s 6d; ditto red, 29s 6d to 30s 6d per 501b.; barley, grinding, 22s to 23s; ditto malting, 28s to 32s per 448lb.; oats, new white, 21s 6d to 22s 6d; ditto new black, 20s to 21s per 336lb; peas, grinding, 32s to 34s; ditto blue, 53s to 80s per 5041b.; beans, Egyptian, 36s to 36s 6d per 504lb; ditto English (new) 37s to 37s 6d per 532lb; Indian corn (small), 24s to 25s; ditto American mixed, 27s 6d to 28s per 480lb.

Spalding, Tuesday.—Trade slow, and wheat scarcely as good as last week, the quotation being 27s 6d, against 28s per qr. a week ago. Oats, 21s 6d, trade being firm. Good inquiry for beans and peas.

Stamford, Friday.—Wheat was well represented, but trade was rather worse. Barley, 28s to 32s per qr. for the best seed. Fair trade in oats at 31s to 35s. Maize sold off at late rates.

Stockton, Wednesday.—Moderate show of English wheat, which made 30s per qr. The trade in foreign wheat keeps quiet, with a moderate inquiry from millers, and to do business a little less money had to be taken. Maize was 6d easier. Oats unchanged.

Wakefield, Friday.—In the small business passing in wheat on to-day's market about late rates are accepted. Malting barley is pressed for sale with but few buyers. Grinding barley 3d. dearer, other feeding stuffs unaltered.—MICHAEL SANDERSON AND SON, LTD.

Wakefield, Friday.—We have a thin attendance of buyers here to-day, and trade in all articles is consequently limited. American and Russian wheats are 3d. to 6d. lower on the week, Indian and Californians fully as dear, English being barely steady. Malting barley in small demand, maize, beans and oats slow.—DUNNS AND CO.

Winchester, Saturday.—English wheat short supply and dull trade; foreign, prices unaltered, with small inquiry. Barley, oats, and maize last week's prices; quiet trade. Flour fair demand; late rates.—FEAR, COLEBROOK, AND CO., LIMITED.

Wolverhampton, Wednesday.—A fair attendance of buyers and sellers, and steady trade. Quotations: Wheat, new, 12s 6d to 13s per 216lb.; oats, old, 15s 6d to 16s; new, 12s to 13s; beans, old, 15s 6d to 16s 6d; new, 14s 3d to 14s 9d per 196lb; barley, 31s to 32s per 448lb; maize, new, 28s to 26s; old, 27s 6d per 480lb.

Worcester, Saturday.—Fair attendance, with moderate supplies of wheat, which met a steady sale at 10s 3d to 11s 6d per bag. Foreign quotations are rather firmer Barley steady. English beans fetch rather more money.

Worksop, Wednesday.—Poor attendance. Very few samples of wheat, and trade slow. Barley for seed in fair demand. Good oats scarce. White wheat, 28s to 29s; red wheat, 27s to 28s 6d per qr. Prices of other grains and offals unaltered.

York, Saturday.—Fair attendance. Very little corn showing, shortage in all departments. Barley, wheat, and oats made about late rates. Little more inquiry for seed corn. Average price of red and white wheat, 28s to 28s 6d; finest barley, 30s to 31s; medium, 28s to 29s; white, oats, 22s to 22s 6d; black, 21s to 22s. Very few beans showing 11d per stone; rye, 8d per stone.

FOREIGN.

Paris, Wednesday.—No market was held to-day, owing to the celebration of the Victor Hugo centennial.

MANURES.

Liverpool, Friday.—Nitrate of soda is only in moderate request, and spot quotations are without alteration, as also sulphate of ammonia. The inquiries for Basic Slag are abating, whilst superphosphate is in increased request, and fair sales transpiring at the annexed rates. Kainit and East India Bone Meal unchanged in value, and move more freely. The trade in feeding stuffs is only quiet, and values barely maintained, with small sales of rice meal at easier rates; some 450 bags Peruvian cotton cake sold ex quay at £6 1s 3d to £6 8s 9d per ton, and other values as annexed:—Nitrate of Soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £10 7s 6d to £10 10s per ton; East India Bone Meal, fair to prime, in bags, £4 1s 3d to £4 6s 3d per ton; Kainit prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; Palm Nut Cake, prime, in bags, £5 15s per ton; Linseed Cake, American thin oblong, prime, in bags, £7 10s to £7 12s 6d per ton; Linseed Cake, English, prime, in bulk, £8 15s to £9 per ton; Linseed Cake, foreign, prime, soft and oily, in bags, £8 5s per ton; Cottonseed Cake, N.A. decorticated, prime, in bags, £7 to £7 5s. per ton; Cottonseed Cake, English ditto, prime, soft, in bags, £7 7s 6d to £7 12s 6d per ton; Cottonseed Cake, English, undecorticated, prime, in bulk, £4 12s 6d to £4 17s 6d per ton; Cottonseed (crushed), 20 to 25 per cent. oil, prime, in bags, £7 3s 9d per ton; Maize Germ Meal, prime, in bags, £5 17s 6d to £6 per ton; Rice Meal, Rangoon, as imported, in bags, £6 5s to £5 7s 6d per ton; Indian Meal, coarse to fine grinding, prime, in bulk, 13s to 13s 6d per 240 lb; Linseed, fine bold feeding, in bags, £3 2s 6d to £3 5s per qr, 416lb; D.N.S. Superphosphate of Lime, guaranteed, 25 to 27 sol., in bags, £2 5s to £2 7s per ton; D.N.S. Superphosphate of Lime, guaranteed, 30 to 31 sol., in bags, £2 10s to £2 12s; D.N.S. Superphosphate of Lime, guaranteed, 35 to 36 sol., in bags, £3 to £3 2s, at the producing depot; Basic Slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags; Basic Slag, prime quality, guaranteed, 35 to 40 per cent. phos.; Basic Slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, nominal.

SEEDS

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report a quiet business passing. The larger firms have already made their early purchases, whilst the general country seedsmen are only just beginning to operate. Meanwhile, values all round exhibit great steadiness, and in view of the large requirements to be satisfied, and the moderate stocks, excepting as regards red cloverseed, which have to meet same, a healthy consumptive demand is with confidence shortly anticipated. Alsyke, trefoil, and white cloverseed must be quoted firm, whilst fine home-grown cowgrass is by no means any cheaper. The ryegrass market continues dull and drooping. Full prices are, however, asked for timothy, cocksfoot, and lucerne. Mustard and rapeseed show no change, but linseed still favours sellers. Spring tares attract more attention on former terms; winter vetches being apparently exhausted. The movements in canary seed continue erratic and puzzling; other descriptions of bird seeds presenting no fresh feature of interest. Peas and haricots have been selling better.

HOPS.

Canterbury, Saturday.—Rather more trade and the quantity on hand is getting into a narrow compass. The present run of business is quite exceptional, and prices have steadily advanced from 2s to 3s per cwt

Worcester, Saturday.—Our market is quieter for hops this week, but the trade still continues for the better qualities left, and for which full recent values are being realised. The lower kinds are almost entirely neglected.—PIERCY AND CO.

HAY AND STRAW.

Manchester, Wednesday.—Hay. 6½d to 7d; clover, 7d to 8½d; straw (oat), 6d to 6½d per stone.

Whitechapel, Saturday.—Supplies met with fair support at late prices. Best clover, 95s to 110s; inferior ditto, 80s to 90s; specially picked hay, 115s; good ditto, 108s; inferior ditto, 80s to 90s; mixture and sainfoin, 90s to 100s; and straw, 28s to 40s per load.

BUTTER.

Tuesday.—Bedale: 1s 6d to 1s 8d per roll of 24oz. Gainsborough: 1s 3d per lb. Settle: 1s 1½d to 1s 2½d per lb. Spalding: 1s 2d per lb. Leeds: York Lump, 15s to 15s 6d per stone; do long rolls, 1½lb., 1s 10d to 2s; fresh, 1s 3d to 1s 4d per lb.

Wednesday.—Barnsley: 1s 3d per lb. Boston: 1s 2½d to 1s 3½d per lb. Colne: 1s 2½d per lb. Goole: 1s 2d per lb. Keighley: 1s 2d per lb. Kirbymoorside: 1s 2d to 1s 3d per lb. Knaresborough: Wholesale, 1s 9d to 1s 10d; retail, 1s 11d per roll of 24oz. Louth: 1s 1d per lb (wholesale). Market Weighton: 1s per lb. Masham: 9d to 10d per roll of 24oz. Northallerton: 1s 8d to 1s 10d per 24oz. Stockton: 1s 2d to 1s 4d per lb. Worksop: 1s 2d to 1s 3d per lb. Dorchester: 1s to 1s 3½ per lb. Ipswich: 1s 3d to 1s 4d per lb. Market Drayton: Best, 1s 3d to 1s 4d; seconds, 1s 2½d to 1s 3½ per lb. Hereford: 1s 2d to 1s 6d per lb.

Thursday.—Brigg: 1s 1d to 1s 2d per lb. Driffield: 1s per lb. Penistone: 1s 2d per lb. Ripon: 1s 8d to 2s per 24oz roll. Scarborough: 1s 4d per lb. Wetherby: 1s 4d to 1s 5d per lb. Birmingham: 1s 3d to 1s 5d per lb. Kidderminster: 1s 2d to 1s 3d per lb.

Friday.—Easingwold: 1s 1d to 1s 2d per lb. Grimsby: Danish, 120s to 122s per 112lb; Dutch, 110s to 114s; Colonial, 110s to 116s. Helmsley: 1s 2d to 1s 3½ per lb. Leeds: Yorkshire, 11s 6d to 12s 6d per 120; Irish, 9s 6d to 11s; Danish, 8s 3d to 9s 6d; Austrian (blues), 7s to 7s 6d; ditto reds, 5s 2d to 5s 8d. Leyburn: 1s 6d to 1s 8d per roll of 24oz. Lincoln: 1s 2d to 1s 3½ per lb. Otley: 1s 10d to 2s per roll of 24oz.

Saturday.—Appleby: 1s 2d to 1s 3d per lb. Berwick: 9d per lb. Carlisle: 1s 2d to 1s 3d per lb. Doncaster: 1s 3d to 1s 4d per lb. Grantham: 1s 1d to 1s 3½ per lb. Howden: 1s 1d to 1s 3d per lb. Lancaster: 1s 3d to 1s 4d per lb. Malton: 1s 2d to 1s 3d per lb. Pontefract: 1s 3d to 1s 4d per lb. Richmond: 1s 1d to 1s 2d per lb. Retford: 1s 3d to 1s 4d per lb. Skipton: 1s 2½d per lb retail; 1s 1½d wholesale. Stokesley: 1s 3d to 1s 4d per lb. Whitby: 1s 2d to 1s 3d per lb. York: 1s 2d to 1s 4d per lb.

EGGS.

Tuesday.—Bedale: 10 or 11 for 1s. Gainsborough: 10 for 1s. Settle: 11 or 12 for 1s. Spalding: 12 or 13 for 1s. Leeds: Yorkshire, 14s to 15s per 120.

Wednesday.—Barnsley: 9 for 1s. Boston: 12 or 13 for 1s. Colne: 2s 6d per score. Goole: 11 for 1s. Keighley: Wholesale 11, retail, 10 for 1s. Kirbymoorside: 11 or 12 for 1s. Knaresborough: 11 or 12 for 1s. Louth: 16 for 1s. Market Weighton: 12 for 1s. Masham: 11 or 12 for 1s. Northallerton: 10 to 11 for 1s. Stockton: 8 for 1s. Worksop: 2s to 2s 2d per score. Ipswich: 10 per 1s. Dorchester: 1s to 1s 3d per dozen. Market Drayton: 9 to 11 per 1s. Hereford: 12 for 1s (wholesale, 12 to 13).

Thursday.—Brigg: 11 or 12 for 1s. Driffield: 14 or 15 for 1s. Penistone: 10 for 1s. Ripon: 11 or 12 for 1s. Scarborough: 9 for 1s. Wetherby: 10 or 11 for 1s. Birmingham: 10 per 1s. Kidderminster: 11 or 12 for 1s.

Friday.—Easingwold: 11 or 12 for 1s. Grimsby: Austrian, 5s 9d to 7s 3d per 120; Styrian, 8s 6d to 9s; Egyptian, 4s 10d to 5s; Swedish, 8s 9d to 9s. Helmsley: 12 for 1s. Leeds: Yorkshire, 11s 6d to 12s 6d per 120; Irish, 9s 6d to 11s; Danish, 8s 3d to 9s 6d; Austrian (blues), 7s to 7s 6d. Leyburn: 12 for 1s. Lincoln: 11 or 12 for 1s. Otley: 9 or 10 for 1s.

Saturday.—Appleby: 10 to 12 for 1s. Berwick: 10d to 11d per doz. Carlisle: 10 to 11 for 1s. Doncaster: 9 or 10 for 1s. Grantham: 12 or 13 for 1s. Howden: 10 or 11 for 1s. Lancaster: 10 or 11 for 1s. Malton: 11 or 12 for 1s. Pontefract: 10 or 11 for 1s. Richmond: 11 or 12 for 1s. Retford: 1s 10d to 2s per score. Skipton: 11 for 1s retail; 12 for 1s. Stokesley: 9 or 10 for 1s. Whitby: 10 or 11 for 1s. York: 10 for 1s.

THE BALTIC.

Wheat is 3d. per quarter lower for cargoes, both near at hand, and for future months' arrival. The tone of the market is exceedingly flat, the firm advices from India and Argentina being outweighed by the dismal depression at New York and Chicago. Sales of the last few days of February were Californian, at 30s. 3d.; Walla Walla, at 29s. 6d.; Australian, at 30s.; Argentine, at 30s.; No. 2 Hard Winter, at 28s. 9d.; No. 1 Northern Manitoba, 29s. 3d.; No. 2, 28s. 6d.; and soft white Kurrachee, 29s. 9d. per quarter. On March 1 a cargo of Hard Winter was sold for 28s. 6d., and No. 1 Northern Spring for 29s. per quarter. Red Kurrachee was offered for prompt shipment at 29s. 3d., but was not disposed of at that price. Maize was very flat on the 24th, 25th, and 26th February, but the 27th and 28th were steady days, and on March 1 the feeding was distinctly better. Sales of the week are: Roumanian, at 22s. 3d.; Galatz, at 22s. 9d.; Turkish, at 22s. 6d.; and Argentine, at 22s. 3d. per quarter.

A cargo of arrived Azoff Rly. made 19s. on Thursday, and Roumanian oats on Saturday made 17s. 9d. per quarter.

The London Corn Trade Association notifythe following standards as available for use in March:—Odessa maize, December shipment; Galatz maize, December shipment; Danube maize, December shipment; Bessarabian maize, December shipment; Danube Cinq. maize, December shipment; Novorossisk maize, December shipment; Varna maize, December shipment; Salonica maize, December shipment; Dedeagatch maize, December shipment; Danubé rye, December shipment; Odessa rye, December shipment; Novorossisk rye, December shipment; Nicolaieff rye, December shipment; Danube barley, December shipment; Novorossisk barley, December shipment; Odessa barley, December shipment; Nicolaieff barley, December shipment; Kertch barley, December shipment; Larache beans, December shipment.

Four wheat and three barley cargoes arrived off ports of call February 24-25, and three wheat cargoes arrived on March 1. The weeks' arrivals therefore were ten cargoes.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The weather has become so mild that the wheat plant has resumed growth, and is also improving in colour with the recent showers. The total fall of rain for February was, however, much below the average, and the following figures are the reverse of satisfactory:—

	1902	1901	1875-1900
January	1.00	0.90	1.85
February	0.90	0.75	1.53
Total	1.90	1.65	3.38

The land is in a good state for barley, and the sooner it is sown the better. Farmers seem to be apprehensive as to the clover lays, and there is a larger demand than usual for lucerne, the love of which for dry weather exceeds that of nearly all the other plants of its species. The winter tares look well.

In France the wheat is regarded as of not much more than mediocre promise, but good reports of its appearance are to hand from Austria-Hungary and Italy. From America the Western States send more hopeful reports than before, while from the South-eastern and Central States there is news of serious damage to the winter wheat. The Indian crop is unfavourable. Rain has fallen very opportunely for crop prospects in Asia Minor, but Persia shares in the drought prevailing in Hindustan.

The sales of English wheat in February showed an increase on January, while the price declined. This is partly a matter of cause and effect, but it must be feared that farmers, as the month wore on, rather lost heart, and hurried grain to the market at 6d. decline. The demand for chicken wheat was rather good, but this, somewhat paradoxically, makes the average lower, as the proportion of low-quality wheat sold at market, instead of used at home, reduces the apparent value of the staple as a whole. Chicken wheat, as a matter of fact, should not be included in the averages, but how are the inspectors to enquire for what purpose the wheat has been bought. Prices and sales thus far this year are as follows:—

January	569,000 qrs. at 27s 8d per qr.
February	681,000 qrs. at 27s 1d per qr.

The average prices paid for feeding stuffs show a slight advance in oats and a slight decline in maize, while barley has been remarkably stationary in value.

	English barley.	English oats.	American maize.
	s. d.	s. d.	s. d.
January	26 8	20 1	27 0
February	26 8	20 3	26 6

The price of best London flour is unchanged on the month, and that of Town Households, on the average of 12 market days, is 3d. up from January. But the last market of February was 6d. cheaper for household flour, and thus the survey from the 1st March back to the 1st February, shows a net decline, and not advance, of 3d. per sack.

Liverpool quotes maize at 5s. 1d. per cental for American, 4s. 9d. for Galatz, 4s. 10d. for Turkish, and 4s. 11d. for Argentine.

Continental prices for wheat, thus compare with value at Mark Lane:—

	London average.	Term market.	F.A.Q. Paris.	F.A.Q. Berlin.
	s. d.	s. d.	s. d.	s. d.
Jan. 1	28 3	31 3	38 0	37 6
Jan. 8	27 1	31 3	37 6	37 6
Jan. 15	28 2	30 9	37 9	37 3
Jan. 22	27 9	30 9	37 0	37 0
Jan. 29	27 10	30 3	37 3	37 0
Feb. 5	28 0	31 3	37 6	37 0
Feb. 12	27 11	31 6	37 0	37 0
Feb. 19	28 3	31 3	36 3	37 6
Feb. 26	28 1	30 9	36 0	37 0

New York quotes wheat at 27s. 6d. and San Francisco at 25s. The latter is the only advancing market at the present moment. Foreign wheat in London is temporarily weaker than English.

Supplies of wheat on passage to the United Kingdom are as follow:—

	Qrs.
Californian	2,340,000
Russian	55,000
American	235,000
Indian	124,000
Argentine	170,000
Australasian	620,000
Other countries	21,000
1st March, 1902	3,575,000
1st January, 1902	2,360,000

Of flour there are now on passage 318,000 sacks, against 420,000 sacks on 1st March, 1901. The present expectations include 186,000 sacks of American.

Of maize the quantity on passage is 350,000 qrs., including 260,000 qrs. of round corn. A year ago 540,000 qrs. were afloat, and more than half of it was flat grain. Barley is in good prospective supply.

	Qrs.
Russian	100,000
Roumanian	70,000
Bulgarian	30,000
Californian	300,000
Asiatic	40,000
Total	540,000
A year ago	355,000

Supplies of oilseed on passage are thus returned for the 1st March:—

Qrs.	1902.	1901.	1900.
Linseed	340,000	415,000	305,000
Rapeseed	12,000	3,000	4,000
Cottonseed	98,000	80,000	90,000

The linseed includes 40,000 qrs. of Indian and 300,000 qrs. of Argentine, the rapeseed 10,000 qrs. of Indian, and the cottonseed 95,000 qrs. of Egyptian.

The American visible supply on the 1st March was called as follows:—

	Qrs
Wheat	11,400,000
Oats	1,034,000
Maize	1,968,000

Oats and maize show some decrease on the twelvemonth, but wheat returns indicate a slight increase in the Atlantic States. The Russian ports hold 1,419,000qrs. of wheat, against 1,652,000qrs. a year ago. The same ports hold 580,000qrs. of barley and 620,000qrs. of oats, against 499,000qrs. of barley and 515,000qrs. of oats at this period in 1901.

Imports of the United Kingdom last week were fairly good of wheat, heavy of flour, small of barley, moderate of oats, small of beans, good of peas, and large of maize. Actual quantities thus compare with the last week of February, 1901:—

	1902.	1901.
Wheat, qrs.	254,000	238,000
Flour, sks.	184,000	169,000
Barley, qrs.	76,000	116,000
Oats, qrs.	115,000	191,000
Beans, qrs.	4,300	6,370
Peas, qrs.	16,000	12,000
Maize, qrs.	257,500	347,000

The changes in the prices of spring corn have been very slight during the past week, but the tendency tof the market has been in buyers' favour for barley, oats, maize and canary seed. The articles held most firmly are beans, peas, oil seeds and farm seeds.

LONDON TERM MARKET.

This market is held twice a day, except on Saturday, when there is no afternoon call. The market is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals. The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

WHEAT.—Calls.	March. s. d.	June. s. d.	Aug't. s. d.
Feb. 24 11 a.m.	6 3	6 3	6 3
4 p.m.	6 3	6 3	6 3
Feb. 25 11 a.m.	6 2	6 3	6 3
4 p.m.	6 2	6 3	6 3
Feb. 26 11 a.m.	6 2	6 3	6 3
4 p.m.	6 2	6 3	6 3
Feb. 27 11 a.m.	6 2	6 3	6 3
4 p.m.	6 2	6 3	6 3
Feb. 28 11 a.m.	6 2	6 3	6 3
4 p.m.	6 1	6 2	6 3
Mar. 1 11 a.m.	6 1	6 2	6 2
To-day noon	6 1	6 2	6 3

The maize market is very weak for March delivery, 4s. 4d. being accepted. For May 4s. 7d. is demanded.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100 lb. We do not give fractions of a penny per cental. The maize quoted is fair average quality from the United States.

The deposit required from members of the Term Market has been fixed at £50 minimum and 1s. per quarter margin on any purchases above 1,000 quarters.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

THIS DAY'S MARKETS

MARK LANE, MONDAY.

[FIRST REPORT.]

The market was not very well attended, but there are so many different interests concentrated at Mark Lane that it is very difficult to judge from a general survey. Thus, there was more, and not less, than usual doing on the barley section on the old market, and in the farm seed section on the new. For English wheat there was a fair sale at currencies, and the small decline admitted in foreign led to a slight increase in the business put through. The greatest dulness, however, marked the trade in oats; maize, beans, peas, rye, and dari; while there also was a falling off in the demand for malt and for oilseeds. The price of maize and oats to sell was fully 6d. down, but there were few sellers at the town rate. Malting barley seldom exceeded 32s., but there were some fine lots for seed sold as high as 38s. per qr. Lucerne was locked up on the seed market at 60s. per cwt.

THE MARKET CLOSED WITHOUT IMPROVEMENT. THE WEATHER, MILD AND OPEN, WAS AGAINST RETAIL INQUIRY FOR GRAIN.

THE FLOUR TRADE.

MARK LANE Monday

A feature of to-day's flour market was the offer of some splendid Russian at 28s. to 30s. per sack. The quantity was not sufficient to justify a separate item in the price list, but if Russia can turn out such quality from her mills the Old Country will have more than ever "to wake up." London and country makes to-day were held for former terms, but there was a wretched sale. American sorts, with 6d. reduction allowed for April delivery, were naturally weak on spot. Hungarian sorts were held above buyers' notions. Milling offals were generally cheaper to buy, but as prices were not quite settled it is safer to quote value as on Monday last.

THE BALTIC, 1 p.m.

STATE OF TRADE.

The following sale of cargoes are offered at 3d. decline from Saturday:—American wheat, Russian and Roumanian maize, Argentine millet, Russian oats, and Roumanian rye. Cottonseed is also in buyers' favour. Other sorts of cargoes are steadily held.

BUSINESS DONE.

WHEAT.—Argentine, 30s 3d, March shipment; Blue Stem, 29s 6d, March shipment; New South Wales, 29s 3d, March shipment; No. 1 Northern, 28s 9d, arrived.

MAIZE.—Galatz, 22s 3d, on passage; Roumanian, 22s, on passage; Odessa, 22s, on passage; Poti, 22s 6d, on passage; Argentine, 21s, June shipment; American, 25s 3d, prompt shipment.

BARLEY.—Azoff, 19s, April shipment; Roumanian, 18s, April shipment.

OATS.—White Konigsberg, 20s, prompt shipment; White Libau, 18s 3d, prompt shipment; White Libau, 18s, April shipment; New Zealand, Bluff, 24s 9d, April shipment.

MILLET.—Argentine Sorghum, 18s, April shipment; Smyrna, fine, 30s, April shipment.

CANARYSEED.—Turkish, 37s, prompt shipment.

COTTONSEED.—Egyptian, £6 6s, prompt shipment.

PROVISIONS

London, Monday.—The arrivals from Ireland last week were 2,025 bales bacon, and from foreign ports 9,697 bales bacon. Bacon.—There was a very poor demand for bacon all the week, the wholesale houses finding trade very slow. Owing to this, and also to the increase in the Danish arrivals, and the coming forward of the previously delayed Canadian, prices were considerably lower. Danish official rates, 3s, and Canadians, 2s to 3s, Irish in short supply being unaltered, prices ranging:—Irish from 50s to 56s, up to 61s; Danish from 49s to 51s, up to 54s; Canadian, 44s to 50s, up to 52s. Butter.—Butter was generally very slow and prices somewhat easier, especially for Danish, which was quoted 114s to 116s, up to 118s; Colonial, 104s to 105s, up to 108s. Lard.—Lard unchanged, quiet.

SEEDS.

London, Monday.—We had a moderate attendance to-day, and not a great deal doing. The principal dealers, having laid in fair stocks, are now waiting for the retail demand before again buying freely. English red clover, with reduced supplies, is decidedly firmer. White clover, Alsike, and trefoil are quiet, but well maintained. Perennial and Italian grasses are steady, with a fair demand. Spring tares meet a moderate inquiry at late rates. Canary seed is dull and drooping. Haricots and blue peas show no change.—JOHN PICARD AND CO.

GRAIN AND FLOUR FACTORS REPORTS.

The wheat trade is steady; prices unchanged. Flour dull, and without change. Maize and barley unchanged. Oats 3d. per quarter lower.—COVENTRY (Mark Lane).

The trade in wheat is inactive, and the few transactions passing show a decline of 3d. to 6d. from last Monday. Maize is steady, unchanged.—WOOD AND CO.

Flour.—Trade to-day has been quiet, and prices are unchanged to 3d. lower since this day week.—T. S. MEDHILL AND SONS.

Milling Offals.—The drop in the price of bran has found buyers. Mills are now clear and sellers firmer. Pollard and middlings are slow, and must be written 2s. 6d. per ton down on the week.—JOHN BAWCOMB AND CO.

Flaur.—The demand continues slow, and, with easier American markets, prices are 3d. to 6d. per sack down. Grain.—Flat and round corn are in smaller compass, and in seller's favour. Oats and barley slow. Beans, 3d. per boll dearer. Pease are in better supply, and the turn lower. Oatmeal quiet. Oilcake unchanged. Mill stuffs are rather scarcer.—MCKINNON AND MCDONALD (Glasgow).

Flour.—With the lower cables from America 3d. to 6d. per sack reduction has been accepted for some qualities of spot flour. Values on spot are as follows:—1st Spring Patents, 24s. 9d. to 25s. 3d.; 2nd Spring Patents, 23s. 9d. to 24s. 3d.; American Winter Patents, 24s. 9d. to 25s. 3d.; extra fancies, 23s. to 23s. 6d. Offals.—There is no improvement in the demand for bran, and prices remain unchanged.—GREENHILL BROS. (Belfast).

FEEDING STUFFS.

London, Monday.—Linseed cake: Spot prices keep up, as there is so very little here, but the forward market is weaker; demand very limited. Decorticated cotton-cake and meal: Dull, unchanged. Undecorticated is also without alteration. Linseed weak, and lower.

ROBERT AND JOHN HEWETSON.

POTATOES.

Borough, Saturday.—Arrivals are heavy, and the quantity proved in excess of buyers' requirements, the demand being quiet, while prices were barely maintained. Quotations:—Reading Giants Blacklands, 40s; Blacklands Up-to-dates, 45s to 50s; Lincoln Silts, 55s to 60s; Blackland Gartons, 40s per ton.

Goole, Wednesday.—Large attendance here to-day, with plenty on offer, and a dull trade. Sellers had to accept less money. Prices for warps, 5s 6d to 5s 9d per load of 18 stones. Top price for best Up-to-Dates, 52s 6d per ton.

Great Northern, Saturday.—A heavy supply was available, but the demand ruled slow. Scotch maincrops, 80s to 90s; ditto Up-to-dates, 65s to 75s; Lincoln ditto, 55s to 65s; ditto maincrops, 80s to 90s; Blackland dates, 40s to 50s per ton; New Teneriffe, 14s per cwt; and Jersey 4d per lb.

Spitalfields, Saturday.—Very heavy supplies, and met a slow demand, prices being weak. Quotations:—Best Lincoln Up-to-dates, 50s to 65s; Blackland ditto, 40s to 45s; Wisbech ditto, 45s to 50s; Scotch ditto, 60s; Scotch maincrops (grey soil), 65s to 70s; Lincoln maincrops, 75s to 85s; Reading Giants, 40s; and Blackland Gartons, 45s per ton.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Good supplies of vegetables were available this morning, but the demand was of a slow character. Fruit was in fair supply, and evidenced a fair demand, at generally steady prices. Greenstuffs:—Cabbages, 4s to 5s; cauliflowers, 6s to 8s per tally; Brussel sprouts, 2s to 2s 6d per half-sieve; spinach, 2s to 3s; beetroots, 2s to 2s 6d per bushel; parsnips, 3s 3d to 3s 6d per bag; carrots, 2s to 2s 6d; turnips, 2s 6d to 3s; parsley, 3s 6d to 5s per dozen bunches; celery, 10s to 12s per dozen rolls; horseradish, 1s 3d to 1s 6d per bundle; forced rhubarb, 1s 3d to 1s 6d per dozen bundles; English onions, 7s 6d to 8s per cwt; Valencia, 7s 6d to 9s per case. Potatoes, 35s to 80s per ton. Fruit: English grapes, 1s 6d to 2s 6d; Belgian, 9d to 1s 6d per lb; Nova Scotian apples, 18s to 25s per barrel; Californian, 9s to 16s per case; bananas, 7s to 12s per bunch; Denia oranges, 10s to 25s; Jaffa, 12s to 14s per case; pineapples, 2s to 5s each; lemons, 8s to 20s per case; Canary tomatoes, 4s to 4s 6d per case; dates, 12s per cwt.

Sheep	3 8	4 10	5 6
Lambs	5 4	6 0	6 4

Milch cows, per head, £15 to £22 10s.

British arrivals include as follows:—Scotland, 35; Eastern Counties, 674; Midland, Home, and Western Counties, 273; Devon, 30; Ireland, 77.

In the beast market, compared with Monday last there was an increase of 160 head, arrivals from Norfolk being heavier, with a few more from Scotland. Trade for fat beasts of both prime and second quality was dull and heavy at late rates. Fat cows, though in full supply, met with more demand at higher rates for best quality; fat bulls and rough cattle were difficult to dispose of even at a reduction.

The following are top quotations per 8lb (sinking the offal):—

	To-day.	March 4, 1901.
Scotch	4s 6d to 4s 8d	4s 4d to 4s 6d
Devons	4s 5d to 4s 7d	— —
Norfolks	4s 5d to 4s 7d	4s 4d to 4s 6d
Lincolns	4s 4d to 4s 6d	4s 0d to 4s 2d
Irish	4s 2d to 4s 4d	4s 0d to 4s 2d
Fat cows	3s 10d to 4s 0d	3s 6d to 3s 8d

In the sheep market there was an increase of 600 in the number penned, amongst which was a large proportion of Dorset lambs, which met a slower trade. A few very choice Down lambs made 1s per lb. Trade for sheep, both wethers and ewes, ruled firm, especially the latter; these cleared early. The supply included 320 Scotch and 3,980 from the Eastern Counties.

Undermentioned quotations are at per 8lb (sinking the offal), and are for the best of each class penned:—

	To-day.	March 4, 1901.
7½ to 8-st. Downs	5s 4d to 5s 6d	5s 10d to 6s. 0d
9-st. do	5s 0d to 5s 2d	5s 8d to 5s 10d
10-st. half-breds	4s 10d to 5s 0d	5s 6d to 5s 8d
12-st. Lincolns	4s 6d to 4s 8d	5s 2d to 5s 4d
10-st. Down ewes	4s 4d to 4s 6d	4s 10d to 5s 0d
11-st. half-bred do	3s 11d to 4s 1d	4s 8d to 4s 9d
5-st. Dorset lambs	6s 4d to 6s 6d	7s 4d to 7s 6d
6-st. half-bred do	5s 10d to 6s 0d	6s 10d to 7s 0d

Calves and pigs being in short supply, trade and quotations are not worth quoting.

London, Monday.—Moderate supplies. Trade rather better. Beef carcasses, 3s 8d to 3s 9d; hind quarters, 4s 2d to 4s 4d; roastings, 5s 2d to 5s 6d; sheep, ewe, 2s 10d to 3s 2d; wether, 3s 10d to 4s 4d; hind quarters, ewe, 3s 8d to 4s; wether, 5s to 5s 4d; pigs, large, 3s 4d to 3s 8d; small, 4s to 4s 4d.

St. Ives, Monday.—Beasts, 400; sheep, 735; pigs, 300. Beef, 7s 3d to 8s 3d; mutton, 7s 7d to 9s 4d; pork, 7s to 7s 9d; sows, 5s 9d to 6s 6d. Fat cattle good demand; stores slow. Fat and store sheep fair. Fat and store pigs good demand. Milch cows, good trade for best; prices, £14 to £23.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1065. To-day's supply compared with Monday last showed an increase of 359, and consisted of 923 from the United States and 142 from Canada, these latter consisting chiefly of ordinary quality. Trade was of a very slow and dragging nature, though rates were a shade higher. The following were the quotations per 8lb.:—Offal given in best States, 4s 5d; ditto seconds, 4s 2d; Canadians best, 4s; plain, 3s 8d. Besides the above number, 350 States beasts were held back. Sheep numbered 752 from the United States, trade for which was very dull, at from 4s 3d to 4s 4d per 8lb. On Saturday the beast supply consisted of 1,213 from the United States, quoted at from 4s 2d to 4s 5d, with a fairly steady trade; Canadians 3s 8d to 4s, mostly cows. On the same day 504 States sheep were on offer, and made 4s 4d per 8lb. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 596, 4s 1d to 4s 2d per 8lbs., to dress about 720lbs.; sheep, 428, 4s 8d for ewes per 8lb., to dress about 56lbs.

Liverpool, Monday.—Smaller supply of cattle demand slow prices generally in favour of buyers, finished quality only maintaining late quotations. Sheep shown in larger numbers; demand good at higher prices. Beef, 6½d to 5d per lb; mutton, 8¼d to 5¼d per lb. At market, 1,126 cattle and 3,827 sheep.

FOREIGN CORN.

Hamburg, Saturday.—After a few days of sharp frost, we have now mild, rainy weather, and inland navigation on the Elbe is reopened. There are no complaints about the state of the autumn-sown crops. Trade quiet, without material alterations in prices. There is no fear of want of supplies. The imports during the week amounted to 13,333 tons wheat, 7,753 tons rye, 4,751 tons barley, 4,207 tons maize. German wheat is offered more freely, 32s 9d per 504lb being asked for fine Saale. American hard winter No. 2 is held at 29s, Northern spring No. 2 at 28s 9d per 480lb, Walla Walla at 29s 6d per 500lb. With an increase of offers of rye from Russia, the demand has abated, and 9 15-20 South Russian, March-April shipment, is offered at 23s 9d per 480lb c.i.f. Good middling qualities of malting barley are offered more freely, while finest quality continues scarce. Good Saale is held at 30s 6d to 32s 6d, fine at 34s to 36s, Moravian 34s to 34s 6d, Bohemian 31s to 32s, Oderbruck 28s to 30s per 448lb f.o.b. Russian feeding barley in fair demand at 18s 3d per 400lb c.i.f. Hamburg. Mixed American maize is held at 25s 3d. Odessa, February-March shipment, is selling at 21s 3d; Turkish at 22s 3d to 22s 6d per 480lb c.i.f. Hamburg. Quality of the new maize from Odessa and Turkey, with few exceptions, is giving satisfaction. River Plate, April-May, is held at 22s to 22s 3d c.i.f.—JOHN TATLOCK.

HOPS.

London, Monday.—W. H. and H. Le May report: There has not been much business done on this market during the past week. Stocks are now getting into a narrow compass.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

Notwithstanding a much shorter supply, trade on the chief market day of the week (Monday) opened with an entire absence of life, even at a decline of 1d. per 8 lbs.; towards mid-day, however, it became firmer, resulting in a clearance being made, though there was comparatively but few butchering cows and bulls on the market; rates to effect sales had to be lowered fully 2d. per 8 lbs. At this reduction was more or less forced. At Deptford, markets were only held on Monday and Saturday, on which days business was of a very slow nature, rates ruling in favour of the buyer. The total number of beasts offered for sale on both markets was 3,104, as against 4,589 during the previous week. The supply consisted of 1,010 British—decrease 515—and 2,094 foreign (decrease 970); these latter comprised 1,919 from the United States, and 175 Canada. The following were the top rates paid per 8lbs. (sinking the offal):—90 stone polled Aberdeens, 4s. 8d.; 90 stone polled Norfolks, 4s. 7d.; 100 stone shorthorn ditto, 4s. 6d.; 95 stone Dublins, 4s. 6d.; Waterfords, 4s. 4d.; 100 stone Lincolns, 4s. 6d.; 90 stone States, 4s. 3d.; 90 stone 3s. 8d. to 3s. 10d.; 100 stone fat bulls, 3s. 4d. to 3s. 6d. With regard to sheep, owing to the smaller number on offer, trade was of a decidedly firmer and steadier nature, this remark applying to both wethers and ewes, especially the latter, these readily making 2d. per 8 lbs. more money. For lambs there was also more inquiry, with consequently freer sale, with a marked upward tendency in value. At the Foreign Cattle Market the supply was light, and the trade was of a very nondescript character. Best pens made per 8 lbs. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 4d.; 9 stone Downs, 5s. 2d.; 10 stone Downs, 5s.; 10 stone half-breds, 4s. 10d.; 12 stone Lincolns, 4s. 8d.; 10 stone Down ewes, 4s. 6d.; 11 stone half-breds, 4s. 2d.; 8 stone States, 4s. 3d.; 5 stone Dorset lambs, 6s. 4d.; 6 stone half-breds, 5s. 8d. Of calves, the supply was very limited, as was also the demand. The best on offer were quoted at 6s. per 8 lbs. No pigs were marketed.

Trade in the West.

Now that the weather, though still excessively dull and gloomy, has once again become open, hopes of an early spring are once more revived, and trade in store middlings is benefitting under its influence. The early spring sales of barreners have opened fairly well, and with a stronger trade than might have been expected under the adverse circumstances of bitingly cold and snowy weather, and prices have been, so far, rather in advance of buyers' expectations, more particularly for young bullocks, which are making £24 to £32 per pair for heavily-fleshed beasts, and more ordinary runs £18 to £22 10s. The milch beast trade has also been attended by equally satisfactory results, at one sale in the Wiltshire district £24 10s. being made for an exceptionally smart heifer and calf, a more general run for good animals being £17 to £22; whilst cows make £12 to £16 5s. Young stock is also commanding a good deal of attention, yearling heifers selling freely from £5 to £7 5s. apiece. Stock bulls are likewise meeting a good seasonable inquiry, the present range for ordinary runs being from £9 to £15 or £16. Fat beasts, after the supply has for some little time past run rather short, are now coming a little more freely to hand, but this in no way affects the firmness of the trade, especially for home-grazed heifers, which are selling at all the leading markets from £15 to £22 each, and steers up to £26 (or quite 11s. to 12s. per score); fat cows selling from £14 to £19 15s. (or 10s. 6d. to 11s.). There is an equally good inquiry for best calves, which are making from £4 to £6 10s. each (or 8d. per lb.), and seconds from 54s. to 76s., rearers being now worth 27s. to 47s. Mutton rules fairly strong, though we hardly consider the trade as buoyant as a fortnight since. Still, anything at all fit in the way of either wethers or ewes meets a very fair sale, best wethers perhaps touching 8d. for anything exceptional in quality and weight, though from 7d. to 7½d. may be considered as a more average range, and from 6½d. to 7d. for ewes (the best class of wethers bringing from about 44s. to 52s., and ewes 42s. to 45s.). Lambs are coming in very well considering the cold; those at all ripe are making up to 38s. or 39s. each (for cross breds), ranging downwards to 30s. for those not so well finished. Store sheep are quiet just for the present, but with a return of open weather we may expect to see things "move" a bit later on, and at prices it is hoped that will in no way prove disappointing to flockmasters, for it is the universal opinion that the scarcity of sheep in the country will be bound to tell on prices as soon as sales become anything like general in the country.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The number of fat cattle on offer this week has been large, and the general quality good. A fair demand has been experienced, and any change has in some cases slightly favoured buyers. A large show of fat cows, and for the best class a good trade was got. Sheep were plentiful. Owing to the continued bad reports from London, heavyweighted sheep and hogs continue to sell at low prices, but nice shop sheep would make an advance of quite 1s. a head. Fat lambs, if of good quality, selling well at from 37s. to 42s. Fat pigs and calves continue to sell at high prices. A remarkably small show of store sheep of a secondary class, for which there was little inquiry. Store cattle a poor show. There was a fair inquiry for the best descriptions on offer, but they were difficult to get quit of. There was a large show of milch cows, which met a quieter trade at about £1 head reduction. Quotations: Best beef to 8s. 3d. per stone; mutton to 7¾d. per lb.

Trade in Ireland.

There was a decrease of 252 cattle at last Thursday's Dublin Market, as compared with that of the previous week, and with a moderate attendance of English buyers. Trade was again of a most sluggish nature; in fact, many were of the opinion that it was the worst market since the stall-fed season opened. The cross-Channel shippers maintain—whether rightly or wrongly—that it is quite a risk buying, as they cannot be sure of making their own money on the other side. Except for the very best heifers and bullocks, the previous market's rates were barely maintained, and a large number of coarse and unfinished cattle were left unsold. Even the nice, medium-weight, well-finished beasts which generally are in active demand met with a very slow sale, with prices tending in favour of buyers. The quotations for beef were:—Prime ox and heifer, from 52s to 55s., and a few lots of extra finish from 56s. to 60s. per cwt.; second quality, from 46s. to 52s. 6d., and inferior 42s. to 45s. per cwt. The number of sheep in market was much the same, these being 3,862, or 142 more than last day. The mutton department was about as unsatisfactory as the beef. The shipping demand continues to be practically suspended, and it was hard to place the hoggets, which form a large portion of the supply. In the early morning it was thought that there would be a revival in the inquiry for light sheep for Manchester, but buyers supplied themselves very quickly. The local buying was fairly good for choice sheep, which sold at practically similar values as on previous Thursday, prime wether mutton making from 6½d. to 7½d. per lb., the latter figure ruling for well-finished Mountain and Cheviot sheep; good ewe, 5¾d. to 6½d., and inferior sheep from 4½d. to 5½d. per lb. Lamb in rather slack demand at from 30s. to 40s. each. Prime veal still scarce, and worth from 7½d. to 8½d. per lb; coarse and medium ditto from 4½d. to 6½d. Large young springer cows in active demand at from £19 to £21, but ordinary descriptions dull, at very irregular prices.

A small pig market, and good attendance of buyers, who operated very slowly at first, owing to sellers holding out for the rise of 2s. per cwt., which ruled last Thursday. As the day wore on trade became more active, and an early clearance was effected at late rates. Choice light-weight pigs made from 48s. to 50s. per cwt., and porkers a couple of shillings more; coarse pigs from 32s. to 42s. per cwt. In the South of Ireland there has been a decided improvement in the price of stores, particularly for small, forward cattle. Beef in the Cork market was weaker, and it is not expected that a better state of things will be seen for a month or so. Mutton holds its own well in Southern markets, choice wethers making from 7½d. to 8d. per lb., and second quality from 6d. to 7d.

a

LONDON.

Islington, Thursday.—Supplies fair for a Thursday's market, and, as usual on this day, the bulk consisted of fat bulls and rough cattle. The demand was of a sustained character, and fair sales transpired at steady prices. Fat bulls 3s 4d to 3s 8d. Arrivals of sheep were moderate, and met with fair request at previous prices. 7½ to 8-stone Down wethers, 5s 4d to 5s 6d; 9-stone ditto, 5s 2d to 5s 4d; 10-stone Down ewes, 4s 2d to 4s 4d; and 11-stone half-bred ditto, 4s to 4s 2d. Calves slow of sale, the best on offer making 5s 4d per 8lb to sink the offal. No pigs were brought forward.

COUNTRY.

Ashford, Tuesday.—The market rather small. Best beef was worth about 11s 6d a score. Mutton trade slow. Veal and pork cheaper.

Basingstoke, Wednesday.—At Raynbird and Sons' Sale Yard there was a fair attendance of buyers to meet a supply of 47 fat beasts, 53 calves, 420 fat sheep, lambs, and 42 head of dairy and store cattle, for which the following prices were realised:—Prime Devons made up to £21 10s, shorthorns up to £26 10s, Welsh steers £17, and Norfolk beasts £17 15s. Prime quality fat sheep realised from 44s to 50s, 13 months' old ditto 35s to 48s, fat sucking lambs 29s to 36s, fat ewes 30s to 50s, a consignment of fat tegs from J. Strattons, Esq., made up to 46s, fat ewes from Breach Farm up to 50s, fat sucking lambs from W. Barrow Simonds, Esq., up to 36s. Fat calves, 70s to £6 5s; small, 20s to 50s; dairy cows, £10 to £19 5s. The supply of fat beasts was fully up to the average as regards both quantity and quality, and a good demand was experienced, and full values made. An average supply of fat sheep and lambs, with a good attendance of buyers, and a slightly improved trade for the better quality fat sheep and ewes. With a full supply of milch cows, trade for the best descriptions was firm; secondary sorts, however, met a slow trade. Store cattle trade is still quiet. Fat calves met a very brisk trade at an advance on last week. Ruling values:—Best quality fat beasts, 6¾d to 7¼d; second ditto, 6d to 6¼d; bulls, cows, and inferior beasts, 5d to 6d per lb; best quality fat sheep, 7d to 8d; second ditto, 6d to 7d; fat sucking lambs, 9d to 10d; old ewes, ram, and inferior sheep, 5d to 6d per lb; fat calves, 6d to 8¼ per lb.

Boston, Wednesday.—A fair show of cattle, and buyers numerous. Strong store beasts, £14 to £16; incalvers, £19 to £21; heifers, £16 to £18; calves, 55s to 60s; best beef, 8s; heifers, 7s to 7s 6d per stone; hogs, 36s to 40s each; best wethers, 7d to 7½d; heavy weights, 5½d to 6½d per lb.

Braintree, Wednesday.—At Messrs. Balls's auction mart trade in cattle and sheep was rather slow; hogs better. Prime beasts met a rather sharp demand, and young sheep made fair prices. Heavy hogs found ready sale.

Bristol, Thursday.—Beef moderate supply to-day; slow trade, best qualities making 60s to 62s per cwt; secondary animals, 56s. Good supply of sheep, but trade dull. Best wethers realised 7¼d to 7½d per lb; heavy wethers, 7d; ewes, 5½d. Good number of pigs on offer, baconers fetching 9s 6d per score; porkers, 10s 9d. Little inquiry for store cattle.

Bury, Wednesday.—At Messrs. Simpson and Sons' auction mart there was a capital show of fat beasts. Trade was hardly up to the higher prices of last week, the quotations ranging up to £26, distant county purchasers attending in full numbers, but buying with rather more caution. Larger show of store cattle. Good trade for all the best bred lots. Some polled cattle fetched £13 each. Several lots of well-bred shorthorns made from £9 10s to £8 5s per head. Yearlings realised from £8 to £6 2s 6d. About an average supply of fat sheep. Trade showed very little variation in price as compared with the last few weeks. Larger show of store sheep, which met a good demand, at fully late rates. About an average show of fat pigs. Trade was hardly up to the late high quotations.

Calne Friday.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of the Back.	Price per Sc. s.	d.
6 sc. 10 lbs. to 9 sc. 10 lbs.	2½ in. and under ...	9	6
Under 10 sc.	Not exceeding 2¼ in. ...	9	0
Under 11 sc. 10 lb. ...	Not exceeding 2¾ in....	8	6
Under 12 sc.	Not exceeding 3 in. ..		

—C. & T. Harris & Co., Ld.

Cambridge, Monday.—Beasts, 293; sheep, 526; horses, 13. Beef, 7s to 8s; mutton, 4s 2d to 5s 2d. A few lots of store beasts, but trade very slow. Fat beasts not so good as last week. Fat sheep a good number to hand, prices lower. Stores trade quiet. Market closed for pigs. Hay, straw, and roots a fair trade.

Canterbury, Saturday.—Large supply of store sheep; working tegs, 24s 6d to 33s. A number of rough ewes, in lamb, were also offred and sold at a wide range of prices from 11s 6d to 26s 6d; strong two-year-old wethers, 44s.

Carlisle, Saturday.—The number of Irish store cattle on offer was considerably larger than a week ago, there being close on 300 heifers and stripping cows. The mild weather had a stimulating effect on the trade. There was a large attendance of buyers from a distance, and a good demand, especially for cows and the best class of heifers. Stripping cows were quoted at £9 10s to £12 10s and £13 10s; good heifers, £11 10s to £15 10s; small heifers, £7 to £8 a head.

Dorchester, Wednesday.—Business was of a brisk character to-day, and although supplies came freely to hand, a clearance was readily effected, and that, too, at prices which generally showed a slight improvement. The beef trade keeps unusually firm, fat bullocks, the best quality heifers and steers, making 10s 2d to 11s 6d per score, and cows 10s to 10s 6d. Mutton a slightly better trade, both for ewes and wethers, making 6½d to 7¾d per lb; cross-bred lambs, 6½d to 9d. The veal trade keeps good, especially for well-finished calves, which are now selling at £4 10s to £6 15s each.

Dublin, Thursday.—Numbers in market:—Beasts, 1,815, decrease, 252; sheep, 3,862, increase, 142; calves, 38, decrease, 6. Demand for choicely-finished cattle fairly well sustained, heavy-weight bullocks being most sought after. Rough sorts slow and a clearance difficult to effect. Sheep in excess of requirements; the very best scarcely made late rates; other sorts lower, with a very bad finish. Cattle, live weight (best), 32s to 34s. 6d per cwt; other sorts, 26s to 31s per cwt. Mutton, dead weight, 6d to 7½d per lb.—GANLY, SONS, AND CO.

Hereford, Wednesday.—Bullocks and cows, 478; calves, 90; sheep and lambs, 608; pigs (fat and sows), 58; sucking pigs, 3; pigs (stores, not more than ten), 204; pigs (stores, more than ten), 145; colts, 5. Prices of stock:—Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 7½d per lb; lamb, 9d per lb; pork, 5½d to 6d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report rather more fat cattle were forwarded, the majority of which were of first-class quality. Local and distant buyers were well represented, and a sharp trade was sustained throughout. All finished animals fully maintained the excellent prices of last week, ranging from 8s 3d to 9s per stone. Fat cows in request up to £19. Fat sheep, amongst which was a good show of excellent hoggets, realised rather more money, the top price being 55s for hoggets (Suffolks). Suffolk shearlings to 52s 6d, half-breds to 51s 6d. Grazing hoggets were more in request, and made up to 33s 9d. A larger supply of fat and store swine, for which the trade was again brisk at fully late rates, with the exception of heavy weights, which in some cases were a trifle lower. Fat calves were dearer, up to £5 7s 6d, and the best for weaning from 61s to 35s. Forty cows and heifers were penned, and, with a large attendance of buyers, biddings were brisk, and good prices were realised, several being purchased by Warwickshire and London buyers. Shorthorn cows to £19; polled ditto to £18; in-calf heifers, £16. Several lots of grazing cattle were offered. Those with condition were in request up to £12 10s, but young cattle were slow and cheaper. Numbers at sales and market: Beasts, 635; calves, 53; sheep, 1,600; swine, 1,485; horses, 18.

Leicester, Wednesday.—The supplies of Norfolk and Lincolnshire fed bullocks were exceptionally heavy, and proved in excess of the demand. Buyers and dealers were well represented, but trade ruled rather sluggish, and prices declined 10s to 20s per head. Choice bullocks, 6½d to 6¾d; secondary, 6d: cows, 5d to 5¾d; heifers, 6d to 6¼d per lb. Sheep were in fair supply, and sold freely at 7¼d to 7¾d for light weights; large sheep, 6¾d to 7d; ewes, 5d to 6d per lb. Lambs in brisk demand at 1s per lb. Calves firm at 8d per lb.

Newport, Wednesday.—Large supply; good attendance; brisk trade. Quotations:—Best beef, 6½d; seconds, 6d to 6¼d; cows, 5d to 5¼d; wether mutton, 7d to 7½d; ewes, 6d to 6¾d; veal, 7½d to 8¼d per lb; porket pigs, 10s 6d to 11s; baconers, 9s to 9s 6d.

Norwich, Saturday.—The supply of store beasts showed some increase here to-day; trade was a little more active, but prices showed no important change. Fat beasts, which were in increased supply, made 7s 6d to 8s per 14lb. The supply of store sheep was pretty good, and keeping hoggetts were in rather better demand at 28s to 38s per head. Fat sheep, which were in good supply, were dull at 7s 6d to 8s and 8s 3d per 14lb. Keep prospects are pretty good in Norfolk, hence the better demand for hoggetts.

Romford, Wednesday.—About an average supply of fat beasts, trade slow. Best animals 4s 4d to 4s 6d, middlings 4s to 4s 2d per stone. Calves in short supply, trade dear, 5s 8d to 6s per stone. Sheep in average supply, trade about the same. Best sheep 5s 4d to 5s 6d, middlings 5s to 5s 2d per stone. A few store beasts on offer; fair demand. Pig market still closed.

Rye, Wednesday.—Number of entries: Sheep and lambs, 270; fat beasts, 27; calves, 6; pigs, 14. Heifers and steers, 4s 6d to 4s 9d. Cows, 4s. Maids and wethers, 4s 6d to 4s 8d. Barrens, 3s 6d to 3s 8d. Calves, 5s 4d. Pigs, 3s 6d to 4s.

Rye, Wednesday.—Heifers and steers, 4s 6d to 6s 9d per stone; cows, 4s; maids and wethers, 4s 6d to 4s 8d; barrens, 3s 6d to 3s 8d; calves, 5s 4d; pigs, 3s 6d to 4s.

Salford, Tuesday.—The supply of cattle was smaller, but trade was slow at late rates. There was a large decrease in the number of sheep penned. A better trade was experienced, and sellers obtained 1s to 2s over last Tuesday's prices. There was a good show of calves; and a better trade at rather more money. Cattle, 4½d to 6¼d; sheep, 6d to 8½d; calves, 5½d to 8½d per lb. At market: Cattle, 2,632; sheep, 7,264; calves, 189; pigs, 58.

Sheffield, Tuesday.—The supply of milch beasts was better than a week ago, and the quality also showed improvement. There was a fair amount of business. Best lots, £18 to £22 10s; secondary sorts, £13 to £16 10s.

Shrewsbury, Tuesday.—Fairy good trade generally. Cows with calves slightly lower, with a large supply. Small supplies of sheep. Quotations:—Beef, 6d to 6¾d; mutton, 6¾d to 8d; and veal, 7d to 8d per lb. Porket pigs, 9s 6d to 10s 6d; bacons, 9s to 9s 9d per score. Cows with calves, up to £21. Hay up to £5 12s 6d, and clover up to £5 per ton. Ewes with lambs made up to 54s 6d. Number offered:—815 cattle, 92 cows with calves, 319 sheep, 137 calves, 58 fat, 151 porket, and 458 store pigs.—B. R. CROXTON.

Spalding, Tuesday.—A fair show of beasts and sheep. Best ox beef, 7s 6d to 8s per stone; cow beef, 7s. Stores sold well; cows dear. Sheep a fair trade at 6¾d to 7¼d for best; middling sort, 5¾d per lb.

Stockton, Wednesday.—There were on offer 154 cattle, 246 sheep, and 231 pigs. A small show of best cattle, with few customers, and a slow trade at 7s 6d to 7s 9d per stone; rougher kinds, 6s 6d to 7s; sheep, 7½d; ewes, 5d to 6¼d; tups, 4d to 5d per lb.

Thame, Tuesday.—A great change in the weather and a mild, damp day had an adverse effect upon trade, particularly beef, which was slow as compared with late markets. There was a short supply, but quite equal to the demand. Mr. Bond's sale comprised 42 fat beasts, 89 fat sheep, 60 fat and weaning calves, and 61 pigs. Fat bullocks, £16 to £20; fat heifers, £14 to £20; fat bulls, £14 to £21 5s; fat tegs, 42s to 50s; fat ewes, 35s to 43s 6d; fatealves, £3 to £4 10s; cow calves, 23s to 54s; bull calves, 14s to 49s; fat hogs, 10s 6d per score; fat sows, £6 to £8 7s. Stores dear.

Wakefield, Wednesday.—Lighter show, but slow trade, at last week's prices. Best beef fully 6¾d; secondary, 6d to 6¼d; and inferior, 5d to 6d. Young sheep, 7¾d; secondary, 7d to 7¼d; other sorts, 5d to 6¾d. Numbers: Beasts, 1,236; sheep, 2,002.

Wolverhampton, Wednesday.—Moderate supply of beasts and sheep; trade slow. Calves small supply and good demand. Quotations: Beef, 5¼d to 6¾d per lb (a few at 7d per lb); mutton, 6½d to 8¼d per lb; veal, 7d to 8d per lb; pigs, bacon, 10s 9d to 11s per score; porkets, 10s 6d to 11s per score. Only two sows were on the market.

Worcester, Saturday.—Average supplies of cattle and sheep. Trade quiet. Beef, 6d to 7d; mutton, 6d to 8d; and veal, 8d to 9d per lb; pigs, 9s to 10s per score.

Worksop, Wednesday.—Fair show of cattle, and [illegible] supply of sheep, but trade was very good, and [illegible] and sheep made more money than last week. Best beef, 7s to 7s 9d; secondary, 6s 6d to 7s per stone; best wethers, 7d to 8d; ewes, 5¼d to 6¼d per lb.

FOREIGN.

Yorkhill, Monday.—At a sale of American cattle held here to-day there were in the lairages 15 cattle landed by the Orthia (s) from Newport News, and 227 by the Pomeranian (s), from Portland (Me.). Bullocks, as is generally the case, formed the greater proportion of the total number, but there were also a few bulls. There was a fair attendance of customers, both wholesale and retail being represented. Business, however, was very slow, and values all round experienced a slight drop on those ruling last week. Small, neat, well-fed bullocks secured the best inquiry. Heavier and secondary class animals were very hard to cash. Bulls maintained last week's values. The dead-weight quotations may be given as follow:—Bullocks, best quality, medium weight, 56s per cwt, and a few choice up to 58s; heavy prime, 54s; secondary and heavier, down to 52s; stags, 50s to 53s; bulls, best class, to 48s; and secondary and heavier, down to 44s and 46s.

Yorkhill, Tuesday.—A sale of United States and Canadian cattle was held in the morning, when there were penned in the sheds about 280 anrmals. Bullocks formed the majority of the supply, and, taken all round, they were of a better quality than those exposed at Monday's sale. There was a good attendance of buyers, and trade was brisker, and good values were easier obtained than those ruling on Monday. As usual, the small, corn-fed, neat bullocks secured the best inquiry, and sold well. The deadweight quotations may be given as follows:—States bullocks, best quality, medium weight, 58s, and for a fine really choice up to 60s per cwt; secondary and heavier, 54s to 56s; bulls, best class, to 48s; secondary and heavier, 44s to 46s. Canadian bullocks, best class, to 56s, and a few extreme 58s per cwt; secondary and heavier 52s to 54s; and bulls made similar prices to those ruling above.

FEEDING STUFFS.

Hull, Tuesday.—Linseed: The arrivals are 3,726qrs Buenos Ayres, 30qrs Catania, 74qrs Hamburg, 250qrs Konigsberg, 800qrs Riga, 6,058qrs San Nicholas, 2,124qrs San Pedro; total, 13,062qrs. Linseed has been dull and lifeless all the week. Calcutta opened with sellers of April-June at 53s, but closes at 52s 6d quoted for the same position. River Plate opened with buyers of spot at 53s 9d, 52s 6d, to 52s, the value afloat according to position, and sellers of January and Feb.-March 51s 9d, but closes weaker; 51s accepted for seed just arrived, and this is the value of all positions up to March. Cottonseed: During last week the market firmed up, with business done at £6 10s spot, passage, and February, also £6 11s 3d paid March, but since yesterday there has been a quieter tone, and 1s 3d less would now buy. A little April-June done at £6 11s 3d, with more offering. New crop, Nov.-Jan., quoted £6 2s 6d. Oils: Exports for the week ending February 18, 1902:—Linseed oil: 12 Belgium, 2 Denmark, 3 Germany, 16 India, 6 Norway; total, 39 tons. Cotton oil: 87 Belgium, 19 France, 261 Germany, 245 Holland, 11 Italy, 2 Norway, 7 Sweden; total, 632 tons. The market is flat. Linseed oil: 30s 3d spot; 30s March-April; 30s May-Aug. Cotton oil: 22s 6d spot; 22s 9d March-April; 23s 1½d May-Aug. Crude: 21s 4½d spot; 21s 6d March-April; 22s May-Aug. Rape oil: Jamba naked, 24s 6d spot; 1st quality naked, 25s spot. Oil seed cakes:—Linseed cakes: With seed arrivals, prices are 2s 6d to 5s cheaper, with steady market. Cotton cakes: With a diminishing trade, due to resumed linseed crushing and dearer cottonseed, with lower oil, prices are 2s 6d to 3s 9d per ton dearer, with firm tendency.—KEIGHLEY MAXSTED AND CO.

London, Thursday.—Linseed: Owing to anticipated heavy arrivals, prices have declined. Spot nominal, near Calcutta to London 56s, passage 55s to 54s, February 54s, March 52s 3d, April 51s 6d, April-June 51s. La Plata, near 51s 6d, Jan.-Feb. 50s 6d. Hull is also easier. Calcutta April-June 52s. La Plata, spot 50s 6d, Feb.-March 50s. To the Continent, Bombay Feb.-March 55s, April-June 54s. Calcutta April-June 52s. La Plata just shipped 51s 6d. Linseed oil inactive at somewhat lower rates. We quote spot in pipes £31 5s to £31 10s, barrels £31 10s, May-Aug. £30 15s, Sep.-Dec. £29. Hull spot naked £30, March-April £29 15s, May-Aug. £20 15s, Sep.-Dec. £28 5s. Linseed cakes are firm. We to-day quote London-made £8 5s to £8 10s ex mill, American Western £7 7s 6d to £7 10s, Russian £7 12s 6d to £8 2s 6d. Cotton cakes quiet, London-made £4 7s 6d to £4 10s. Rapeseed: Neglected, and prices easier. Brown Cawnpore, Feb.-March 38s 9d, March-May 39s 9d. To the Continent we quote Yellow Guzerat March-May 46s. Brown Cawnpore, Feb-March 38s 9d, March-May 39s 9d. Brown Calcutta, Feb.-March 38s 3d, April-June 39s 6d. Ferozepore, Feb.-March 40s. Jamba, March-May to Hull 31s 9d. Cottonseed, after becoming firmer, has relapsed, and closes quiet. Spot London £6 8s 9d, February £6 8s 9d, March £6 10s, April-May £6 11s 3d. Hull spot £6 7s 6d, Feb.-March £6 8s 9d. April-May £6 10s. Bombay to Hull: Importers ask £4 15s for March-April, but the value is about £4 8s 9d. Cargoes, March £6 13s 9d, April £6 15s, May £6 16s 3d.—THE PRODUCE BROKERS CO., LTD.

Mark Lane, Monday.—Linseed Cakes.—There is only a limited quantity of foreign available in warehouse, and spot values are well maintained, while in forward positions a fair quantity has changed hands at a slight reduction on present quotations. Russians move off quietly at unchanged prices. Americans offer for March shipment at £7 to £7 2s 6d per ton ex ship. Calcutta made in bags may be purchased at last week's quotations. London made attract very little attention, but being in small production, crushers are firm in their demands. Cotton Cakes.—The market is still well supplied with a considerable falling off in the demand; quotations are not quite so strong. Egyptians are obtainable at 1s 3d per ton less money, and English are also slightly easier. Decorticated meet a slow sale, and are unchanged in price, as also is the case with meal. Rape Cakes unchanged. Maize Germ Meal.— American offers come to hand on slightly easier terms, but buyers are still unwilling to operate, the trade generally anticipating much lower values. English is steady, but 2s 6d per ton cheaper on the week. Rice Meal.—Spot parcels of Rangoon make £5 5s, but some business is reported for April-May shipment at £4 7s 6d on the usual London ex ship terms.

POULTRY AND PROVISIONS

Smithfield, Saturday.—Supplies fair, with subdued demand, prices, however, being steady at the following quotations:— Fowls: Yorkshire, 2s 6d to 3s 6d; Essex, 3s to 3s 6d; Boston, 2s 6d to 3s; Surrey, 3s 9d to 4s 6d; Sussex, 3s 6d to 4s; Welsh, 2s to 2s 9d; Irish, 2s to 2s 6d; turkeys, cocks, 6s to 7s 6d; hens, 4s to 5s; country ducks, 2s 9d to 3s 6d; goslings, 6s 6d to 7s 6d; Bordeaux pigeons, 9d to 1s; feathered, 7d to 8d; quail, 10d to 1s 2d; wild rabbits, 10d to 1s 3d each; Australian, 8s to 10s 6d per dozen; hares, 2s 6d to 3s; wild ducks, 1s 6d to 2s; widgeon, 1s 2d to 1s 4d; pintail, 1s 3d to 1s 6d; teal, 10d to 1s 2d; woodcock, 2s to 2s 6d; snipe, 7d to 1s 2d; golden plover, 8d to 1s; black, 5d to 8d. Russian game:—Capercailzie, cocks, 3s to 3s 9d; hens, 1s 6d to 2s; black game, 1s to 1s 2d; partridges, 1s to 1s 2d; ptarmigan, 10d to 1s; brown hares, 1s 6d to 1s 10d; white, 1s 2d to 1s 6d each.

COLONIAL DAIRY PRODUCE.

London, Friday.—The demand for the best grades of Australian and New Zealand butters is somewhat quieter this week owing to the late advance in prices, but for inferior qualities the demand remains very brisk. "Choicest" brands may be quoted at 110s to 112s, with a few "Fancy" brands at 114s, and "Finest" brands 104s to 108s. Inferior qualities selling at about 102s are in great demand, and "milled" New Zealand makes 96s to 100s. The "Oroya," which is the last vessel carrying butter from Australia this season, is due in a day or two, with only 1,218 boxes on board. The Copenhagen official quotation remains unchanged at 100 kroner, against 96 kroner at this time last year. The recent rise in the price of Danish has checked the demand in the North of England and in London. Buyers nearly everywhere are retailing New Zealand at the same price as Danish, and as New Zealand can be purchased at a few shillings below Danish, the demand for Danish must necessarily be reduced. There is a better tone in the cheese market, and more business has been transacted than there was last week. Prices remain firm at late quotations.—W. WEDDEL AND CO.

WOOL

Canterbury, Saturday.—One or two exceptional lots of Kent wool have made 6d per lb, but the bulk of the trade is still being done at 5½d. Half-bred fleeces remain at 6d, and Downs at from 7d to 8d per lb.

Glasgow and Leith.—The course of the Scotch wool trade has been uneventful during the past month. There have been no public sales, and the private buying has been entirely for current requirements. Although prices are so low, and might be expected to stimulate speculation, there is little or none. Stocks of all classes, except ordinary Cheviots, are within very modest limits, while there is also a disposition on the part of holders to meet existing demands. Cheviots of fine quality, especially hoggs, command a ready sale at good prices; but there is not much selling in other grades of white-faced wools. Blackfaced keeps moving off to a moderate extent, for both home and foreign consumption, at firm prices. Stocks of this quality are well reduced, and would speedily disappear under any material increase of buying.—J. AND W. GREIG.

London, Friday.—English—per pk of 240lb—Fleeces S. D. hoggs, £7 to £8 10s; half-bred hoggs, £6 to £6 10s; do wethers, £5 to £6; Kent fleeces, £5 to £6; S. Down ewes and wethers, £7 to 8 10s; Leicester do, £5 to £5 10s. Colonial—per lb—Vic., fleece super, 1s 5d to 1s 7d; scoured god, 1s 7½d to 1s 8½d; scoured average, 1s 6d to 1s 7d; greasy average to fair, 10½d to 11½d; N. S. W. scoured average, 1s 3½d to 1s 4d; greasy average, 8d to 9d; S. Australian greasy average, 6½d to 7d; New Zealand scoured average, 1s 4d to 1s 5d; grease average, 8d to 9d. Cape scoured super, 1s 5d to 1s 6d; fleece average, 7d to 7¼d; greasy average, 5½d to 6½d; Natal scoured, 1s to 1s 1d; greasy average, 6½d to 7d. Crossbreds—Grs.—Vic., good to super, 10½d to 11½d; New Zealand fine, 8d to 9d; do medium, 4¾d to 5¼d; do coarse, 4d to 4½d.

CHEESE.

Preston, Tuesday.—The pitch consisted of 49 lots, comprising 666 cheeses, a decrease of four lots and 144 cheeses compared with the corresponding fair last year. Almost all the cheese was winter-made, and not quite of average quality. The demand was slow, but a clearance was effected at prices showing a slight reduction on those realised last fair. Common, 60s to 65s; medium, 67s 6d to 70s; best, 72s 6d to 77s 6d.

Glasgow, Wednesday.—The arrivals of cheese in the Glasgow market were small this week, and the demand was poor. The trade regard prices as too dear, and prefer to work off the stocks they have to augmenting them. In the meantime Cheddars and Dunlops were quoted from 54s to 62s per cwt. A fair trade, however, was passing in Canadians and Americans at late rates.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended Feb. 22, 1902, together with the quantities imported in the corresponding week of the previous year:—

STOCK AND SHOW NOTES.

By Herdsman.

Rather an exciting incident was witnessed at the Agricultural Hall on Wednesday afternoon, when the Prince and Princess of Wales attended the Shire Horse Show. Reaching the show at a quarter-past three, their Royal Highnesses were loudly cheered when they appeared in the Royal box, from which, after watching the exhibits for an hour, they descended to the judging ring to enable the Princess to present the principal prizes to the winners. The Princess had no sooner handed the Challenge Cup to Mr. Forshaw when the champion stallion, Stroxton Tom, became restive, as a result of the cheering. Suddenly swerving, it knocked the lid of the gold cup from Mr. Forshaw's hands. The animal was then led down the ring, but as the Royal party were leaving the enclosure the demonstrations of the spectators were renewed. The stallion instantly almost got beyond the control of the groom, and rushed for the exit. Fortunately, the Prince and Princess and the other members of the party realised their danger, and the Princess, who was nearest, grasped the situation, and stopped short. The horse rushed by her Royal Highness, missing her by some feet. Their Royal Highnesses were in no way discomposed by the incident, and smilingly acknowledged the congratulatory cheers of the crowd round the ring.

Mr. C. H. Jolliffe, of Goldicote, Stratford-on-Avon, has issued a nicely got-up private catalogue of his shorthorn herd, which has been in existence about eight years, and consists at the present time of 51 head. Animals were first purchased from good herds in the district, but these have now been superseded by the fashionable Scotch strain, and the herd almost entirely consists of animals bred from the famous herds of Messrs. Cruickshank, Duthie, Marr, Gordon, and other breeders in Scotland. The recent sires have been "Count Arthur," bred by Mr. Willis, by his champion bull, Count Lavender, "Mescombe," bred by Mr. Stephen Allen, a grandson of the same famous sire, and Handsome Boy, a prize representative of Mr. W. S. Marr's Alexandrina's family. Among the cows is Rose Blossom, a first prize Royal winner in 1897, while a number of other animals have been very successfully shown at the Oxfordshire, Herefordshire, and Worcestershire, Warwickshire, and other shows.

Details of an extraordinary driving feat have come to hand by the latest Australian mail. For a large wager, Mr. F. C. McMillen, a wealthy Westralian goldfields man, drove eleven horses (five couples and a leader) attached to his coach out of the stable yard in Coolgardie, through the town and five miles out. For the return, in the main street he turned his unwieldy team with the coach four times, and finally drove back into the yard. Beyond the swingle-bar breaking, there was no mishap, and Mr. McMillen won his wager. Every horse was driven with reins, and the driver had, therefore, six ribbons in each hand, and must have been holding a considerable dead-weight, independent of the strain of pulling his horses into place. What made the feat exceptionally difficult was that the team was taken from various sources.

In face of the renewed interest being shown in the Aberdeen Angus cattle, breeders may look forward to a good show and sale at Bingley Hall on Tuesday, March 11th. An entry of 109 bulls, cows, and heifers has been received, and a keen competition should result. There will doubtless be a good attendance of breeders and farmers anxious to obtain certified animals from which to breed useful stores and butchers' beasts.

On Tuesday evening Sir Walter Gilbey entertained the President and Council of the Shire Horse Society at dinner at Cambridge House, Regent's Park. Amongst those present were Lord Llangattock, the Earl of Verulam, Lord Belper, Lord Middleton, Lord Tredegar, Lord Hothfield, Sir J. Blundell Maple, M.P., Mr. P. A. Muntz, M.P., Mr. Alex. Henderson, M.P., and Mr. Freeman-Mitford.

The Highland and Agricultural Society has now issued the prize list for the annual National Agricultural Show of Scotland for 1902, which takes place at Aberdeen on Tuesday, July 15th, and three following days, under the presidency of the Earl of Aberdeen. The list is a very liberal one, the total value of the prizes amounting to close on £2,800, or nearly £400 more than at Aberdeen in 1894. The Society itself contributes £2,379 of the total. Horses receive the largest amount, viz., £1,029, cattle coming next with £958, then sheep with £540; a sum of £266 being spread over the other various sections. The sums alloted to the various breeds are as follows:—Cattle: Shorthorns, £178; Aberdeen-Angus, £278; Galloways, £158; Highland, £158; Ayrshires, £158; FaFt Cattle, £28. Horses: Agricultural, £450; Hunters, £94; Hackneys, £170; Ponies, £160; Driving Competition, £36; Jumping, £119. Sheep: Blackfaced, £110; Cheviots, £86; Border Leicesters, £106; Half-breds, £86; Shropshires, £44; Oxford Downs, £22; Suffolks, £30; Extra Sheep, £38; Wool, £18. Various: Pigs, £6; Poultry, £140; Dairy Produce, £40; Medals, £20.

The Earl of Aberdeen, as President of the Society, offers Champion Medals for the best animal or pen in each section of live stock, the number of these medals offered being 23. As usual, the contributions towards the prize fund by breed societies and private individuals are numerous and handsome. Amongst these contributions are the following:—Shorthorn Society, £20; the late Mr. C. Macpherson Grant, cup value £50; Sir George Macpherson Grant, cup value £50, to replace the cup finally won by him at Edinburgh in 1899; Polled Cattle Society, £20; Clydesdale Horse Society—Cawdor Cup, value 50 guineas; Sir John Gilmour, Bart., £25; Captain Clayhills Henderson, £27; Hunters' Improvement Society, £10, 10s.; Hackney Horse Society, £10; Lord Tweedmouth, £20; Polo Pony Society, £10 10s.; Lady Estella Hope, £10; Mr. Howatson, of Glenbuck, £24; Tweeddale Gold Medal for Border Leicester Tup, £20; Scotch Breeders of Shropshire Sheep, £10; Suffolk Sheep Society, £20; Oxford-Down Sheep-Breeders' Association, £10; Sir Robert Menzies, Bart., £18.

As at recent shows of the Highland Society handsome prizes are offered for jumping. The pony classes for jumping have not been well filled, and these have now been discontinued, so that this year there will be only one class for jumping each day, with prizes as follows:—Wednesday, £20, £15, £10, £5, and £2; Thursday and Friday, each £10, £8, £5, £3, and £2. A champion prize of £10 raises the prizes for jumping to no less than £119. The entries of implements close on Monday, 12th May, and of stock, poultry, and dairy produce on Monday, 9th June. Copies of the prize list may be had from the secretary, Mr. James Macdonald, 3, George IV. Bridge, Edinburgh.

The thirteenth annual show of the Newport and District Agricultural Society is fixed for Thursday, July 31, at Newport, Salop.

As others see us is always an interesting phase of life. In the "Breeders' Gazette" of Chicago a "Westerner" gives some of his opinions on the way in which the Smithfield Show is conducted. His comments are all through favourable, but let him speak for himself. "The one-judge system prevails here, and the judging is done with great swiftness. How little one can see of the judging. All classes, all breeds in their respective places, are judged at the same time. The greatest good nature prevailed; not one protest did I hear from a disappointed competitor. All the ribbons and championships were in their place by three o'clock p.m. At this show they have an admirable system of providing a separate judge for each breed. I must say I quite admire the method, and think it preferable to only one judge for the innumerable breeds we sometimes have on exhibition in our shows, making the work one of exhaustion, lasting sometimes for several days.

"Besides the stock show, there was an exhibit of table poultry of such merit as I never saw before. There were also agricultural products of the nation, agricultural implements and machinery, a veterinary surgeon's exhibit, and everything in connection with the pursuit of agriculture. The farm machinery and farm waggons of English make were, cumbersome, expensive, and poorly adapted for the purpose intended. The ploughs were lond and heavy---no improvement in the last fifty years. A potato harvester is about as complicated and expensive as a threshing machine, and required about the same number to operate it.

"The most beautiful cattle here are the cherry-red, curly-coated Sussex. They are very attractive with the long, well-tapered and polished horns. They are good and useful, too---big scale, thick-fleshed, and fine quality. Had they white faces and briskets, most of us would say pretty strong class of white faces. In this exhibit there was lack of uniformity of types. The picturesque West Highlanders are here, and, as usual, attracted more than their share of attention from the public. I should much like to see more of these in our own country. They would be a valuable addition to any collection of novelties. One mammoth bullock, dun in colour, with long, shaggy coat and great upspreading horns, creates an impression of stateliness found in no other domestic animal. The Welsh cattle are here, too. They make good killers. The largest bullock in the show was a Welsh, and weighed 2,260 pounds. The Dexter, Kerry, and Shetland cattle were the novelty in the show; they are the pigmies of the cattle family, perfect in form. The steers under three years, in highest show condition, weighed from 600 to 800lbs.---about two-fifths of the weight of the large beef breeds. The pig show embraced every breed except the Poland-China and Arkansas red. They were fine in quality and finish, and smaller than the American pigs. The sheep are here in bewildering numbers, both the pure-bred and crosses, and all of them good---every animal good enough for a champion. This perfection has been growing through the long dim ages. It is the one family of domestic animal that has steadily improved in type. A persistency of purpose has been steadily adhered to in sheep-breeding. The object of producing

good mutton has never been sacrificed for fad or fashionable pedigree."

Friday and Saturday, June 13th and 14th, are the dates chosen for this year's Royal Horse Show at Richmond, Surrey.

The entries received for the shorthorn show and sale at Bingley Hall, Birmingham, on Wednesday next and the two following days number exactly the same as last year, viz., 611, of which 138 are cows and heifers (with 32 calves at foot) and 473 bulls, the age of the latter being chiefly from nine to twenty-one months. A large number of prize-winners at the Royal and nearly all the important shows are entered, and there are representatives of nearly all the most noted families. Amongst the largest exhibitors are the Earl of Powis (13), Mrs. L. H. Holland (18), Messrs. J. W. Barnes (14), C. W. Brierley (14), W. S. Dowding (13), George Gerrard (14), G. F. King (13), Thomas Mace (15), Charles E. Morris (11), Leopold de Rothschild (11), W. H. Tremaine (13), and amongst the other principal herds represented are those of his Majesty the King, the Duke of Northumberland, the Marquis of Exeter, the Earl of Camperdown, the Earl of Crewe, the Earl of Lathom, Earl Manvers, the Earl of Powis, Earl Spencer, the Earl of Suffolk and Berkshire, Viscount Baring, Lord Fitzhardinge, Lord Lilford, Lord Lovat, Lord Moreton, Lord Penrhyn, Lord Tredegar, Lord Wrottesley, the Hon. W. F. D. Smith, Colonel Sir N. Kingscote, Major Chaffey, Captain Mytton, Captain Reeve, Captain Whitting.

As regards the arrangements for the above show, it may be mentioned that judging commences at nine o'clock on Wednesday, and the sale of the cows and heifers is to be held the same day, commencing at 11.30. On Thursday the bulls from 18 months old and upwards, including those entered for the £50 prize, will be offered, and on Friday the younger bulls will come under the hammer. The sale on each of these days is to commence at 10.30. Messrs. Lythall and Co. will, as usual, be the auctioneers.

The inhabitants of Leeds and the surrounding districts do not seem to be much interested in the coming visit of the Yorkshire Agricultural Society to Leeds, for the subscription list for the local fund of the show has met with but scanty support so far. The amount required is £2,500, and at the time of writing the total sum received and promised was only a little over £900, so that it is not surprising to find that the members of the local committee have decided to canvass for subscriptions. One would have thought that in a place like Leeds no difficulty would be experienced in raising £2,500 for a purpose calculated to do the town some good without having to canvass, but as this mode of "raising the wind" has become necessary, it is to be hoped that it will meet with success, and the £1,600 still needed will be quickly got.

Some fine prices were reached at a sale of shorthorns, mostly imported, at Chicago on February 7th. Sensational figures were not realised, but a good all-round average was obtained. Highest price was made for a roan cow, Solidity 2nd, which was knocked down for £260, while £210 was reached for another cow, Lavender Princess. The average for forty-five females was £117, while two bulls obtained an average of £130.

SHEEP.

Lambing Notes.

Suffolks.

The ewes have come in well after a somewhat trying season, owing to the severe drought of last summer. Lambing has been in progress four days, and at the time of writing there are exactly 100 lambs to 57 ewes, or a yield of 1.7 to a ewe, thoroughly confirming the extraordinary fecundity of the Suffolk ewe. They come strong and well, the ewes are full of milk, and there has not been the loss of a ewe, or, for that matter, an ailing one.—W. J. Malden, Colonial College, Hollesley Bay, Suffolk (Feb. 27th).

Hampshire Downs.

I am pleased to be able to report favourably respecting the present lambing season here. During the late severe weather a few lambs were lost from scour, etc. With a good number of twins and five triplets—14 of which are alive and vigorous—there was no difficulty in filling up vacancies. The ewes are in good condition, have a full supply of milk, and are making the lambs progress rapidly. The numbers now stand 33 per cent. of twins, deaths in ewes 1 per cent., and barren ewes 2 to 3 per cent. Over half of the ewes are two teeth. Food has been plentiful, but swedes, where unprotected from frost, are decaying, while kale and other forage crops have been cut back. Now that milder weather has come, these will recover, but may keep backward.—R. W. Lyne, Barton, Marlborough (Feb. 27th).

SHIRE HORSE SHOW: The Judges Watching a Horse Walking.

Frauds on Farmers.—At the Kent Assizes on Monday William Roberts, alias Samuel Taylor, 65, and Oscar Taylor, 36, were indicted for obtaining by false pretences large quantities of mangel wurtzel and other goods from farmers and merchants living at Bromley, Canterbury, Ashford, Chelsfield, and other towns in Kent.—The prisoners traded under the fictitious name of "Samuel Taylor and Son, carriers, contractors, and forwarding agents," and on being asked for references gave false ones. On making inquiries the police found that the prisoners only rented a letter-box at a house in Old Street, St. Luke's, London.—The jury found a verdict of guilty, and it was stated that Roberts had already undergone three terms of five years' penal servitude, and had spent nearly 30 years in prison. He was sentenced to a further term of five years' penal servitude, and Oscar Taylor received a sentence of six months' hard labour.

Shire Horses at Islington.

The annual show of Shire horses, under the auspices of the Shire Horse Society, was held during last week, commencing on the Tuesday morning last week, commencing on the Tuesday morning, at the Agricultural Hall, Islington, London. The weather throughout proved most favourable, both for man and beast, and though there were two or three cases of sickness among the horses, probably owing to the very wet day on Monday for getting them to their show quarters, on the whole the health of the stock was excellent. From the early hours of opening the show right on to its close the attendance was very large the greater part of the time, the start being quite congested, and this was the more severely felt owing to the extra large entry of horses, 860 being catalogued, which number is far in excess of any previous year. As regards the quality of the animals, this must be called most satisfactory. The leading portion has certainly never exceeded its present standard, if it can be said to have equalled it; whilst the number of inferior ones is certainly no greater than when we had a smaller total of entries.

The great increase in the prize-list, as well as the excellent innovation of giving a certain sum of money to the H.C. and C. horses, no doubt accounts for a great deal of the increase in numbers, and this plan will, there is little doubt, have a most encouraging effect on small breeders by inducing them to breed better stock, and attend to them better, as well as to see that they are all registered. This will assist very greatly in improving the breed, as many first-class mares throughout the country are not eligible for the stud book, and therefore their good properties are not so far as that they are unable to be utilised in the registered studs.

The judging of the various classes commenced on Tuesday morning and continued throughout that day and Wednesday, concluding about six on the evening of the latter day. The system adopted was the one that has worked so well in the past, namely, two judges acting in concert, with the third man standing out as umpire, if needed, and once more the plan worked admirably. The rules of the Society are that the Shire judges select a number of animals (not more than 25 in any class) to be examined by the veterinary surgeons, and afterwards those that are able to pass the examination are brought back to the ring to be finally judged. As respects soundness, though one or two good horses failed to get a clean bill, the lot on the whole were most satisfactory, every animal returning with its certificate in several of the largest classes.

Stallions.

The stallion classes were the first to be judged, commencing with the yearlings foaled in 1901. There were to commence with 74 entries of yearlings, the selected 25 of which proved a very fine lot of colts, by and in respect of their main points a vastly improved collection as compared with the earlier days of the Society; indeed, the subject of improvement was one that kept cropping up at every turn, people often remarking, "You wouldn't have been able to find pasterns like these a few years ago." This one point itself should encourage the Society in its good work, as there is no doubt the improvement mentioned is in a great measure due to its efforts in that direction. The majority of the best quality of both sexes had been winners in the foal classes of last Autumn in one district or another, and it was quite interesting to mark the varied progress they had made; this doubtless being influenced by the way in which they had been kept. The best yearling colts came from parts of the country very remote from each other, which is a great mark in favour of the cosmopolitan character of the Shire. Mr. Jackson carried off the first prize with a very fine colt full of substance and quality, bred in Yorkshire; Mr. Whithurst was second with another very promising one, bred in Hertfordshire, by Mr. Ransome; whilst the third prize went to a colt of Mr. Lewis', bred in Wales. Others came from various parts of the country, every county being pretty well represented. The third colt to-day, we may mention, was the winner of the great Challenge Cup in the Ashbourne Show last year, an achievement that is looked upon as one of the greatest importance in the country. A good deal of hard blood once more came to the front, though in some cases this strain suffered a little. Two

year-old colts were an extraordinary entry, no less than 127 being catalogued. The selection of Shire proved a very long and hard business for the judges; and when at last the selection and vetting were completed, the 25 colts returning to the ring, they proved to be one of the best collections that have been seen together, at least, for a very long time. The first prize colt in Shire was Lord Rothschild's Birstall Menestrel, bred in Yorkshire, by Lord Middleton, and sired by the Birstall Stud herd Menestrel, out of a ; he is probably the best colt of his age in size, weight, and points, that has been seen in the days of the Society—having bone and limbs, as well as quality of the highest order; indeed, later in the show, he succeeded in carrying off the runner-up for the Championship of the entire show. Captain Duncombe, Earl Egerton, and Mr. P. A. Muntz, followed in the list with very promising colts.

Class 3, for colts of three years old, was a very strong class indeed, though perhaps there were as many indifferent ones in this as any of the young classes. The leading animals in it, however, were of a very superior class. There were in all, to commence with, 120 of this age, which were brought down to 22, which came in to receive their honours from the judges. In this class were several colts, altogether 10, above the average, the best of them being Mr. J. P. Cross's Lockinge Forest King, bred by the late Lord Wantage, and sired by Lockinge Manners. This colt had practically an unbeaten career at last summer's shows throughout the country, and is probably about the best stamp of a real Shire stallion that will be seen for some time; his depth of muscle and grand finish of his limbs and feet stamp him as an outstanding sire, whilst his breeding will assist in giving effect to his progeny. Mr. Arthur Grandage contributed another capital colt for the second place of Prince William, and Harold III. were shaped and powerful with the cut of pattern and movement. A comparatively new exhibitor in Mr. Leopold Salomons won the third prize with a colt that shows his owner is going in for weight, and the sort we want as well as good blood; and so on through a long list of eleven prize-winners we find a vastly improved class of Shire colts in these three-year-olds.

Four-year-old stallions, with 50 entries, contained several of rather modest character for that age, as by this time of life we expect the worst to have been disposed of. Some of these middling ones, however, were probably forwarded more as giving an opportunity to dispose of them than as a likelihood of winning money. The best of these were a very weighty, massive horse of Captain Duncombe's, of good build, but moderate action, with a good deal of Lincolnshire Lad blood, however, which will help his progeny, and Desford Combination, shown by Messrs. Thompson, the horse that was awarded the gold medal at last year's Royal Show, and an extraordinary fine mover as well as put together properly; he is the get of Stonewall. In the class for stallions over four years old and under 16.2 hands high, what we call the short-legged class, were a lot of beautiful horses full of power and muscle, and calculated to get the right sort of mares for breeding from in the future. The class had 28 entries altogether. The best of them were Capstone Harold, a famous type of horse by Harold, shown by Messrs. Forshaw and Sons; and Waverley Triumph, another what we may call sweet stallion, got with plenty of substance, and very good movement, shown by Captain Duncombe. Waresley Triumph, by Duke of Worsley. The remaining winners were also extra nice class of horses.

Stallions over 16.2 and over four and under ten years old were perhaps the best of the adult classes. Three, at least, extraordinary horses came into contact here. Mr. Peter Stubbs's Blairsdon Conqueror, by Hitchin Conqueror, Messrs. Forshaw and Sons' Bay Thumper, by Cashier V., and Mr. Edward Green's Moors Regent, by Regent II. Three horses were eventually placed as written, though for a long time the third horse stood at the head of his class, where perhaps his beautifully balanced form and limbs might have allowed him to remain. Capital stallions followed on a long way down this class.

The aged class of stallions (over 10 years old) was the last of the male section, and was not particularly well filled. Messrs. Forshaw and Sons' Stroxton Tom, by Honest Tom, was an outstanding winner, indeed had a walkover, as may be supposed seeing he was last year reserved for the championship which this year he succeeded in capturing One or two other very good horses were shown, including Mr. W. Greenwell's Hatherton II.

Mares and Fillies.

Mares and fillies throughout, from the fine and well-filled class of yearlings up to the last class of aged mares, were a superb collection, full of quality and with thin pastern points that our Clydesdale friends so often taunt us with being too straight, beautifully shaped, and with the very carriage of real cart horses about them.

The yearling fillies were a big and good lot of 61 entries. 25 out of which received honours, and were about as good and level a lot as one could desire to see. Mr. Walter Cunningham, the Buscot Park stud, the Dunsmore stud, and several others were capitally represented with stock, containing a good deal of Harold blood, and succeeded in carrying off the leading prizes. We may, however, mention that many of the colts and fillies which will be found in the prize list were quite fit to occupy the front seats, and will probably later in life find themselves nearer to their more favoured neighbours than they are upon the present occasion.

Two years old fillies came forward to the number of 89, and out of these 24 at least received honours. Some of these were quite extraordinary in the way of development for their age, being as big and weighty as we often find them when a year older, and yet they carried themselves with all the vivacity of the two years old, their extra feeding not having in the least affected their movement or joints, or in other words, given them more than they could carry. The best of these were Mr. Parnell's Yatesbury Flower, by Lockinge Manners; Mr. James Eadie's Barrow Charm, a beautiful filly; Mr. Jackson's Kendal Bessie, and others, the quality of the class being estimated by the fact that such a grand and valuable filly as Sir. J. B. Maple's Yonno could but get just inside the money where nine prizes are given.

Three years old mares, like the two years old, gave a very good account of themselves, 59 being entered, and without many failures in the class. The head filly of these, Mr. James Eadie's Barrow Princess, who passed through an unbeaten career last season at many of the leading Shire shows was at the close of the judging given the championship of the junior classes. She possesses immense substance, and a beautiful class of limbs and moulding. Her sire was Harold, her dam by Hydrometer. Mr. R. W. Hudson followed her with Wern Blossom, a Welsh-bred filly of great calibre and a fine runner. Mr. Ashly, Mr. Hamer Towgood, and several others also exhibited good fillies in the prize list that anyone might covet, and of a class likely to give the Shire improved standing in the eyes of those who may not think so favourably of it.

Four-year-old mares made up a class of thirty-five entries, amongst which were several of last season's leading members. Messrs. Thompson's Desford Flower, a wonderfully well built mare by Lullington Harold, full of power and quality, and a good walker, topped the class, followed by such other mares as Mr. Green's Moors Peggy, by Moors Thumper, and Mr. R. A. Yerburgh's Lily of the Valley, by Southgate Honest Tom. The latter filly, it will be remembered, was champion of the young classes as last year's show, and is of the best quality and character. Mr. P. L. Mills and several others were also capitally represented in this class.

Class 12, for mares under 16 hands high, was the next to follow, and here nearly 38 animals were entered, out of which no less than over 20 were able to obtain honours from the judges' hands. We do not recollect having seen a better lot of Shire low-set mares than were included in this class. Full of quality, standing upon short legs, with their pasterns well pronounced and a great amount of power and muscle about them, they were, as a lot, the very ideal type of brood mares. Mr. P. L. Mills won the red card with an extraordinary mare, Saxon Girl, of Sir Walter Gilbey's breeding, sired by Norman Conqueror and purchased at a very high figure at Lord Rothschild's sale recently. The amount of weight and muscle, with correctness of formation, that this mare possesses in the space are quite phenomenal. Sir J. B. Maple followed with another mare of great character and quality, Cowdale Starlight, by Queen Harold, bred in Derbyshire and of the real type. She was purchased at Mr. Parnell's sale last autumn, and brought out in fine form. Captain Duncombe also exhibited a beautiful mare in Morning Starlight, by Menestrel, that came third, and altogether the class was one of the most satisfactory description.

Mares between 16 and 16-2 hands high were the next on the list. Of these the entry was but 29, and the collection suffered a little by comparison with either the previous one or the one that followed it (smaller and bigger mares). Notwithstanding this, however, there were some capital mares in the ring, the best of them being quite the cream of the show, perhaps, as in these was the champion mare of last year, Alston Rose, who was again placed in that enviable position, and Worsley Princess 7th, another splendid mare, shown by Messrs. Thompson. The former was shown now by Mr. R. W. Hudson, who purchased her from Lord Rothschild's sale at the highest price of that day, is by Vulcan 7th, and a mare of very fine style, shape, and quality. Two or three other very good mares filled the prize list in this class.

The last class for females, that for mares 16-2 hands high and over, was a very good class, though perhaps the tail end of it was not quite as good as might have been expected. This deficiency, however, was amply atoned for by the excellence of the first four mares, which represented a money value not often known in cart-horse breeding. These are Mr. Towgood's splendid mare, Rolleston Fuchsia, who came throw Messrs. Lowndes' hands in her earlier life, and to-day is certainly a very close champion, inasmuch as she was reserved for that honour and thought by many to be worthy of it. The second mare was the well-known and many times head of her class, as well as champion at country shows, Mr. Victor Cavendish's Southgate Charm, now in very good trim Mr. Smith Carrington's grand mare Hendre Crown Princess, by Prince Harold, stood third, and another well-known mare, Queen of the Shires, now in Mr. Fred. Crisp's hands, was given the fourth prize. The latter mare was looking in fine condition, and the competition between the four was fairly close, at least as regards the three last of them, Rolleston Fuchsia perhaps standing out well as the first. In addition to the remaining prize-winners some half-score of mares in this class were H.C. and C.

Geldings.

Geldings were allotted three classes, which, though they were much better filled than we have seen them at some previous shows, were still rather a small entry, the classes holding about fourteen each. There is one point, however, in connection with this, namely, their quality, which was of a much improved kind, and scarcely a moderate one amongst them. Lady Wantage's stud contributed several extraordinary horses, including the winner of the Champion Cup, a horse standing close upon 18 hands high and proportionately built. Other good mares were shown by Mr. R. W. Hudson, the Nottingham Corporation, Sir Oswald Mosley, Mr. T. Edwards, and others.

Champion Prizes.

The hall in all its various parts was very much thronged to witness the award of these trophies, which was made in the presence of T.R.H. the Prince and Princess of Wales, who afterwards distributed the cups. The Championship for the young stallions came first, in which Lord Rothschild's Birdsall Menestrel., bred by Lord Middleton, carried off the victory, Mr. Cross's fine colt Lockinge Forest King being second.

The older stallions followed, in which Messrs. Forshaw and Son's Stroxton Tom was the victor, and Mr. Stubbs' Blaisdon Conqueror the reserve. Then for the Championship of the male classes Stroxton Tom and Birdsall Menestrel were the winners and reserve as named. One of the most popular awards we recollect for some time.

Of the females Mr. Eadie's Barrow Princess and Mr. Parnell's Yatesbury Flower were winner and reserve in the junior classes, and Mr. Shilton's Alston Rose and Mr. Towgood's Rolleston Fuchsia in the older classes, the two latter names standing in the same position for the Championship of the female classes.

Judges.

Mr. A. H. Clark, Moulton Eaugate, Spalding.
Mr. F. W. Griffin, Borough Fen, Peterborough.
Mr. John Rowell, Manor Farm, Bury, Huntingdon.

Champion Cups.

STALLIONS.

Challenge Cup, value 100 guineas, for the best stallion in the show, and gold medal; Messrs. J. Forshaw and Sons, Carlton-on-Trent, Newark (Stroxton Tom); r, Lord Rothschild, Tring Park, Herts (Birdsall Menestrel).

Gold medal to the reserve for the champion, Lord Rothschild (Birdsall Menestrel).

Champion Cup valued £25, for the best stallion in the show, Messrs. J. Forshaw and Sons (Stroxton Tom); r, Lord Rothschild (Birdsall Menestrel).

Cup value £20, for the best stallion in Classes 1, 2, and 3, Lord Rothschild (Birdsall Menestrel); r, Mr. J. P. Cross, Colthorpe Towers, Rugby (Hockinge Forest King).

Cup value £20, for the best stallion in Classes 4, 5, 6, and 7, Messrs. J. Forshaw and Sons (Stroxton Tom); r, Mr. P. Stubs, Blaisdon, Newnham, Gloster (Blaisdon Conqueror).

MARES AND FILLIES.

Gold Challenge Cup value 50 guineas, for the best mare or filly in the show, and a gold medal, Mr. R. W. Hudson, Danesfield, Marlow (Alston Rose); r, Mr. Hamer Towgood, Little Shelford, Cambridge (Rolleston Fuschia).

Gold Medal to the Reserve for champion, Mr. Hamer Towgood (Rolleston Fuchsia).

Champion Cup value £25, for the best mare or filly in the show, Mr. R. W. Hudson (Alston Rose); r, Mr. Hamer Towgood (Rolleston Fuchsia).

Cup value £10 for the best mare or filly in Classes 8, 9, and 10, Mr. J. Eadie, Barrow Hall, Derby (Barrow Princess); r, Mr. J. Parnell, Rainsbrook, Rugby (Yatesbury Flower).

Cup value £10, for the best mare in Classes 11, 12, 13, and 14, Mr. R. W. Hudson (Alston Rose); r, Mr. H. Towgood (Rolleston Fuchsia).

GELDINGS.

Cup value £10, for the best gelding in Classes 15, 16, and 17, Lady Wantage, Lockinge Park, Wantage (Lockinge Ebony); r, Mr. T. Edwards Spring Bank, Zitherland, Liverpool (Woodham Royal).

Prize List.

STALLIONS.

CLASS I.—Stallions, one year old (foaled in 1901): 1, W. Jackson, The Hall, Knottingley, Yorks. (Knottingley Royal), br. ditto; 2, J. W. Whitehurst, Markeaton, Derby (Markeaton Ransome), br. A. Ransom, Hitchin, Herts.; 3, J. Lewis, Trwstllewelyn, Garthmyl, Mont. (Severn King's Cup), br. ditto; 4, J. Wainwright, Hargate Hall, Buxton (Rocks Victor King), br. ditto; 5, Lord Rothschild, Tring Park, Herts. (Girton Charmer), br. F. Crisp, Girton Stud Farm, Cambridge; 6, P. A. Muntz, M.P., Dunsmore, Rugby (Dunsmore Masterpiece), br. P. G. Atterbury, Great Haddon, Rugby; 7, A. Henderson, M.P., Buscot Park, Faringdon, Berks. (Buscot Plutus), br. ditto; 8, H. Oakley, Dewstow, Chepstow, Mon. (Dewstow Pioneer), br. ditto; r. and h.c., W. and J. Thompson, Barron's Park Stud, Desford, Leicester (Desford Stonewall II.), brs. ditto; h.c., W. Cunningham, Gorsey Cop, Gateacre, Liverpool (Coldwall Chorister), br. ditto; J. Eadie, Barrow Hall, Derby (Barrow Albert), br. ditto; J. Eadie (Barrow Statesman), br. ditto; Hon. N. C. Rothschild, Tring Park, Herts. (Ashton Lad), br. ditto; Sir W. H. Wills, Bart., Coombe

Lodge, Blagdon, Somerset (Rickford Monarch), br. ditto; c., F. Casswell (Dunsby Victor), br. ditto; W. H. O. Duncombe, Waresley Park, Sandy (Triumphant of Waresley), br. ditto; W. Hammond, Ware, Herts. (Ware Masterman), br. S. Leggate, Dogdyke, Lincoln; W. Hammond (Ware Surprise), br. F. Lemon, Sudbury, Derby; G. Hanson (Watnall Wizard), br. ditto; J. W. Measures, Dunsby, Bourne (Regal), br. W. Dook, Laughton, Gainsborough; Lord Middleton, Birdsall House, York (Birdsall Melanite), br. ditto; Duchess of Newcastle (Clumber Victor), br. ditto; Duchess of Newcastle (Clumber Derby), br. ditto; G. D. and W. J. Thody, Clothall, Baldock, Herts. (Baldock Chancellor), brs. ditto; Lady Wantage, Lockinge, Wantage, Berks. (Lockinge Anglo-Saxon), br. late Lord Wantage, K.C.B., V.C.

CLASS II.—Stallions, two years old (foaled in 1900): 1, Lord Rothschild (Birdsall Menestrel), br. Lord Middleton, 2, W. H. O. Duncombe, Waresley Park, Sandy (Conqueror of Waresley), br. ditto; Earl Egerton of Tatton, Tatton Park, Cheshire (Lymm Harold), br. J. Gould, Model Farm, Lymm, Warrington; 4, P. Albert Muntz, M.P. (Dunsmore Lieutenant), br. ditto; 5, Hamer Towgood, Little Shelford, Cambridge (Mouiton Ringleader), br. G. L. Morris, Thorney, Peterborough; 6, H. W. Bibby, Carleton, Poulton-le-Fylde; r. and h.c., T. Edwards (Woodham Royal), br. E. Moss, Ilgars Manor, Woodham Ferris, Essex; h.c., F. W. Catton (General), br. W. Scholey, Hut Green, Whitley Bridge, Yorks; T. Simpson, Haynes, Bedford (Midlands Rattler), br. H. A. Underwood, Murcott, Rugby.

The Sale.

The annual sale, which took place on Thursday and Friday last, was, like the show itself, a record one in respect to the number of animals entered, but unfortunately it was not a record one for the averages realised, though we believe it placed to itself the credit of being the sale at which the largest number of horses have been sold sincet hese excellent sales were first established. There can be no question that it is the establishment of these annual sales that has most materially aided in making these annual shows so very popular among the breeders. For at these annual sales a very capital opportunity is afforded to the smaller breeder whose studs are not large enough for the periodical sales, to dispose of to full advantage any animal he may be able to breed of sufficient merit. One lesson, however, that the present sale has brought home to a very large number who consigned thereto, namely, that it is possible both to overset the value of the animal and also to over-supply the market.

We give, as in former years, a detailed summary, and therefore we need not refer to the averages made more than to remark that this year's average for the whole of the breeding animals sold works out at £77 18s. 3d. per head for 237, as against £87 2s. 9d. for 217 in 1901, £79 18s 4d. for 164 in 1900, and £74 10s. 7d. for 162 in 1899.

In dealing with the sale we follow the order of the catalogue, commencing with the yearling stallions, of which eighteen were sold at values ranging from 100 to 18 gns., the average being £42 1s. 2d., the best prices being 100 gns. for Watnal Warden, Mr. A. Whittime; 82 gns. for Lockinge Anglo-Saxon, to Mr. Paisley; 62 gns. for Ware Masterman, to Mr. G. Cowing; 46 for Dusty Victor, to Colonel Walter, etc. The range in value of the two-year-old stallions, fifty-four of which were sold, was 270 gns. to 29 gns., Mr. A. Whittome paying the former price for Redlynch Champion, from Mr. H. P. Taunton's well-known stud, another from the same stud, Redlynch Blue Blood making 190 gns. to Mr. Cresswell; another good price was that paid by Mr. F. W. Griffin, 160 gns.; for Exton Heirloom, a fine colt, with good power; 140 gns. was made by Nuilstone Expectation, to Mr. J. B. Dirmock; 120 gns. was made for Kendal Burgeon, whose sire, Burgeon, was one of Mr. Forshaw's horses, and he thus showed his appreciation of his set by taking this horse at the price named. Two others went at 115 gns. each, Souldern Vulcan, to Mr. W. R. Trotter, and Markeaton Typewriter to Mr. W. Hammond. Another pair made 110 gns. each, Durdham Tom, to Mr. G. Adams, and Poulton Prince Harold, to Mr. H. B. Ward; 105 gns. purchased Southill Vulcan, Mr. W. R. Trotter securing him at this value, and Mr. R. W. Hudson took that well-bred colt, Celtic, at 100 gns.

The three-year-old stallions were well competed for, and those sold made a fairly satisfactory average, the range in values being from 300 gns., 31 gns., a wide margin, but one that clearly demonstrates the difference in the value of the high class stock and that not of this character. The top price horse was Blythwood Ray, 7th in its class, and he was, as far as we could judge, secured by Mr. Cresswell, well within his value, at 300 gns. Next came Captain Heygate's judicious purchase, at 270 gns., Scarcliffe Old Fashion by Old Warden Royal Harold. Another real good horse in Drayman XXIII. changed hands at 230 gns., Mr. J. Forshaw being his purchaser. Two made 155 gns. each, Copenhagen, a son of the noted Harold, being taken at this figure by Mr. C. Haynes, and Prince of Rube, by Mr. Garriott, at 5 gns. less. Mr. G. Kenworthy became the owner of that fine mover, Langton Navigator. D'Arcy Royal, sent up by Mr. W. Richardson, went to Mr. Ewart, at 130 gns., and Mr. Kitchener took Coat-of-Arms at 105 gns. The four-year-old stallions did not command so good a trade as was the case last year, nor were they so much sought for as the three-year-olds. Seven only were sold at a range of values from 110 gns. to 48 gns., Mr. J. C. Hunter taking Norman President by Dunsmore Combination for the former figure. Another, D'Arcy bay made 70 gns., to Mr. Crossland, and three others went at 60 gns. each, as follows:—Duke X., to Mr. J. W. Welcher; Treasure Trove, to Mr. Cole Ambrose; and Nailstone Yeoman of the Guard, to Mr. Green. Of the older stallions, twenty-three changed hands at the range of values from 300 gns. to 13 gns., Mr. P. A. Muntz, M.P., taking Watnall Merry Lad, a commended horse, at the former figure; Mr. Walpole Greenwell secured Ashwell Cheer Boy at 190 gns.; Mr. Page, Conistro, at 115 gns.; and Mr. Delaney Sowerby, Victor, at 105 gns.

The demand for yearling fillies was not so good as the average of years, and this was one of those classes, in which, however, supply was very apparent. Five only were sold, ranging from 40 to 21 gns., the former price being paid three times, for Ivy Merry Girl, by Mr. Cooke; Spring Flower, by Mr. G. Cowing, and Desford Victoria, by Mr. Nicholson, who secured a very promising filly at a moderate price. A very much better demand was found for the two-year-old mares, whose range of values were 165 to 23 gns., the former price being made by Cutthorpe Catriona, from Mr. J. P. Cross' stud, her purchaser being Lord Iveagh; next in value was Baroness, who went to Mr. Brereton at 150 gns.; then came Alvaston Victoria, whose value was 105 gns., to Mr. Most; three others made 100 gns. each, namely, Moulton Lady Jessie, Mr. A. Moulton; Barrow Coral, a grand filly from Mr. J. Eadie's, to Lord Iveagh, and Creslow Primrose to Mr. Brereton, at 92 gns. Mr. England took that fine filly, Redlynch Royal Alice, and at 80 gns. Lord Harris got Norman Rose, a filly that looks like making a good one. The three-year-old-mares, whose range of values was from 300 gns. to 30 gns., sold well, and the top-priced one, Surrey White Foot, 3rd in her class, was one of the most eagerly competed for animals in the sale, Mr. Brereton being her purchaser, and Mr. Most the runner up. Creslow Belle III. was another that secured many admirers, and Mr. J. Pearman had to pay 175 gns. to secure her; two others made 150 gns. each, Cherry Rose to Mr. Webb and Wheatley Bute, by Calwich Tom, to Mr. Brereton. Tutbury Nunn by, Rokeby Friar, went to 120 gns, before Mr. J. Pearson stopped his competitors, and Mr. Munson gave 100 gns. for Boarbank Peggy, a daughter of Tatton Victor. Four-year-old mares, like the same age in the stallions', did not contribute largely to the aggregate number sold, for only seven of these were sold, though their average was satisfactory, the range in values being from 200 gns. to 35 gns., the former price, and also 105 gns. for another, being paid by Mr. Sheppard Cross, M.P., who has thus secured a grand pair of mares for his Herefordshire estate, the highest-priced one being Kiddington Alberta, by Waresly Albert, and the other Ludboro Movement, by that good horse, East Anglican; both these mares were h.c. in their class. Another to whom this honour went, Shelford Actress, went to Mr. Philips at 110 gns. The older mares, exhibited in three classes, made a very good average, the range of values being, however, a wide one, from 250 gns. to 13 gns., a curious coincidence for the lowest price for matured mares to be exactly the same as that for the corresdonding class of stallions; Lord Camden paying the top price of the section for Radical Lass, a grand bay 8-year-old mare, by Regent II.; next came Sterling Shire Queen, who went to Mr. Assheton for 200 gns., followed by the 10-year-old mare Rocks E Blyth's Echo, to Mr. Carr, at 180 gns.; then at 180 gns. Mr. W. R. Trotter secured D'Arcy Fuchsia, by the well-known Dunsmore Willington Boy, at 5 gns. less Mr. Steward secured Alston Bonny, a close relative of the Champion Mare; the Marquis of Winchester took Beacharden Fuchsia at 140 gns.; Stanton Nexies making 120 gns., Mr. Skinner being her purchaser; Mr. Thompson gave 105 gns. for Oakham Janet; 100 gns. being the price made by Nora Sensation to Lord Camden, by Broom to Mr. B. Ford, and by Miss Pilling to Mr. Richardson Carr.

The geldings offered were not in great demand, the values placed on them by their owners being such that prevented the sale of most of them, only five being sold. Sir O. Mosby, Barts., Bonny Captain securing 100 gns. from Mr. G. Davis, Midlands Ratten 62 gns. from Mr. W. Hammond, and Prince 60 gns. from Mr. Shead.

SUMMARY.

The Hackney Show.

The Shire horses having taken their departure, Hackneys will enter into possession of the Royal Agricultural Hall, Islington, to-morrow (Tuesday), and will remain until Friday evening. This will be the eighteenth annual show of the Hackney Horse Society, and although the entries do not, as at the Shire Show, constitute a record, the number obtained—493—has only on one occasion been exceeded, and that in 1899, when the total was 495, so that this year's number fell only three short of creating a record. Compared with last year, there is an increase of nine entries, stallions being 11 more and geldings 35 more; but mares are fewer by 23, and in the harness section there are eight less than last year. The following table will show at a glance how this year's entries compare with those received for the five previous shows:—

	1902	1901	1900	1899	1898	1897
Hackney and pony stallions..	219	208	189	227	242	284
Hackney and pony mares	114	143	146	173	187	141
Hackney geldings	94	59	69	53	51	—
Riding and driving	66	74	60	42	—	60
Totals	493	484	464	495	480	485

Classification.

The division of the show last year into separate sections for Hackneys, cobs, and ponies was the cause of some comment, and the council have reverted to the former division into Hackneys and ponies, drafting the classes in last year's cob section into their proper position in the Hackney portion.

To relieve the classes for older stallions, which last year applied to horses four years old and over, a fresh class for four-year-old stallions has been inserted, and this has attracted an excellent entry of 42, the remaining three classes being applicable to horses five years old or over. The class for three-year-old mares has been divided, and fresh classes for barren mares and geldings (class 17) and pony mares (class 27) have been added.

Prizes.

A total of £1,215 is offered in cash prizes, as compared with £1,045 last year. The whole of this sum is provided out of the Society's funds for the encouragement of breeders of Hackneys and ponies, in addition to the large amount distributed in prizes at the country shows in the summer. In addition there are the Society's champion and challenge cups. A champion cup for stallions and a champion cup for mares, to be retained by the owner, is given each year, with the condition that a stallion or mare shall not take more than two champion cups. McKinley, the champion of 1900 and 1901, is not exhibited this year, as this debarring rule now applies to him; but Royal Danegelt, reserve to McKinley for the championship on both occasions, is competing, as is last year's

champion mare, Rosarene. The special prizes for the various classes in groups, which are sometimes termed the junior championships, are again repeated.

Breeders' Prizes.

The system of Breeders' prizes is continued, and it is safe to say that no system of premiums has ever been so favourably received by the general body of horse breeders as has this. The total sum already awarded in this competition amounts to £720.

Exhibitors.

Among the noteworthy exhibitors this year are His Majesty the King, Earl of Albemarle, Sir Walter Gilbey, Sir Gilbert Greenall, Sir Robert Moncrieffe, Lord Middleton, Mr. John Barker, Mr. Fredk. Wrench, Col. F. W. Tannett Walker, etc.

Judging.

The programme, which has been made as attractive as possible to the public as is consistent with the somewhat uninteresting duties of judging, provides that proceedings shall commence at 9 a.m. on Tuesday with the judging of Hackney stallions, which should conclude at or about 5 p.m.

On the morning of Wednesday the Hackney mares in hand will occupy the ring, and in the afternoon there will be the class for small Hackneys exhibited in harness, followed at or about 3 p.m. by the stallion championships and by two other harness classes, concluding with a parade of prize-winning stallions, if time permits.

On the third day the classes for mares and geldings in hand will be taken as soon as the show opens, to be immediately followed by ponies in hand and the special prizes for ponies. In the afternoon there will be the judging of the mare championships, followed by the ponies in harness and a parade.

The last day of the show is devoted to the judging of the best sires in the produce groups, a parade, and a sale by auction in the ring at noon.

Mr. William Henderson, of East Elrington, has received from the University of Halle an elaborate testimonial, being a letter of thanks on behalf of the German Agricultural students, who, last April, were the guests of Mr. Henderson, whose farm they visited in order to view his famous stock of Shorthorns. The scroll, which is a large one, is beautifully executed, having at the top a fine picture of the University buildings, with Handel's statue in front, displaying on the margin scenes of several agricultural operations, as also Demeter among the sheaves. The testimonial is signed by Dr. Julius Kuehn, Professor in Ordinary and Director of the Agricultural Institute of the University of Halle, and is a pleasing memento of the visit of the students.

Bristol Bull Sale.

Messrs. George Nichols, Hawes, Young, Alder, and Co. held their fourteenth annual exhibition and sale of Shorthorn bulls on Tuesday last in the Cattle Market, Bristol. There was a large and representative attendance of breeders and buyers to view the seventy animals, which were much above the average quality, and sent from a goodly distance around. The judging was entrusted to Mr. Richard Stratton, the Duffryn, Newport, and Mr. Benjamin Read, Quedgely Court, Gloucester, who got through their work speedily and satisfactorily. The first class was for Shorthorn bulls above 15, but not exceeding 30, months old; the championship of the show was won by Mr. G. F. King's Lord Bruce, Mr. Philip Jenkins's Just One being reserve champion; Charlton Prince, owner and breeder the Earl of Suffolk, commended, 22 gs., Mr. Napper Englishcombe; Motcombe Monarch, breeder Mr. Nathaniel Benjafield, owner Mr. H. G. Bush, commended, 25 gs.; Mr. E. Matthews Box, Carnoxford Knight, owner the Earl of Ducie, breeder H. G. Bush, commended, 25gs., Mr. Barton; Mr. G. F. King's Lord Bruce first and champion withdrawn at 250 gs.; Chewton Ruby, owner and breeder Mr. G. F. King, commended, 19 gs., Mr. Bryant; Bloodstone, owner and breeder Mr. J. Lear, 24 gs., Mr. Bond; Charlton Sentinel, breeder the Earl of Suffolk, 18½ gs., Mr. Hodges; Vain Count, owner and breeder Mr. Arthur Taylor, 19 gs., Mr. Hardwick; Red Robin, owner and breeder Mr. D. Stinchcombe, 22 gs., Mr. Jones; Mystic Lad, owner and breeder Mr. John Griffiths, 13½ gs., Mr. Tanner; Royalty, owner and breeder Mr. D. Stinchcombe, highly commended, 29½ gs., Mr. Loxton; Kelmscott Count, owner Mr. H. G. Bush, breeder Mr. R. W. Hobbs, 2nd prize, 34 gs., Mr. Stokes; Cuthbert, owner and breeder the Earl of Ducie, commended, 19 gs., Mr. Andrews; the same breeder's Herbert, 17 gs., Mr. James; Marquis, owner and breeder Mr. John Griffiths, 11½ gs., Mr. Vowles; Wild-Eyed Knight, 3rd, owner and breeder Mr. H. G. Bush, highly commended, 24 gs., R. Clapp; Clarence, owner and breeder the Earl of Ducie, commended, 36 gs., Mr. Isaacs; Lord Chalmer II., owner and breeder Mrs. Mary Kello, 16 gs., Mr. Hardwick; Director, owner and breeder Mr. McEwen Smith, reserve 25½ gs., Mr. Jones; Buller, owner and breeder, Mr. James Gibson Langford, 13½ gs., Mr. Jones; Hanyet Pride, owner and breeder Mr. James Gibson, 12 gs., Mr. Shepherd.

Class II. was for Shorthorn bulls over 10, but not exceeding 15, months, and they constituted a rather neat class:—Mobley Prince, owner and breeder Mr. G. F. Cullimore, highly commended, 20½ gs., Mr. Staley; Blagden Cameo II., owner and breeder Sir W. H. Wills, 14 gs., Mr. Fear; Dauntless, owner and breeder Mr. W. McEwen Smith, highly commended, 18½ gs., Mr. H. G. Thornton; Noble, owner and breeder Mrs. E. Hardwick, commended, 19 gs., Mr. Young; Silver King, owner and breeder Mr. George H. Jones, 17 gs., Mr. Cox; Chewton Cornelius IX., owner and breeder Mr. G. F. King, highly commended, 20½ gs., bought for Lord Annaly for the use of his Somersetshire tenants; Donald, owner and breeder Mr. W. McEwen Smith, 14 gs., Mr. Richards; Chewton Cornelius VII., owner and breeder Mr. G. F. King, reserved, 28½ gs., Mr. Phippen; Baron Alpine, owner and breeder Mr. John E. King, 20 gs., Mr. H. Crew; Cecil, owner and breeder, Mr. George Stephens, 16½ gs., Mr. Crossman; Dairyman, owner and breeder, Mr. McEwen Smith, 15 gs., Mr. Jones; Prince Sackburn, owner and breeder Mrs. Mary Kello, 16½ gs., Mr. Alway; Duke of Gloucester XI., owners and breeders Messrs. D. and C. Savage, 2nd prize, 32 gs., Mr. W. H. Beaven; Harry, owner and breeder Mr. George Stephens, 12 gs., Mr. Hopkins; Just One, owner and breeder Mr. Philip Jenkins, 1st prize and reserve championship, 40 gs., Dr. Fox; Count Alpine, owner and breeder Mr. John E. King, 15 gs., Mr. Gunning; Chescombe Pride, owner and breeder Mr. John Gould, commended, 17½ gs., Mr. Poole; Chescombe Prince, owner and breeder Mr. John Gould, 13 gs., Mr. H. Matthews; Hamlet, owner and breeder Mr. H. G. Bush, 25 gs., Mr. Baker; Blagden Duke III., owner and breeder Sir W. H. Mills, 17½ gs., Mr. James; Prince Alpine II., owner and breeder Mr. Thomas Benewith, commended, 19 gs., Mr. Panes; Conqueror, owner and breeder Mrs. E. Hardwick, 14½ gs., Mr. Reynolds; Jumbo, owner and breeder Mr. George Russell, highly commended, 16½ gs., Mr. W. Nichols.

Class III. was for Shorthorn bulls over 5, and not exceeding 10, months, and these did not make such a strong class as the preceding ones, either in numbers or quality, and therefore very high prices could not be expected:—Charlton Marquis, owner and breeder the Earl of Suffolk, 10 gs., Mr. Thomas; Nobility, owner and breeder, Mrs. Meredith, second prize, 12½ gs., Mr. Thatcher; Chewton Victor IV., owner and breeder Mr. G. F. King, 14 gs., Mr. Carter; Rob, owner and breeder Mr. George Stephens, 9 gs., Mr. George Marshall; Alpine Prince, owner and breeder Mr. John King, 11½ gs., Mr. Paget; What's Wanted, owner and breeder Mrs. Meredith, 1st prize, 14½ gs., Mr. Weaver; Winford Democrat, owner and breeder Mr. W. McEwen Smith, 8½ gs., Mr. Weaver.

Shorthorn Show and Sale at Perth.

The second of the spring show and sales of pedigree stock at Perth took place on Tuesday and Wednesday, when Shorthorns were the breed represented, the Aberdeen Angus cattle, it will be remembered, having been disposed of on the previous Tuesday and Wednesday. This was the thirty-eighth annual show and sale, and as in the case with Aberdeen Angus breeders, rearers of and dealers in Shorthorns, attach a considerable amount of importance to this event, and that it is as popular as ever was proved last week, for the entries were considerably larger than for some years past, whilst the same might be said of the attendance of buyers. As a rule there are not so many Shorthorns forward as at the Aberdeen Angus sale, and the rule has been to simply judge the Shorthorns on the first day, and leave all the sales to the second, but owing to the increased number this year it was deemed expedient to follow the system adopted with the "doddies," namely on the first day to judge all the animals and dispose of the females, leaving the bulls to be sold on the second day. This new departure worked well, and seemed to give satisfaction to all concerned. The total number of entries was 384, as compared with 272 last year and 289 in 1900, whilst but three years ago the total was only 205. The bulls are, of course, the most important animals, and of these there were 313, the cows and heifers numbering 71. In the older class of bulls there were 129 entries, the younger bulls numbering 184; whilst in the female section 5 cows, 5 three-year-old heifers, 21 two-year-old heifers, and 26 yearling heifers. The number of individual exhibitors in the bull section was 69, against 54 last year, and 16 herds against 14 were represented in the cow and heifer classes. There were no exhibitors from England, but most of the leading herds in Scotland were represented. The largest lot of bulls was, as usual, that from Cluny Castle, Lady Gordon Cathcart having an entry of no fewer than 26 promising young animals, a large proportion of the calves being sired by the Collynie-bred bull Royal Pride, and representing well-known tribes on the female side. Mr. Granger, Pitcur, and Mr. Thomson, Balbegno,

came next, each with 11 bulls. The Montrave, Crieffvechter, and Strowan herds were each represented by 10, most of Sir John Gilmour's lot being by the well-known bull Brave Archer. Mr. Merson, Craigwillie, had 9 entries, including his prize-takers at Huntly Show recently, and most of the consignment are got by Dorset Prince and Masterpiece, bulls which were sold at Birmingham for 200 gs. and 230 gs. respectively. A similar consignment was sent from Mr. Shepherd's old herd at Shethin; and Mr. Taylor, Pitlivie, had also 9 entered. Eight bulls were sent from each of the Westertown, Coldstream, Rettie, and Orchardmains herds; and drafts of seven were entered by Mr. Adam, Baads (all got by his prize bull Mercury); Mr. Fergusson, Dalcapon; Messrs. Lumsden and MacKenzie, Huntingtowerfield; Messrs. Law, Mains, of Sanquhar; and the Duke of Richmond. Mr. Durno, Jackston; Mr. Fletcher, of Rosehaugh; Mr. Robertson, Ballechin; and Mr. Stewart, Millhills, each had six bulls of good breeding. Lord Lovat entered three bulls, all by his famous stock-getting sire, Royal Star, whose produce in recent years has ralised such high prices. The largest consigner of heifers was Sir John Gilmour, who sent 22 females from the Montrave herd.

Judging.

The judging, which was begun at nine o'clock, occupied the whole of Tuesday morning, for the judges had by no means an easy task, for the quality was distinctly much better than the average; in fact, many thought that the bulls made the best show ever seen at Perth. They were a great advance on last year—the young bulls especially being of exceptional merit. Heifers as a whole were also very good, although the improvement in quality was not so striking as in the case of the bulls. In the older bull class the judges drew out a leet of about a dozen, and from these they selected for the first place Ronald of Minmore, a stylish roan, belonging to Colonel Smith Grant, and bred by the late Colonel Smith. He was sired by Rameses, and is a well-fleshed bull, with a capital top, and displaying much gaiety in the ring. The second prize went to Lord Lovat for one of Royal Star's produce, a roan named Viking, a bull of great merit. The third prize-taker, belonging to Mr. Fletcher, of Rosehaugh, was the red bull, Waterloo Chief, sired by Marmont, and descended on the dam's side from a long strain of Waterloo and Wellington blood. The fourth bull, belonging to Mr. Durno, Jackston, was Victor Chief, a roan with good loins and hind-quarters, sired by Lord Lynedoch, and out of a cow whose dam, Chief Blossom, won numerous prizes, including first at the Highland Society's Show. Sir John Gilmour was fifth with Montrave Baron, a neat and promising dark roan that should improve as the season advances.

The younger bulls made a large and capital class, and it was a great honour for Mr. Maxtone Graham, of Redgorton, to take both the first and second awards. The leading one was Ambassador, by White Archer, a bull of tremendous substance, with great wealth of flesh, although perhaps lacking something in masculine character, and inclined to hold himself a little easy on the top when standing. The one that came next was Dictator, by the same sire, and is a pretty and typical Shorthorn. The third and fourth prizes were awarded to the well-known northern breeder, Mr. Merson, Craigwillie, for a pair of bulls by Dorset Prince, named respectively What Not and Washington, two very fine animals. The latter is the more stylish animal, and for general character is superior to his half-brother, but he does not handle quite so well. Mr. Durno, Jackston, was fifth with another son of Lord Lynedoch, a dark roan of compact build, and with an excellent coat of hair; whilst Messrs. Law were commended for Chancellor of Sanquhar, a red bull by Rover of Sanquhar, one of the Cruickshanks strain. The cup for the three best bulls of the breed was awarded to Mr. Maxtone Graham, of Redgorton, for his first and second prize bull calves, and an animal that was not placed. Mr. Fergusson, Dalcapon, was reserve for three bulls, which were not in the prize list, but they were more uniform in character than Mr. Merson's lot, which came next.

Tuesday's Sale.

The sale of the females, which was conducted by Mr. Wedderspoon, of the firm of Macdonald, Fraser, and Co., Ltd., was well attended, and bidding was fairly brisk throughout. A dozen of the females entered were not passed through the ring, but most of the remainder brought very satisfactory prices, the average for heifers being quite seven guineas better than last year. Twenty-four of the animals sold made less than 20 gs., but in more than a score of instances 30 gs. at least was realised, while some of the choicest heifers ranged from 40 gs. upwards. One of the features of the day's sale was the extent to which purchases were made by Baroness Rothschild, no fewer than a dozen of the choicest animals being acquired on her behalf. The top price of the day was 90 gs., which was obtained by Sir John Gilmour for his first prize yearling heifer Wild Rose. She was started at 40 gs., and, after a keen competition, was knocked down to Mr. Bruce, Dublin, at 90 gs., the runner-up being Mr. Robertson, Ballechin. The highest price for heifers last year was 36 gs. The Montrave first prize two-year-old Blue Bell was put up at 30 gs., and, after some spirited bidding, the Baroness Rothschild prevailed. The second prize two-year-old from Ballechin brought 43 gs., and the third heifer from the same herd 36 gs., the purchaser in both cases being the Baroness Rothschild. The second prize yearling Nonpareil Jewel, from Kilblean, was also secured by her at 51 gs., but the third prize-taker, Active, belonging to Mr. Grainger, Pitcur, went to Ireland at 44 gs. Lord Rosebery was the purchaser at 40 gs. each, of Sir John Gilmour's Baroness Cromwell, a yearling, which did not appear in the prize list, and Mr. Napier's fifth prize winner in the same class, whilst he gave 33 gs., for the fourth prize animal. The highest average for heifers was £35, which was made by the Ballechin lot of six, which is £17 3s. above that of last year, and compares with £28 3s. 6d., last year's highest average, which was realised by the Knowehead consignment. Sir John Gilmour had the second best average with £32 12s. 1d., but he had the large draft of 19 heifers; Mr. Menzies, Tirinie, had £31 10s. for three; and Mr. Napier, Nether Dallachy, £30 0s. 7d. for five, which is about £7 more than last year. The total proceeds of the day's sale amounted to £1,636 19s. for 59 head of stock, as compared with £782 18s. for 37 females last year. The averages for the respective years being £27 14s. 11d. and £21 0s. 7d.

Below we give a list of some of the best prices realised, the name of the seller being given in parenthesis:—

	Gns.
Myrtle (Mr. D. Anderson) ..... Mr. Fleming	20
White Heather (Mr. D. Anderson) ..... Bailie Taylor	20

Mary Ann (Mr. J. Scott) ..... Baroness Rothschild	24

Wednesday's Sale.

The sale of the bulls on Wednesday proved one of the best experienced at Perth, the average of £30 4s. 4d. per head for 267 animals being obtained, which sum is £3 more than the average of last year, and the best that has been obtained for shorthorns at these sales. There was a very large and thoroughly representative gathering of breeders from all parts of the country, including a good many buyers from Ireland, on behalf of the Congested Districts Board and other parties, and they were ready purchasers, a considerable proportion of the animals sold—nearly one-third of the whole—being taken across the Channel for crossing purposes. Argentina has always been a good customer for Scottish-bred shorthorns, and several of the best animals were secured for exportation to the Argentine Republic, although their destination was not in every case announced at the sale. Only 45 of the animals entered were absent or withdrawn. There was a steady demand from first to last for the best class of stock, and almost at the close of the sale, when the demand might fairly have been expected to be fully supplied, some very high prices were obtained. Less than one-fourth of the bulls failed to reach 20gs., while 23 brought upwards of 40 gs., and five made three figures. The judging of Tuesday was a good deal upset at the sale, neither of the first prize bulls reaching three figures. The public fancy favoured some of those that were pretty far back in the prize-list, and the highest price was given for the bull which was but fifth in the older class. This was Sir John Gilmour's stylish roan, Montrave Baron, which was started at 40gs., and after keen competition, was purchased by Captain Graham Stirling, of Strowan for 145gs. The Montrave herd has thus the honour of leading the sale list in both the male and female sections. The second highest price was paid for the Redgorton second prize bull calf, Dictator, which was not reached till near the close of the sale, but it was put up at 50gs, and was soon carried to 100gs., and was finally knocked down at 135gs. to Mr. Hume, Barrelwell The second prize bull in the senior class, Lord Lovat's Viking, a roan son of Royal Star, started at 50gs., and quickly rose to the three figures, being taken out at 130gs. by Mr. Maclennan for exportation to Argentina. The fourth of the older bulls from Jackston, the roan,, Victor Chief, made the gratifying price of 120gs, his purchaser being Mr. Robertson, Ballechin. Another bull from the same herd, and by the same sire, Mr. Durno's Royal Emblem, met a spirited demand, and was sold at 100gs. to the Marquis of Londonderry. The first prize bull calf, Mr. Maxtone Graham's Ambassador, was sold at 86gs. to Mr. Tavendale, Henley-on-Thames, and one of the Jackston bulls, Vanderbilt, a roan son of Lord Lynedoch, was knocked down at 80gs. to Lady Gordon Cathcart. The Rosehaugh third prize bull in the older class, Waterloo Chief, realised 75gs, his purchaser being Colonel Smith Grant of Minmore; and Mr. Durno's fifth bull calf, King of Fame, another of Lord Lynedoch's produce, made the satisfactory price of 70gs., which was paid by Mr. Campbell, Hardhill. The first prize bull in the older class, Colonel Smith Grant's Ronald of Minmore, was offered before the pulse of the market had been fairly felt, and he sold rather cheaply to Colonel Munro Murthly, at 63gs. The third prize bull calf from Craigwillie was purchased by an English buyer at 58gs.; while the fourth bull, from the same herd and by the same sire, Dorset Prince, was taken to Ireland at 57gs.

A list of the other principal sales is given below. The result of the day's sale was a total of £8,073 9s. for 267 animals, as compared with £5,264 11s 6d. for 193 head last year. The whole proceeds of the two days' sale of shorthorn cattle, amounted to £9,710 8s for 326 animals, as against £6,047 9s 6d. for 230 cattle of the same breed sold last year. The highest herd average at the sale was made by Mr. Durno, Jackston, who had the very creditable figure of £97 2s. 6d. for four animals. Lord Lovat came next with £74 18s, and his lordship was followed by Mr. Maxtone Grahame, of Redgorton, with £67 8s. 2d. for five bulls, Mr. Douglas Fletcher, of Rosehaugh, being fourth, with £46 16s. 7d. for five animals.

Below we give a list of the sales at 25gs. and over:—

Show and Sale of Shorthorns and Aberdeen Angus at Inverness.

The annual show and sale of Shorthorn and Aberdeen Angus bulls and heifers, under the auspices of the Northern Counties Breeding and Fat Stock Club, was held in Messrs. Macdonald, Fraser, and Co.'s mart at Inverness on the 21st ult., when there was about an average display of stock and attendance of buyers. The judging was conducted by Colonel John Smith Grant, of Milmore, in the Aberdeen Angus section, and Mr. Durno, of Jackston, in the Shorthorn section. In the latter section there was an extra good show of quality animals, many of them from leading herds in the North. The Shorthorn championship went to a bull belonging to Lord Lovat, which showed the great substance and quality of this famous herd. Viceroy, the champion, was got by the Crombley bull Royal Star, a sire which has bred noted prize-winners, whilst the dam was one of the Broadhooks tribe, so successful at Beaufort. He was afterwards purchased by Mr. Marshall, Stranraer, for 240 guineas. Mr. Cameron, of Balnakyle, a well-known Ross-shire breeder, stood reserve with Merry Rothwell, a young bull of great size and substance, but of smaller build than the Beaufort champion. Many fancied him, and there were numerous bidders for him. He fell to the well-known exporter, Mr. S. Campbell, Kinvellar, Aberdeenshire, at 85 guineas. The representatives of the late Major Jackson, of Swordale, secured a quality bull in Benvolen, from Findon Mains, which, though only commended in the class, made 50 guineas. Another fine bull from the same farm went to the Duke of Sutherland's herd at Dunrobin at 45 guineas. Several bulls were purchased by Mr. Forsyth for the Congested Districts Board. Mr. Cameron, Caledon, Ireland, secured an excellent representative of the breed from the herd of Mr. Inglis, of Newmore, at 45 guineas. Mr. Cameron, Westside, Brechin, sold Lord Loch, a Broadhooks bull, to Mr. Douglas, Rhynie, at 62 guineas. There was a very level display of Aberdeen Angus cattle. Sir George Macpherson Grant, Bart., of Ballindalloch, carried off the principal prizes. His first prize bull, Gondolier, by Eblito, a son of Prince Ito, went to Mr. Rattray, Phoineas, at 59 guineas. Mr. Grant, The Dell, Strathspey, had Echline, a full brother of the Kinnochtry bull, which brought 360 guineas two years ago at Perth, for 50 guineas.

Appended is a list of the principal awards:—

SHORTHORN.—Bulls calved before 26th May, 1900.—1, P. B. MacIntyre; 2, H. MacRae; 3, A. MacDonell; 4, H. P. MacRae; 5, H. F. Rose. Bulls calved after 26th May, 1900, and on or before 15th November, 1900.—1, T. A. Anderson. Bulls calved after 15th November, 1900, and before 15th February, 1901.—1, Lord Lovat; 2 and 3, Mr. Anderson. Bulls calved on or after 15th February, 1901.—1, Lord Lovat; 2, C. M. Cameron; 3, Alex. MacDonell.

ABERDEEN ANGUS.—Bulls calved before 26th May, 1900.—1, Andrew Mackenzie; 2, W. Dyson Perrins; 3, J. A. Walker. Bulls calved after 26th May, 1900, and on or before 15th November, 1900.—1, 2, and 3, J. Rattray. Best bull calved after 15th November, 1900, and before 15th February, 1901.—1, Sir George Macpherson Grant, Bart.; 2 and 3, Countess Dowager of Seafield. Best bull calved on or after 15th February, 1901.—1 and 3, Mr. Maconochie; 2, Mr. Munro; 4, Countess Dowager of Seafield. Best heifer calved after 15th November, 1900, and before 5th February, 1901.—1, Wm. Stewart. Best heifer calved on or after 15th February, 1901.—1, 2, and 3, W. Fettes. Special prize of £5 5s., given by Lord Lovat for best polled Aberdeen Angus.—1, Sir George Macpherson Grant, Bart. Best group of not less than three pure-bred Aberdeen Angus bulls.—1, Sir George Macpherson Grant; 2, Countess Dowager of Seafield. Heifer calved before 15th November, 1900.—1, 2, and 3, W. Dyson Perrins.

Below we give a list of the principal prices realised at the sale, the names of the sellers being given in parenthesis:—

Angus (Mr. Finlay Munro)	Mr. Clyne, Noss	28
Adam (ditto)	Mr. Stephen, Brechin	27

In the heifer section, Sir John Gilmour had by far the largest consignment, and he was with general approval awarded the leading honours in both classes, a judgment which was amply upheld at the sale. About a score of two-year-old heifers were forward, and Sir John Gilmour was easily first with Blue Bell, a sweet roan, sired by the Montrave stock bull, Brave Archer. The second and third prizes went to Mr. Robertson, Ballechin; for two fine animals, the former being a heifer of great substance and rich in colour, but not so fleshy over the loins as the winner. Mr. Napier, Nether Dallachie, was fourth with Laurestina, a daughter of Watchman, a nice-looking heifer, with long quarters. In the class for yearling heifers Sir John Gilmour was first with Wild Rose, a daughter of Spicy Baron, a heifer of splendid quality. Mr. Manson, Kilblean, was second with Nonpareil Jewel, a nicely-topped heifer; Mr. Granger third with Active, by Count Nicholas, a neat little heifer; whilst Mr. Napier was fourth with Lucretia, a bigger animal, with more substance, but in the meantime standing just a little off the ground. Another heifer from Nether Dallachie, and very much of the same kind, was fifth.

Record Prices for Aberdeen Angus Cattle in America.

The boom in Aberdeen Angus cattle appears to be assuming gigantic proportions in America, judging by the remarkable prices realised at a composite sale of the "doddies" at Chicago during the week ending February 7th. The record prices for both bull and female Aberdeen Angus were beaten by the imported Prince Ito and the yearling heifer Blackcap Judy, the fromer animal, which was bred at Ballindalloch, realising £1,820 after very spirited bidding, and the heifer £1,260. An offer was subsequently made and accepted for service by the bull at £250. The collected lot of animals imported from Scotland by Mr. Judy, besides including the two already mentioned, contained several other splendid animals, which topped the £200. Below we give some of the best prices realised by this consignment:—

Primate of Polowick (Vol. 26), c March 29, 1901, s Earl Essex	J. W. Wheatley	200

The average obtained by this consignment was £235 10s., 28 females reaching an average of £210, while the average price paid for each of six bulls was £354.

The Argentine and British Stock.

Mr. J. E. Gordon, M.P., recently wrote to Mr. Hanbury, President of the Board of Agriculture, concerning the report of the re-opening of Argentine ports to British stock. On Thursday Mr. Gordon received a reply from Mr. Hanbury, in which he says:—A cable was received at the Foreign Office on the 19th inst. from Sir W. Barrington, the British Minister, stating that "the decree re-opening Argentine ports to live stock from the United Kingdom has been signed," but making no mention of the date on which it is to come into force. The delay in answering your letter has been due to our attempt to ascertain this, but at present the Foreign Office and the Argentine Legation have no information on the point. We are, however, unofficially informed that the ports will be opened from the 8th March, and that Messrs. Lamport and Holt, of Liverpool, are prepared to accept live stock for shipment on information received by cable from their agents at Buenos Ayres.

Sale of Cumberland Bulls at Annan.

The annual sale of Cumberland Shorthorn bulls held at Annan took place on Tuesday, Messrs. Kirkpatrick and Sons being the auctioneers. About 300 yearling bulls, the majority of which were pedigreed, were catalogued, all of which were from herds in the Abbey Holm and West Cumberland districts of the Solway, and all the well-known breeders in these districts had animals forward. Some prizes were offered, the animals being divided into two classes, namely, Red and White, the former being the strongest number, just over 200, whilst white bulls totalled a little short of a hundred. The judges had considerable difficulty in making their awards, but eventually decided as follows:—

Red bulls.—1 and v.h.c., Mr. J. Lightfoot, Bowness Village; 2, Mr. William Little, Bowness Hall; 3, Mr. Park, Bowness; c., Mr. R. Brown, Whitrigg.

White Bulls.—1, Mr. J. Lightfoot, Bowness Village; 2, Mr. William Little, Bowness Hall; 3, Mr. Mattinson, Parkhead; v.h.c., Mr. Taylor, Biglands; c., Mr. R. Wilson, Whitrigg Lees.

There was a very large attendance of buyers, and some keen competition was witnessed. The red and roan bulls were exposed first, and for the best animals the prices were good all round. The first prize roan sold at £25 10s. (the animal was only 14 months old); the second prize bull sold at £22 5s.; and the third prize taker was sold at £21. Quite a number of the other red bulls sold very well. In the white bull section the first prize animal was sold for £22 15s.; the second prize taker brought £18 5s.; and the third prize winner £19 5s.; whilst the very highly commended brought £22 15s., and the commended bull £18 7s. 6d. For the very youngest animals the demand was not so good, and a number of the bulls were passed.

The Raby Castle Sale.

Lord Barnard's herd of shorthorns was disposed of by Messrs. Thornton and Co., on Thursday, February 20, at Raby Castle, Staindrop, near Darlington. The stock was brought out in ordinary condition, but the animals included some promising heifers and young bulls. There was a large attendance, but no large prices were realised, the recent severe weather doubtless having some effect on the prices. Mr. H. Straker gave thetop price of the day, 40 guineas, for Raby Beatrice, a handsome roan heifer calf; the same buyer also tok several other good animals. The folowing is a list of the principal prices and buyers' names:—

Particulars of Transactions in Store Stock.

The fair at Kilmallock, Co. Limerick, on Monday was a moderate sized one, composed chiefly of second-class cattle, mostly of inferior quality, and in poor condition; but there was a fair demand. The very few springers met a fair demand. Prices:—Calves, 1st class, £5 to £6; 2nd class, £3 15s. to £4 16s. 3d.; 3rd class, £2 10s. to £3; yearlings, 1st class, £8 10s. to £9 15s.; 2nd class, £7 to £8; 3rd class, £5 10s.; two-year-olds, 2nd class, £9 15s. to £11; springers, 2nd class, £12 10s. to £15.

At the fair held at Killeagh, Co. Cork, on Monday, there was but a small supply of cattle, chiefly yearlings, which met a fair demand. Prices:—Calves, 2nd class, £3 10s. to £4 10s.; yearlings, 1st class, £7 12s. 6d. to £7 17s. 6d.; 2nd class, £6 to £7; 3rd class, £4 5s. to £5 10s.; two-year-olds, 2nd class, £8 5s. to £9 5s.; 3rd class, £6 to £7 10s.; springers, 1st class, £14 10s. to £15 10s.; 2nd class, £12 7s. 6d. to £13; 3rd class, £11.

Maryborough fair (Queen's Co.), held on Monday, was a small and poor one. A fair demand prevailed for one-and-a-half-year-old cattle, but scarcely any for other sorts. Quotations:—Yearlings, 1st class, £9 5s.; 2nd class, £6 2s. 6d. to £7 10s.; two-year-olds, 2nd class, £8 15s. to £9 2s. 6d.; springers, 2nd class, £10 5s. to £14 10s.

Shire Horses in Canada and the United States.

A correspondent writes:—The annual meeting of the Dominion Horse Breeders' Association was held in Toronto on the 18th of February. Among other reports made was that of the Shire Society, which has just published the first volume of the Canadian Shire Stud Book, and registration of 31 pedigrees during the year.

At the general meeting of the association, the Lien law, the Hon. John Dryden, Minister of Agriculture, intends bringing before the Ontario Legislature shortly, was discussed.

The Manitoba Act gives a lien only on the colt. The Ontario breeders want a lien on the mare as well as the colt. It was proposed that registered stallions, with veterinary certificates as to soundness, only, should come under the Act.

The demand for high-class, heavy, draught stallions was never so great as at present, both in the United States and Canada. They could easily absorb 1,000 stallions of the right stamp every year, and would take horses too good to castrate and not good enough to retain as sires in this country. Heavy geldings, for use in the cities, are now worth as much, or more, on the other side of the Atlantic than in this country, and the demand bids fair to increase.

It is only the duty of 20 per cent. on geldings that prevents very heavy British-bred horses being shipped to the United States in large numbers. The freight and expenses would not stop them.

Through incomprehensible neglect or want of enterprise the Shire and coach horse breeders in Great Britain have left this, the best market in the world, to the tender mercies of a number of Yankee combines, some of these advertising 500 head of Percherons and French coaching stallions.

In five years as many as 1,000 of these sires, the bulk of them, of course, of a very low quality, have been imported by one of these firms. They could not get the same number, even of a similar doubtful pedigree, in any other country but France.

The Shire breeders' Society follow them up the same as the Clydesdale men have; these, however, have their hands full, and stand the best specimens of Shires, even at a loss at first, at Ottawa, Toronto, and Brandon, Manitoba, Canada, and offer medals at the leading expositories, exhibiting them at Winnipeg in July next. There are usually 5,000 American visitors there. Again, at Toronto, in September, and at the leading agricultural shows in the States.

They want to see what Shires are. Send out very best samples to sell from, the same as other merchants. If they would not pay the price, and there is little fear of that, bring them home again.

Yankee buyers were in evidence at the Agricultural Hall last week, but in the interest of the breed it is deplorable that the first large shipments should include a large number of low-priced horses, and, what is worse, unsound at that. The enterprising Percheron manipulators in the States could not wish better help than this.

The friends of Shire horses and well-wishers to United States and Canadian farmers should call the attention of both the American and Canadian Ministers of Agriculture to this fact at once.

These gentlemen can soon put a stop to such nefarious practices.

In order to be exempt from 20 or 25 per cent. duty, horses, or any other stock, must be accompanied by breed societies' permits, and this should at once be made to include a veterinary surgeon's certificate as to soundness. Hereditary and transmissable defects in an imported sire can inflict as much loss to a country as tuberculosis, scab, or other disease, which could probably be much more easily eradicated.

We have received from Messrs. John K. King and Sons, of Coogeshall and Reading (by which name the well-known business of John K. King will in future be known), a copy of their catalogue of pedigree farm seeds. It is well-arranged, while the illustrations, principally from photographs, are of a high order. For practical utility also it is well worth perusal, as there is a mass of useful information given. There are some capital illustrations of the Royal Parks, which are to be sown this, the Coronation year, with John K. King and Son's grass seeds, by order of H.M. First Commissioner of Works, being the fifth occasion that this honour has been conferred on the firm. A copy of the catalogue may be obtained free on application to John J. King and Sons, Coggeshall, R.S.O., Essex; or Reading, Berks.

SOCIETIES.

Frome.

At the annual general meeting of the Frome District Agricultural Society, Mr. Trotman, J.P., was voted to the chair, Mr. R. P. H. Batten-Pool, the retiring president, being unable to attend.

The minutes of the last meeting were taken as read, and the same course was adopted with regard to the report and balance-sheet for the past year, copies of which had been circulated amongst members.

In the course of their report the committee stated that the society still continues to fully maintain the high position it has held for so long, and that the show of September last was in no way inferior to any of its predecessors. The exhibition was, indeed, a record one, the total number of entries being far in excess of those on any previous occasion. One very important item in the year's proceedings has been the erection of a permanent grand-stand in the show field, which will add considerably to the comfort and convenience of the public. The cost of this (£230) has been met out of the society's funds, and there are no outstanding liabilities.

Including a balance of £317 9s. 10d. from the previous year, the year's receipts amounted to £1,370 19s. 3d., and after deducting expenditure, there was a balance in hand of £10 7s., and as compared with £317 9s 10d last year.

Mr. Trotman, in moving the adoption of the report and balance-sheet, said their financial position was not quite satiesfactory, but he did not think it was worth while to discuss the matter on that occasion. The reasons for the reduction of the balance had better be left for inquiry by the committee, though he might say one reason was the construction of a permanent grand-stand, which was likely to be a very good investment indeed for the society. Their last show was one of the most successful they had ever had.

Mr. Hoddinott seconded the adoption of the report and balance-sheet. He said he thought the committee could well account for the decreased balance. They had launched out, they had embraced a greater area of usefulness, and that meant extra expense. They had several assets which had been the cause of expenditure last year and which would not occur again in their accounts for many years to come. He quite agreed that the outlay on a grand-stand would prove a most economical one, and believed they might look forward to increasing their balance for many successive years. He did not take a pessimistical view of their financial position, and seconded the adoption of the report with every confidence.

The resolution was agreed to.

Mr. Jefferys moved a hearty vote of thanks to Mr. Batten-Pool for the very able way in which he had carried out the duties of his office of president during the past year. This was seconded by Mr. Collins, endorsed by the chairman, and adopted by acclamation.

Mr. Lewis proposed the renomination of Lord Cork, the Duke of Somerset, and Lord Bath as patrons of the society, a resolution that was seconded by Mr. Gradidge and duly approved.

Mr. Wiltshire proposed Lord ork as president of the Society for the present year, and said that the name of Lord Cork, he felt sure, was one that would command a great warmth of feeling on the part of those present. They all knew the number of years in which his lordship had taken a kindly and active interest in the welfare of that society, and on that important occasion of the Coronation year it was most fitting and appropriate that they should have him as their head and president. He was pleased to say that he knew his lordship would accept the office if elected.

Mr. Cooper seconded the proposition, which was carried unanimously and with acclamation.

Mr. Wiltshire was re-elected treasurer, with the hearty thanks of the meeting for his past services.

In a eulogistic speech Mr. Hoddinott proposed the re-election of Mr. T. C. Harding as secretary and collector to the society. He spoke of the immense amount of work attached to the office of secretary and of the able way in which Mr. Harding performed every duty that devolved upon him. The stipend paid was most inadequate as a recompense for the work done.

The resolution was seconded by Mr. Gradidge and adopted by acclamation.

Mr. Harding, in returning thanks, said he should be pleased to do his best for the society during the coming year. He wished the society would go further afield and give him more work to do. He thought they ought to work the Christmas Show and the Milksellers' Association, and there were many questions affecting agriculture which they could well take up.

Mr. T. C. Harding mentioned that a few days ago he and Mr. Collins looked through the list of members and found that out of a total of about 230 only about 68 were actually farmers.

It was resolved that a show be held as usual on the last Wednesday in September.

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent"-fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

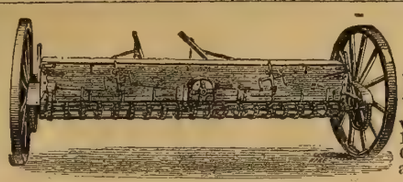
VESTA CREAM MEAL.

This, our latest Calf Meal, has been specially made for use with either Skim or Separated Milk, and after the first few days can be used alone.

It is very nutritious, easily digested, prevents scour, and imparts a beautiful sleek skin.

It is one of the richest milk substitutes obtainable, and fine healthy thriving calves are reared on it by the leading breeders of cattle.

It is therefore a *perfect milk substitute.*



T. GITTINS, Esq., Wrentnall Farm, Shrewsbury, says

"I am more than pleased with your Calf Meal I consider it excellent in every way."

15s. per cwt. Carriage Paid to Nearest Station.

LIVERPOOL VESTA CAKE CO.

CHILDWICK MAJESTIC 17354.

Dark whole-coloured Brown, foaled in 1896. Sire Rokeby Friar 14827, dam Rose by Lincolnshire Boy 3183. 17 hands high, on very short legs; has immense flat bone of fine quality, a profusion of long silky hair, feet and joints as they should be, and a sure stock-getter; 85 per cent. of mares in foal to him season 1901. He is the sire of Childwick Youno, sold at Sir Blundell's sale when 10 months old for 520 Guineas. Fee, 10 Guineas; tenant farmers, 5 Guineas.

BUSCOT SQUIRE 18600.

Bright Bay, foaled in 1899. Sire Markeaton Royal Harold 15225, dam Madyn Bonny Lass 16956 by Wellington Sir John 8609. 17 hands high; won First Prize and £20 Cup for best Stallion in Classes 1, 2, and 3, London Shire Horse Show, 1900; he still has those beautiful flat legs and silky feather, has grand style and action. Fee, 10 Guineas; tenant farmers, 5 Guineas.

OLD TIMES 18265.

Bright Bay, foaled in 1898. Sire Stonewall 15375, dam Fratts Buttercup 18744 by Bury Victor Chief 11105. 17 hands high; a great massive colt, of rare quality. Winner of many prizes, including First Prize and Gold Medal Paris Exposition. Fee, 10 Guineas; tenant farmers, 5 Guineas.

CHILDWICK HAROLD.

Bright Bay, foaled in 1900. Sire Markeaton Royal Harold 15225, dam Fratts Buttercup 18744 by Bury Victor Chief 11105. A few nominations to this Colt at 10 Guineas.

CHILDWICK PIONEER.

Dark Brown, foaled in 1900. Sire Pioneer VII. 16890, dam Town Melody 2711 by Dunsmore Masterman 12874. A few nominations to this Colt at 5 Guineas.

CHILDWICK COUR DE LION.

Bay, foaled in 1900. Sire Nailstone Cour de Lion 16269, dam Childwick Annie 25644 by Burgundy 12862. A few nominations to this colt at 5 Guineas.

BUCKINGHAM SHIRE STUD

THE PROPERTY OF

MR. A. C. ROGERS, J.P., BUCKINGHAM.

HAROLD'S PILOT 11564.

HAROLD'S PILOT 11564 will serve a limited number of Mares. No Groom's Fees. Sire Harold 3703; dam Sudbury—Hymen 3338 by Honest Prince 1058. This Mare bred Delicacy, first-prize Mare London Show, 1891, and the dam of Dunsmore Masterman 12874.

HAROLD'S PILOT is one of the best-bred Shire Stallions in England, and has proved himself a very good stock-getter. He is a nice dark brown, smart, active horse, with short back, deep ribs, grand top, plenty of bone, muscle and hair; stands 18 hands high; is a splendid mover, with good temper and manners. He is sire of the first and second prize Geldings at Aylesbury Show, 1895, and sire of the Champion Foals at Bicester and Buckingham Shows, 1894 and 1895, and in 1896 his foals gained first at Brackley Show, first and second at Bicester Show, first, second, third, and champion at Buckingham Show, and at the Royal and Central Bucks Show the same year (in a class of thirty-five) first, second, and third prizes were awarded to foals by this horse. In 1898 his stock took first at Tring Show, Oxfordshire Show, Bicester, Buckingham, Royal and Central Bucks. He is also the sire of Sir Blundell Maple's Pioneer 16990, purchased at a thousand guineas, which won first prize as a yearling at the Royal and other Shows. His stock are nearly always to the front wherever exhibited. One of his last year's foals has been sold for 175 guineas. Address, for Nominations, to the Owner.

N.B.—The thrice Champion Stallion Rokeby Harold was bred at this Stud.

RAILWAY STATION: BUCKINGHAM, L. & N.W.

CHAMPION ARAB STALLION MOOTRUB.

CHAMPION POLO PONY MARE ZITHER.

The Stallions in this Stud of Riding Ponies have been selected with regard to their suitability to mate with the Polo, Thoroughbred, Arab, and Mountain Pony Mares of the Stud.

CHAMPION ARAB STALLION MOOTRUB 32. Winner of numerous prizes in the show-ring, including 2 championships, 3 reserve championships, 9 firsts, and 5 seconds. His stock have won 24 prizes at the leading shows. He stands 14.1, and was bred in Arabia. He has quality and power, and is a grand goer. Fee £3 3s. and 5s. the groom.

POLY PONY STALLION HURLINGHAM 90. Winner of 7 prizes. He is by Champion Rosewater out of Esmeralda—a high-class Polo mare and winner of prizes at Hurlingham. He stands 13.2, and is suitable for big mares. His stock are prize-winners. Fee £3 3s. and 5s. the groom.

THOROUGHBRED PONY STALLION EHEU by Despair out of Fisher Lass by Exminster; granddam Fisherman's Daughter by Fisherman. Eheu (lately the property of Sir Humphrey de Trafford, Bart.) is a winner of races. He measures 8¼ inches below the knee, and is a most suitable sire for small mares. He sired the first and second prize Pony Polo yearlings at the Royal Show at Cardiff, 1901. Fee £4 4s. and 5s. the groom.

POLO PONY STALLION ROSEBUD (Two-year-old) by Eheu, out of Eau-de-Rose by Champion Rosewater. Rosebud is beautifully bred, and should make an ideal Polo Pony sire. His dam, Eau-de-Rose 964—bred by Sir Humphrey de Trafford—won first prize at Polo Pony Society Show at Ranelagh, 1895, and third at the Royal Show, 1897, and other honours. Rosebud's granddam, Reading 247 by Lord Gough, was a grand pony mare and very fast, being a winner of Galloway races, and also won third prize as a brood mare at Hurlingham, 1891. ROSEBUD won the second prize in the Polo Pony yearling class at the Royal Show, 1901, being placed second to his half-sister Doubtful by Eheu. A few nominations open for 1902. Fee £3 3s. and 5s. the groom.

The Stud consists of carefully selected mares, some of which have been high-class playing Polo Ponies (registered at Hurlingham); also Racing Ponies, Arab Ponies, and Mountain Ponies.

PRIZES WON IN 1900.

Mootrub—1st Polo Pony Society London Spring Show; 1st and Silver Medal, Liverpool Polo Club Show; 1st Royal Agricultural Society at York; 1st and Silver Medal and Champion Crystal Palace; 2nd (to Sir Walter Gilbey's Rosewater) at Tunbridge Wells and South-Eastern Counties Show.
Silver—1st Liverpool Polo Club Show.
Sunflower—3rd (Polo Ponies under Saddle) Tring.
Zither—2nd Crystal Palace; 1st Tunbridge Wells and South-Eastern Counties Show; 1st (under Saddle) Tring; 1st (Riding Ponies 13.2) Tring; Gold Medal Polo Pony Society, Tring.
Girton Girl—2nd Crystal Palace; 1st and Gold Medal Polo Pony Society, Tunbridge Wells and South-Eastern Counties Show.

PRIZES WON IN 1901.

Mootrub—1st London; 2nd Liverpool; 2nd (to Rosewater) and Silver Medal, Tunbridge Wells; 1st and Silver Medal and Championship for the best Stallion in the Show, Crystal Palace.
Gipsy—2nd Crystal Palace.
Sunflower—1st and Silver Medal, Moreton-in-Marsh.
Belle—2nd Crystal Palace.
Girton Girl—1st and Silver Medal and Championship for the best Polo Mare, Crystal Palace; 2nd Tring; 4th Royal; 1st and Silver Medal, Tunbridge Wells.
Silver—1st Crystal Palace.
Timothy—1st Tring.
The Boy—2nd Liverpool.
Spree—2nd (to Silver) Crystal Palace.
Zither—2nd London; 1st and Gold Medal and Championship for the best Polo Mare at the Royal Show at Cardiff.

And other Prizes amounting in all to 58 honours at the leading shows during the last two years.

CONTRACTS.

ARMY CONTRACTS.
FORAGE AND PAILLASSE STRAW.

SEALED Tenders for the supply of Forage and Straw for Paillasses, for Military Services, during Six months, from the 1st MAY, 1902, will be received until 12 o'clock noon, on MONDAY, the 24th day of MARCH, 1902, by the Officers in charge of the undermentioned districts:—

Scottish District	Edinburgh.
North-Eastern District .	York.
North-Western District.	Chester.
Western District... ...	Devonport.
Southern District ...	Portsmouth.
South-Eastern District .	Dover.
Salisbury Plain District	Tidworth House, Andover.
Eastern District... ...	Colchester.
Thames District	Chatham.
Woolwich District ...	Woolwich.
Home District	23, Carlton House Terrace, S.W.
Aldershot District ...	Aldershot.

Forms of Tender and Conditions of Contract may be obtained on application at the above-named District Headquarter Offices, by letter addressed to the Assistant Adjutant-General, or in person between the hours of Ten and Four o'clock, and no Tender will be entertained unless made upon the form so obtained.

The Tenders must be properly filled up, signed and dated; and no Tenders will be noticed unless delivered in time, at the above-named District Offices, under sealed envelope, marked "Tender" on the outside.

A. MAJOR,
Director of Army Contracts.
War Office, Pall Mall, S.W.,
March, 1902.

CONTRACTS.

CUMBERLAND MARKET TOLLS.

REGENTS PARK.

THE COMMISSIONER OF WOODS in charge of His Majesty's Land Revenue, in the County of Middlesex, is prepared to LET by TENDER for a term of Seven Years from the 5th APRIL, 1902, the two areas of Cumberland Market, Regent's Park (together with the Office or Weigh House and weighbridge attached), appropriated to the sale of hay, straw, grass, clover, and vetches, with all the rents, tolls, duties, authorised or appointed to be collected from persons using the same.

Tenders sealed and addressed to the Commissioners of Woods, 1, Whitehall Place, and endorsed "Tender for Cumberland Market Tolls," are to be delivered there before TWELVE o'clock on TUESDAY, the 25th MARCH, 1902.

For further particulars and conditions of letting, application may be made to the Office of Woods, 1, Whitehall Place, S.W.

AUCTION SALES.

SALE ON FRIDAY NEXT.

WALLINGFORD HAY SALE.

Important Annual Sale of HAY and STRAW.

FRANKLIN, GALE & NEWTON Will SELL by AUCTION, in the Town Hall, Wallingford, on FRIDAY NEXT, MARCH 14th, 1902, at Two o'clock precisely, 78 RICKS of well-secured CLOVER, SAINFOIN, MIXTURE, and MEADOW HAY and BRIGHT WHEAT STRAW, containing together about 1,800 TONS, the whole being well situate for removal and near to Stations on the Great Western Railway.

Credit will be given and time allowed for removal, subject to Conditions of Sale.

The Lots may be viewed at any time prior to the Sale on application to the respective owners.

Catalogues may be obtained of the Auctioneers, Market Place, Wallingford, 11, Cross Street, Reading, and 1, St. Michael's Street, Oxford.

The Tram Depot, Manchester Road, Bankfoot, Bradford.—MESSRS.

WOOLLER JENNINGS & CO. are favoured with instructions from the Directors of the Bradford and Shelf Tramway Co., Ltd., to catalogue and SELL by AUCTION, on WEDNESDAY, MARCH 19th, 1902, at TWELVE o'clock noon, on the premises as above, the Whole of their ROLLING STOCK, comprising—14 first-class loco-tram engines and cars, in good working order; stores, &c. All the engines and cars are fitted with vacuum and other brakes, and systematically indicated by the Vulcan Boiler Insurance Co. for fuel saving, and can be seen working up to the 14th day of March next. The engines have been built by Messrs. Thomas Green & Sons, Limited, Leeds, and the cars by the Starbuck Car and Waggon Company, and H. G. F. Milnes, of Birkenhead. The engines can be used for contractor's work or converted for agricultural and other purposes by substituting pulley wheels instead of flanged ones. Also the following TOOLS, comprising:—Cylinder boring machine with accessories, steam hammer, drilling machine, planing machine, second-hand boiler (30 ft. long), used as water tank, hand travelling crane and accessories, shop boiler, hydraulic pump, hydraulic jack, vertical engine. Detailed particulars will appear in Catalogues, which may be obtained on application at the Depot or from the Auctioneers four days prior to Sale.

Auction and Valuation Offices: Prudential Buildings, Sunbridge Road, Bradford, and George Street, Halifax.

RAILWAY ANNOUNCEMENT.

LONDON AND NORTH WESTERN RAILWAY.

DOG SHOW, to be held at MANCHESTER, MARCH 25th, 26th, and 27th, 1902.

For the convenience of Exhibitors at the above Show, the London and North Western Railway Company will arrange the running of Special Through Vans for the conveyance of Dogs to Manchester, on Monday, March 24th, by the Trains leaving London (Euston) at 8.35 a.m., 12.25 p.m., 2.45 p.m.; Northampton at 10.21 a.m., 2.29 p.m.; Carlisle at 8.30 a.m., 1.40 p.m.; Leeds at 11.30 a.m., 1.45 p.m., 4.0 p.m.; Birmingham (New Street) at 7.20 a.m., 2.0 p.m.; Shrewsbury at 11.25 a.m., 4.40 p.m. These will be in addition to the Vans running regularly on the Through Trains to Manchester.

Consignments from the Branch Lines, and from Nottingham, Peterboro', Oxford, Cambridge, &c., will be placed in these Vans at the various Junctions, thus ensuring direct transit to the Exhibition.

Rates for the conveyance of the Traffic, which in no case exceed those charged by any other route, can be obtained at the various Stations on the Line.

Exhibitors are requested to be careful to write their names and addresses distinctly on the backs of the direction labels issued by the Show Committee.

The Company's representatives will be at the Show to answer inquiries with regard to the arrangements for the return journey. All information can be obtained of Mr. ROBERT TURNBULL, Superintendent of the Line, Euston Station, London; or from the Company's District Superintendent, Mr. H. LINAKER, Exchange Station, Manchester.

FRED. HARRISON,
General Manager.

C. F. DAWES, BURY ST. EDMUNDS, SUFFOLK

SEEDS, PLANTS, &c.

PEDIGREE WHEAT, Barley, and Oats, restarted each year for 41 years from the proved best single grain of the year. —MAJOR F. F. HALLETT, Brighton.

JOHN COOPER, Barley Merchant, Ipswich, has a few hundred quarters of the following Seed Barleys for sale: Wrinch's Premier, Archer's, Hallett's, Webbs' Kinver, Golden Grain, Page's, and Spratt's.

MACDONALD'S (Pt. 16099[10]) PREMIER CABBAGE PLANTER. A man can plant 1,000 an hour. At one operation, dibbling, planting and closing are performed. Scores of unsolicited testimonials. Price, post free, 2/3.—JOHN MACDONALD, Implement Maker, Lenzie, Glasgow.

POTATOES, popular and profitable, to plant 1902; lists free. — T KIME, Mareham-le-Fen, Boston, Lincs.

SEED BARLEY, grown last year from Hallett's renowned Pedigree Stock. Bold, level, heavy sample (weight 456lbs.).—R. BARLOW, Mereside, Ramsey, Huntingdon.

SEED POTATOES, in any Quantities.—"British Queens," and "Up-to-Dates," grown last year, from Lord Rosebery's celebrated Dalmeny Stock. Excellent quality; heavy croppers; and absolutely true.—Apply, R. BARLOW, Mereside, Ramsey, Huntingdon.

FOR SALE, Up-to-Date and British Queen SEED POTATOES, true to name, and grown from selected stocks. Price 40s. per ton.—Apply JOHN WRIGHT, Potato Grower, Sutton St. Edmunds, Wisbech

ASHWORTH'S NEW BREED WHITE SEED OATS. "Gigantic," Very prolific. Produced 71 bushels per acre last season. One of the finest oats ever offered for seed purposes. Price on application.—ASHWORTH'S Ltd., Seed Warehouse, Frodsham Bridge, via Warrington.

POTATOES (seed size).—Few of Carter's Snowball, an immense cropper, early, superior quality, £4 per ton. Also 5 tons "Up-to-Date," from Lincolnshire last season, £2 10s.—T. PIPER, Redbourn, St. Albans.

SEED OATS.—Tartar King, early, white, 42lb. bus., 28s. qr.; Giant Eliza (white), 30s.; Abundance, 28s.; Select Black Tartarian, 40lb., very fine, 28s. qr.—E. W. KING & CO., Seedgrowers, Coggeshall.

CHEVALIER BARLEY, same stock and grown on same farm in Suffolk as won the Championship last Brewers' Show. Also Seed grown from the original Barley that won over £100 in prizes, Brewers' Show, 1899 and 1900. Grown on various soils, from 42s. qr. Samples on application.—E. W. KING & CO., Seed Barley Growers, Coggeshall, Essex.

SEED POTATOES.—FOR SALE, the following sorts, true to name, seed size, in lots of 2 tons or more, F.O.R. Up-to-Dates, 40s.; Gartons, 40s.; Langworthys, 50s.; British Queens, 50s.; British Lions, 60s.; Duke of York's (as grown), 110s. per ton. Cash with order. Bags charged 3d. each.—Apply, HENRY WAY, Wisbech.

SEED POTATOES. — Findlay's new and best varieties—Ambrose Colonist, Lord Roberts, Conquest, Empire, Jennie Deans, &c., all true to sort at low prices. SEED BARLEY.—Garton's Brewers' Favorite, 40s qr.; Standwell, 32s. qr. SEED OATS.—Garton's Goldfinder, 30s.; and Garton's Waverley, 25s. per 24 st.—ALFRED INSKIP, Hardwicke Farm, Shefford, Beds.

POTATOES FOR SEED, grown in Lincolnshire and Cambridgeshire.—Up-to-Dates, British Queens, Gartons, Jubilees, Findlay's Improved Maincrops. —For price and particulars apply to KEEBLE BROS., Limited, Potato Growers, Peterborough.

OX CABBAGE PLANTS and Enfield Market, millions to offer; price and sample free for two stamps.—W. SERPELL, Coppington, Charlecote, Warwick.

FOR SAL — GARTON'S Brewers' Favourite Barley, 40s. per quarter, and Garton's Pioneer Black Oats, 20s. per quarter, both direct from Garton's last year. Also Archer's Barley, 32s. per quarter, and Webb's Black Oats, 26s. per quarter, all grown on chalk land.—H. TALLENT, Westacre, Swaffham, Norfolk.

SEED POTATOES.—Beauty of Hebron, White Elephant, and Early Rose, 90s. per ton. British Queen and Up-to-Date splendid Scotch Seed, 65s. per ton.—BRINKWORTH & SONS, Growers & Shippers, Southampton.

SCOTCH SEED.—All varieties, Maincrop, British Queens, Up-to-Dates, &c.—Write for quotations to JOHN SHORE and SON, 39, Old Hall Street, Liverpool

BLACK TARTARIAN OATS FOR SEED. 475 Grains grown on one Straw. Parson's Unrivalled. Result of 36 Years' Careful Selection. Price 28s. per Imperial Quarter, delivered on rail. New Sacks, 1s. each. Terms Cash.—W. B. PARSONS, Alymer Hall, Lynn, Norfolk.

SEED POTATOES FOR SALE. Up-to-Dates, good sample.—Apply THOS THOMPSON, Tydd, Wisbech.

SEED BARLEY, "Burton Malting," was awarded Webb's Champion Prize of £25 in 1900, and again in 1901, at the Brewers' Exhibition, and grown from the Seed which won the "Mitchell's Ten Guinea Cup at Birmingham." Price 42s. per quarter on rail at Cressage Station.—RICHARD PREECE, Cressage, Salop.

SEEDS, PLANTS, &c

SEED POTATOES.—Heavy Croppers, fine quality. British Queen and Up-to-Date, of excellent quality and shape, and exceptionally heavy croppers, grown specially for seed from select stocks. Also two *new varieties*, Mid-season and Maincrop, offered for the first time, yielding up to the extraordinary rate of 24 tons per imperial acre, under ordinary field culture.—Illustrative descriptive catalogues and prices on application to MANAGER, Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

SEED POTATOES. — Findlay's British Queen, Up-to-Date, Challenge, Empire, and others, grown on the Lynn marshland, Norfolk.—Prices on application to H. G. WELCHMAN, Terrington, King's Lynn.

THOUSAND HEADED KALE, Seed from splendid crop and very clean 20s. per bushel on rail.—J. B. BRAY, Clapham, Berwick Station, Sussex.

SEED POTATOES. "UP-TO-DATES," price 45s. a ton, bags included. Also a few tons of the best cropping early potato "CHALLENGE," price 60s. a ton, bags included, on rail. — THOMAS MAY, Chalk Pit Farm, St. Paul's Cray, Kent.

GARTON'S WAVERLEY OATS Pioneer Black Oats, Abundance (renovated); all from Garton's in 1900, 26s. for 24 stones.—JOHN SEARBY, Croft, Wainfleet.

POTATOES.—British Queen, and Up-to-Date, good samples of seed and ware cheap.—Apply, E. A. WHITE, Limited, Beltring, Paddock Wood, Kent.

UP-TO-DATE POTATOES, 5s., in 10-stone bags. Bruce, 4s. 6d. Cash with order.—F. GARFORTH, Drighlington.

FARM SEEDS of tested growth, and saved from the finest stocks. The following selected Mangels have been saved from picked roots, and are the best of their respective kinds:—Selected Yellow Fleshed, Golden Tankard, Sutton's Prize-winner Yellow Globe, Selected Mammoth Long Red, Selected Yellow Intermediate, all at 50s. per cwt., 6d. per lb. Good Stocks of Golden Tankard, Yellow Intermediate, Yellow Globe, Long Red, 40s. per cwt., 5d. per lb. The best Tankard-shaped Swedes are Sutton's Crimson King, Carter's Elephant, and Hurst's Monarch. These I offer at 32s. per bushel, 9d. per lb. Good Lucerne, 70s. per cwt., 8d. per lb. Sample and quotations for any other Seeds will be gladly sent. Inquiries solicited. Goods to the value of 20s. carriage paid for cash with order.—Z. COLEMAN, Seed Grower, Sandwich, Kent.

MISCELLANEOUS.

OIL ENGINES.—"CUNDALL'S PATENT ENGINES" are the simplest to work.—Sole Makers, R. CUNDALL & SONS, Ltd., Shipley, Yorks, London, and Paris.

SULPHATE OF AMMONIA.—Farmers and cultivators of the soil should give this valuable fertiliser a trial. It is the best artificial manure for grass, wheat, barley, roots, potatoes, &c. One ton of Sulphate of Ammonia contains as much nitrogen and will go as far as 25¼ cwt. of nitrate of soda. It is not washed out of the ground by rain, and is not so readily exhausted from the soil as nitrate of soda. Pamphlets of instructions for its use will be forwarded, post free, on application. Present price (free on rail at Sheffield), 11s. 3d. per cwt.; larger quantities specially quoted for. Cheques and post office orders to be made payable to the Manager, THE SHEFFIELD UNITED GAS LIGHT CO., Sheffield.

BEST & CHEAPEST MANURE for all farm and garden crops, "NATIVE GUANO," a safe and reliable fertiliser, and an effectual remedy for fly, slug, wire-worm, &c.; price £3 10s. per ton in bags, 2 ton lots carriage paid, 1 cwt. paid to any station in England on receipt of P.O. for 5s. Extracts from 26th annual collection of reports: Native Guano for Grass, Grain, and Root Crops. G. Dickson, Selby: "Oats and barley did well Heavy crop of cattle cabbage. Highly satisfied." E. Stanford, Warnham: "Clover good. Stopped fly on turnips. A good manure." H. O. Habberfield, Forestfach: "Oats 60 bushels per acre. Mangolds, best crop I ever had. Very pleased." W. Price, Hardwick: "A cheap and good manure for clover and swedes." J. Knight, Wisbech St. Mary: "Very good crops of mangolds and potatoes. Biggest and finest potatoes I ever had." W. Allsopp, Bloxwich: "Mangolds the finest crop ever seen on the farm. Swedes excellent." G. W. Gilbert, Boultham: "Cannot speak too highly of it for wheat; answers well for grub and wire-worm.' J. Powell, Lulsley: "Hops, a very good crop.' —Orders to the NATIVE GUANO CO., LIMITED, 29, New Bridge Street, London, E.C., where TESTIMONIALS FROM ALL PARTS AND FOR ALL CROPS MAY BE OBTAINED. AGENTS WANTED.

MISCELLANEOUS.

NITRATE OF SODA. — Our cargo per *Sierra Pedrosa* has arrived in the Millwall Docks, London, and buyers wanting prompt delivery on favourable terms should apply to the importers,—THE ANGLO-CONTINENTAL (late Ohlendorff's) GUANO WORKS, 15, Leadenhall St., E.C.

THE BEST HARROW for improving pastures, scattering mole-hills, distributing manure, and eradicating moss, is the "FARMER'S PROGRESS." Sent on trial.—Sole Makers, R. A. Lister & Co., Ld., Dursley.

TITHE RENT CHARGE AND LAND TAX.

Closely allied to relief from excessive income tax (on which we wrote a fortnight ago) is the incidence of tithe rent charges and the land tax.

The provision for remission of heavy tithe rent charge on agricultural land is not so widely known as it should be. The Tithe Act 1891 provides that where a sum is claimed on account of tithe rent charge issuing out of land used solely for agricultural or pastoral purposes, or for the growth of timber or underwood, and the County Court is satisfied that if the sum claimed be paid, the total amount paid for tithe rent charge for the year will exceed two-thirds of the assessment of the land for income tax under Schedule B, the Court shall order the remission of so much as is equal to the excess, and the amount remitted shall not be recoverable, and if the local rates on the tithe rent charge are assessed on the full amount thereof without such remission, the Court may remit a proportionate part of the then current rate.

This is to say, the tithe rent charge must not exceed two-thirds of the income tax assessment under Schedule B. Obviously, therefore, where there is reason to think that this provision may apply, attention should be directed to seeing that the land is correctly assessed under Schedule B.

It sometimes happens, however, that the land was, at the commutation, the subject of a special apportionment, that is, that the tithe rent charge in respect of a larger area was, by desire of the landowner, specially apportioned on a smaller area, so that the smaller area bears a greater proportion of the burden than it otherwise would have borne. In such cases the remission will not be granted unless the Court is satisfied that the applicant would have been entitled to relief if no special appointment had been made.

If the land subject to the rent charge is included under Schedule B. with other land, the Surveyor of Taxes is required, on application, to divide the annual value stated in the assessment between the lands liable to the rent charge and those which are free from it. Notice of such division is to be given to the applicant and to the tithe owner, either of whom, if dissatisfied, may appeal to the Commissioners of Income Tax.

The Act also provides for the direct payment of tithe rent charge by the landowner, where an occupier is liable under a contract made before the Act to pay the rent charge, then he is to repay to the owner the amount so paid by the latter, but contracts for payment by the occupier made after the Act are null and void. Recovery of the rent charge is to be through the County Court, but at least three months' grace must be allowed.

The land tax is not, like the income tax, charged at the same rate per pound all over the country. It is an apportioned tax, and each parish is liable to raise a fixed amount. This amount is raised in each parish by a new assessment (if necessary) every year at an equal rate on the annual value of all lands and tenements not exonerated from land tax under the provisions in force for redemption of the tax. Thus, if in any year there has been

a considerable redemption of tax the whole amount payable has to be borne by the unredeemed lands (subject to the relief about to be mentioned), and, consequently, the rate per pound upon those lands is correspondingly increased. This is why, when agricultural land becomes building land, the land tax is almost invariably redeemed, otherwise it would be payable at so much in the pound on the rateable value of the houses to be built thereon, and might thus spring from an unconsidered trifle to a serious annual burden. The sum required for redemption is thirty times the apportioned amount of the tax.

Formerly the maximum rate of land tax chargeable was 4s. in the pound; but now it is limited to one shilling in the pound, on the annual value, as assessed under Schedule A for income tax. If an assessment at this rate is insufficient to raise the quota for which the parish is liable, the balance is simply written off as irrecoverable.

Unlike the income tax, land tax when once paid cannot be recovered back by persons entitled to exemption. The remedy is not retrospective, and the only course is to look alive and see that relief is claimed from future contributions. Neither can land tax paid by a tenant be deducted from the rent, unless he has a contract to that effect. A contract purporting to deprive a tenant of the right to deduct income tax paid by him under Schedule A. is null and void, but a like contract as regards land tax is perfectly good. If, therefore, he enters into an agreement to pay the rent without any deduction for land tax, he has ground to grumble if he is called upon to pay it.

But if the owner of any property liable to land tax in any financial year before payment of the tax produces to the collector a certificate from the Surveyor of Taxes that he has been allowed total exemption from income tax by reason of his income not exceeding £160, the tax will not be collected; and if he has been allowed an abatement by reason of his income not exceeding £400, an abatement of half the land tax will be allowed.

Having regard to the disastrous year which we have just experienced, and to the parlous state of agriculture generally—a good industry, but too often rotten at the core—we strongly advise farmers to see that they avail themselves fully of the remission of taxes and burdens on land to which the law entitles them, and for fuller information on the topics with which we have been dealing we earnestly commend to their attention leaflets No. 27 (tithe rent charge) and No. 39 (land tax) issued by the Board of Agriculture.

The Lincolnshire Lambing Season.—So far as the lambing season has progressed in the southern part of Lincolnshire, the results are fairly satisfactory. Many flockmasters report that there is not quite such a large percentage of pairs as usual, but the lambs are said to be exceptionally strong and healthy. As a rule, there has not up to the present been any serious mortality among the ewes.

Berwick Hirings.—The annual March hiring market at Berwick was held on the 1st inst., and, being the first on the Borders, the attendance of masters and men from both sides of the Tweed was very large. A large number of engagements were made, generally on the old terms, and, as usual, married men with daughters as women workers easily found situations. On the north side of the Tweed the terms in such cases as these were 16s. to 17s. per week, with free house, coal led, 1,000 to 1,200 yards of potatoes, and the usual harvest allowance. Men who obtained a cow's keep only got 14s. a week, with the other perquisites. Women obtained 10s. a week all the year round, in place of 9s. twelve months ago. On the south side of the Tweed men who could supply female workers received 17s. to 18s. a week, with free house, coal led, and 1,200 yards of potatoes. Single men got 16s. to 17s., and women 10s. a week all the year round. Lads were paid according to age and ability.

By a Man of Mark Lane.

The Bengal Department of Land Records and Agriculture has issued its first note on the wheat crop of Bengal for 1901-1902, in which it is stated that the rainfall was defective in Behar at sowing time, but was normal in the other districts. The total area sown with wheat in the Province is estimated at 1,404,700 acres. Of the 19 large wheat-growing districts in the Province, only four (Rangpur, Pabna, Malda, and the Sonthal Parganas) anticipate a normal outturn; in two the outturn is estimated at from 90 to 99 per cent.; in four it varies between 80 and 89 per cent., and in five more between 60 and 79 per cent., while in Shadabad, Champaran, Muzaffarpur, and Palamau less than 60 per cent. of a normal crop is anticipated. According to the estimates of the local officers, the outturn for the Province will amount to only 75 per cent. of a normal crop, and the outturn for Behar to only 71 per cent.

The receipts on account of revenue from April 1, 1901, when there was a balance of £5,596,918, to March 1, 1902, were £126,725,602, against £116,996,584 in the corresponding period of the preceding financial year, which began with a balance of £3,517,047. The net expenditure was £175,181,877, against £166,161,587 to the same date in the previous year. The Treasury balances on March 1, 1902, amounted to £12,854,318, and at the same date in 1901 to £7,884,495.

In the report of his speech at the Taunton Farmers' Club's dinner, Mr. Hanbury, President of the Board of Agriculture, was made to say:—"He considered that the present milk standard was high, and that it did not give fair play to the ordinary farmer." Mr. Hanbury has since pointed out that he was not referring to the present milk standard, which he himself fixed, but to the standard recommended by the Departmental Committee on Milk, which reported last year. That, he thought, would have been hard on ordinary farmers, and, therefore, he imposed the standard now in force as being equable generally.

The Custom Tariff Committee of the German Reichstag has decided to raise the duty on maize and millet to five marks, as against four marks in the Government Bill. A duty of one mark and fifty pfennige, fixed in the Government draft for other articles of grain not specially mentioned, was agreed to, as was a provision that cereals in sheaves shall pay one-half of the duty fixed.

Of late rapid advance has been made in bulb culture, both in England and Ireland. Along the eastern and southern seaboards of Ireland there are large tracts of fine, sandy ground, abundantly supplied with subsoil moisture and equal in every respect, as fields for bulb culture, to the far-famed nurseries of Haarlem. At Rush, a small village near Dublin, the first Irish bulb farm was commenced on a very modest scale in 1895, and in six years this bulb farm has grown from half an acre to twenty acres.

A telegram was received from Valparaiso on Saturday, stating that, as a result of the nitrate combination, the Government propose to increase the export duty on nitrate by 6d. per quintal. This, it is estimated, will produce 50,000,000 dols. per annum extra revenue.

A useful catalogue of clovers, grasses, turnips, and miscellaneous seeds has reached us from the well-known firm of seedsmen, Messrs. J. Poynter, Son, and Macdonalds, 18, Bank Street, Dumfries, N.B.

By a Lobbyist.

This week's incident of by far the greatest interest to agricultural politics has what I may describe as an extra-Parliamentary character. I refer, of course, to the speech of Mr. Hanbury at Taunton. If intention be behind that speech—and Heaven forfend it should be esteemed that I doubt it!—then it is the most remarkable and significant utterance delivered by any Minister for Agriculture in the last half-dozen years. I am not exaggerating in this one whit. A Member of Parliament once declared that I was the eternal badgerer of Mr. Hanbury. I have badgered because it seemed to me to be a thousand pities that a man with the practical prescience of Mr. Hanbury—a statesman of the eminently common-sense type, with an inherent distaste of uselessness and waste—should not be allowed an opportunity of giving his own ideas an organised and deliberate character. I do not claim—and probably the editor of the MARK LANE EXPRESS would not claim—to have been the stimulating influence in connection with Mr. Hanbury's present resolution. I can only say that this resolution is in harmony with the suggestions persistently made in this journal.

'Tis not personal or journalistic egotism which induces these reflections. It is rather a desire to advance a justification against the frequent criticism that the persistent advocacy in this column has been inconsiderate in its vigour and inappreciative of the difficulties with which Mr. Hanbury has been environed. Three positions have been adopted in this column. In the first place, it has been contended that no interest is more deserving of sympathetic legislative and administrative treatment than the old traditional interest of agriculture. In the next place, it has been urged that the Board of Agriculture should be given a realistic character, with powers of direct iniative—that, in a word, it should be something more than a stereotyped collector of unreliable statistics and muzzler-in-chief to the dogs, something more, indeed, even than the organised enemy of cattle disease. Pointing to the effective character of the Irish body, the demand has been formally preferred that the English body should, in its methods and policy, be assimilated to that organisation. How far these suggestions have been adopted can be best indicated by the clear and straightforward language of Mr. Hanbury: "No department in the State," quothed he, "ought to do more to make itself known to those whom it represents"; "I want to abolish red-tape, and to make the department thoroughly practical and useful"; "my object is and will be to see that the English and Scottish farmers receive the same assistance as is given to the Irish farmer." Mr. Hanbury's declarations are, in fact, almost a paraphrase of the language of the reformers.

Withal, we need something more than Mr. Hanbury's oration—excellent and encouraging as that undeniably is—has provided us. We want, in a word, that Taunton speech defined. What is quite meant by the "abolition of red-tape?" What is quite meant by the promise to assimilate the English Board with the Irish Board? Let me put the matter in a specific fashion: Does Mr. Hanbury intend

to establish a series of experimental farms? Does he intend to regularly present the results of experiments which have been conducted under most useful conditions to the British farmers? Does he intend to even seek markets—for this assuredly is what Mr. Horace Plunkett has done—for the British farmer? Well, in a measure, my last question has, I would fain believe, been partly replied to by Mr. Hanbury himself. The right honourable gentleman has himself frankly confessed that the demand for horses which the necessity of the Britsh army has created should be in itself a source of profit to the British farmer. This confession I take to mean that there will be in the future the closest and the friendliest relations between the War Office and the Board of Agriculture. What methods, however—and I must be forgiven indulging in my favourite Socratic vein—does Mr. Hanbury intend to adopt in order to make the British farmer acquainted with the requirements of the War Office and to secure him a fair price? How will he see to it that the real profit on horse-culture goes into the pockets of the farmer, and not into those of any middle-man? The Minister for Agriculture has presented us a picture which has fascinated our imagination and inspired our hopes. We now desire to examine it a little more closely, and to comprehend its details. In our anxiety we even desire to know the artists' pigments; and, in a matter of this supreme moment, we have a right to this knowledge.

You will, of course, have observed that Mr. Hanbury's speech only indicated a probable internal reform of the Board of Agriculture and an extension of its administrative powers. What, however, is his attitude towards the economics affecting the interest? What are his views towards its legislative necessities? Does he still contend that the last Agricultural Holdings Act Amendment Act—which has proved itself to be more faulty in operation than even I had expected it would be—is the last word which official Conservatism has to say on the question of land tenure reform? Does he stand fast to the opinion that the farmer has no right to expect more from organised Conservatism, and that if he desires further reform he must resort to its antagonist? The right honourable gentleman has, I personally know, been made adequately aware of the fact that the proposals in Mr. George Lambert's Bill has the sympathy of a large body of Unionist and Conservative farmers. Mr. Sears, the Unionist Member for the Tavistock division, had behind him in the support which he extended to that Bill the appreciation of a volume of men who have never failed in their loyalty to the Conservative party. Mr. Hanbury's assertion was a rebuff to these men, and a rebuff which I am afraid was received in instances with ill-temper. The right honourable gentleman need not mind recalling his words, inspired as they may have been by the passion of a passing moment. Of course, he would be accused of inconsistency. But what of that? "Inconsistency," as Emerson once finely said, "is the bugbear of little minds." Mr. Hanbury has shown that he is possessed by a fine resolve. That resolve has only an administrative character. Why should the value of legislation be disdained? I am persuaded Mr. Hanbury will do well to disregard his somewhat historic and ill-fated ejaculation. There is, he will remember, no such thing as finality in politics, not even in agrarian politics.

There is still another "t" to cross and another "i" to dot in connection with this most remarkable and valuable speech of the Minister for Agriculture. It contained two explicit invitations—invitations which mean that the British agriculturists ought to co-operate with the department. The first invitation was that when a farmer has got a real effective case of over-charge in connection with railway rates he should not hesitate to appeal to the Board. The second invitation was that the farmer should assist the Board in carrying out the Adulteration Acts. Not to accept those invitations would be an act of recreancy. I myself have no doubt whatever of the sincere intention of Mr. Hanbury—his Taunton speech was fragrant with the breath of sincerity. However, the attitude of the Board towards the appeals which the Minister suggests should be made to it will in itself be a very touch-stone of the earnestness and honesty of the official announcement. Mr. Hanbury has asked agriculture to test his purpose; and it would be more than a venial offence to disregard the opportunity.

An excellent sign of the new spirit which seems to have been called into existence by Mr. Hanbury's speech is the interest which is now being shown by the agricultural M.P.'s in the question of rural education. The point is as to how the forthcoming Education Bill will deal with the rural districts. The general view is that it would be unwise to make the rural provisions an inelastic and stereotyped section of one rigid national system. In other words, the Bill must be made to provide for giving rural districts such an education as the rural necessities may require. Should, then, this system be entrusted to an existing body already sufficiently hampered with the work of county government? I am bound to say that there is a growing feeling that if this be done educational interests would of necessity suffer. They would, in fact, be given a first instead of a second place in the esteem of the controlling body. It would be well to heed the development of this view. That it should have been inspired is, I repeat, a healthy sign.

The Suggested Tax on Imported Corn and Flour.

As will be seen from the reports given below, the feeling in favour of a duty on imported cereals and flour is growing very strongly, and the matter is being discussed by agricultural societies in various parts of the country. Numerous Yorkshire chambers of agricultural societies have passed resolutions in favour of the duty, with the result that a special meeting of the Yorkshire Union of Agricultural Clubs and Chambers of Agriculture was held at the Agricultural Club House, Pavement, York, on Saturday, to consider the desirability of requesting the Chancellor of the Exchequer to receive a deputation from the above Union urging the advisability of imposing a duty or registration fee upon foreign flour and cereals, or a duty or registration fee upon similar lines, to partly meet the expense of the war.

The President of the Union (Mr. J. Allan, of Pocklington) occupied the chair, and there was a large attendance.

The Right Hon. James Lowther, M.P., had been invited to address the meeting, but he was unable to attend, and, in expressing his regrets to the secretary, wrote:—"I am very busy just now with, amongst other things, the general fiscal question, and I hardly see my way to embarking in any controversy with the members of the Yorkshire Union, which has, so far as I know, been under Cobdenite influences hitherto, and has never to my knowledge afforded any encouragement to home producers as against their foreign competitors. I shall read the report of the proceedings with interest in the hope that the Union will strike out a new line at this critical period. From a circular I have seen I gather that the demand for a recurrence to sound principles of raising revenue may be urged as a means of providing for carrying on the war in South Africa, which would lay the movement open to the retort that it would not be wise to upset the whole fiscal system for a short time of emergency. It is, however, the normal increase of national expenditure, apart from the ephemeral pressure of the present war, that has opened the eyes of the taxpayers. Hence the change should be advocated in my opinion as desirable in the permanent interests of the nation. While it is no doubt right to urge duties upon foodstuffs, it is also necessary to provide revenue by the taxation of foreign goods generally which come into competition with home industries. A preferential rate in favour of British Colonies should form part of the scheme."

The Chairman suggested that if a resolution were passed it should apply not only to foodstuffs but to imports generally. Moreover, the duty should not be imposed as a war tax. "We have been struggling under a cloud," said he; "it does not lift, but gets darker and darker every year, and it is high time that agriculturists took some step to get a remedy for the depression." (Hear, hear.)

Mr. Henry Liversidge, jun., on behalf of the Selby Club (at whose request the meeting was held), proposed the following resolution:—"That in the opinion of this meeting it is necessary for the prosperity of home producers that discriminating revenue duties should be placed on foreign imports. That this resolution be sent to the Chancellor of the Exchequer, and that he be asked to receive a deputation on the matter."—This was eventually carried nem con. The majority of the members present supported the resolution, but several refrained from voting.

In the course of a letter to the secretary of the Lincolnshire Chamber of Agriculture, regretting his inability to be present at the meeting of the Chamber on February 28, Mr. Henry Chaplin, M.P., said that he had, as is well known, been an advocate for many years of the re-imposition of the old shilling duty upon grain, which was still in existence when I first entered Parliament, and I have always regarded its repeal, causing as it did, great loss of revenue without appreciable benefit to anyone, as an act of great financial folly. The burden of such a duty at the present time would be absolutely infinitesimal. The price of bread to the workers and the poorer classes would not be increased by the fraction of a farthing. In my belief no other tax productive of so large a revenue can be suggested which would so little injure or affect the general public. I know of no argument against it, except on the ground of sentiment alone, and although I must admit that its effect on agriculture would be practicaly nil, yet for the purposes of revenue it would produce to-day, according to the latest statement of the Chancellor of the Exchequer, no less a sum than £2,700,000 a year. That being so, it is encouraging to remember that such high authorities as the "Times," and Sir R. Giffen are supporting this proposal, Sir R. Giffen going even somewhat further, and we may congratulate ourselves, I think, upon the fact that the dawn of commonsense is at least apparently beginning to dispel the mists of ignorance and prejudice which have enveloped for so many years every proposal of this nature for extending the basis of taxation." At the meeting the following resolution was carried unanimously, and it was ordered that copies of it should be sent to the Chancellor of the Exchequer, the Central Chamber of Agriculture, and the local borough and county members of Parliament:—"That, in view of the increased taxation caused by the war, and of the deplorable state of agriculture, an appeal be made to the Government to put a duty on imported corn and flour."

At a meeting of the West Riding Chamber of Agriculture, held at Wakefield, on February 28th, a resolution was unanimously passed in favour of the imposition of a duty of 2s. 6d. per quarter on foreign wheat, and 2s. 6d. per sack on foreign flour, until the average price of wheat is 40s. per quarter.

A special meeting of the Wetherby and District Chamber of Agriculture was held on the 27th to discuss the subject, and at the conclusion of some strong speeches in favour of the duty, the following resolution was carried, with but one dissentient:—"That, in the opinion of this meeting of agriculturists of Wetherby and district, it

OUR LIST OF SHOWS.

The Mark Lane Express

POCKET BOOK

AND

LIST OF AGRICULTURAL SHOWS.

Our list of Agricultural Shows is this year issued in the form of a pocket book, of a convenient size, which, in addition to containing the Show Fixtures for 1902, includes a considerable amount of useful information, consisting of Railway Rates for Stock, tables, etc. The Pocket Book consists of 72 pages and cover, and is of a size eminently suitable for the purpose for which it is intended. A vacant page for memoranda faces each page of the Show Fixtures, and this arrangement will be found of great use, enabling readers to easily and quickly make a note of any prospective engagements.

Copies of the "Mark Lane Express Pocket Book and List of Agricultural Shows" may be obtained free upon application to 1, Essex Street, Strand, London, W.C., the only stipulation being that ½d. stamp for each copy required is forwarded to cover the cost of postage.

is the bounden duty of the Government to re-impose a duty on cereals and flour imported into this country."

Speaking at Retford, on the 1st inst., at the annual meeting of the Bassetlaw Conservative Association, Sir Frederick Milner, alluding to the forthcoming Budget, said that personally he hoped the Chancellor of the Exchequer might put a small duty on corn. There was no doubt a 1s. duty on corn would bring in three millions of money, and would not add the 15th part of a farthing to the price of bread. He did not know how the Chancellor of the Exchequer looked upon this question, but he hoped there would be no fresh burden put upon the shoulders of the payers of income tax.

At the last meeting of the members of the Cumberland and Westmoreland Chamber of Agriculture, the subject of rural depopulation was discussed, and several speakers were in favour of a duty on corn and grain, the proceeds of such duty to be applied to the relief of agricultural rates. At the conclusion of a long discussion it was decided to further consider the matter, at a meeting to be held on the 29th inst.

The following resolution was unanimously passed, at a largely attended meeting of the Bridlington Agricultural Club:—"That this meeting would respectfully point out to His Majesty's Government that, in view of the necessity for increased taxation at the present time, a duty might be fairly and equitably placed upon all cereals and flour imported into the United Kingdom from foreign countries other than British Colonies; that in their opinion such duty should be an annual one of such amount as may be necessary for the time being, but that it should not be less than 2s. per quarter (480lb.) on cereals, and 2s. 6d. per sack (20 stones) on flour."

In the course of a discussion on the subject of our food supply during war at a meeting of the Warwickshire Chamber of Agriculture, the following resolution was moved and carried by five votes to four:—"That a shilling a quarter duty should be placed on all corn entering the British market, that a tax should be placed on all imported flour, that a federation of the British Empire for the supply of raw products should be entered into, giving our colonies preferential terms, and that part of the tax from imported corn should be used as a bonus per acre for the encouragement of wheat grown in the British Isles."

Mr. Chaplin, M.P., on our Food Supply in the Time of War.

In the course of a letter to the secretary of the Lincolnshire Chamber of Agriculture, regretting his inability to attend a meeting of that Chamber, Mr. Henry Chaplin, M.P., referred to the question of "Our Food Supply in the Time of War," and said:—"I have good reason for believing that this question is growing steadily in public interest from day to day. We depend at present for three-fourths of our bread supply upon corn and flour imported from abroad, and our position in time of war would be little different from that of an army in the field liable to be cut off at any time from its commissariat. This is a situation which in many minds is naturally causing great uneasiness, and nowhere more so than among the poorer classes, who would be the first and chiefest sufferers from an excessive or even from a serious rise in the price of bread. What we want, in my opinion, is an inquiry into all the branches of this question, which undoubtedly is one of real and grave importance.

"Whether we should look for our supplies in case of war to a large wheat reserve at home, or a larger wheat production than we have at present, or to both, or whether, for the safety of these supplies, we should continue to rely entirely on the fleet, and, if so, to what extent the fleet should be strengthened for the purpose, are all of them questions which should be the subject, I consider, of a careful but a prompt inquiry by a Parliamentary Committee or Royal Commission. I am assured by many admirals, with whom I have discussed this question, that for such a purpose, in addition to its other duties in time of war, our fleet would be inadequate. If that is so, and after the warnings we have had of the state of feeling which exists on the part of many foreign countries towards us, I am more than ever of opinion that this inquiry should be made, and made without delay. It is true that a similar demand made early in the session during the debates on the Address was emphatically refused by the President of the Board of Trade, but unless I am much mistaken we have not heard by any means the last word upon this question. I shall await with lively interest the views of your Chamber on the subject, and I am, yours very truly,"

By Hordeum.

Depressed Brewing.

One of the organs devoted to the special interests of a particular class of brewers has just published a short article upon the falling off in the amount of beer brewed. It shows that in the last quarter of 1900 the heaviest decline took place, but that the drop has been more or less persistent throughout the whole time the additional duty due to the war has been collected. The fall amounted to no less than 475,000 barrels, following upon the slightly larger amount of 495,000 in the corresponding period of the year before. This loss has not been equally distributed over the United Kingdom and Ireland, as the Emerald Isle shows a very marked increase, instead of a falling off, amounting to nearly 4½ per cent.

As the loss (?) is not to be explained by a gain in the consumption of spirits, it is lugubriously suggested that it is a proof of the

Lessened Spending Power

of the people, consequent on the diminished general prosperity of the country.

For many years the figures have been given of the number of barrels of beer brewed each year. These are officially set forth in a number of reports and returns, and owing to their official position they are looked upon as being correct. All brewers, however, know to the contrary, or they ought to, and there is now no longer any excuse for anyone to be deceived by them, or through them to try to practise deception.

One of the aspects of this very important question was dealt with by me last week, but as it will be of much advantage if a number of its bearings are known more generally, it will bear further reference, especially at the time when we cannot tell what the views and purposes of the Chancellor of the Exchequer may be.

Increase of Beer Duty

without alteration of the mode of assessing it would be a grave disadvantage to everyone, and would not benefit the revenue to the same degree as it would hurt producers and damage consumers.

Reassessing the duty and altering the basis of charge would be a certain gain to the revenue, and a distinct advantage to beer drinkers and barley growers, as was very clearly set forth in this column last week.

The explanation of the apparent loss of trade is a very simple one. The returns do not give the actual barrels brewed, but only the number assumed to be brewed from the amount of materials used by brewers. All common brewers have to make entry of all malt and its substitutes used by them, and when the total is ascertained it is a very simple calculation to turn the bushels of malt and corn, or the hundredweights of rice, sugar, and glucose into the number of barrels of beer they ought to make. For the purposes of these returns the assumption has been allowed to pass for the fact.

But at the Central Chambers of Agriculture it has been persistently pointed out that, in the interests of farmers and of beer-drinkers or consumers, it would be very useful to have the facts given instead of fancies, especially as the figures have always been available at Somerset House. In time this request has been graciously acceded to, and although it works out very unpleasantly for the brewers, it is calculated to do other people a lot of good.

In the reports of the Commissioners of Inland Revenue we now get the dual form of assumed barrels and the

Actual Bulk Barrels,

or, as it is dryly termed "liquid" barrels. Taking the latest return at present issued, up to March 31st last, whilst it was assumed that the barrels of beer retained for home consumption was 35,993,000, or at the rate of .872 barrel per head of the whole population, in reality the number of bulk or liquid barrels was no less than 39,557,000, or a difference of over 3,564,000.

Put into plain English, this means that this vast quantity of beer represents exactly so much water to all purchasers and yields nothing to the State.

That the Commissioners have at last awakened to the full perception of the facts can at present be only conjectured and hoped. It is significant that in their last return they refer to it quite clearly in two places. In one place they say that, while the apparent quantity of beer consumed has remained practically stationary, the character has been lighter. A tendency to lower gravities has been observable for many years. An increase in the beer duty is always followed by lower gravities. Last year there was only a very small increase in the actual quantity brewed throughout the whole country, but whilst in England the decrease was 2.5 per cent., in Scotland there was an increase, and in Ireland it amounted to nearly 4 per cent.

The Decreased Consumption

is accounted for much more truthfully by the arsenic scare instead of lessened spending power.

Every intelligent beer-drinker throughout the country knows perfectly well that from every gallon of beer consumed a certain amount of toll is levied by the State. It is collected by the brewer as the farmer of the tax, and he (the brewer) gets handsomely paid for his trouble in the matter; but whilst the officers of the Crown are most exemplary in the zeal with which they prevent the dilution of beer by publicans and other vendors, it is strange to note that they do not interfere with the brewer diluting to any extent he pleases.

Brewers have an absolutely free hand to make as much beer as they please from a given quantity of material, and naturally, if they pay no more duty on 20 barrels than they would on 15, there is a very strong inducement to them to dilute to that extent. But it does not stop there, and is not likely to, unless the charge is made upon a barrel of beer of 36 gallons, regardless of its gravity or strength. When this is done, dilution will be checked.

Arsenic in Beer: Lecture at Lewes.

At a meeting of the East Sussex Farmers' Club, at Lewes, on Tuesday, Mr. H. Stopes, hon. secretary of the British Barley Society, gave an address on the subject of "Arsenic in Beer." He began by explaining the importance of barley growing, and the cultivation, in prosperity, of arable land. It seemed to be forgotten that when farmers were prosperous they were not only producing a larger amount of good food, but they were doing something of more value to the country; from the arable farms of the country we got our best supply of soldiers and sailors. He had hoped that when he addressed them he would have been able to refer to the Pure Beer Bill. That Bill had been drafted the previous night, and he was acquainted with its contents; but that knowledge was at present confidential, and therefore he could not discuss it as freely as he would have liked.

Passing on to the immediate subject of his lecture, Mr. Stopes asked his hearers to look at the question from a broad basis. This was that it was most in the interests of those who drank beer that they should have no harmful ingredients in their drink. The great majority of the beer drinkers in this country preferred to have genuine beer. The brewers stated that there was a very large demand on the part of the public for beer which was brewed from sugar. He did not believe that. The threat which brewers had made that if pressure were brought to bear upon them they would have to use foreign barley instead of British barley was a disgrace to the brewers. They knew that for many years brewers had used as much foreign barley as they could get. English barley could not be beaten, and in many cases could not be equalled. He was not an agitator, and he wanted to increase the good relations between brewers, barley growers, and beer drinkers. If the brewers treated the farmer and the public fairly, he would have nothing to say.

Mr. Stopes then proceeded to remind the company of the origin of arsenic in beer agitation. In their fright the brewers had left it permanently on record that there was more harm in using malt than in using sugar; that hops contained arsenic, barley contained arsenic, that there was arsenic in certain artificial manure, that the using of sulphur with hops constituted a danger, etc. Mr. Stopes attacked these assertions. If foreign materials were used in the brewing of beer there ought to be an absolute declaration to that effect. He spoke of his experiences before the Royal Commission, and read the report of witnesses (Mr. Clare Sewell Read and himself), appointed by the Central Chamber of Agriculture. He stoutly resisted the suggestion that hop growers and maltsters should give guarantees. It was very important that beer should be brought under the operations of the Food and Drugs Act.

He strongly criticised the Report of the Royal Commission, urged that drinkers actually paid the duty on beer, and argued that the supposed ne-

cessity for the use of sugar in brewing was a fallacy. He pointed out that there were other things sometimes in beer beside arsenic, including bi-sulphite of lime. All brewers should employ better material, and then there would be no need for preservatives. In conclusion, he insisted the farmers wanted protection against unfair practices.

A hearty vote of thanks having been accorded the lecturer, the following resolution was carried:—"That the members of the East Sussex Farmers' Club regret that the preliminary, or first Report of the Royal Commission appointed to inquire into the subject of arsenical poisoning of food has been issued without publication of minutes of evidence submitted, and that much of the evidence which the witnesses nominated by the Central Chamber of Agriculture were prepared to give was not submitted. The existing powers of the Commissioners of Inland Revenue could, with advantage, be supplemented by an official and fuller definition of beer, bringing it under the Foods and Drugs Act. We would respectfully urge the completion of the inquiry, and the publication of the official recommendations and minutes of evidence at the earliest practicable date."

Home Notes.

The Borough.

The recent active demand for hops has somewhat relaxed this week, but although sales have been fewer the market shows no sign of weakness with respect to values. The selection being limited and the quantities on offer being materially reduced, buyers are compelled to content themselves with samples that have been frequently rejected in the earlier part of the season, and, realising their position, they are much more inclined to yield to the advanced prices now being asked by holders. The present aspect of affairs is therefore strongly marked by firmness, and the outlook is distinctly favourable to those who have hops in hand for sale. Especially is this the prospect with regard to such lots as can lay any claim to quality and colour. Of these so few remain that it is certain they must become much more priceworthy before long, and even the inferior and discoloured growths are being taken over with sufficient rapidity to dispel any doubt as to the ultimate disposal; consequently we may reasonably anticipate that better figures will be generally established as the available supply becomes more restricted.

Imports and Exports.

The imports from the United States during February were 14,425cwt., and from other countries 4,951cwt., the total of 19,376cwt. being almost 7,000cwt. in excess of the corresponding month of 1901. We exported last month 2,133cwt. of English and 875cwt. of foreign hops, our trade in this direction exceeding that of February, 1901, by 1,165cwt. The balances for the month are therefore 16,368cwt. this year, and 11,231cwt. in 1901. The increase may be explained by the delivery to consumers of lots previously brought, as the advanced prices current on the other side of the Atlantic are checking any present trade on the London market, and I quite expect to find our imports considerably lessened in the course of the next few weeks.

Cold Storage.

By the courtesy of the editor of "Cold Storage" I was present on Wednesday evening last at a meeting of the Cold Storage and Ice Association, held at the Institution of Mechanical Engineers, Storey's Gate, St. James's Park. The annual report read by the secretary showed that the Association now numbered nearly 100 members, and that the application of the system was rapidly extending, the capacity of the cold stores in the United Kingdom having materially increased during the past year. The Hon. Alan de Tatton Egerton, M.P., read a paper, describing a small installation which he had erected and experimented with at Knutsford. Although this had been devoted solely to the preservation of meat, poultry, game, butter, cheese, and other similar country produce, its applicability to hops was evident, and the particulars given by the president set me thinking about the feasibility of establishing similar stores in central positions in our hop-growing counties, in which farmers might keep their hops in perfect security at less cost than in the Borough warehouses, and thus in some degree protect themselves against the dangerous monopoly now in the hands of merchants and brewers. According to the figures presented to the meeting, a cold storage plant, with capacity for the preservation of about 600 pockets of hops, can be erected for about £2,500. The annual interest at 5 per cent. on this outlay and the working expenses, would apparently not exceed £250. The same plant would be useful for many other purposes, including a regular supply of ice, usually difficult to obtain in rural districts. On the whole, I think such a matter is worthy o fconsideratio, as I believe it could be worked on a profitable basis, and would furnish growers with a means of defence which would be extremely useful to them in these critical times.

A long conversation the same evening with an expert in the science of preservation of materials in atmosphere of various degrees of cold below freezing-point convinced me of the permanent utility of the system, and confirmed my previously expressed views that therein is included a most serious factor in determining the future of our industry, concerning which it behoves our growers to be wide awake.

Foreign Notes.

Nuremberg.

The course of the hop trade shows but little variation. Values are generally well and easily upheld, although the volume of business has rather diminished, and arrivals from the country districts and from Russia have created a total somewhat in excess of sales. Choice samples are distinctly dearer, but the large quantities of inferior hops which overburden the market are not readily disposed of, and in cases where holders are anxious to reduce their stocks, slightly reduced prices have been accepted.

The "Mittheilungen des Deutschen Hofenbau-Vereins" gives the current

Market Quotations,

from which I extract the following first quality figures:—Market hops, 70s. to 75s.; Ordinary Hallertans, 90s. to 100s.; Sealed Hallertans, 100s. to 108s.; Spalts, 80s. to 100s.; Wurtembergs, 80s. to 90s.; Badens, 90s. to 95s.; Alsace, 70s. to 75s.; Saag, 100s. to 105s.; Russians, 70s. to 85s.

During the season, from September 1st, 1901, to January 31st last, the

Transit of Hops by Railway,

to and from Nuremberg, was as follows:—Arrivals, 175,924 cwts.; departures, 165,110 cwts. The largest quantity, exclusive of the Bavarian growth, was supplied by Bohemia; next in importance are Wurtemberg, Austro-Hungary, Alsace, Baden, and North Germany. The supplies from Russia, Belgium, and France are comparatively small.

Belgium.

The markets, both actual and speculative, remain steady and firm at recent figures. Brewers are buying more freely, and holders of hops, whether dealers or growers, are solid in their offers, refusing to entertain lower bids, and confident in early realisation of better prices. The Belgian trade movements, officially reported, for January last, give the following results:—Imports, about 3,000 cwts; exports, about 2,200 cwts. The imports are chiefly from Germany, England having sent only a few, and the United States none. Exports have principally gone to France, with about 360 cwts. to England.

America.

Stocks in New York are being gradually lowered, although the volume of business, either local or for export, is not very large. Growers are holding their hops back for better offers, and dealers are therefore making no effort to sell, except at higher prices. The finest growths of States or Pacifics cannt be bughto under 17 cents, and there is a distinct tendency towards higher rates for all qualities. It is now anticipated that the day is not far distant when 20 cents will be obtainable for choice samples.

The "Pugallup Independent" says:—"The season of 1901 is practically over, and less than 1,500 bales of hops now remain in growers' hands. The shortage in America has caused the market to steadily advance. Prices must be higher before spring, the 'short sellers' must be heavy losers."

Reported Cure for Foot-and-Mouth Disease.—At Friday's sitting of the Budget Committee of the Lower House of the Prussian Diet, Privy Councillor Kirchner, who is a high official of the Ministry of Education, announced that success had been attained in the endeavour to discover a sure means of rendering cattle immune from foot-and-mouth disease. He added that it was justifiable to assume that a preparation would shortly be available which would enable individual owners to immunise the whole of their stock for a comparatively small sum. Professor Löffler, of Greifswald, who has been conducting the experiments, had also tested the remedy discovered by the Italian, Professor Baccelli, and had found it dangerous and not efficacious.

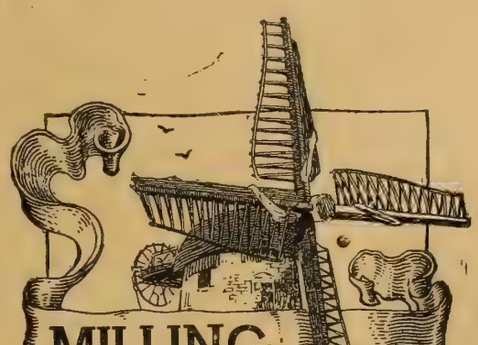
WATERPROOF SHEETS

FOR

THRESHING MACHINES, PORTABLE ENGINES, MILLER'S, CARRIERS, LUGGAGE CART COVERS,

AND ALL PURPOSES.

Illustrated Price List and Samples Post Free.



Waterproof Oil Sheets at 1/6 and 1/8 per square yard.

Chemically-Dressed "Peck" Cloth at 1/11 per square yard, complete with tie cords, lettering, &c. Thoroughly seasoned, ready for immediate use.

J. H. PECK & CO., LTD., WIGAN.

Established 1808. *Telegrams*—"Peck, Wigan."

Fine v. Coarse Dressing of Flour.

There is little fresh to report as regards the business side of the trade. Flour is still very dull and bakers, as a rule, refrain from buying, except in small lots. There is still a good demand for offals, especially in the large manufacturing centres. Broad bran goes off very well, at high figures. As is natural, however, at this time of the year, and perhaps also owing to March coming in like a lamb, in some districts offals show a downward tendency. English wheat has been in very fair supply, although there cannot be a very great deal to come forward now. The writer has seen some very fine samples during the past week, which, when milled, made a fairly strong flour, that is to say, as far as home-grown wheats go. These wheats ground well, and when dressed through No. 12 silk made a very nice granular flour, bloomy and of fine flavour. After all there is nothing like English wheat to produce the latter quality, although in the present system of milling everything is against the retention of the sweet, nutty flavour peculiar to it. In the old days, when the mill-stones were speeded very high, so high indeed that it was necessary to place the flour in a room specially provided for the purpose, in order that it might cool before selling it, the dressing was very coarse, and many particles of the bran coverings and germ were mixed with the flour. The writer has often wondered whether

this very cooling process was not the real cause

of much of the flavour being retained in flour milled from English wheat. For some years now the struggle has been in favour of strength and whiteness, to the neglect of flavour; but whether the public or the miller is to blame most it would be difficult to say. Probably both can "share the honours," if there are any honours to share. The gradual reduction system naturally brought in its train finer dressing, and the whiter, purer flour possibly took the public eye. These flours made more money, and this encouraged the miller to still persist in his efforts to cultivate the sense of sight, instead of that of taste. So that the manufacturer and the consumer played into the hands of each other, with the result that now we are dressing four through Nos. 16 and 17 silk—equal

to about 156 and 164 threads to the lineal inch—instead of Nos. 8 and 9—equal to about 84 and 94 threads to the lineal inch—in the old millstone days. As to fine dressing, we have surely reached the limit when one considers that in sifting flour through No. 16 silk each grain cannot exceed 1-24,336th part of a square inch in size. But so it is, because the number of meshes will be represented by the product of 156 multiplied by 156. Indeed each grain of flour would have to pass through a very much smaller aperture, because the silk surface itself

takes up about 50 per cent. of the whole sifting surface.

Even many country millers, who dress through No. 10 silk as their highest number, do not realise that each grain of flour must pass through a mesh as small as 1-11,236th part of a square inch in size; or, as has been said, very much less, owing to the space occupied by the silk threads themselves. The finer the dressing, the whiter the flour; but such fine dressing as is practised in some of the larger establishments in this country can only be effected by special conditions—conditions which are not possible in small mills. Sharp, large-grained flours are not nearly so white in colour as small-grained soft flours. The impurities are shown to a much greater extent, but really the difference is only in appearance. The specks and impurities are of such a size as to be easily seen in the larger grained flours, and for this reason a soft-grained flour may contain a larger proportion of impurities and yet show cleaner than the larger grained flour with which it is compared. But this is not the real reason for the difference in colour. Writing on this question some years ago, a well known expert observed:—"The granules of a large-grained flour cast shadows one upon the other in such a way as to make the whole appear darker than where

the granules are smaller and the shadows less,

To explain this, a gravel bed looks lighter than a pile of boulders of the same geological formation. Or, again, the flour from middlings looks whiter than the middlings themselves, notwithstanding the fact that it may not have been bolted. . . . . It is a mere difference of size and not of composition. The largest particles cast the heaviest shadows, and consequently show the darkest." These sentences put the whole matter in a nutshell, and this is why there is a craze for fine dressing in the larger establishments. But the stock must be bone dry, and, in fact, in some cases, hot air is passed into the dressers, which not only has a tendency to keep the meshes open by preventing condensation, but hardens the flour particles and enables them to easily pass through the silk. But small millers need not despair, as, in the opinion of the writer, this fine dressing is a fad, and has been carried to too great an extreme. It would never be possible to dress English wheat through these fine numbers, because its very nature prevents it breaking up into such small grains as some foreign wheats, such as American Springs and Russian. What country millers should do is to cultivate flavour, especially as there is a sign that the public are beginning to tire of the search after colour, to the neglect of taste.

Some Corrections,

The writer regrets that one or two rather serious mistakes occurred in the issue of the MARK LANE EXPRESS, of February 24th. Instead of "by lay experience," it should read "by long experience," and, in discussing the angle of grooving of corrugated rolls, the phrase should read, "15 degrees to the plane of the axis of the roll," and not "15 per cent. of c." And in the eighteenth line from the bottom, the word "dirty" occurs for "dusty." If the wheat is properly cleaned there is no "dirty" stock in the mill, not even in the offals. In fact, the miller should try to make pure offals as well as pure flour. The word "dirty" in the flour mill proper, it must be understood, is altogether a misnomer. "Dusty" stock is really floury stock, such as is separated from the break reductions. The writer, however, takes all the blame upon himself, as his caligraphy is anything but the best, and the terms he uses are purely technical. MILLER-FARMER.

The Mid-Suffolk Light Railway.—The Duke of Cambridge has accepted the invitation of the chairman, Mr. F. S. Stevenson, M.P., and directors of the Mid-Suffolk Light Railway, to cut the first sod of the new line, and will be the guest of Captain Pretyman, M.P., at Orwell Park, for the occasion. The ceremony will take place at Westerfield Junction, Ipswich, on May 3rd. The railway will be forty-two miles long, and will open up a highly interesting and important agricultural district, as well as supply the shortest route between West Suffolk, Cambridge, and the Midland district, and the East Suffolk seaside resorts.

SOCIETIES.

Royal Agricultural Society of England.

A monthly council of the Royal Agricultural Society of England was held on Wednesday, H.R.H. Prince Christian, K.G. (president), in the chair. The minutes of the last ordinary meeting of the council, held on February 5th, 1902, having been taken as read and approved, the election of the following three governors and thirty-two members was proceeded with:—

Governors.

Goldsmid, O. E. d'Avigdor, Somerhill, near Tonbridge.
Midwood, G. Norris, Brown Street, Salford, Lancs.
Montefiore, The Rev. D. B., Mursley Hall, Winslow, Bucks.

Members.

Ahlborn, Otto C., Hildesheim, Germany.
Brisco, Hylton Ralph, Crofton Hall, Wigton, Cumberland.
Chambers, John Edward, Park Attwood, Bewdley, Worcestershire.
Champion, B., Baron's Place, Mereworth, Maidstone.
Chrystal, William, The Villa, Houghton-le-Spring, co. Durham.
Cowing, Jacob Bushby, Estate Office, Osberton, Worksop.
Edwards, Frederic Chaplin, Faircroft, Harlow, Essex.
Eveleigh, Charles John Davy, Wilminster Park, Remenham, Henley-on-Thames.
Freeland, George Scott, 63, Quarry Hill, Tonbridge, Kent.
*Harris, G. S., Craven Cottage, Eastbourne.
Hopper, James, Kelleythorpe, Driffield, E. Yorks.
Jones, Evan Bowen, Ynysfor, Penrhyndendraeth, Merionethshire.
Langley, Hamilton W., 8, Craven Hill Gardens, W.
Large, James Day, Cherry Gardens, Goudhurst, Kent.
Lethbridge, William, Wood, South Tawton, Okehampton, Devon.
*Lycett, H. Clairville, Birkdale, Southport.
Micholls, Edward E., 39, Prince's Gate, S.W.
Owen, Edward Tudor, Ash Hall, Cowbridge, Glam.
Payn, Thomas, Villa Franca, St. Saviour, Jersey.
Reed, Leicester M., 61, Harrington Gardens, South Kensington, S.W.
Royds, John Fletcher Twenlow, The Hill, Sandbach, Cheshire.
Sanders, John, 33, Woodville Road, Ealing.
Smith, William P., Church View, Navan, co. Meath.
Tennant, Robert Craig, F.R.C.V.S., 57, Thames Street, Windsor.
Thompson, Frederic, Marton Farm, Marton R.S.O., Yorks.
Turner, James, Copt Knowle, Burpham, Arundel.
Wailes-Fairbairn, William Fairbairn, Askham Grange, York.
Wilkinson, Bathurst George, Weston Lea, Albury, Guildford.
*Wilmot, Sir Robert R., Bart., Binfield Grove, Bracknell, Berks.
Wingfield, Captain Mervyn E. G., Rhys, Barrington Park, Burford.
Wood, David Herbert, Bransbury, Micheldever, Hants.
Wykeham, Aubury A. H., Pitt Place, Brightstone, I.W.

* Re-elected under Bye-law 12.

The reports of the various Standing Committees were then presented and adopted as below.

Finance.

Sir Nigel Kingscote (chairman) reported that the accounts for the month of February, 1902, as certified by the Society's accountants, showed total receipts amounting to £1,103 13s. 7d., and expenditure to £1,396 15s. 6d. Accounts amounting in all to £2,607 16s. 10d. had been passed, and were recommended for payment.

The committee reported that they had continued to take active measures to remove from the registers the names of those members of the Society who from various causes had ceased to pay subscriptions. The committee had thus been able to reduce considerably the amount of nominal "arrears of subscriptions," though this course would necessarily diminish the total number of members on the books. The members on the registers who now owed subscriptions (other than those for the current year, which would not, under Bye-law 3, become technically "in arrear" until after June 1st next) now numbered only ninety-two (twenty-seven of whom owed for 1900 and 1901, and sixty-five for 1901).

Chemical and Woburn.

Mr. Bowen-Jones (chairman) reported that the bullock and sheep feeding experiments for the winter of 1901-02 were now nearly complete. He and Dr. Voelcker had attended at the Privy Council office on February 6th last to give evidence on behalf of the Society, before the Poisons Committee of the Privy Council with regard to the sale of agricultural and horticultural preparations containing poisonous substances; but, owing to the death of the Pharmaceutical Society's representative on the committee, the taking of their evidence had been postponed until March 12th.

Botanical and Zoological.

Mr. Reynard presented the following report by the consulting botanist (Mr. W. Carruthers, F.R.S.):—

Report of Consulting Botanist.

During the past month the Consulting Botanist has had twenty-seven inquiries from members of the Society, which have been dealt with.

Eleven samples of seeds have been examined and tested for germination. Two samples of hay seed proposed to be used for seeding were found to be composed mainly of ryegrass with some worthless grasses. The following were the ingredients:—

I.

	Per cent.
Rye grass	79
Crested dogstail	9
Soft brome	1
Vernal and cocksfoot	1
Yorkshire fog	1
Trefoil and red clover	1
Rib grass	6
Buttercup	1
Field madder	1

II.

	Per cent.
Rye grass	62
Crested dogstail	21
Yorkshire fog	11
Meadow grass	2
Foxtail, cocksfoot, and hard fescue	2
Yarrow	1
Buttercup, etc.	1

Mixtures suitable for permanent pasture on good land were supplied as follows:—

Lb.		Germinating seeds.	Cost. s.	d.
5	Timothy	6,468,000	2	1
2	Rough-stalked meadow grass	4,380,000	2	4
6	Cocksfoot	2,428,000	5	6
5	Meadow fescue	1,133,000	2	11
2	Meadow foxtail	833,000	3	4
3	White clover	2,152,000	3	0
½	Yarrow	1,492,000	1	10
	Total	18,886,000	21	0

The value of a mixture for laying down pasture depends not on its quantity or its weight, but on the number and quality of the living plants that are produced from it. As one often hears of sowing so many bushels in the field or so many pounds to the acre, it is very important to emphasise this as the correct view of a mixture. That the bulk or weight of a seed mixture is no help in forming an estimate of its value is apparent from the varying number of seeds per pound in the different grasses.

In one case it was proposed to lay down permanent pasture with a mixture consisting of ryegrass (Italian and perennial in equal quantities), 84 per cent.; clovers, 15 per cent; sheep's parsley, 1 per cent. at a cost of 24s. 6d.

Specimens of Gnomonia on wild cherry from Somerset show that this disease is extending its area of destruction.

March 4th, 1902. WILLIAM CARRUTHERS.

The committee had approved of a form of report on the purity and germination of seeds, and recommended that copies be printed for the use of the consulting botanist in reporting to members upon the samples of seeds analysed by him.

They had also considered a memorandum by the consulting chemist relating to proposed experiments on a field infested with wild onion on a farm in Hertfordshire. He suggested the experimental treatment of two acres of the infested field extending over four or five years. The committee were of opinion that the experiment should be carried out by the Society on the lines indicated by Dr. Voelcker, and they recommended that a grant not exceeding £15 per annum for five years should be placed at the disposal of the committee for the purpose.

Judges Selection.

Mr. Crutchley reported that, with very few exceptions, the gentlemen invited to act as judges at Carlisle had accepted office. Arrangements had been made for the completion of the list, and for its publication as soon as ready.

General Carlisle.

Sir Walter Gilbey reported that the local committee had offered to secure the services of a band of forty performers of the Portsmouth Division, Royal Marines, to play in the showyard during the Carlisle Meeting, provided the Society contributed a proportion of the expense, and the committee recommended that this offer be accepted with thanks. The Bishop of Carlisle had consented to preach the sermon at the service in the showyard on Sunday, July 6th. The railway cartage rates had been submitted by the companies concerned, and were substantially the same as those in force at Cardiff last year.

Showyard Works.

Sir Jacob Wilson (chairman) reported that the outbuildings in the timber-yard and the fence enclosing the showyard at Carlisle were being proceeded with, and that part of the levelling required to be done by the local committee had been completed. The main for supplying water for the implement yard had been laid. Various details connected with the Carlisle Meeting had been discussed, and instructions given thereon.

Selection.

The Hon. Cecil Parker presented the recommendation of the committee that Lord Wenlock, of Escrick Park, York, nominated at the last meeting, be elected a member of the council, in the room of Mr. C. S. Mainwaring (resigned). He made a formal motion to this effect, which was seconded by the Earl of Feversham, and carried unanimously.

Education.

Lord Moreton (chairman) reported the arrangements for the examination for the National Diploma in Agriculture, to be held at the Yorkshire College, Leeds, on May 5th and following days. The entries for the examination would finally close on the 31st inst.

Dairy.

Mr. Dugdale (chairman) reported that the judges of butter and butter-making, and of cheese, appointed for the Carlisle Meeting, had accepted office.

The committee had considered the interim report of the Departmental Committee on Butter Regulations, and recommended that the following resolution should be sent by the council to the Board of Agriculture:—

The Council of the Royal Agricultural Society of England, while approving the limit of 16 per cent. of water suggested to be prescribed for butter by the Departmental Committee on Butter Regulations, learn with much apprehension the view of the Committee that butter containing a higher percentage of water will escape the operation of the above limitation if disclosure be made of the fact beforehand. They would specially regret the making of any Regulation which would admit of "milk-blended butter," or similar mixtures not of the true nature of butter, being sold under any description implying that they were butter, or with the word "butter" attached to them.

This resolution having been formally moved by Mr. Dugdale, and seconded by the Hon. Cecil T. Parker, was carried unanimously, and ordered to be transmitted to the Board of Agriculture.

Date of Next Meeting.

The council then adjourned over Easter until Wednesday, April 9th, 1902.

Central Chamber.

A meeting of the Council of the Central and Associated Chambers of Agriculture took place on Tuesday, at the Society of Arts, Adelphi, Sir E. Strachey, M.P., presiding.

Mr. Laurence Hardy, M.P., moved the report of the Parliamentary Committee who had had under consideration the private bills of various corporations, containing clauses dealing with the milk supply within their areas. Mr. Hardy said practically their wishes had been complied with by the various Corporations which had adopted the model milk clauses. Owing to the fact of Mr. Jeffreys having received a post of considerable honour and responsibility in the House of Commons (loud applause), he was unable to take charge of their special work in Parliament, and the President had kindly offered to take Mr. Jeffreys' place (hear, hear).

Mr. B. St. John Ackers moved the report of the Cattle Diseases Committee, which dealt with the question of the Corporation private bills and the milk supply. The Committee recommended that, owing to greater knowledge and the results of the International Conference on Tuberculosis, the model milk clauses should be sent to the Chambers for further consideration. Mr. Ackers said the model clauses were the result of a compromise arrived at when their knowledge of tuberculosis was much less than at the present time, and the time had come when the whole question should be reconsidered with a view to their amendment.

Professor Lloyd doubted whether it was desirable to attempt to amend the milk clauses. If they reopened the question it was very doubtful whether they would obtain such useful clauses as they now possessed. If any effort was made to prevent the sale of milk from tuberculosis cows the supply would be reduced 50 per cent. In his opinion the Government should deal with the question in a general way.

Mr. Laurence Hardy, M.P., said when the great municipalities met them half-way it would be fatal to all progress if they reopened the question.

An amendment proposed by Professor Lloyd, omitting the recommendation as to the milk clauses, was carried by 20 votes to 12, and the report, as amended, was adopted.

Milk-blended Butter.

In a report on this subject the Dairy Products Committee remarked that the decision of the Court of King's Bench upon the successful appeal of Messrs. Pearks, Gunston, and Tee against the Richmond magistrates' decision that an excess of milk and water had been fraudulently added to butter sold by them would seem to uphold the following recommendation made by the Departmental Committee of the Board of Agriculture:—"We therefore recommend the adoption of a limit of 16 per cent. for the proportion of water in butter to be fixed by a regulation under Section 4 of the Sale of Food and Drugs Act, 1899, and we make this recommendation on the assumption that butter containing a larger percentage of water than 16 per cent. will escape the operation of this limit, provided that a sufficient disclosure is made to the purchaser." The Dairy Committee reported that they dissented from that recommendation, being of opinion that, in accordance with the principles laid down in the case of margarine, no substance should be sold as butter which did not comply with the standard fixed by the Board of Agriculture. The Committee were informed that 35 to 40 per cent. of water could be left in or incorporated with butter, and therefore recommend that the attention of the President of the Board of Agriculture be drawn to the necessity of immediate action on his part, and also that the Government be requested to legislate at once, in order to put a stop to the sale of such substances as butter.

Professor Lloyd proposed the adoption of the report, and Professor Long seconded. The latter gentleman said the company referred to in the report were selling butter imported into this country, and blending it with milk-cream, the result being that it contained twice as much water as ordinary butter. He urged that they should insist upon the authorities taking some steps compelling those selling this material to call it by its proper name, and not butter. The President of the Board of Agriculture was in sympathy with them in this matter, whereas his predecessor, Mr. W. Long, had no sympathy for them. He was in a more congenial atmosphere because he was dealing with water (laughter).

Mr. F. A. Channing, M.P., said a very unsatisfactory state of things existed, because it seemed, if they asked for butter, they got a third water.

The report was carried unanimously.

Rura Depopulation.

Mr. B. St. John Ackers proposed the following gentlemen as the Committee to consider the question of rural depopulation:—Sir J. Dorington, M.P.; Mr. D'Arcy Wyvrill, Mr. Barfoot Saunt, Mr. F. A. Channing, M.P.; Mr. W. Lipscomb, Mr. Biddle, Professor Long, Mr. James Lowther, M.P.; Mr. H. Stratton, Mr. Tedbutt, Mr. Buchanan, and Mr. Spiers, M.P.

Mr. Williams seconded the resolution, which was unanimously adopted.

Beet Sugar Committee.

The Beet Sugar Committee was requested to select members to form a deputation to the Chancellor of the Exchequer on the question of an excise duty on home-grown sugar.

Tuberculosis and the Compromise.

Dealing with tuberculosis and milk supply, the Cattle Diseases Committee, in their report, emphasised that they were of the opinion that the time had arrived when the compromise known as the model milk clauses in the private Acts of local authorities might be amended, and suggested that these clauses should be sent to the local Chambers for further consideration.

Mr. Ackers, M.P., added that the committee thought that the whole question should be reconsidered. They did not say that there were any special alterations in the clauses that they desired, but they were anxious to know how far these model milk clauses were generally acceptable to the dairymen and farmers of the country.

Professor Lloyd proposed that the last clause of the report should be omitted. Referring to the London County Council's Bill, he said it appeared they wanted not merely to control tuberculosis in the udder, but to control the supply of milk of every animal suffering from tuberculosis. Such a power could only be vested in the Government, and any attempt to deal with tuberculosis on a large scale could only be dealt with by the Government. They wanted to prevent farmers who kept cows suffering from tuberculosis with those that were not so suffering from supplying milk to London. That would mean a decrease of 50 per cent. in the milk supply to London. That would mean ruin to the dairy farmer, and therefore he thought that the whole matter should be left to the Government to deal with, and not by private Bills.

The report was adopted, after being amended in accordance with Prof. Lloyd's amendment.

Food Supply in Time of War.

A long and interesting discussion respecting our food supply in time of war was opened by Sir John Dorington, Bart., M.P., who moved—"That this chamber is of opinion that the most practical way of ensuring a food supply in time of war is the payment by the Government of a certain sum per quarter to the grower for keeping his wheat stack from nine to twelve months." He explained that he was acting on behalf of Mr. Jeffreys, who, owing to the position he had taken in the House of Commons, was unable to bring the subject forward. No more important question could be brought before the chamber. It was said that generally we had about two months' supply of corn in the United Kingdom, and there was no likelihood of scarcity as long as peace continued and the flow of ships into our harbours was uninterrupted. Extremists had an idea that our food supply from foreign scurces might be entirely cut off in time of war, but we had a magnificent fleet and an immense coast line, which it would be almost impossible to blockade, and it was difficult to conceive circumstances in which we should be reduced to rely wholly upon home-grown supplies. Still, the inflow of foreign supplies might be interfered with to such an extent that prices would be raised greatly, so that while the e would not be starvation of the population through actual lack of corn, many peopie might not be able to pay the price that would be demanded for bread. Prices might be raised similarly by a nation with whom we were at war having taken time by the forelock, and, prior to the outbreak of hostilities, having stopped the exportation of corn to this country. One course that might be adopted in such an event was for the Government to take control of the national food supplies, paying for them the price demanded at the ports, and undertaking to supply the population at prices within its reach; but that course would not be adopted until after great privations had been endured by the people. It was suggested by Mr. Jeffreys and others that the best methods 0of preparing against this risk would be that our food supply from home sources should be increased appreciably beyond the present two months' standard, and that if a supply adequate for six or eight months could be ensured there would be little risk of national disaster through lack of food. We had diminished the acreage under wheat from 4,000,000 to 1,700,000, and, instead of growing, as this country used to do, 12,000,000 quarters, it now grew only 6,000,000. In that fact lay the whole secret of rural depopulation. (Hear, hear.) By increasing the quantity of corn grown in this country, not only might a grave national risk be averted, but something would be done to restore the rural population upon which the physical strength of the nation largely depended. The suggestion had been made that, by a payment to farmers of 5s. for every quarter of wheat held by them for nine months they might be induced to hold about 4,000,000 quarters. That step, if successful, would cost the nation a million sterling a year—a mere bagatelle compared with our expenditure upon the navy and army as means of protection against national risk. Would farmers be induced to hold wheat by such a grant? (Cries of "Yes" and "No.") The establishment of huge granaries would, he believed, be far more expensive, and it would not do the same amount of good to our own population, though it might serve to avert the danger of scarcity. He thought the capital outlay upon this latter scheme would be £17,000,000.

Mr. Horne (Shropshire), in seconding the motion, said it was a subject for congratulation that public opinion was becoming increasingly in favour of some steps being taken to remedy what might prove a fatal flaw in our national defence. While we required 30,000,000 quarters of corn annually, we grew only 8,000,000, and of the 22,000,000 quarters imported 14,500,000 came from the United States, and only 3,000,000 from our colonies. That was a condition of affairs that no other country in the world would tolerate.

Mr. Kidner (Gloucester) moved as an amendment that the Government should be urged to appoint a committee to inquire into the whole question of our food supplies in time of war. He agreed that there was a national danger, and remarked that the Government treated it in a very cavalier spirit; but he thought the chamber would be unwise to adopt a definite proposal as a remedy without having made sure of their ground.

Mr. Stratton (Winchester) said they were unanimous as to the necessity of some security, and almost the whole country was agreed, although certain leading members of Parliament seemed to think the matter a joke.

Mr. Hy. Marriage (Essex) said the suggestion in the resolution was the only practical one, and he thought they could get double the wheat grown in this country to what was produced now.—Mr. Berry was opposed to the resolution, for no farmer would do anything of the kind, and there were a thousand and one reasons against it. He feared they did not realise the intensity of the danger they were running in not making any provision whatever. They were getting less quantities of wheat from the United States every year, and as Russia was opening up enormous districts in Siberia, they would be getting large supplies from there. If they got more and more wheat from Russia and less from the United States, they would be drifting into a condition of things which from a political point of view would be very serious.

Mr. J. T. Wilson (Stockton-on-Tees) declared that no farmer would keep wheat in stock for nine months for a payment of 5s. or 8s. a quarter if he had his wits about him. (Hear, hear.) The national danger was becoming more acute owing to the tendency of supplies from the United States to decrease, and to the increasing reliance that was being placed upon Russia as the source of our supplies of corn.

The Earl of Lichfield said that he should feel impelled to support the amendment. If the resolution were passed it would stand against them as their view of the most practical way of insuring the food supply in time of war. None of the arguments advanced showed that it was a practical one.

Mr. James Lowther, M.P., said it seemed to him that there was an idea of regarding the scheme as a comprehensive one. It would merely go to assure the public mind in some way. Some of the objections had weight, but for himself he welcomed the resolution as a step in the right direction. He hoped, however, that its scope would be extended, so as to include an inquiry. He thought the scheme a better one than that of huge elevators filled with foreign grain. (Hear, hear.) If they were to make wheat growing a practical pursuit rather than a mere by-product of farming, they must take some strong steps. He hoped the scheme would be extended so as to include an inquiry into the whole of our mischievous fiscal system.

Sir John Dorington accepted the amendment subject to the insertion therein, after the word "committee" of the words "or commission having representatives of agriculture and the corn trade upon it," and, this suggestion having been

adopted by Mr. Kidner, his proposal was agreed to, and copies of the resolution were ordered to be sent to members of the Government.

The Rating of Machinery.

Mr. Williams (Monmouth), moving a resolution opposing the Rating of Machinery Bill, said this Bill was a sort of hardy annual, and they had always felt it their duty to oppose it. They contended it would be an injustice to other ratepayers to exempt machinery. He contended that there could be no injustice in rating special machines. They opposed every Bill that relieved anyone else from rating. At this moment they were rated at at least one and a half of their income. The rating of the mill-owner was infinitesimal compared with theirs.

Mr. Lathom seconded.

Mr. Truston Eve (Bedford), supporting, said that if this Bill was carried someone else would have to pay the rates. It was a mistaken idea to say machinery was rateable. It was not rateable, but it had to be taken into account when they rated bricks and mortar that contained it, and he contended that that was perfectly fair. The whole thing was thrashed out in 1886, and ever since 1888 there had been a Bill in Parliament to make machinery not rateable. He hoped the Parliamentary Committee would give the matter closer consideration. He would be prepared to bring surveyors to give evidence as against the evidence of the Machinery Users' Association.

The Chairman explained that he was not in charge of the Bill this year, although his name and that of Sir John Dorington would appear at the back of the Bill. He thought it was his business merely upon this occasion to say that as regarded the Bill itself, the Bill had been considerably altered in order to bring it into form with the report of the Royal Commission upon local taxation. This chamber had generally approved of the reports of the Royal Commission upon local taxation.

The resolution of Mr. Williams was then put and carried, and the Council adjourned until Tuesday, April 8th.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended March 1, 1902, together with the quantities imported in the corresponding week of the previous year:—

Blandford Fair.—The first of the Blandford (Dorset) Fairs for the present year was held on Thursday, in beautiful weather, when, despite the fact of it clashing with Maiden Newton, and also with Bristol, there was a full attendance of buyers from the usual districts, and about an average supply of cattle, sheep, pigs, horses, etc. Business ruled fairly brisk for all good things, either in cattle or sheep, and late prices were well maintained. Best Down couples may be quoted from 45s. to 57s.; store wether tegs, 36s. to 43s. 6d.; fat lambs, 34s. 6d. to 37s. Heifers and calves made £14 to £18; and cows and calves up to about £15 5s.; barreners, £20 to £26 per pair; two-year-old barren heifers, to £14 each. Fat calves sold from £3 to £5 4s., and store pigs 20s. to 30s. A good clearing trade.

Monday (March 3rd).—The weather was generally overcast or cloudy, and rain was again falling at several places in Ireland. Small amounts of rain were measured in the morning in different parts of the kingdom, as the result of the fall in the preceding twenty-four hours. The winds were generally southerly, under the influence of an area of low barometer readings which had arrived on our north-west coasts from the Atlantic, and the mercury had fallen over the western portion of the kingdom. Temperature had risen in the west, but there was very little change elsewhere, and readings were generally above the average. The day was fine in London, although there was a good deal of cloud, and the highest temperature was 52 degrees.

Tuesday (March 4th).—The weather was generally fine over our islands, but there was a great deal of cloud, and fog was prevalent in the English Channel. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, at many places in the North and West, but the conditions continued dry in most parts of England. Temperature was still high in the South of Ireland, where the lowest readings during Monday night were above 45 degrees, but the thermometer had fallen generally over England, and a slight frost had occurred on our East coast. The midday temperatures exceeded 50 degrees in the South-West, but in England the readings were not generally above the average. In London the day was dull, but dry, and the highest temperature was 45 degrees.

Wednesday (March 5th).—Rain fell at several places in the North of Scotland and Ireland, and fog was very prevalent in England. Rain was measured at a few of the northern stations in the morning, as the result of the fall in the preceding twenty-four hours, but the amounts were mostly small. No appreciable rain fell in England, and the weather was generally dry over the south-west of Europe. The winds were generally southerly, but the east wind was still blowing in many parts of England. Frost occurred in the Midland and Eastern districts during Tuesday night, and the temperature had generally decreased. The mid-day temperatures were again rather low.

Thursday (March 6th).—Fog or mist was very prevalent over a large part of our Islands, and the weather was unusually thick for the time of year. Scarcely any rain fell in any part of the kingdom, and it was only in the extreme north that rain had fallen since Wednesday morning. The barometer readings were high and uniform over England and Ireland, and the wind was in consequence light and variable. Frost occurred in many parts of England during Wednesday night, and in the midlands the sheltered thermometer fell seven degrees below the freezing point. A brisk rise of temperature occurred during the day.

Friday, March 7th.—Fog was again prevalent over the greater part of England during the morning, but it cleared during the day under the influence of a gentle North-West wind, which became general. Small amounts of rain were measured in the morning, as the result of the fall in the preceding twenty-four hours at the Northern stations, but scarcely any rain fell during the day. Temperature was changing very irregularly, and a brisk rise had occurred over the central parts of England. Frost was experienced during Thursday night over the Eastern portion of the Kingdom, but the midday temperatures exceeded fifty degrees over a large part of the country.

Saturday and Sunday (March 8th and 9th).—The weather was generally dull and cloudy over our islands on Saturday, and rain fell almost everywhere, except in the South of England, but the amounts measured were not large. On Sunday the weather had improved in most parts of the United Kingdom, although rain again fell at a few places in the North and West. The westerly wind reached the force of a gale early on Sunday morning on our North coasts, and strong squalls occurred elsewhere. The temperature remained high on both days. Saturday was dull in London, but Sunday was fine and bright, and the thermometer in the shade rose to fifty-six degrees.

THE GARDEN.

Mild weather still prevails; during the past week there have been several beautifully fine and warm days, and as very little rain has fallen lately the ground is now in excellent working order, for the most part.

Having got plenty of peas and beans (broad) sown, and a good batch of early potatoes planted, as directed last week, the next thing is to get a good-sized bed each of onions and parsnips sown, with a smaller one of one of the horn or stump-rooted carrots (of these Sutton's Early Gem is one of the best), a moderate quantity of spinach (round-seeded), more radishes, and a small bed of leeks, for transplanting.

If beet is required early, a bed of properly prepared soil in an open, yet sheltered, spot, may be sown about the middle of the month, with seed of one of the improved forms of the Egyptian or turnip-rooted beet, which is at once hardier than the ordinary kinds, and forms roots much more quickly.

A first sowing of Brussels sprouts should have been made last month, as directed, and these had better be pricked out, as soon as they attain a height of about 2in., either into one or more cold frames, or a pit, if there is one, or else into a warm and sheltered border, placing them about 4in. apart. Make another sowing of seed for the main crop.

At the same time, a moderate quantity of seed of savoys, early brocoli, cabbage for succession, and more cauliflowers (if necessary) had better be made. Harden off early-sown onions that were raised under glass, and plant them out, in the same manner as the autumn-sown plants, as soon as they attain a sufficient size. Bear in mind that the soil for onions, whether seed or plants, must be made quite firm—if of a light character it can scarcely be made too firm.

Plant out more lettuces, and sow more seed, if necessary, preferably in a pit or frame. Jerusalem artichokes should be planted this month, so get the ground well dug and manured—these appreciate generous treatment, like anything else.

Indoors, the main crop of celery should be sown within the next week or two, both red and white kinds being included. If no seed has yet been got in, sow a box of good white variety, such as the Sandringham, immediately. A genial warmth of about 60 degrees is advisable for celery in the early stages. Celeriac also should be sown about the middle of the month. A few vegetable marrow seeds may be sown for an early crop, if wanted, but, as a rule, there is time enough yet.

Tomatoes for planting out of doors ought to have been sown by this time, and be now germinating; but if neglected, get the seed in at once. Pot on early-sown plants for indoor culture, and plant them out when 6in to 9in. high, but it is never safe to put them out in a cold or unheated structure before about the middle of April, and in cold districts a week or two later is often better. Keep cucumbers warm and moist, and top dress frequently with fresh compost.

Cheques and Post Office Orders payable to WILLIAM A. MAY, 1, Essex Street, Strand, London.

SUBSCRIPTION RATES:—United Kingdom, one year, 15s.; six months, 7s. 6d.; the Colonies and Abroad 17s. 6d. per annum.

Cumberland.

Back-end ploughing was, fortunately, forward, so now that frost has left remnants are being rapidly turned over. Boom ploughing is on, and the changes are numerous. Fodder scarce. Sheep dear, rising last week about 2s. 6d. per head. Potatoes, though cheap, are abundant, and the quality good. Oats are specially good; close by, the thresher turned out last week 17½qrs. (2 4-5 tons) per hour. "Protection" is in the air, but likely to remain there, though at our Chamber of Agriculture some advocates are persistent. The more thoughtful, however, recognising that consumers exceed, exceedingly, producers, and that the Government Front Bench is also opposed, turn their thoughts to more feasible aids for oppressed agriculture. Rural depopulation has for two sessions occupied the attention of the Cumberland and Westmorland Chamber of Agriculture, and is again to be discussed on the 29th inst. at Carlisle. Lord Muncaster's agent at last meeting suggested cheap loans and a duty on corn. The Vicar of Plumpton, agreeing with the first on the Irish Co-operative Banks system, strongly objected to the second, and was so efficiently supported that the discussion stands adjourned. The vicar's suggestion that, instead of "hirings" half-yearly, permanent farm-hands should be housed, at the rate of a house for each 100 acres of rable land, meets with general approval.—H. W. K.

Essex (Mid).

The wheats generally are not at all promising for next year. Peas and beans are now being sown, the weather preventing it before. Scarcely any barley is sown yet, but the land works much more dry than could be expected, and the ponds are not yet full. The weather has been very changeable; one night in February the thermometer registered below zero. Beef and pork have been a very fair trade, mutton not quite so good. The lambs have been an average fall up to the present. Pigs are still scarce. This is the worst year for tanners for some years. The yield of barley last year was very bad, and money gets scarcer every day.—(March 8th).

Suffolk (East).

There is not much spring corn in yet, but if we have a few more fine days, and some winds, the drills will generally be going. February has been a dry month; only a little over ½in. of rain in this district, and 1¼in. is the total rainfall for the year so far. This, of course, is very little for this season, and ponds are by no means full; but, still, if March is dusty, so much the better.

Wheats are not looking well; they went off last month extraordinarly, but they begin to look a little greener now. Live stock are generally healthy.—H. P. Y. (March 7).

Foreign Prospects.

FRANCE.—The agricultural situation is considered satisfactory and wheat is making good progress.

BELGIUM.—Weather fine and favourable to the autumn-sown crops.

HOLLAND.—Crop prospects appear satisfactory.

GERMANY.—Mild and rainy weather is clearing away the snow and river navigation has reopened. There are no complaints respecting the crop outlook at home, and the same remark being applicable to principal wheat growing countries, an easier tone was engendered in the wheat and rye markets.

DANUBIAN PROVINCES.—Weather continues mild and suitable for spring sowing. Autumn crops are reported to be doing well.

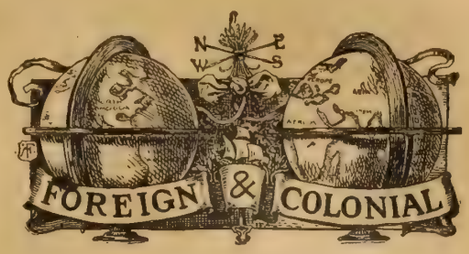
RUSSIA.—Weather almost everywhere is milder and much rain fell in several districts; snow in the south has completely disappeared, and prospects generally are favourable for spring sowing.

HUNGARY.—The autumn-sown crops present a satisfactory appearance.

NORTH AFRICA.—Rain fell in certain districts of Algeria, but in other parts and in Tunis copious moisture is deemed necessary to secure the crops.

INDIA.—The Viceroy telegraphed 1st inst., rainfall light and scattered, of no use to affected tracts.

UNITED STATES.—Wheat prospects are unchanged and fairly good. Some freezing and thawing is reported, but nothing of a serious character. There is no growing weather, but moisture is generally sufficient for the present. The roads are in bad condition. Live stock has wintered unusually well and feeding is now light. In California abundant rain has fallen, bringing the total up to date 15⅛ inches, against 18 inches same time last year.



Board of Agriculture: "Not a Mere Doll Dressed in Red Tape."

The annual dinner of the Yorkshire Union of Agricultural Clubs and Chambers of Agriculture was held at Yorks on Saturday, at which the Right Hon. R. V. Hanbury, M.P., President of the Board of Agriculture, was the principal guest. In reply to the toast of "Agriculture," Mr. Hanbury said he thought the country might be congratulated on its alliance with Japan, not for aggressive purposes, but for opening up trade for British markets. He expressed the hope that the successful negotiations with regard to the sugar bounties would find approval in Yorkshire, though it might not affect the farmers so far north; yet, in the changing circumstances of agricultural life it was quite possible that the sugar beet which had been successfully grown in Warwickshire might do something to help in reviving the agricultural industry. He went on to say that he had come to York, not to talk—as he thought there was too much talking in the country—but to learn. He had not come to advertise himself, but his Board, and to make them feel that in the Board of Agriculture they had not a mere doll dressed up in red tape, not a mere London department, but a Board which desired to make itself of practical use by making itself interested in every district, and every district interested in it. (Applause). They had to fight the battle of the agriculturists. There had been too many quack remedies, and it was only by coming amongst them, and by coming into personal touch with them, and asking them to treat the Board as a friend, that they could show that they were determined to serve the farmers to the best of their ability. (Applause.)

He asked them to think out the problem for themselves in each district, and to make the Board acquainted with it as far as they could. They should not merely sign resolutions which were signed by other Chambers of Agriculture which might be applicable to one district and not to others, but should let the Board know what were the particular wants of their own district. He gave statistics to show the falling off in the area under wheat culture, the decrease in the North Riding being 31 per cent. These figures taught them that, though agriculture remained the greatest industry of the country, there was a diminished home market. He went on to speak of the adaptability which the farmers had shown to their changed positions: they had to undergo a competition with the whole world, a competition which no other industry had to undergo. The farmers had met the competition with great vigour and intellect, and he hoped that in the days which were coming—for he saw a vigorous competition arising in the manufacturing world—that the competition would be met with the same adaptability, the same vigour, and the same determination as the farmers had shown. (Applause.)

It was the duty of the Government to see that the farmer in the new industry which he had set up—that of cattle-breeding—starts fair with his rivals. In connection with this contention Mr. Hanbury detailed what had been done to protect the flocks and herds of the country from disease. He also spoke of the necessity to protect the British milk and butter producers, and said that it was the Government's duty to protect the farmer, especially the small farmer. There was one department in which the Board of Agriculture had not done as they might have, and that was in finding fresh markets and obtaining information of what was going on abroad. With regard to the purchase of remounts for the army, he thought that a great deal might be done by co-operation between the Board of Agriculture and the War Office. If the War Office wanted remounts, the British farmer had the first claim to supply them. (Applause.) During the war the very best horses which were sent to South Africa had been those produced within these islands. (Hear, hear.)

In dealing with railway rates, he said if they would bring before the Board of Agriculture, either as individuals or as an organisation, that undue rates had been established, he would undertake that the Board of Agriculture would press the matter on the Board of Trade and the railway companies, and do their utmost to fight their farmers' battles. (Applause.) He expressed the hope to see competition entered into with the railways by means of motor-cars for the conveyance of goods to the villages. The size of the motor would have to be altered, they would have to travel at a reasonable rate, and the roads would have to be put into a better state. He believed, he said, that the day was over when a Government department was merely to fold its arms and let things slide along. He did not say that they should return to days of protection, but to days of energy. He wanted to make his Department a living department, and to do this he was going about the country and studying in detail the wants of those whom he had the honour to represent in that department.

New Zealand Corn Statistics.

We have received during the past week a copy of a statement issued by the Department of Agriculture, Wellington, New Zealand, giving the area of wheat, oats, and barley for threshing, and the estimated yields; also the wheat on hand in the colony, as at 31st October, 1901. Owing to the very dry weather experienced, a portion of the area, returned at the time of the collection of the statistics as "For threshing," have since been consumed by stock. The total for the colony thus dealt with is estimated at 9,000 acres.

The following table shows the estimated number of acres and the total bushels of the three cereals enumerated above:—

	Acres.	Estimated consumed by stock.	Total bushels.
Wheat	166,562	3,100	4,086,550
Oats	410,224	4,300	13,801,416
Barley	28,114	1,600	742,392

In the "New Zealand Gazette" of 24th June, 1901, the wheat on hand, available for all purposes, as from 28th February, 1901, was stated at 8,620,659 bushels, and this has been disposed of as follows:—For seed, 167,474 acres, at 2 bushels per acre, 334,948 bushels; consumption for population of 820,000, at 6 bushels, for 8 months (28th February, 1901, to 31st October, 1901), 3280,000 bushels; wheat and flour exported from 28th February, 1901, to 31st October, 1901, less imports, 2,098,158; 2,189 bushels imports; total 5,713,106 bushels. This left on hand at 31st October, 1901, 2,907,553 bushels, but the amount actually returned on that date was 3,182,007 bushels, so that there was an apparent surplus of 274,454 bushels. A surplus of 274,454 bushels is shown, according to the amount returned. It is remarked that this may be due to the fact that the wheat on hand, unthreshed, has been overestimated, or that the yield last year was underestimated.

An illustrated treatise on Artificial Manuring by Mr. E. B. Hadley, F.C.S., has been published by the Potash Syndicate, Ltd., 110, Strand, London, W.C. The booklet is published at 6d., but a copy will be sent post free to any of our readers who apply to the above address.

We have received a copy of the prospectus of several courses of instruction in poultry-keeping to be given at the college, and on the college poultry farm, Theale.

Bristol March Fair.—Although there was no falling off in the attendance at the Bristol March Horse Fair on Thursday, the amount of business transacted was below the average. The proceedings opened quietly, but as the morning advanced a slight improvement took place, buyers being later than usual in putting in an appearance. The supply of horses of all classes was fairly good, though, as usual, most business was done in sound powerful cart horses. Prices last year ranged from £60 to £80, and there was no material change in these figures, though the number which reached the latter figure was probably smaller; and perhaps animals of a useful stamp, which were not quite first-class, were a little cheaper. Rough sorts sold very slowly. A few cart colts were on offer, the average price being about £32. Irish colts made a fair show, and commanded an ordinary amount of business. Few carriage horses were in the market, and tradesmen's horses realised from £10 to £35.

Maiden Newton Fair.—Favoured with an exceptionally fine day, the annual great March fair at Maiden Newton, Dorset, on Thursday, which is chiefly famous for the remarkable array of high-class bulls, brought together from all parts of the district, was very largely attended, and there was an enormous offer of stock, considerably in excess of previous years. Business ruled very brisk throughout, and prices compared very favourably both with last year's and also at other similar sales. Horn ewes made 36s. to 43s.; horn wethers, 38s. to 46s.; Down chilver hogs, 35s. to 37s. 6d.; store pigs, 24s. to 32s.; bulls, which included some rare Devons, Herefords, Shorthorns, and cross-breds, found a ready sale, especially medium-priced animals, prices for best ranging from 10 guineas to 23 guineas for Devons; Shorthorns, 9 guineas to 16½ guineas; Herefords, 8½ guineas to 15½ guineas; and cross-breds, from 8 guineas to 13 guineas. Most of the bulls found buyers at about the above range of prices.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: No change to notice since last Monday. Barley: A slow sale at last week's prices. Wheat: Quiet. Oats: A downward tendency in price. Maize: Unchanged Flour: Dull.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.—The attendance was very restricted, and the market for wheat and flour ruled dull and in buyers' favour. Maize slow, and 3d to 6d lower for round sorts. Barley quiet, and in absence of business values are nominally unchanged. Oats, quiet trade at about late rates. Beans and peas slow.

Mark Lane, Friday.—Little, if anything, occured to alter the views of buyers, and business was slow, while quotations varied but slightly; attendance small. English wheat was scarcely mentioned. There is, however, sufficient in hand at present to suit all requirements of town and country millers. Whites range at 29s to 31s, and good reds 29s 6d; well-conditioned reds, 27s 9d per qr. Foreign unchanged, and here and there millers show rather more disposition to buy. The principal business in American descriptions is confined to No. 1 Northern Duluth at 31s ex ship, and 31s 3d Northern Manitoba both in very limited supply. Hard Kansas Winter's, 30s 9d ex granary. White wheats very scarce. Russian above the notions of buyers, while India still tails as an exporter. Australian well maintained. New Zealand commands the recent advance. Tuscan, 29s to 30s 496lb. American brands of flour in buyers' favour, although not quotably altered. Fancy patents, 23s 3d upwards, and 22s 9d is asked for Minnesota first patents. Cascadias, 22s 3d ex granary; country flour unaltered. At the meeting of the London Millers' Association, town households, 23s; whites, 26s per sack, delivered to the baker. Top price, town made 28s net. No. 1 households, 21s 6d at the mill door. Australian patents, 20s to 20s 6d 280lb ex store. Grinding barley steady, and none on offer ex ship, while 19s 3d is named ex granary for Odessa. Danubian, 18s 3d ex ship. Malting maintained, and seed parcels ranging between 28s and 33s. Foreign types steady. Oats the turn easier since last Friday, and in sufficient supply for all immediate requirements. F.a.q. Libau, 18s 3d ex ship, 18s 6d ex quay 38lb, and 40lb Libau. 20s 3d upwards ex quay. Good Konigsberg, 21s ex quay, 40lb. New Zealand ordinary bluff, 25s 6d to 26s 6d, 284lb ex store. English fully sustained. Round corn occasionally 6d lower on the week. Odessa quoted about 20s 6d ex ship, and 21s ex quay. Holders of imported beans and peas were asking similar rates, which were not responded to by any means readily.

COUNTRY.

Banbury, Thursday.—Wheat, red (new), 28s to 30s per qr. Slow trade and not much wheat on offer. Prices as before. ffl ffl ffl

Birmingham, Thursday.—The market had a very quiet tone, and values have undergone little change on the week. English wheats, 10s 6d to 11s 3d per bag, and in the foreign department soft reds were 5s 5½d, and Russians 5s 10½d per cental (Liverpool). Maize had an easier tendency; prime Plate, 4s 10d per cental (Liverpool), and 22s 9d to 23s per 480lb (Sharpness); round maize, 22s 9d per 480lb (Liverpool), and 22s 6d to 23s (Sharpness). Grinding barley, 18s 3d to 18s 6d (Sharpness), and 18s 4½d to 19s 4½d per 400lb (Liverpool). Black oats were scarce, and quotations ranged from 21s 6d to 22s per qr, and whites 22s 6d to 23s 6d per 312lb (Birmingham). English beans, 3d easier; new at 13s 9d to 14s 3d, and old at 15s 6d to 16s per bag. ffl ffl

Boston, Wednesday.—A small attendance and a slow trade. Wheat, 27s 6d; grinding barley, 22s; oats, 20s to 22s; peas, 50s to 63s; beans, 34s; maize, 23s to 24s. per qr.

Brighton, Thursday.—New white wheat, 28s to 29s; new red ditto, 27s 6d to 28s 6d; barley, 28s to 33s; grinding ditto, 21s to 22s; English oats, 21s to 24s; peas, 35s to 36s. Wheat in fair supply; quiet trade at last week's prices. Average attendance.

Bristol, Thursday.—There has been about an average trade passing since our last. To-day English wheat was in rather less supply than of late, and made about last week's prices. Foreign unaltered. Maize, barley, and oats without change. The bakers seem to be working down their stocks of flour, making the demand for flour rather slack at present; prices in this article are, however, unchanged.—GRACE BROTHERS.

Bury St. Edmund's, Wednesday.—Wheat: There was a fair show, some of the samples representing considerable quantities which were being cleared off in preparation for seeding operations. The market was quiet, with a steady demand at just last week's prices. Reds or whites, 27s 6d to 28s 3d per 504lb, on the line. Barley: Very little business passing; prices same as last week. Maize, 3d per qr dearer. Other feeding corns firm.

Cambridge, Saturday.—During the week trade has been firm for all kinds of grain, with smaller supplies, as farmers are beginning their spring sowing. At this market to-day there was a small supply of all grain. Wheat sold steadily at the full prices of last Saturday. Red, 27s to 28s; white, up to 29s per 504lb. Barley nearly over; some demand for seed lots, but malting parcels in very little demand. Beans dull. Oats firm.

Canterbury, Saturday.—Wheat dull; oats firm. White wheat, 28s to 30s; red, 27s to 29s; malting barley, 28s to 35s; grinding, 23s to 25s; white oats, 20s to 24s; black, 19s to 23s; grey peas, 33s to 35s; tick beans, 36s to 38s; mazagans, 33s to 34s; round maize, 25s to 26s; flat, 28s; spring tares, 7s to 8s; giants, 8s to 9s per bushel.

Carlisle, Saturday.—Much larger supply of oats in our market to-day; good seed demand at 6d per qr over last week's prices; 22s to 23s 9d per 336lb. No wheat or barley offered.—THOMAS ROBINSON.

Chester, Saturday.—At this market, at which there was more English grain offering, wheat was barely as well sold, but oats and beans were steady. Indian corn in better demand. Barley. Scarce. Wheat, white and red, 4s 5d to 4s 6d per 75lb; malting barley, 4s to 4s 1d per 60lb; grinding, 3s 4d to 3s 6d per 64lb; beans, 5s 6d to 5s 8d per 80lb; oats, new, 2s 10d to 3s 1d; old, 3s 4d to 3s 6d per 46lb; Indian corn, 12s 6d to 13s 3d per 240lb.

Chichester, Wednesday.—There was a large attendance, but the tone of business generally was still quiet. Moderate supply of wheat, which was quoted at late rates. Feeding stuffs and flour steady, without change.

Croydon, Tuesday.—White wheat, 27s to 29s; red ditto, 27s to 28s; malting barley, 28s to 36s; grinding, 22s to 24s; oats, 20s to 24s; beans, 31s to 33s; peas, 29s to 31s. A slow trade for wheat; prices unchanged. Oats firm. Beans and peas no alteration.

Colchester, Saturday.—Short supply of wheat; trade firm at last week's prices. Practically nothing offering in barley. Oats and beans firm.—FRANCIS AND CO.

Devizes, Thursday.—We had a moderate supply of corn to-day. The trade was dull at last week's prices for all descriptions. Quotations: Best wheat, 13s 6d to 14s 6d; secondary, 12s 6d to 13s; best malting barley, 29s to 34s; secondary, 25s to 28s; grinding barley, 20s to 24s; oats, 21s to 24s; beans, 16s to 20s; fine flour, 22s to 24s; extra fine, 23s to 30s; best bread, 9d. ffl ffl

Glasgow, Wednesday.—There was the usual attendance at our market to-day. Wheat and flour slow at about late rates. Indian corn steady, but quiet. Round maize firmer. Grinding beans rather dearer, but little doing. Canadian pease unchanged. Home and foreign oats dull, and prices unaltered. Barley quiet. Bran and thirds steady, but quiet. Oatmeal dull.—GIBSON AND CLARK.

Ipswich, Tuesday.—Wheat was in average supply, and with a fairly steady demand, the trade was unchanged, at last week's prices. Reds or whites, 28s 6d to 29s 6d per qr, delivered at Ipswich. Barley was quite a retail trade, but the few samples left find buyers at fully last week's quotations, from 29s to 33s per qr. Grinding sorts dearer. Maize the turn dearer, at 22s 6d per qr. Danube-Bessarabian barley, 19s 6d per 400lb. Lentils (Calcutta), 31s 6d; Bombay, 32s per 504lb. Feeding stuffs steady.

Leeds, Tuesday.—There is still a lack of activity in the trade, and the want of stability in the American markets, notwithstanding moderate shipments, makes itself felt, so that millers will only buy wheat from hand to mouth even at a slight reduction from last week's rates. Malting barley firmly held. All feeding stuffs slow.—DUNNS AND CO.

Leeds, Friday.—Little doing in both English and foreign wheats, without any change from Tuesday's prices, except a hardening tendency in Americans. Barley and oats firmly held. No change in beans, peas, maize or flour.

Leicester, Saturday.—Fair attendance, with moderate supply of home-grown wheats. Trade steady at 28s to 31s per 36 stones. Barley a slow trade. Fine oats in demand at firm prices.

Leith, Friday.—The amount of business passing still very small, prices being much about the same as last week. Wheat, Scotch, small supply. Oats, Scotch, smaller supply, with better demand; foreign oats, from 19s to 21s 6d. Barley, Scotch, dull sale; foreign feeding, 21s. Hard white peas, 38s. Beans, all varieties, 33s 6d to 34s. Round maize, 23s 6d to 24s; parcels with very slight heat, 21s to 22s 6d; damaged, 19s to 20s. Millet seed, 19s. Mill offals.—Better demand. Broad bran, 120s to 125s; medium bran, 97s 6d to 102s 6d; sharps, 95s to 97s 6d; pairings, 105s to 107s 6d; cummings, 82s 6d to 87s 6d; dried grains, brewers, 97s 6d; distillers, 102s 6d to 105s; oat husks, 45s; meal seeds, 67s 6d.; all sacks included.—WILLIAM MACLAY.

Lewes, Tuesday.—New white wheat, 28s to 29s; new brown ditto, 27s to 28s; malting barley, 32s to 35s; grinding barley, 20s to 24s; oats, 21s to 25s; beans, 35s to 39s; peas, 33s to 37s per qr.

Lincoln, Friday.—Small supply of English wheat. Trade slow, with no change in prices. Reds, 28s 6d to 29s. 6d; whites, 29s to 30s. Barleys season over. Oats a dull sale at easier rates. Beans, peas, and maize no change.

Liverpool, Friday.—The market has had a fair attendance of millers, and wheat is in better demand. Kansas and Manitobas experiencing an active trade at ½d advance over Tuesday. Other sorts are in moderate request and the turn dearer. Flour—Foreign sorts have a small inquiry, but prices remain unchanged. Local milled flours are very slow, but prices remain unaltered. Maize—Mixed rules steady at unchanged prices, but slow. European is generally ½d lower, but meets some inquiry at the decline. Plate is the turn lower, with a moderate trade. Barley—Malting steady, but quiet at unchanged quotations. Beans are firmly held, but very inactive. Peas are firm, but quiet at quotations. Oats are firm, but quiet at late rates for English. Foreign sorts are ½d lower, and very slow. Oatmeal steady, with a moderate inquiry at last market day's prices.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Transactions in wheat to-day represented what is required for present needs. There is no disposition on the part of millers to extend buying, and we note a dull tone, at former cost. Barley of best quality is in fair request up to about previous value. Oats have slightly relapsed, but holders consider they will not go cheaper to any extent. Maize, especially round corn, can be obtained at less money than recently had to be paid for it. Beans and peas are both a scarce supply, and consequently hold on well. We do not note any change in the value of rye, hemp, brank, lergum, and millet.

Maidstone, Thursday.—There was a little inquiry for seed corn, but otherwise the market was exceptionally slow, notwithstanding a good attendance. Quotations: White wheat, 29s to 31s; red ditto, 28s to 30s; malting barley, 28s to 34s; grinding ditto, 21s to 23s; oats, 20s to 25s; peas, 34s to 36s; white ditto, 37s; maize, 24s to 28s; beans, 36s to 40s; tares, 7s to 8s; English linseed cake, £8 10s to £9; foreign ditto, £8 to £8 10s; cotton cake, £4 15s to £5.

Manchester, Thursday.—A poor attendance. Trade slow for both English and foreign wheat at about unchanged prices. Maize quiet at about ½d lower. Oats, beans, peas, and barley unchanged, with a quiet consumptive trade. Flour very quiet at last week's prices.

Newport, Wednesday.—A thin attendance. No change in the price of wheat. Maize rather better, but not much done. Oats and barley, no change on the week. Flour, 23s per sack for fines.

Newcastle-on-Tyne, Saturday.—At our to-day's market wheat ruled steady at late rates. Maize slightly easier. Scotch oats favouring sellers. Beans 6d per qr dearer on the week. Peas dearer through scarcity. Barley quiet at late rates.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—About the usual attendance of farmers and millers. Business was exceedingly quiet. Samples of wheat and other grain was not plentiful; nevertheless, the demand was very slow, at scarcely the prices of last week. Feeding stuffs much wanted and dearer. Flour, dull trade. White wheat, 28s to 30s; red wheat, 27s to 28s 6d; barley, 26s to 32s; grinding barley, 22s to 26s; oats, 18s to 23s; old, fine, 24s; beans, 33s to 40s; flour, 21s to 22s; fine, 24s.

Norwich, Saturday.—There is no change in the wheat trade to-day, which remains firm at former prices. The weather continues mild, with occasional showers. Wheat, red, 28s to 28s 6d per qr, weight 63lb per bushel imperial. Corn inspector's return for the week ending March 1, 1902:—Wheat, 2,793, 26s 7d; barley, 3,622-5, 28s 7½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in fair supply, and a good trade resulted at last week's rates. Barley—Malting about cleared; grinding steady at previous values. Oats and beans small supply; steady trade at full rates.—ROBERT HUBBLE.

Peterborough, Saturday.—There has been a thin attendance at market, and a small supply of wheat, for which the trade was quiet and values unaltered. Very little doing in barley at late rates. Oats steady and unchanged.—THOMAS HILL AND SON.

Plymouth, Thursday.—Small attendance at our market to-day. Maize and barley 3d. lower. Oats quiet; demand unaltered.—ORLANDO DAVIS AND CO.

Reading, Saturday.—We had a very good attendance on the exchange to-day. There was only a limited supply of wheat on offer, and business was not very brisk. In cases where sales were effected, however, 27s to 29s per qr was obtained. The barley trade, except for seed purposes, is practically over now; but oats, which were in average supply, changed hands at former currencies.

Ripon, Thursday.—A brisk market, all inquiries being for seed purposes. Barley and oats have an upward tendency. Wheat, English (new), 28s 6d to 29s 6d; ditto foreign, 29s to 33s; barley, grinding, 22s 6d to 23s 6d; ditto, malting, 26s to 31s; oats, new, 22s to 24s; round maize, 24s to 26s per qr; beans, 1s per stone; bran, £5 15s to £6 5s per ton.

Romford, Wednesday.—Wheat trade firm at last week's prices. Only a small supply on offer. Red wheat, 27s 6d to 28s 6d; white wheat, 29s to 30s per qr.

Sheffield, Tuesday.—There was a better attendance at to-day's market. Prices of wheat unaltered. Oats being scarce, commanded better prices. Beans easier. Maize and barley without change. Quotations: Wheat, white, 29s 6d to 30s 6d; ditto red, 29s 6d to 30s 6d per 504lb; oats, new white, 21s 6d to 22s 6d; ditto new black, 20s to 21s per 336lb; barley, grinding, 22s to 23s; ditto malting, 28s to 32s per 448lb; peas, grinding, 32s to 34s; ditto blue, 53s to 80s per 504lb; beans, Egyptian, 36s to 36s 6d; ditto English, new, 37s to 37s 6d per 532lb; Indian corn, small, 23s 6d to 25s; ditto American mixed, 27s 6d to 28s per 480lb.

Spalding, Tuesday.—All kinds of corn in short supply, and a rather thin market. Wheat firm at 27s 6d to 29s per qr. Oats rather slow at 21s to 22s per qr.

Stamford, Friday.—Small quantity of wheat on offer, and prices were unchanged at 27s to 28s 6d. Good show of seed barley, which was fully 2s dearer. Very little malting barley shown. Oats, 22s to 24s 6d; seed oats, 26s. Small supply of beans, which sold at 32s to 35s. Maize about unchanged.

Stockton, Wednesday.—There was very little English wheat on offer, which made up to 30s per qr. The foreign wheat market keeps very quiet. Strong red wheats firm at last week's prices. White wheats 3d to 6d easier. Maize very dull and 3d to 6d lower on the week. Oats easier. No malting barley showing

Sunderland, Saturday.—Little grain offering. Wheat rather easier. Barley and oats dull. Arrivals coastwise:—Wheat, 740 qrs; foreign, nil.—E. AND F. RICHARDSON.

Winchester, Saturday.—English wheat short supply; last week's prices. Maize 3d cheaper. Barley and oats unaltered. Flour fair demand; late rates.—FEAR, COLEBROOK, AND CO., LIMITED.

Wisbech, Saturday.—A short supply of grain. Wheat firmer, millers giving 6d more for special lots. Oats, 22s to 24s. Barley, 27s to 30s. Beans, 34s to 38s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—A fair attendance and steady trade. Quotations: Wheat, new, 12s 6d to 13s per 216lb; oats, old, 15s 6d to 16s; new, 12s to 13s, beans, old, 15s 6d to 16s; new, 14s 3d to 14s 9d per 196lb; barley, 31s to 32s per 448lb; maize, new, 25s to 26s per 480lb; old, 27s 6d per 480lb.

Worksop, Wednesday.—Moderate attendance; small show of grain. Slow trade. White wheat, 28s to 29s; red wheat, 27s to 28s; best barley for seed, 28s to 32s; secondary, 26s to 28s; grinding barley, 24s to 26s; white oats, 23s to 25s; black oats, 22s to 24s; maize, 24s to 26s per qr.

Wakefield, Friday.—With diminishing supplies of English wheat and firmer American advices, the trade is gradually developing a steadier tone, and though we cannot call prices quotably higher, selling pressure has vanished, and there is more inclination shown to operate. Malting barley slow and unchanged. Feeding stuffs quiet.—DUNNS AND CO.

Wakefield, Friday.—There is only a small business passing on our market to-day in wheats, and about last week's prices are obtained. Malting barley offering at about late rates, with but few buyers. Maize 3d per qr lower, and other feeding stuffs unaltered.—MICHAEL SANDERSON AND SON, LIMITED.

Worcester, Saturday.—Quiet for all kinds of grain. Only a moderate supply of English wheat, and trade was slow at last week's prices. Grinding barley firmly held. Oats and beans unchanged.

York, Saturday.—Wheat was scarce, and sold readily at last week's prices. Malting barley appears to be nearly finished, and prices were rather high. Oats firm and scarce. Rye, 8d per stone; beans, 11d per stone.

FOREIGN.

Hamburg, Saturday.—Weather frosty in the early part of the week, mild and rainy towards the end. There is more firmness in our market, with a slightly improved demand. The imports during the week amounted to 12,120 tons wheat, 7,686 tons rye, 9,589 tons barley, 15,319 tons maize. American hard winter wheat, No. 2, is held at 29s 3d, Northern Spring No. 2 at 28s 3d, fine River Plate on the spot at 29s 3d per 480lb; Walla Walla May delivery at 29s 9d to 30s, spot 30s 6d per 500lb. Rye firmer, offers from Russia having decreased, and 9 15-20 Odessa Nikolajef April shipment is held at 23s 3d per 480lb. Middling qualities of malting barley are freely offered; white fine sorts continue scarce. Good saal is held at 30s 6d to 32s, fine at 34s 6d to 36s. Bohemian and Moravian at 31s to 34s, Russian and Mecklenburg at 26s 6d to 30s per 448lb f.o.b. Russian and Danubian feeding barley is selling at 18s to 18s 6d per 400lb c.i.f. Hamburg. Maize is meeting a fair sale: Odessa and Danubian March-April shipment at 21s 3d to 21s 6d, Turkish at 22s 3d to 22s 6d per 480lb; mixed American is held at 25s 9d per 480lb.—JOHN TATLOCK.

Paris, Wednesday.—At the opening of the native wheat market holders manifested some resistance to abate their prices, but were unable to maintain them in presence of the almost complete indifference of buyers. In short, the tendency has shown no improvement to-day, transactions being apparently unchanged since last week. Choice red, appreciably unchanged since last week. Choice red, 36s 6d to 36s 11d per 480lb. The flour market was supported at the opening, and closed with an average improvement of 5s. to 10s. at the following prices: March, 25s 10½d to 26s 2d; April, 26s 5d to 26s 8d; May-June, 26s 10½d to 27s 2d; and May-August, 27s 2d to 27s 5d per 280lb. Trade is still very brisk in consumption marks flour among dealers and bakers, and prices remain unchanged. Quotations are as follow: Choice marks, 30f. to 30f.50 (30s 6d to 30s 11d); first marks, 29f.50 to 30f. (29s 11d to 30s 5d), good marks, 28f.25 to 29f.50 (28s 8d to 29s 11d); ordinary marks, 27f.50 to 28f.75 per 100 kilos (27s 11d to 29s 9d per 280lb). Transactions in rye are still insignificant, the inactivity which prevails in the wheat trade having an unfavourable influence upon the value of this cereal, which, in spite of still meagre offers, has again lost a few centimes on the week. Buyers will not exceed 25s 8d per 480lb. The situation of oats remains the same, except on the term market, where uncovered sellers are repurchasing, which thereby provoked a firmer tone. Here trade was a little quieter, with a tedious trade and restricted offers. Quotations are as follow: Grey Beauce, 24s 11d to 25s 3d; white, 23s 2d to 24s 8d;

red, 24s 8d to 24s 11d; black from the Central Provinces, 25s 3d to 25s 6d; smal Picardy, 24s 8d; In., 24s 1d to 24s 4d; white Libau, 23s 6d to 23s 9d; black, 24s 1d to 24s 4d; and Swedish, 25s 3d to 25s 6d per 320lb. Trade in barley is quiet and values unchanged. Prices in Beauce vary from 23s 11d to 24s 8d, according to quality. Champagne asks 23s 11d to 23s 4d. Here the tendency was supported for grinding and feeding corn, and unaltered for malting sorts, prices being quoted as follows: 17f.50 (25s 4d) for choice, and 17f.25 (25s) for good malting; grinding, 16f.25 to 16f.75 (23s 7d to 24s 3d); and feding, 14f.75 to 15f.50 per 100 kilos (21s 5d to 22s 6d per 400lb). Owing to the scarcity of offers and a rather important demand, the tendency of buckwheat is still firm, and a rather perceptible advance in prices has taken place, the quotation standing at 27s 10d per 480lb.—*Dornbusch*.

Miscellaneous ... 20,000	10,000	11,000	20,000	10,000
Total 775,000	134,000	375,000	153,000	145,000

THE BALTIC.

The sales of wheat cargoes last week were not very numerous, and prices were mostly in favour of buyers. There were three arrived cargoes sold—Australian at 30s., Californian at 30s. 1½d., and No. 2 Hard Winter at 28s. 9d. per quarter. The sales of cargoes on passage included Californian at 29s. 3d., Walla-Walla at 29s., Blue Stem at 29s. 6d., Australian at 29s. 9d., and Argentine at 28s. 9d. per quarter. Sales of futures included No. 1 Northern at 29s. 4½d., No. 1 Northern Manitoba at 29s., No. 2 Hard Winter at 28s. 9d., and No. 2 Northern Manitoba at 27s. 4½d. per quarter.

Maize cargoes have been very weak. Odessa has been pressed on sale at 20s. 6d. on passage, Argentine at 21s. 3d. for May shipment. American is not offered.

Barley has made 18s. 9d. for a cargo on passage from Caucasia. Oats have realised 17s. 9d. for white Libau, and 19s. 3d. for Gothenburg. Other cargo sales include Caucasian rye at 24s., Argentina sorghum at 18s. 9d., Egyptian beans at 29s., and No. 2 Canadian peas at 33s.—all per quarter.

Dense fog in the Channel has delayed ships' arrivals, but five wheat and two barley-laden vessels have got into port during the past week. All seven ships were from California.

BUTTER.

Tuesday.—Bedale: 1s 8d to 1s 9d per 24oz roll. Gainsborough: 1s 3d per lb. Settle: 1s 1½d to 1s 2½d per lb. Spalding: 1s 1d per lb. Stone: 1s 3d to 1s 4d per lb. Leeds: York lump, 15s to 15s 6d per stone; long rolls, 1½lb, 1s 10d to 2s; fresh, 1s 3d to 1s 4d per lb.

Wednesday, Barnsley: 1s 3d to 1s 4d per lb. Boston: 1s 1d to 1s 2d per lb. Colne: 1s 3d per lb. Goole: 1s 1d per lb. Keighley: Wholesale, 1s 2d; retail, 1s 3d per lb. Kirby Moorside: 1s 2d to 1s 3d per lb. Knaresborough: Wholesale, 1s 2d; retail, 1s 9d to 1s 10d per 24oz roll. Louth: 1s 1d per lb. Market Weighton: 1s per lb. Masham: 1s 7d to 1s 9d per roll of 24oz. Northallerton: 1s 8d to 1s 10d. Stockton: 1s 2d to 1s 4d per lb, Worksop: 1s 2d to 1s 3d per lb. Ipswich: 1s 3d to 1s 4d per lb. Hereford: 1s 4d to 1s 5d per lb. Uttoxeter: 1s 3d to 1s 4d per lb. Dorchester: 1s to 1s 3d per lb.

Thursday.—Devizes: Milk butter, wholesale, 1s 1d to 1s 2d per lb; retail, 1s 2d to 1s 3d. Brigg: 1s 1d to 1s 2d per lb. Driffield: 1s per lb. Penistone: 1s 2d per lb. Ripon: 1s 8d to 1s 11d per roll of 24oz. Scarborough: 1s 4d per lb. Wetherby: 1s 3d to 1s 4d per lb. Kidderminster: 1s 2d to 1s 3d per lb. Wellington: 1s 3d to 1s 4d per lb.

Friday.—Easingwold: 1s to 1s 2d per lb. Grimsby: Danish, 116s to 120s per 112lb; Dutch, 110s to 112s; Colonial, 106s to 112s. Helmsley: 1s 2d to 1s 3d per lb. Leyburn: 1s 6d to 1s 7d per roll of 24oz. Lincoln: 1s 1d to 1s 3d per lb. Otley: 1s 9d to 2s per roll of 24oz.

Saturday.—Appleby: 1s 2d to 1s 4d per lb. Berwick: 9d to 1s per lb. Carlisle: 1s 2d to 1s 3d per lb. Doncaster: 1s 3d to 1s 4d per lb. Grantham: 1s 2d to 1s 3d per lb. Howden: 1s 2d per lb. Lancaster: 1s 3d to 1s 3½d per lb. Malton: 1s 2d per lb. Pontefract: 1s 4d per lb. Retford: 1s 2d to 1s 4d per lb. Stokesley: 1s 2d to 1s 3d per lb. Whitby: 1s 3d per lb. York: 1s 2d to 1s 4d per lb.

WOOL

London, Friday.—English—per pk. of 240lb.—Fleeces, S. Dn. Hggs, £7 to £8 10s; half-bred hoggs, £6 to £6 10s; halfbred wethers £5 to £6; Kent fleeces £5 to £6; South Down ewes and wethers £7 to £8 10s; Leicester do, £5 to £5 10s. Colonial—per lb.—Vic—Fleece, super, 1s 5d to 1s 7d; scoured good, 1s 7½d to 1s 8½d; scoured average, 1s 6d to 1s 7d; greasy average to fair, 10½d to 11½d; N. S. W. scoured average, 1s 3½d to 1s 4d; greasy average, 8d to 9d; S. Australia, greasy average, 6½d to 7d; N. Z. scoured average, 1s 4d to 1s 5d; grease average, 8d to 9d; Cape scoured sup., 1s 5d to 1s 6d; fleece average, 7d to 7¼d; greasy average, 5½d to 6½d; Natal scoured, 1s to 1s 1d; greasy average, 6½d to 7d; Crossbreds—Grs.—Vic. good to super, 10½d to 11½d; New Zealand fine, 8d to 9d, do medium, 4½d to 5½d; do coarse, 4d to 4½d.

Canterbury, Saturday.—No improvement, and it is seldom that 6d per lb. can be realised. The more usual figures are 5½d for Kent fleeces, and 4d for lamb wool.

POULTRY AND PROVISIONS

Smithfield, Saturday.—Moderate supplies, but very slow sale. Yorkshire fowls, 3s to 3s 6d; Boston, 2s 6d to 3s; Essex, 2s 9d to 3s 3d; Surrey, 3s 6d to 4s 6d; Sussex, 3s 3d to 3s 9d; Welsh, 2s 3d to 2s 9d; Irish, 2s to 2s 6d; cock turkeys, 6s to 7s; hen, 4s to 4s 9d; country ducks, 3s 6d to 4s 3d; Bordeaux pigeons, 10d to 1s; feathered, 7d to 9d; quail, 10d to 1s 2d; wild rabbits, 11s per dozen; goslings, 6s 6d to 8s; wild ducks, 1s 6d to 2s; widgeon, 1s 2d to 1s 6d; pintail, 1s to 1s 6d; teal, 10d to 1s 3d; woodcock, 2s to 2s 6d; snipe, 6d to 9d; golden plover, 8d to 10d; black, 5d to 6d; Russian game, cock capercailzie, 2s to 2s 6d; hen, 1s 9d to 2s; blackgame, 1s to 1s 2d; partridges, 1s to 1s 2d; ptarmigan, 10d to 1s; brown hares, 1s 6d to 2s; white, 1s 2d each.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The wheat fields show a better colour since the sharp frosts of February gave place to milder conditions. They are evidently recovering from the nasty changes of thaw and biting cold, and if the month prove dry, without being too bitter, the aspect at Easter will be good. Barley sowers will also welcome this type of weather, but by April, at this rate, the deficiency in the rainfall will have become extremely serious, so much so indeed that nothing but plenty of rain in April and May will be able to give us full crops. The very dry state of the land is not encouraging to oat sowers, and the present promise is of an increased sowing of barley. We do not hear of spring wheat being sown anywhere except in parts of Devonshire, where it is traditional to sow wheat in March. Some farmers speak of sowing linseed a little later on, but despite the excellent price made for this staple in 1901, we do not apprehend any great revival of its cultivation. Not only does it exhaust the soil to a notable degree, but its price here is absolutely at the mercy of Argentina and India. When these countries have good yields the price of linseed in England is ruinously low. And Argentina, be it noted, has shipped 600,000 qrs. of the article in the past six weeks.

The Australasian wheat crops are cabled as follows:—

	Qrs.
Australia	5,950,000
New Zealand	510,000
Total	6,460,000

The estimated requirements are 4½ millions for home wants and ½ million for the Cape, leaving 1,460,000 qrs. available for shipment to England and Europe. Of this quantity 660,000 qrs. are already on passage, leaving 800,000 qrs. to be shipped in the next nine months.

Mr. Thorburn, Financial Commissioner of the Punjaub, takes a gloomy view of India and the crops there. Irrigation will not do anything, and reafforesting bare lands would not be, he thinks, any great gain. The production of food increases, but it must needs increase slowly. Population increases, even in "famine" years, less slowly, and poverty is in his opinion far more severe among "the real poor" than it was even ten years ago. The proportion of poor folk whose poverty reaches the stage of chronic underfeeding is steadily rising and as the level of robust health falls the ability to cultivate the soil with due effect falls also. Thus there is a heavy set back to the drag upon all progress in India, and the Commissioner foresees a day when the North will export as little grain, even in a good year, as is already the permanent state with the South. It may be added that, as the present promise of the growing crops in India is much below the acreage, 1902 is not likely to pass without the serious points raised by Mr. Thorburn being prominently before the British public. It is difficult, however, to believe that the taxes in India are excessive or unduly tell against agriculture. The United Kingdom's total taxes come to £1,000 per square mile, those of India to £1 per square mile.

Imports of foreign grain and flour into the United Kingdom for the first half of the cereal year (September 1 to February 28) were as follows:—

	Qrs.
Wheat	7,218,000
Flour	3,467,000
Breadstuffs	10,685,000
Barley	4,335,000
Oats	3,464,000
Maize	5,397,000
Beans	262,000
Peas	244,000

The totals of wheat and maize were below those of barley and flour above the average; the totals of pulse and oats may be considered about the mean.

February imports of oilseeds were 121,000 quarters of linseed, 17,000 quarters of rapeseed, and 80,000 tons of cottonseed.

The visible supply of wheat in merchants' hands is thus returned for the chief countries:—

	Qrs.
The United Kingdom	2,700,000
France	700,000
Germany	400,000
Russia	1,600,000
America	11,400,000
March 1, 1902	16,800,000
February 1, 1902	16,700,000
January 1, 1902	17,200,000

Farmers' holdings in the United Kingdom are reckoned at 2,409,000 quarters, as compared with 3,856,000 from January 1. The imports of the first week of March have been as follows:—

Wheat, 219,000qrs; a fair supply.
Flour, 120,000sks; a moderate supply.
Maize, 170,000qrs; under an average.
Barley, 91,000qrs; under an average.
Oats, 103,000qrs; under an average.

These figures ought to help holders and steady the market.

The following returns are for the half (cereal) year:—

Ports of the	Flour Imports: Cereal year, 1901-2. Half-year, Sept. 1 to Feb. 28. Sacks.
1. Thames	2,376,000
2. Mersey	1,654,000
3. Severn	425,000
4. Clyde	1,193,000
5. Forth	288,000
6. Humber	109,000
Total	6,045,000

These receipts include British as well as foreign, if arriving by sea (coastwise), but it is practically only London which gets any large proportion of seaborne flour from other parts of the kingdom.

London was greatly over supplied with flour in December last, and this has made January and February markets peculiarly difficult to move. London monthly receipts of flour from all sources are reckoned to average 349,000 sacks, so that four months out of the past six have been over supplied.

The Thames estuary receipts have been:—London, Rochester, Tilbury, etc.—

	Sacks.
September	277,000
October	296,000
November	448,000
December	600,000
January	372,000
February	383,000
Total	2,376,000

Supplies on passage on the 8th included the following quantities of wheat:—

	Qrs.
Californian	2,300,000
American	200,000
Argentine	200,000
Russian	70,000
Indian	140,000
Australian	660,000
Other countries	20,000
Total	3,590,000

The total quantity of maize on passage is 440,000 quarters against 630,000 quarters a year ago, that of barley is 545,000 quarters against 355,000 quarters a year ago. The barley includes 420,000 quarters of Californian, the maize 400,000 quarters of round corn from Russia, Roumania, Bulgaria, and Turkey.

LONDON TERM MARKET.

This market is held twice a day, except on Saturday, when there is no afternoon call. The market is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals. The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

WHEAT.—Calls.	March. s. d.	June. s. d.	Aug't. s. d.
March 3 11 a.m.	6 1	6 2	6 3
4 p.m.	6 1	6 2	6 3
March 4 11 a.m.	6 2	6 2	6 3
4 p.m.	6 2	6 2	6 3
March 5 11 a.m.	6 2	6 2	6 2
4 p.m.	6 2	6 2	6 2
March 6 11 a.m.	6 2	6 2	6 2
4 p.m.	6 2	6 2	6 2
March 7 11 a.m.	6 2	6 2	6 2
4 p.m.	—	6 2	6 2
March 8 11 a.m.	—	6 2	6 2
To-day noon	6 1	6 2	6 2

The market for maize futures is dull at 4s. 4d. per cental for March, 4s. 5d. for April, 4s. 6d. for May, and 4s. 7d. for June delivery. Depression on these figures should at least be abating.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100 lb. We do not quote fractions of a penny per cental. The maize quoted is fair average quality from the United States.

The deposit required from members of the Term Market has been fixed at £50 minimum and 1s. per quarter margin on any purchases above 1,000 quarters.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

LONDON TOP PRICE FLOUR.

OFFICIAL PRICES.

Cereal year commencing 1st September, 1901.

	s.	d.
September 2 (per sack)	29	0
,, 28 ,,	28	0

(No official change since last date given.)

THIS DAY'S MARKETS

MARK LANE, MONDAY.

[FIRST REPORT.]

English wheat to-day was the turn in buyers' favour, but the prices quoted do not admit of actual change. Foreign wheat was rather lower for all the principal American descriptions, and these now predominate. There are very scanty offerings of Indian, Argentine, and Russian. New Zealand approximates in price as in quality to the English samples. Maize was a trifle lower to-day for round and flat, but yellow was too scarce to be quoted. Barley was lower for ordinary brewing types, but fine seeding barley at the top of the price list and grinding barley at the bottom were steady in value and demand. Oats were a very disappointing trade. Tares were rather dearer on the week, but linseed and cottonseed were irregularly cheaper. Linseed was depressed for the Argentine type, but not for Indian.

CLOSE OF THE MARKET.

THE MARKET CLOSED STEADIER FOR WHEAT, BUT DECIDEDLY DEPRESSED FOR SPRING CORN.

THE FLOUR TRADE.

MARK LANE Monday

There were buyers of country flour at sixpence decline on the week and of London makes at 3d. reduction, but where old prices were insisted on the sales were extremely limited. American sorts were rather cheaper, both for bakers' grades and for fancy flour. Australian flour was fairly steady, and Hungarian was above buyers' ideas. Fine Russian made 28s. to 30s. per sack, Cascadia 22s. to 23s.; the latter is a somewhat enhanced value. The chief sorts of milling offals favoured buyers, but Messrs. Bawcombs' circular indicates a sound reason for hoping that this market will steady itself shortly. Flour closed a little firmer on improved cables from the United States.

THE BALTIC, 1 p.m.

STATE OF TRADE.

There is a better inquiry for wheat cargoes this morning, and the decline allowed last week has evidently served its purpose in stimulating business. Barley and oat cargoes are still neglected, and round maize is decidedly difficult to place. Cargoes of beans and peas for spring shipment are the subject of an improved inquiry.

BUSINESS DONE.

WHEAT.—Californiah, 29s 6d, prompt shipment; Walla Walla, 29s 6d, prompt shipment; Victorian, 30s 3d, prompt shipment; South Australian, 30s 3d, on passage; Argentine (finest), 30s, on passage; Argentine (f.a.q.), 29s, prompt shipment; Russian Winter, 30s, prompt shipment; Odessa Chirka, 29s, prompt shipment.

MAIZE.—Argentine, 21s 6d, May shipment.

BARLEY.—Roumanian, 18s 6d, on passage.

OATS.—Konigsberg, 20s, March shipment.

BEANS.—Egyptian, 28s 9d, May shipment.

PEAS.—Canadian No. 2, 32s 9d, April shipment; Calcutta green, 23s 6d, May shipment.

LINSEED.—Argentine, 49s 6d, arrived.

HOPS.

London, Monday.—W. H. and H. Le May report: The trade during the past week has been quiet, stocks are in a very narrow compass, and prices are firm.

POTATOES.

Great Northern, Saturday.—A good supply, for which fair demand. Scotch Maincrops, 90s to 95s; Lincoln Up-to-dates, 60s to 65s; Maincrops, 80s to 85s; and Yorkshire Up-to-dates, 70s to 75s per ton.

Borough, Saturday.—Supplies good, but demand without increase. Scotch Maincrops (Dunbars), 80s. to 90s; Blackland Reading Giants, 40s to 45s; Blackland Up-to-dates, 45s; Lincoln (Silts), 55s to 60s; Gartons, Blacklands, 40s per ton.

Spitalfields, Saturday.—Supplies show no diminution, and with no recovery in demand business remains in a very slow condition. Best Lincoln Up-to-dates, 55s to 5s; Blackland, 40s to 45s; Wisbech, 50s to 60s; Scotch, ditto, 60s; Scotch Maincrops (grey soil), 70s; Lincoln Maincrops, 75s to 85s; Reading Giants, 40s; Blackland Gartons, 40s per ton.

GRAIN AND FLOUR FACTORS REPORTS.

Small arrivals; wheat and flour firm, at full prices. Maize 9d. to 1s. per quarter lower. Barley 3d. per quarter lower. Oats quiet, unchanged.—COVENTRY, SHEPPARD AND CO.

Milling offals are slow, prices being about the same as last week. Mills are not making much offal, on account of the bad flour trade, hence there is no great pressure to sell.—J. BAWCOMB AND CO.

Flour.—A quiet trade, at about 3d. advance on the week.—T. S. MEDILL AND SONS.

Offals.—The demand for bran continues dull. No improvement to report as to prices.—GREENHILL BROTHERS (Belfast).

Flour.—Quotations of spot flour continue about the same. Trade, however, extremely dull, and very little business being done. Values on spot are as follows:—1st Spring Patents, 24s. 9d. to 25s. 3d.; 2nd Spring Patents, 23s. 9d. to 24s. 3d.; American Winter Patents, 24s. 9d. to 25s. 3d.; Extra Fancies, 23s. to 23s. 6d.—GREENHILL BROTHERS (Belfast).

Flour.—Arrivals continue small. Prices are unchanged. Grain.—Flat and round corn, after being firmer, are now slightly in buyers' favour. Beans are again 3d. per boll up. Grinding barley is also 1½d. per boll dearer. Pease are in retail demand. Oatmeal and oilcake quietly steady. Mill Stuffs.—Bran and thirds unchanged.—MCKINNON AND MCDONALD (Glasgow).

FEEDING STUFFS.

London, Monday.—Linseed cake.—Spot trade dull. Prices unchanged. There is a little more doing in forward shipment of American, which may be bought at 7s. 6d. under spot price. Decorticated cotton cake and meal, nothing doing. London and Egyptian about unchanged. Linseed unchanged on the week.

ROBERT AND JOHN HEWETSON.

SEEDS

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report only a moderate business now doing. White cloverseed is cheaper, but fine samples of red command former terms. There is no quotable alteration in either alsyke or trefoil. Rye grasses meantime continue to favour buyers, whilst for sainfoin the sale is small. Timothy, cocksfoot, and lucerne are held with firmness, but less money is accepted for tares. Mustard and rapeseed move off slowly at previous currencies. Linseed is quiet. With regard to canary seed, of which the supplies are getting into narrow compass, some large transactions are reported. The unprecedentedly low rates at which fine white millet is now obtainable attract attention. Peas and Haricots keep steady alike in value and demand.

London, Monday.—We had a fair attendance to-day, and a moderate demand for all articles of farm seeds, without quotable alteration in any article. The supply of English red clover continues to dwindle.—JOHN PICARD AND CO.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 1,470 bales bacon, and from foreign ports 9,970 bales bacon. Bacon—At the lower range of prices current last week there was an improved demand for all bacon, and the market closed firm on Friday at the following quotations:—Irish, 52s to 58s up to 61s; Danish, 50s to 53s up to 55s; Canadian, 44s to 50s up to 53s. Butter—The butter market was very quiet, indeed, and lower prices were again current for nearly all descriptions; Danish, 110s to 112s up to 113s; Colonial, 102s to 108s up to 110s. Lard—Unchanged in prices, with a fair demand; Irish bladders from 54s to 63s; American pails and boxes from 48s to 50s.

CORK BUTTER.

Calves	5	5	10
Pigs	50	50	40
Milch cows	50	60	70

Quotations per 8 lbs. (sinking the offal).

ENGLISH.

	Inferior.	Second.	First.
Beasts	2s. 5d. ..	3s. 10d. ..	4s. 8d.
Sheep	3s. 10d. ..	5s. 0d. ..	5s. 8d.
Lambs	6s. 2d. ..	7s. 0d. ..	8s. 0d.
Calves	6s. 2d. ..	7s. 0d. ..	8s. 0d.
Pigs	2s. 10d. ..	3s. 10d. ..	4s. 6d.

Milch cows, per head, £16 to £23.

British arivals include as follows:—Scotland, 38; Eastern Counties, 901; Midland and Home Western Counties, Devon, 30; Ireland, 93.

In the beast market to-day there was an increase in the supply compared with Monday last, and consisted chiefly of fat beasts from Norfolk. Trade, owing to less demand, was extremely slow, with a slight decline in value, but a clearance is anticipated. Fat butchering cows and bulls, being in steady request, were firm in value. Rough cattle met with little inquiry.

The following are top quotations per 8lb (sinking the offal):—

	To-day.	March 11, 1901.
Scotch	4s 6d to 4s 8d	4s 4d to 4s 6d
Devons	4s 6d to 4s 8d	—
Norfolks	4s 7d to 4s 8d	4s 4d to 4s 6d
Lincolns	4s 4d to 4s 6d	4s 0d to 4s 2d
Irish	4s 2d to 4s 4d	4s 0d to 4s 2d
Fat cows	3s 10d to 4s 0d	3s 6d to 3s 8d

In the Sheep Market there was an increase in the number penned compared with Monday last; for lambs, of which there was a large proportion, trade was firm at late rates. Both wethers and ewes were in good request, in many cases higher rates by 2d per 8lb being obtainable. The supply included 430 Scotch and 5,340 from the Eastern counties.

Undermentioned quotations are at per 8lb (sinking the offal), and are for the best of each class penned:—

	To-day.	March 11, 1901.
7½ to 8 st. Downs	5s 6d to 5s 8d	6s 0d to 6s 2d
9 st. Downs	5s 2d to 5s 4d	5s 10d to 6s 0d
10 st. half-breds	4s 10d to 5s 0d	5s 6d to 5s 8d
12 st. Lincolns	4s 8d to 4s 10d	5s 4d to 5s 6d
10 st. Down ewes	4s 6d to 4s 8d	5s 0d to 5s 2d
11 st. half-bred do.	4s 3d to 4s 4d	4s 8d to 4s 10d
5 st. Down lambs	7s 10d to 8s 0d	7s 10d to 8s 0d
5 st. Dorset do.	6s 6d to 6s 8d	7s 6d to 7s 8d

Calf trade nominal.

For pigs there was a slow trade; best small breeds, however, sold readily at 4s 6d per 8lb.

London (Central), Monday.—Good supplies available; trade rather slower. Beef carcases, 3s 11d to 4s; hind-quarters, 4s 4d to 4s 8d; roastings, 5s 4d to 5s 8d. Sheep—Ewe, 3s to 3s 4d; wether, 4s to 4s 4d; hind-quarters, ewe, 4s to 4s 4d; wether, 5s to 5s 4d. Pigs—Large, 3s 8d to 4s; small, 4s to 4s 4d.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,450. To-day's supply compared with Monday last, showed an increase of 385, and consisted of 1,228 from the United States and 222 from Canada, quality being below the late average. Trade was of a rather slow nature, with a slight downward tendency in value at following quotations per 8lb (offal given in): 90-stone States, 4s 5d; second quality, 4s 2d; Canadians quoted at from 3s 8d to 4s 2d. Sheep numbered 1,184 from the United States, and met with a fairly steady trade. Best pens made 4s 4d per 8lb, to dress from 64lb to 68lb. On Saturday beasts numbered 752 from the United States, and with a firm trade, were quoted at from 4s 3d to 4s 6d per 8lb. Sheep totalled 1,291 from the same county, and met a slow tarde at from 4s 3d to 4s 4d per 8lb (offal given in). The following were the numbers on offer on the corresponding day last year, with the current top rates: Beasts, 978, 4s 1d to 4s 2d pe 8lb, to dress from 680lb to 720lb. No sheep arrivals.

Liverpool, Monday.—There were fewer cattle in market to-day; demand rather better, but prices unchanged. Sheep—Supply larger; notwithstanding this, trade was good at higher rates for all classes. Beef, 6½ to 5d per lb; mutton, 8½d to 6d per lb. At market, 1,085 cattle and 4,417 sheep.

Live Weight Quotations.

Department of Agriculture and General Instruction for Ireland.

ROBSON'S CATTLE MART, BELFAST, HELD ON 4TH MARCH

The following returns are those of actual sales made in the markets referred to, the stock being weighed either before or after sale, for the week ending March 8th, 1902

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London,

At the Islington Cattle Market on the chief market day of the week (Monday) business, so far as fat beasts was concerned, proved of a dull and heavy nature, especially at the start, when higher rates were unsuccessfully demanded; in fact, as sales progressed, slightly lower rates had to be accepted, but the decline was not sufficient to alter late quotations. A clearance was made on Thursday, but few sales were recorded. Of fat butchering cows the supply was much larger, but there being more demand, especially by country buyers, trade ruled firm, best quality readily making 2d. per 8lbs. more money, other grades being steady at last week's prices. For fat bulls and rough cattle there was less inquiry, rates consequently being easier. At Deptford trade on all three market days, viz., Monday, Wednesday, and Saturday, trade was of a rather slower nature, but last week's quotations were well upheld. The total number of beasts on offer at both markets was 3,897, as against 3,104 during the previous week, consisting of 1,160 British (increase 150) and 2,737 foreign (increase 643). These latter comprised 2,595 from the United States and 142 from Canada. The following were the top rates paid per 8lbs. (sinking the offal):—90-stone polled Aberdeens, 4s. 8d.; 90-stone polled Norfolks, 4s. 7d.; 100-stone Shorthorn ditto, 4s. 6d; 100-stone Lincolns, 4s. 6d.; 95-stone Irish, 4s. 4d.; 90-stone States, 4s. 4d. to 4s. 5d.; 85-stone Canadians, 4s.; 100-stone fat cows, 3s. 10d. to 4s.; 100-stone fat bulls, 3s. 4d. to 3s. 6d. The sheep trade at Islington, with a larger supply, was, for both wethers and ewes, of a firmer character, both in regard to tone and value, an early clearance of the latter being on both market days made. At Deptford rates also were steadier, but sales were rather slower. Some very choice Down lambs were on sale at Islington, and made 1s. per 8lb., but Dorset ditto met a slower trade. The total number penned at both markets was 10,847 (previous week 9,002), consisting of 8,610 British (increase 410) and 2,237 foreign (increase 1,435). These latter consisted of consignments from the United States. Best prices made per 8lb. as follows:—7½ to 8-stone Downs, 5s. 6d.; 9-stone ditto, 5s. 2d.; 8-stone Scotch, 5s. 2d. to 5s. 4d.; 10-stone Downs, 5s.; 10-stone half-breds, 4s. 10d. to 5s.; 12-stone Lincolns, 4s. 8d. to 4s. 10d.; 10-stone Down ewes, 4s. 6d.; 4½ to 5-stone Down lambs, 8s.; 5-stone Dorset ditto, 6s. 6d. Calves numbered 20, and pigs 35, for both of which trade was dull. Top value, former 6s., and the latter 4s. 6d. per 8lb.

Trade in the West.

The burst of bright, sunshiny weather with which we have been favoured during the past week has been a stimulus to business all round, of which the early spring fairs held within the last few days have had the benefit, and, although the trade can hardly be termed fast, still it was better, undoubtedly, under the genial influence of fine weather than it might otherwise have been. The milch beast trade continues to monopolise attention in most districts, where sales have been in active progress of late at uniformly high rates, which show no immediate prospect of declining. It is a long time since we remember a better trade for this class of stock, really good milchers fetching any price from £17 10s. up to £22 10s. each for reputable heifers, and from £12 to £16 10s. each. In-calvers, especially those shortly coming into profit, are likewise finding a very ready sale, those calving early commanding high prices. There has been no falling off either in the inquiry for barreners, which make capital prices; for those which will not be very long in coming out from £22 to £30 per pair for young well-fleshed bullocks, and from £17 to £20 10s. for older animals. Store bulls are likewise an exceptionally good trade for moderate-price animals, a rare Devon realising 23gs. at Maiden Newton fair on Thursday. Some little business is passing in store sheep, principally couples, which are selling from 45s. to 58s.; whilst store wether tegs sell from 35s. to 44s., which is the general run. In fat stock, bullocks maintain their recent firmness, and graziers seem rather inclined to hold out for even better prices than now rule than otherwise, good-class steers and heifers making £20 to £24 a-piece (or fully 11s. to 12s. per score); cows also selling well from 10s. to 10s. 6d. (or £14 to £19 10s. each), and veal seems to be well keeping in the wake of beef, as the best calvers are now making almost as much as they will do at any period of the season; best selling from £4 10s. to £6 10s. each (or little under 8d. per lb. for the best finished animals), the more ordinary grades making 6½d. to 7d. (or from 45s. to 75s.); rearers, too, are a good trade at from 20s. to 36s. each. Mutton is again rather depressed: wethers sell from 45s. to 53s. each, and ewes from 38s. to 47s. 6d. (or for the former about 7½d. per lb., and the latter 6½d. to 7d.—not more, if so much). The cold weather has militated somewhat against a very great demand for lamb, values in which just now are none too remunerative—about 8½d. or 9d. per lb. Pigs are certainly a comparatively better trade than lamb—that is, for all the neater weights, which are bringing for their owners from 10s. to 11s. per score, according to quality, and make an almost unlimited demand at the price.

Trade in Ireland.

It is getting rather monotonous to have to write the same stereotyped "a bad market again," but this is all that can be said of last Thursday's in Dublin. There was a falling away of 270 head of cattle on the previous week, but this was discounted by a limited attendance of both home and export buyers. Really choice beef was again very scarce, and the few beasts answering this description were keenly competed for, and brought the full rates of last market. For medium and rough cattle there was a very dull inquiry, and dull, dragging sale, the general opinion being that it was the very worst market of this year. Best ox and heifer beef made from 54s. 6d. to 57s. 9d., some extra choice lots making from 60s. to 62s. per cwt., the latter price being paid for half-a-dozen magnificent polled red bullocks, fed in the county Wicklow; good second-class beef, 48s. to 52s. 6d., and other descriptions from 40s. to 46s. per cwt. Sheep met with no better luck, the cattle trade being equally dull and unsatisfactory, the only exception being for choice Cheviot and mountain wethers, which were freely purchased at the full rates of last week. For anything else in the mutton line business was particularly dull and tedious, and a large number of sheep were left over unsold at the close of the day. Prime wether mutton was worth from 6½d. to 7½d. per lb., choice Cheviots making a farthing or half-penny more per lb; ewe, 5½d. to 6½d., and inferior sheep from 5d. to 5½d. per lb. Small to medium hoggets made from 27s. to 38s., and large, heavy ditto from 40s. to 52s. each. Lambs met with a very slow demand, at very irregular prices, medium fetching from 22s. to 30s., and choice from 34s. to 40s. each. Good, well-fed veal still a scarce commodity, and worth from 8d. to 9d. per lb.; coarse calves from 4½d. to 6½d. per lb. There were 1,546 head of cattle and 3,898 sheep on the market. Choice springers and new milch cows scarce, but demand was slow at from £18 to £20 for former and £16 to £19 for latter. Other qualities in large supply, but very difficult to dispose of. A large market of pigs, numbers being sent in by dealers who bought at Athy and Ballinasloe fairs. An exceptionally sluggish demand prevailed, and prices receded fully 2s. to 3s. per cwt. As compared with previous week-end, it was impossible to effect anything like a clearance. Best light-weight pigs made from 45s. to 47s. per cwt.; porkers, 48s.; and coarse, heavy pigs, from 30s. to 40s. per cwt., according to quality.

LONDON.

Islington, Thursday.—Supplies were again moderate and, as customary on this day, the bulk consisted of fat bulls and rough cattle. The demand was of a quiet character, but prices were unchanged. Fat bulls, 3s 6d to 3s 8d. Fair supplies of sheep met with quiet request, prices, however, being steady. 7½ to 8-stone Down wethers, 5s 4d to 5s 6d; 9-stone ditto, 5s 2d to 5s 4d; 10-stone half-breds 5s; 10-stone Down ewes, 4s 4d to 4s 6d; and 11-stone half-breds, 4s to 4s 2d. Calf trade and supply nominal. Pigs steady. Neat small porkers, 4s 6d to 4s 8d per 8lb, to sink the offal. Total supplies:—70 beasts, 820 sheep, 5 cows, 10 calves, and 15 pigs.

COUNTRY.

Basingstoke, Wednesday.—At Raynbird and Sons' sale yard there was a good attendance of buyers to meet a supply of 141 fat beasts, 52 calves, fat sheep, lambs, and 71 head of dairy and store cattle, for which the following prices were realised: Fat Shorthorn steers made up to £24 10s; heifers, from £20 15s; cows, up to £18 5s; Devon steers, £20; and Welsh runts, £16 to £17; fat calves, 65s to 112s 6d; small, 15s to 50s; dairy cows, up to £16; prime quality fat sheep, 46s to 54s; 13 months old ditto, 39s to 48s; fat sucking lambs, 27s to 37s; fat ewes, 38s to 48s; store tegs, 32s 6d. A good show of prime quality fat beasts, chiefly from local graziers, were cleared at about last week's figures. A shorter supply of fat sheep and lambs of an all-round better quality, and with a good attendance of buyers, met an improved demand, and a clearance effected, with the exception of a few lots of half-fat tegs. A consignment of 25 fat sucking lambs from W. Banon Simonds, Esq., were sold up to 37s; fat tegs from Mr. E. Wigg made up to 54s; fat two-tooth wethers from Mr. J. Brownfield, 57s., etc. With a larger supply of dairy cattle on offer, prices all round, with a slow trade, must be quoted considerably lower than last week. Store cattle continues a slow business. Fat calves are in demand, and meet a brisk trade. At the monthly sale of horses 24 lots were offered, some of excellent stamp, and commanded attention from local and distant buyers. Cart horses were sold at from 7 to 44gs. Ruling values: Best quality fat beasts, 6¾d to 7¼; second quality ditto, 6d to 6¼d; bulls, cows, and inferior beasts, 5d to 6d per lb; best quality fat sheep, 7d to 8d; second ditto, 6d to 7d; fat sucking lambs, 9d to 10d per lb; old rams, ewes, and inferior sheep, 5d to 6d; fat calves, 6½d to 8¾d per lb.

Boston, Wednesday.—A good show of cattle, but a quiet trade. Strong stores, £16 to £17; drapes, £12 to £14; in-calvers, £19 to £21; heifers, to £19; calves, 55s to 60s each; best beef, 7s to 7s 9d; cow beef, 7s to 7s 6d per stone; hogs, 36s to 40s each; best wether mutton, 7d to ½d; ewes, 5½d to 6d per lb.

Braintree, Wednesday.—For beef, good for prime quality; for mutton, improved; for pork, as last week. The general tone all round was good. Young sheep freely bid for, and best beef in demand. Store cattle, although scarce, found ready sale, and cows were in demand. Large hogs made good prices. Numbers penned: Beasts 56, fat sheep 130, hogs 75, store cattle 20, milking cows 12, calves 22.

Bristol, Thursday.—Beef in fair supply to-day, best qualities making 60s to 62s per cwt; secondary animals, 56s. Moderate supply of mutton, but quiet trade. Best light wethers fetched 7½d to 7¾d per lb; heavy wethers, 7d; ewes, 5½d. Pigs plentiful, baconers selling at 9s 6d per score; porkers, 10s 9d. Prices for store cattle for opening of season considered satisfactory.

Bury, Wednesday.—With a full attendance of buyers, trade ruled sharp, at a little more money for all descriptions, especially for the ripest cattle. Several lots of store beasts found buyers at late rates. Very short supply of fat sheep, which met a sharper trade, at more money for all descriptions of young sheep. Fat ewes also made more money. Grazing hoggets also sold at rather better prices than of late, prices ranging up to 38s for half-breds, and from 34s 6d to 31s for black-faced hoggets. Rather more fat pigs at market, and a sharp trade for all heavy weights.

Calne, Friday.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of the Back.	Price per Sc. s.	d.
6 sc. 10 lbs. to 9 sc. 10 lbs.	2½ in. and under ...	9	6
Under 10 sc.	Not exceeding 2½ in. ...	9	0
Under 11 sc. 10 lb.	Not exceeding 2¾ in. ...	8	6
Under 12 sc.	Not exceeding 3 in. ...		

—C. & T. Harris & Co., Ltd.

Cambridge, Monday.—Beasts 361, sheep 572, horses 21; beef, 7s to 8s; mutton, 4s to 5s. A few lots of store cattle; trade a little better. Fat beasts a good show; prices unchanged. Fat sheep a large supply; trade slow at less money. Stores only a few lots shown, and trade slow. Hay, straw, and roots short supplies, and trade good.

Canterbury, Saturday.—Fairly good trade; working tegs of the better class made 27s to 32s; very strong sheep forward in condition, 32s to 35s 6d; two-year-olds, 37s to 40s, and one pen of large fat wethers sold at 44s per head. A large number of cows and calves were also on sale.

Carlisle, Saturday.—The supply of Irish store cattle was similar to that of last week, consisting of about 300 heifers and stripping cows. The high price of fodder has so far acted as a deterrent in the trade, but there was an improvement to-day, the attendance being larger and trade more active. The quotations, according to the quality of the cattle, are similar to those at this time last year. Small heifers realised £8 10s to £10 10s; best heifers, up to £14 10s; stripping cows, £8 10s to £11 10s.

Chichester, Wednesday.—There was a much larger supply of fat stock than usual, and business for beef was on the whole good. Mutton, however, was rather dull, though without alteration in price. Veal and lamb were in fair supply, and met a steady trade without alteration in values. Store sheep were in smaller supply than of late, but trade was still characterised by extreme sluggishness, and the tendency of prices was in a downward direction. A good business was done in the pig department, where prices held their own.

Dorchester, Wednesday.—The market was again well supplied. A good tone pervaded business, and prices were well maintained. The beef trade keeps strong, the best bullocks now making 11s to 11s 6d per score. Mutton scarcely so good a trade as that for bullocks, though good nice-weight wethers are making 7½d per lb and over; ewes, 6d to 7d; cross-bred lambs, 8½d to 9d. Pigs, both porkers and baconers, fetched high rates, best porkers selling at 10s 6d to 11s per score, and baconers 9s 6d to 10s; heavy sows, £4 to £7 10s.

Dublin, Thursday.—Numbers in market:—Beasts, 1,546, decrease 269; sheep, 3,898, increase 36; calves, 35, decrease 3. Only the choicer descriptions of cattle maintained late rates. Other sorts met a slow and tedious trade, with prices more in favour of buyers. No material alteration in price of best suitable sheep for home trade. Rough and inferior qualities neglected. Shipping business almost nil. Cattle: Live weight (best), 32s to 34s 6d per cwt; others, 26s to 31s per cwt. Mutton, dead weight, 6d to 7½d per lb.—GANLY SONS AND CO.

Hereford, Wednesday.—Bullocks and cows, 757; calves, 195; sheep and lambs, 751; pigs (fat and sows), 49; sucking pigs, 3; pigs (stores, not more than ten), 315; pigs (stores, more than ten), 105; horses, 1; colts, 3. Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 7½d per lb; lamb, 9d per lb; pork, 5½d to 6d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report the number of fat cattle on offer was much the same as last week. Competition was sharp for all descriptions, and prices were very firm up to 9s per stone. Fat sheep were short, and sold without alteration; Suffolk shearlings, to 55s; ditto hoggetts, 51s 6d; half-breds, to 51s. An excellent show of grazing hoggets; those forward in condition fully maintained recent rates, and those with less condition advanced in value. Suffolks in nice condition made from 37s to 36s 3d, half-breds to 40s, others from 38s to 26s 3d. Fat and store swine came to hand in good numbers, and buyers were in strong force; a brisk trade was done, but prices were a trifle easier, except in the case of stores, which were dearer. For grazing cattle, with condition, there was more inquiry, but calves and yearlings were not much wanted. Home-breds made from £12 10s to £8 7s 6d, Shorthorns from £8 17s 6d to £7 7s 6d. A large entry of dairy stock, and several buyers present, but the high prices recently current were not maintained. Cows made from £18 15s to £13, heifers £17 5s to £10 10s. Numbers at sales and market:—Beasts 643, calves 80, sheep 2,237, swine 1,543, horses 19.

Leicester, Wednesday.—A good average supply of home-fed bullocks came to hand, generally in good condition, and with buyers and dealers well represented, trade was much brisker at an advance of 15s to 20s per head. Choice bullocks made 6d to 6½d, cows 5d to 5¾d, and heifers 6d to 6¾d per lb. Sheep were a full supply, and sold freely at 7½d to 8¼d per lb for choice lots; large sheep 6¾d to 7d per lb, and ewes 5¾d to 6d. Lambs were very firm at 1s per lb. Calves sold freely at 8½ per lb.

Norwich, Saturday.—The supply of store beasts here to-day was not large; the demand showed no improvement, and previous prices were barely maintained. Fat beasts, which were in large supply, moved off steadily at 7s 6d to 8s per 14lb. Store sheep were in fair supply; and keep prospects being better, there was a good demand at an advance of 1s to 2s per head on the week; keeping hoggets were quoted at from 28s to 40s per

head. Fat sheep, which were in pretty good supply, made 8s to 8s 6d per 14lb. Some moderate rains yesterday are calculated to improve keep prospects in Norfolk.

Newport, Wednesday.—Quotations were:—Best beef, 6½d to 6¾d per lb; secondary sorts, 6¼d to 0d; cows, 5½d to 6d; best wether mutton, 8d to 8¼d; ewes, 6d to 6¼d; lamb, 0d; veal, 8d to 9d. Porker pigs, 10s 6d to 11s per score; and baconers, 9s to 9s 6d. There was a small supply of sheep, and prices showed no upward tendency.

Romford, Wednesday.—Short supply of fat beasts, trade about the same. Best animals 4s 4d to 4s 6d, middlings 4s to 4s 2d per stone. Calves in very short supply, trade dear, at 5s 6d to 5s 8d per stone. Sheep in short supply, and trade better. best sheep 5s 4d to 5s 6d, and middlings 5s to 5s 2d per stone. A few lambs on offer, and made 7s 4d to 7s 6d per stone. Few store beasts on offer; fair demand. Pig market still closed.

Salford, Tuesday.—There was a smaller supply of cattle than last week. Trade ruled fairly good, and last week's prices were obtained. The supply of sheep was larger, but notwithstanding this, a good selling trade was experienced, and late rates were fully maintained. There was a good supply of calves, and a good demand for choice fat ones at last Tuesday's quotations. Quotations: Cattle, 4½d to 6½d; sheep, 6d to 8½d; calves, 5d to 8½d per lb. At market: Cattle, 2,327; sheep, 8,239; calves, 174.

Sheffield, Tuesday.—Fair show of milch beasts, but the sale was very slow. Best lots, £18 to £23; less desirable animals, £15 upwards.

Shrewsbury, Tuesday.—Pigs made fair prices. Cows with calves, and calves, in good demand. Trade slower generally. Quotations:—Beef, 6d to 6½d; mutton, 6½d to 7¼d; and veal, 7d to 8d per lb. Porket pigs, 9s 6d to 10s 6d; and bacons, 8s 6d to 9s 6d per score. Cows with calves, up to £23 15s. Hay, up to £5 s 6d; and straw, up to £4 7s 6d per ton. Clover, up to £5 7s 6d. Number offered: 882 cattle, 82 cows with calves, 444 sheep, 157 calves, 75 fat, 176 porket, and 464 store pigs.—B. R. CROXTON.

Spalding, Tuesday.—A small show of fat beasts and sheep. Beef trade slow, and decidedly lower than last week. Best, 7s 6d; cow beef, 7s per stone. Sheep trade good. 6½d to 7½d per lb being realised.

Stockton, Wednesday.—There were on offer 105 cattle, 21 calves, 270 sheep, 2 lambs, and 236 pigs. The show of best cattle was very small, and customers were few, prices ranging from 7s 6d to 8s; rougher kinds, 6s to 7s per stone. Calves met with a very good demand at 7d and 8½d sheep, 7½d; ewes, 5d to 6d; tups, 4d to 5d per lb; lambs, 36s to 38s each.

Thame, Wednesday.—Trade all round showed a great improvement from last Tuesday, and with a short supply of stock and a full attendance of buyers, competition was keen and a clearance readily effected. Mr. Bond's sale comprised 49 fat beasts, 80 fat sheep, 44 fat and weaning calves, 156 fat and store pigs, and 2 horses. Prices: Fat bullocks made £16 to £21; fat heifers. £14 to £21 12s 6d; fat tegs, 46s to 60s 6d; fat ewes, 38s to 46s; fat lambs, 39s; fat calves, £3 to £4 15s; cow calves, 23s to 62s; bull calves, 14s to 45s; fat pigs, 10s per score. Stores a better trade.

Wakefield, Wednesday.—A better tone prevailed, although there were rather more beasts and sheep than last week. Best beef, 6¾d; other qualities from 5d to 6½d; young sheep, 7¾d; other animals from 5¾d to 7¼d. Number of sheep, 3,118; beasts, 1,252.

Wolverhampton, Wednesday.—A moderate supply and trade in beasts; sheep small supply and slow trade; calves in moderate supply and good demand. Beef, 5¾d to 6¾d per lb, a few at 7d per lb; mutton, 6d to 8¾d per lb; calves, 8d to 10d per lb; pigs, bacon 10s 6d per score, porkets 10s 6d to 11s per score, sows 8s 6d per score.

Worcester, Saturday.—Steady trade for beef at full rates. Mutton slow and unaltered. Fat calves were in request, and store pigs sold well. Beef, 6d to 7d; mutton, 7d to 8d, and veal 9d per lb. Pork pigs, 10s; bacons, 9d to 9s 6d per score.

Worksop, Wednesday.—Very good show of stock, and fair trade, late rates being fully maintained. Best beef, 7s 3d to 7s 9d; secondary, 6s 6d to 7s 3d; per stone: best wethers, both clipped and in the wool, 6½d to 7¼d: ewes, 5d to 6d per lb.

FOREIGN.

Deptford. Wednesday. — Beast supplies to-day amounted to 920 head, against nil on Wednesday last, and consisted of consignments from the United States. Trade ruled slow, at 4s 2d to 4s 4d; exceptionally, 4s 5d per 8lb, to sink the offal. 194 United States sheep left unsold from Monday last were offered, and elicited no attention.

Yorkhill. Monday.—The usual weekly sale of United States and Canadian cattle was held to-day, when there were penned in the sheds 54 cattle landed by the Sarmatian (s), from Boston, and 198 by the Alcides (s), from St. John, N.B. Taken all round, the animals were only a middling lot, though a few of the bullocks were of prime quality. There was the usual attendance of buyers, and trade for good cattle was brisk, the rates realised being fully up to those ruling last week. Secondary and heavier animals were much slower to sell, and the prices made were not so satisfactory. Bulls met a fair selling trade. The dead-weight quotations may be given as follows: States bullocks, best quality, medium weight, 58s. per cwt, and a few really choice made up to 60s; secondary and heavier animals, 54s to 56s; bulls, best class, to 49s; and secondary and heavier, 44s to 46s. Canadian bullocks, best class, to 56s per cwt, and a few choice and prime beasts made up to 58s; secondary and heavier, 52s to 54s; and bulls, 44s to 46s, all according to quality and finish.

Yorkhill. Tuesday.—A sale of American cattle was held to-day, the supply consisting of 14 animals held over from Monday and 309 landed by the Norwegian from Portland (Ore.). As regards quality, the animals were up to the average, and showed well. There was only a small attendance of buyers—a fact due to it being a half-holiday in the trade and a large number having their immediate wants wel supplied. Good, well-fed bullocks met a brisk demand, and fully made Monday's prices. Heavier and plainer were slow to cash. Bulls met a fair trade, and sold relatively dear. The deadweight quotations may be given as follows: States bullocks, best quality, medium weight, 58s to 60s per cwt; secondary and heavier 54s to 56s; bulls, best class, 46s to 48s; secondary and heavier, down to 44s. Canadian bullocks, best class, 56s to 58s per cwt; secondary and heavier, 52s to 54s; and bulls made similar prices to those ruling above.

HOPS.

Canterbury. Saturday.—Rather less doing during the week, supplies having been so much reduced. Recent advance firmly maintained, with a steady inquiry.

Worcester. Saturday.—There is very little trade doing in hops now, but the better sorts tempt buyers at the low prices now ruling. Many growers decline to sell, except at prices considerably above market value, believing that they will do better later on.—PIERCY AND CO.

FEEDING STUFFS.

Hull, Tuesday.—Linseed: The arrivals are 7,633qr. Buenos Ayres, 980qr Harlingen, 1,250qr Libau, 2,555qr Ramallo, 2,643qr Rosario, 14,246qr San Nicholas, 10,072qr Villa Constitution; total, 38,871qr. Linseed: The market, after a dull and lifeless week, firmed up yesterday, and 6d to 9d per qr advance was paid for Plate. Calcutta, 51s 6d paid for April-June. River Plate, spot 49s to 49s 3d, Feb. and Feb.-March 49s 6d. Cottonseed: After our last issue, there was a further decline in this article, and £6 6s 3d was accepted spot, £6 7s 6d Feb., and £6 8s 9d April-June, but the market has since improved, with business done at—up to £6 10s spot, £6 11s 3d passage, and £6 11s 3d to £6 12s 6d paid April-June. No sales reported in New Crop, which at one time offered at £6 Nov.-Jan., but £6 2s 6d now quoted. Market closed strong, £6 15s spot and passage, £6 13s 9d March, £6 15s April-June. Oils: Exports for the week ending 25th February, 1902:—Linseed oil: 26 America, 3 Germany, 10 Norway; total, 39 tons. Cotton oil: 203 Belgium, 2 Denmark, 1 France, 91 Germany, 297 Holland, 5 Sweden; total, 599 tons. Linseed oil: Steady, 29s 6d spot; 29s 3d March-April; 29s 3d May-Aug. Cotton oil: 22s 10½d spot; 22s 10½d March-April; 23s 3d May-August. Crude: 21s 6d spot; 21s 6d March-April; 21s 9d May-August. Rape oil: Jamba naked, 24s 3d spot. 1st quality naked, 25s 3d spot. —KEIGHLEY, MAXSTED, AND CO.

London, Thursday.—Linseed: Heavy shipments from the Plate, and Calcutta offering freely, have caused the market to decline the end of last week, but prices have again advanced. Spot Calcutta to London nominally 54s 9d, passage 54s 9d at 53s, March 52s 6d, April 52s 3d, April-June 52s. La Plata, near 51s 6d, passage 51s. Hull is steady. Calcutta April-June 52s 9d. La Plata, spot 49s 9d, February-March 50s 6d. To the Continent, Bombay, March-May 53s 9d. Calcutta, April-June 52s 6d. La Plata, just shipped 50s, February-March 50s 6d. Linseed oil was quiet during the early part of the week, but has again improved. We quote spot in pipes £31 5s, barrels £31 7s 6d, May-August £30 15s to £31, September-December £29 5s. Hull, spot naked £29 12s 6d, March-April £29 15s to £30, May-August £30, September-December £28 5s. Linseed cakes are firm. We to-day quote London made £8 5s to £8 10s, ex-mill, American Western £7 7s 6d to £7 10s, Russian £7 12s 6d to £8 2s 6d. Cotton cakes quiet, London made £4 6s 3d to £4 7s 6d. Rapeseed: Steady, but quiet. Brown Cawnpore, February-March 38s 4½d, March-May 38s 9d. To the Continent, we quote Yellow Cawnpore, March-May 42s 6d. Brown Cawnpore, February-March 38s 4½d, March-May 38s 9d. Brown Calcutta, February-March 38s, April-June 38s 6d. Ferozepore, February-March 39s. Jamba, March-May to Hull 31s 6d. Cottonseed: The Alexandria market becoming excited, owing to a marked advance in Hull, caused by anticipated short supplies, has improved prices considerably. Spot London £6 10s, February £6 10s, March £6 12 6d, April-May £6 13s 9d. Hull, spot £6 15s, February-March £6 15s, April-May £6 15s. Cargoes, March £6 16s 3d, April £6 17s 6d, May £6 18s 9d. Bombay to Hull—Importers ask £4 10s March-April.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—There are practically no stocks of foreign in warehouse, and with only a limited quantity afloat, values are firmly held up, but a good business has been done in March-April shipments at a slight reduction on present quotations. Russians sell quietly at a slight reduction. Americans offer on slightly better terms for future deliveries. Calcutta-made, in bags, are obtainable at a small advance on last week's prices. London-made may be bought on rather better terms. Cotton cakes: The demand has been less active of late, and with a considerable quantity offering in second hands, values are weak, but not quotably lower. Egyptians move off slowly at a slight reduction, while English are unchanged in price. Decorticated remain dull and without change, as also is the case with meal. Maize germ meal: American continues scarce on spot, and needy buyers have to pay full prices of £6 to £6 2s 6d, while the price for March-April, despatched from the mills is unchanged. English is also unchanged. Rape cakes: Quiet. East India unchanged. Rice meal: Some steamer parcels of Rangoon, due the end of the month, may be bought at £4 15s, while shippers still ask last week's prices.—PINNOCK BROTHERS.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Vegetables in good supply, but demand slow. English grapes, 1s 6d to 3s; Belgian, 1s to 1s 9d per lb; Nova Scotian apples, 20s to 25s per barrel; Californian, 9s to 12s 6d per case; bananas, 7s to 12s per bunch; Denia oranges, 10s to 25s; Murcia, 7s to 10s; Jaffa, 12s to 14s per case; pineapples, 1s 9d to 4s 6d each; lemons, 8s to 20s per case; dates, 11s to 12s per cwt; cabbages, 4s to 5s; cauliflowers, 10s to 12s per tally; Brussels sprouts, 2s 3d to 2s 6d per bushel; parsnips, beetroots, 2s; spinach, 2s to 2s 6d per bushel; carrots, 2s to 3s to 3s 6d per bag; carrots, 2s to 2s 6d; turnips, 2s to 3s; parsley, 3s to 3s 6d per dozen bunches; horseradish, 1s 3d to 1s 6d per bundle; celery, 12s to 14s per dozen rolls; forced rhubarb, 1s 3d per dozen bundles; Valencia onions, 7s 6d to 8s per case; potatoes, 35s to 80s per ton; new, Teneriffe, 14s per cwt.

MANURES.

Liverpool, Friday.—Nitrate of soda maintains late rates, and rather more inquiry is experienced. Other fertilisers are more inquired for, and a fair amount of sales are transpiring in East India bone meal, kainit, and superphosphate of lime at unchanged values. Feeding stuffs are rather quiet, but are without change in prices. Nitrate of Soda, best quality, *i.e.*, guaranteed 95 per cent., pure, in bags, £10 10s per ton; East India Bone Meal, fair to prime, in bags, £4 1s 3d to £4 6s 3d per ton; Kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; Palm Nut Cake, prime, in bags, £5 15s per ton; Linseed Cake, American thin oblong, prime, in bags, £7 10s to £7 12s 6d per ton; Linseed Cake, English, prime, in bulk, £8 15s to £9 per ton; Cottonseed Cake, N.A. decorticated, prime, in bags, £7 to £7 5s per ton; Cottonseed Cake, English decorticated, prime, soft, in bags, £7 7s 6d to £7 10s per ton; Cottonseed Cake, English, undecorticated, prime, in bulk, £4 10s to £4 15s per ton; Cottonseed Cake (crushed), 20/25 per cent. oil, prime, i nbags, £7 3s 9d per ton; Maize Germ Meal, prime, in bags, £5 17s 6d to £6 per ton; Rice Meal, Rangoon, as imported, in bags, £5 7s 6d per ton; Indian Meal, coarse to fine grinding, prime, in bulk, 13s to 13s 6d per 240lb; Linseed, fine bold feeding, in bags, £3 1s to £3 4s per qr, 416lb; D.N.S. Brand Superphosphate of Lime, guaranteed, 25 to 27 sol., in bags, £2 5s to £2 7s per ton; D.N.S. Brand Superphosphate of Lime, guaranteed, 30 to 31 sol., in bags, £2 10s to £2 12s per ton; Superphosphate of Lime, guaranteed, 35 to 36 sol., in bags, £3 to £3 2s per ton at producing depot; Basic Slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, nominal; Basic Slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, nominal; Basic Slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, nominal.

COLONIAL DAIRY PRODUCE.

London, Friday.—The demand for Australian butter is over, and the Ormuz, the last vessel for the season, has arrived. With New Zealand the case is different. Vessels from that colony will bring butter for the next two or three months. During the past week New Zealand butter has not been in such request as it was; but this is true of all butters. Retailers are naturally anxious not to follow the high prices prevailing, hoping for a fall in values, but it looks very much as if they would be disappointed, for, though there is a temporary dullness, there is not enough best quality butter outside of New Zealand to meet the consumptive demand. Denmark and the Continent will be unable to supply future requirements. "Choicest" New Zealand remains at 110s to 112s, although some weak holders have been offering at 108s. "Finest" grade maintains its late value of 104s to 108s. The scarcity of butter to meet the shilling retail demand continues, and prices of this class of butter keep firm at late rates. The Copenhagen official quotation has been reduced four kroner, and now stands at 96 kroner, the same price as last year at this date. There appears to have been a paniky feeling in the Northern markets of England this week, and this has caused the Danes to lower the quotation, thus bringing the value of Danish butter for the second time this season almost on a par with New Zealand. The fall in Danish will be only temporary, and will not affect New Zealand. Unless an early spring arrives, butter must remain dear. Cheese.—There is a better demand for "Choicest" quality Canadian, and prices have advanced a good shilling in the week to 53s, the present value. "Finest" brings 50s to 52s, and is in better request than "Choicest." New Zealands are scarce, and worth 51s to 52s.—W. WEDDEL AND CO.

EGGS.

Tuesday.—Bedale: 12 for 1s. Gainsborough: 12 for 1s. Settle: 13 or 14 for 1s. Spalding: 14 for 1s. Leeds: Yorkshire, 11s to 12s per 120. Stone: 12 and 13 for 1s.

Wednesday.—Barnsley: 9 and 10 for 1s. Boston: 14 for 1s. Colne: 2s 3d per score. Goole: 12 for 1s. Keighley: Wholesale, 10; retail, 9 for 1s. Kirbymoorside: 14 to 15 for 1s. Knaresborough: 12 or 13 for 1s. Louth: Wholesale, 16 for 1s. Market Weighton: 14 for 1s. Masham: 12 to 14 for 1s. Northallerton: 11 or 12 for 1s. Stockton: 9 or 10 for 1s. Worksop: 2s per score. Ipswich: 10 and 12 for 1s. Hereford: 12 for 1s; wholesale, 14. Uttoxeter: 1s 7d to 1s 8d per score. Dorchester: 11d to 1s per doz.

Thursday.—Devizes: 14 to 16 for 1s. Brigg: 13 or 14 for 1s. Driffield: 14 or 15 for 1s. Penistone: 10 for 1s. Ripon: 12 or 13 for 1s. Scarborough: 11 for 1s. Wetherby: 12 to 14 for 1s. Kidderminster: 12 for 1s. Wellington: 12 and 13 for 1s.

Friday.—Easingwold: 12 to 14 for 1s. Grimsby: Austrian, 5s 10d to 7s 1d per 120; Egyptian, 4s 10d to 5s; Danish, 8s to 8s 6d. Helmsley: 13 for 1s. Leyburn: 14 for 1s. Lincoln: 13 to 14 for 1s. Otley: 11 to 13 for 1s.

Saturday.—Appleby: 12 to 14 for 1s. Berwick: 10d to 1s per dozen. Carlisle: 12 to 13 for 1s. Doncaster: 11 to 12 for 1s. Grantham: 12 to 15 for 1s. Howden: 14 for 1s. Lancaster: 8 to 12 for 1s. Malton: 14 or 15 for 1s. Pontefract: 12 for 1s. Retford: 1s 8d to 1s 10d per score. Stokesley: 11 or 12 for 1s. Whitby: 11 and 12 for 1s. York: 12 for 1s.

CHEESE.

Dorchester, Wednesday.—Best Dorset blues made 50s to 64s per cwt; seconds, 30s to 46s.

Newport, Wednesday.—Quotations: Caerphillies, 65s to 70s; fancy dairies, 72s to 74s; inferior —s to —s; Derbys, 66s to 68s; truckles, 60s to 66s; and Cheddars, 60s to 65s. There was a short supply, an average attendance, and a good inquiry for best quality cheese.

Glasgow, Wednesday.—There were a few fresh parcels of cheese forwarded to Glasgow market this week. The inquiry was moderate. Stocks are now rapidly diminishing; those left are mostly of secondary quality. Prices of Cheddar and Dunlops varied from 54s to 60s per cwt, but in some instances a shilling or two more was paid for anything really fine. Canadian and New Zealand cheese were in fair request at previous prices.

Nantwich, Thursday.—There was a pitch of about 20 tons of cheese. The market was sharp and an early clearance was effected, prices being slightly better than at last year's fair. Finest Cheshire made from 70s to 75s, and medium down to 60s.

HAY AND STRAW.

Manchester, Wednesday.—Hay, 6½d to 6¾d; clover, 7d to 7¾d; straw (oat), 5¼d to 5¾d per stone.

Whitechapel. Saturday.—Arrivals fair, but demand without increase, and business quiet at late prices. Best clover, 95s to 110s; inferior, 80s to 90s; specially picked hay, 115s; good, 108s; inferior, 80s to 90s; mixture and sainfoin, 90s to 100s; and straw, 28s to 40s per load.

STOCK AND SHOW NOTES.

By Herdsman.

At a meeting of the Committee of the Suffolk Agricultural Association held at Ipswich to consider matters relating to the show to be held in that town on June 5th and 6th it was announced that the Local Committee fully approved of the allocation of the £500 guaranteed by the Mayor, and it was agreed to vote £20 for dairy produce made by tenant farmers in Suffolk, as suggested by the Local Committee. The Secretary, Mr. Robert Bond, stated that the East Suffolk Technical Instruction Committee had written offering £50 towards the erection and equipment of a model co-operative dairy, to be managed by a person experienced in such dairying from Denmark or Ireland, whilst the Rev. C. J. Steward had also promised £10 towards the same object, and he (the Secretary) believed the cost of the dairy would almost be covered by these sums. The whole of the machinery of the dairy was to be worked by steam, and the appliances would include a weighing and receiving tank, Pasteuriser, separators, coolers, cleanser, and butter worker. The offers of the Technical Instruction Committee and Rev. C. J. Steward were accepted, and it was resolved that the cost to the Association in connection with the scheme should be limited to £15.

It has been decided to promote an annual agricultural show at Harrogate, and a public meeting of horse and stock breeders, landowners, etc., is to be called in order to organise the society on a sound basis. It is intended to make the society's operations cover a wide area.

Sir Walter Gilbey, who, it will be remembered, entertained to dinner the president and members of the Shire Horse Society, extended a like hospitality to the Hackney Horse Society on Tuesday. Amongst those present were Mr. Fred Wrench (President), Earl Spencer, Earl Carrington, Baron W. von Schroder, and Sir Gilbert Greenall.

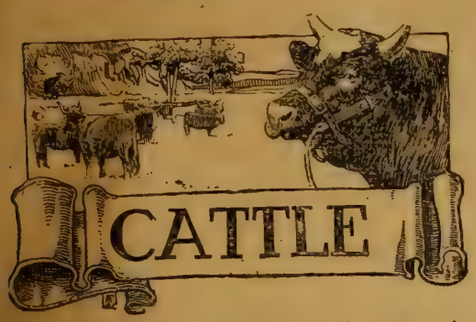
The entire herd of red-polled cattle belonging to Mr. James E. Platt is to be sold at the Dairy Farm, Howbury Hall, near Bedford, on Wednesday, the 19th inst., by Messrs. J. Thornton and Co. It will be remembered that when the late Mr. J. J. Colman's celebrated herd of red-polls was dispersed, the choicest specimens were purchased by Mr. Platt, including the celebrated bull Champion 5370, for 320 guineas; he soon afterwards acquired Champion's stable companion Red Knight 5818. These two famous sires stood first and second on several occasions. The animals were first taken to Bruntwood, a large estate in Cheshire; when that property was given up a portion of the herd was sold at Ipswich, and the remainder with the thoroughbred stud brought down to Bedford, where it is found that the farm is insufficient to carry a large herd as well as a first-class stud, consequently the whole of it is now offered for unreserved sale.

Among the prize animals included in the sale are Brinhilda, Necklace, Red Lass, Dormouse, Sleeping Beauty, Meddlesome Mattie, also the first-class prize bulls, Champion, Red Knight, and Pistol, as well as other very fine animals and choice young stock, the produce of distinguished prize winners. A good number are by bulls that have also been celebrated, among which may be mentioned Able Risky 4722, a prize winner at the Royal Shows at Birmingham and Maidstone, and Champion 5370, one of the most celebrated prize bulls of modern days, and he was by Red Prince, who in his day was rarely if ever beaten, being a first and Champion Royal winner four years in succession. The great dairy properties of the breed have also been studied. The sale includes descendants of first-class dairy cows from the herds of Lord Rothschild, Mr. George Gooderham, and Mr. Garrett Taylor, of which a careful milk record has been kept for some years. Last season thirteen first prizes, eight seconds, one third, and four reserves, as well as one Champion and one reserve for Champion, were won at the principal shows, including first and Champion at the Royal Show at Cardiff.

Mr. J. G. Massey, President of the United States Sheep-breeders' Association, and a well-known breeder of Hampshire Down sheep, is now on a visit to this country for the purpose of making purchases with a view to introducing some of the blood of our best flocks into his own. Mr. Massey has been a breeder of Hampshire Downs for many years, and since 1895 has paid several visits to this country and made extensive purchases from English flocks. He has now the largest and probably the best flock of this particular breed of sheep in the United States, and he says they are admirably adapted to the climate and pasture of the States.

The Roscommon Sheep Breeders' Association have issued Volume V. of the Roscommon Long Wool Sheep Flock Book, which contains particulars of rams from No. 1,101 to 1,361, and a number of other useful items of interest to breeders of the particular sheep, whilst there are some illustrations of capital specimens of the breed. In the course of the preface it is stated that the past season has been so favourable that never, perhaps, have the Roscommon sheep looked so vigorous, in better constitution, or in such good condition—truly a remark which will not apply to many other breeds.

The twenty-third volume of the Shire Horse Stud Book, which has now come to hand, contains a total of 5,213 entries, these consisting of 1,028 stallions and 4,185 mares. The new entries in this volume are 920 stallions and 3,250 mares, while there are 108 re-entries of stallions and 935 of mares. The entries of stallions are 140 more than in the preceding volume, but the entries of mares are fewer by 658. This falling off may be explained, however, by the fact that with this volume more stringent conditions of entry come into force, and in anticipation of these an exceptional entry was made in the previous volume. Mares foaled since 1885 cannot now be registered unless they have registered sire and registered dam, or unless they have three crosses of registered blood, viz., sire, dam's sire, and grand-dam's sire. Stallions have been entered for the present volume in greater numbers than for any volume since the thirteenth, in which 1,110 were registered. The total number of registered stallions is now 20,195 and of mares 37,828. Particulars are given of the exports of Shires during 1901, and it is stated that the numbers are decidedly better than those for 1900, and it would seem that in some cases a better class of horse has been taken. In 1900 219 export certificates were issued, whilst in the past year the number was 291, the greatest majority of the horses going as heretofore to the United States.



A fine sale of draft horses was held at Wichita, Kansas, U.S.A., on Feb. 13th, the animals disposed of being from the studs of Messrs. J. W. and J. C. Robinson and Snyder Bros. Best prices were made by the Percheron stallion, of which three made over £200. Top price was reached by Charlie, a black, foaled in 1898, which sold for £220, next price being £215, made by Va Vite. Messrs. Robinson's consignment consisted of 15 head, which made an average of over £98, while the other consignment of eight stallions realised an average price of £92.

A statement of some considerable importance to horse breeders was made by Mr. Brodrick in the course of a speech on the Army Remount Question in the House of Commons on Tuesday. He said: "We have already framed a scheme which will enable us to deal, I hope, much better with this question in the future than we have in the past. We propose to plant our buyers in districts both here and in Ireland, who will be able to get more in touch with the breeders and less with the dealers, and, I hope, with the assistance of the Board of Agriculture and the societies which give prizes for special classes of horses, with a view of making a speciality of a class of horse required for the army. For many years to come South Africa will be largely drawn upon for the horses needed there. Australia is largely drawn upon by India, but I trust that we shall have some support from the House if we endeavour to establish some permanent connection with Canada for the supply of horses. It will be necessary for us in the future to keep more in touch with Continental sources of supply. I cannot, of course, feel sure in anything connected with horses that we shall give satisfaction to everybody."

THE SHORTHORN BULL, "HAYLE SPECULATOR," shown above, was bred by Mr. W. J. Hoskens, and is a get of Royal Sovereign out of a Waterloo cow. In the £50 or Champion Class at Birmingham last week Hayle Speculator managed to win the coveted prize of £50 for the best bull over ten and not exceeding twenty-one months old. At the subsequent sale he realised 2 0 gs., passing into the ownership of Mr. Colman.

My attention has been drawn to an error which occurred in our account of the Shire Horse Sale last week. It will be remembered that Captain Heygate paid 270 guineas for a commended animal. This was not Scarcliffe Old Fashion by Old Warden Royal Harold, as we stated, but was Harold's Drayman18785, a get of Harold's, out of Bona 19,415, and bred by Mr. F. W. Park, Headon Manor, Retford.

Birmingham Shorthorn Show and Sale.

The thirty-fourth annual spring exhibition and sale of Shorthorn cattle, held under the auspices of the Birmingham Agricultural Exhibition Society, was opened in Bingley Hall on Wednesday, there being 611 entries. As is usual at these combined shows and sales, a goodly number of the animals were sent for sale only, and some of these would have done their owners more credit had they kept them at home. It may not show supreme wisdom on an owner's part to send a string of useful young bulls, and then send a three-quartered dam of one of them. The females are sold first, and the price is remembered when the same owner's bulls enter the ring. The judges of the females were Messrs. J. Beattie, Estate Office, Aston Hall, Oswestry, and Harry Butler, Badminton Farm, Chippenham. There was a big entry in Class I., for the best cow or heifer exceeding three years old. Here the judges went for beef instead of milk, and selected Mr. C. W. Brierley's Autumn Queen, a wide-backed, deep-set cow, fat enough for a Christmas show; second to her was placed a level-backed, rare-fronted cow, with excellent middlepiece, but a trifle weak at the rumps. Mr. G. H. Proctor's Fairy Ring, which might have been more even between the backbone and the tail, was reserved. Highly commended mentions were given to Mr. C. W. Brierley's Lavender Queen, Mr. J. A. Preece's Cream Custard, Colonel Sir Nigel Kingscote's Sabrina 47th, Mr. G. Gerrard's Captive Queen, Mr. Thomas Stokes's Countess of Sherlowe; whilst commendations were given to Mr. Thomas Diggle's Lady Lynn 8th, Mr. W. S. Dodwing's Motcombe Pansy, Mr. Sherrard's Queen Dowke, Mrs. L. H. Holland's Gipsy Queen, and Mr John Naylor's Lady Leighton 2nd.

Class II., for heifers exceeding two but not exceeding three years old, only drew sixteen competitors. Here Mr. C. W. Brierley was again placed to the fore with another well-filled out one, and with a capital frame to put it on. Royal Jewel was certainly a treasure to its owner. Mr. Brierley also secured second with Coquette 3rd, which was not so even behind as the other. Mr. L. H. Holland was reserved with Princess Nancy, that most certainly did not show at all well for milk. Mr. T. M. Crock's Stanley Duchess 3rd was highly commended, as was also Mr. Sidney Hill's Trilby 3rd. Two commendations only were given, one to Mr. D. Arkell's Frost 88th, and Mr. John Naylor's Lydia.

There were three dozen in the class for exceeding one and under two years old, and some of these showed a considerable amount of quality. Mrs. L. H. Holland was placed first with a level heifer, Moss Rose, that, besides having an excellent underline, had a good coat. Mr. C. W. Brierley again stepped in with Love Bird, heavily fleshed, and carrying quality. An extremely close reserve was Mr. Henry Wynne's Rose Moss, a deep blacky one. Highly commendeds were given to Mr. G. F. King's Countess 61st, Mr. H. Wynne's Lady Fashion, Lord Powis's Esmeralda 6th, and Mr. T. Mace's Daffodil.

The heifer class was an extremely weak one, as far as quality went, though there was a fair entry. Mr. C. W. Brierley's Queen Clarissa was placed first, the reserve ticket going to Mr. S. W. Greve's Corley Baroness 4th, highly commendeds going to Mr. C. A. Hewitt's Music 10th, Mr. G. Gerrard's Offerton Duke, and to Mr. S. Greve's Mercote Baroness 4th.

There was a big muster of bulls. The one-old and two-young bull classes were judged by Messrs. James Peter, Berkeley, Glos., and Mr. R. Wright, Nocton Heath, Lincoln, and exceptionally smart work they made in dealing with these animals. In Class V., for bulls exceeding thirty months old, there were just over thirty competitors. First prize went to Mr. John Handley's Lord James Douglas, a smart bull of good scale. The Earl of carry himself so well as he might. Mr. G. F. Manners' Ruddy Star, which was second, did not King's Chewton Victor, a very useful type of bull, was reserved. Highly commendeds were given to Mr. C. H. Joliffe's Handsome Boy, Mrs. Holland's Brilliant Beau, and Mr. Phil Mill's Invincible.

There was an entry of over seventy for Messrs. George Ashburne, Kirkby-in-Furness, and Mr. Alexander M Gordon, Insch, N.B., to select from and there was no mistaking the fact that their decisions could be by no means termed hurried; in fact, their classes were later judged than for years past. Mr. W. Parkin Moore's Major Sprightly was placed first. He showed himself well, but was rather thin in the coat; second prize went to the Hon. W. F. D. Smith, M.P., Lord Renvenham 10th, a deep-set bull; Mrs. Lewis' Lord Stanley was placed third, a capital forend bull, but needed a bit more quality behind; Mr. A. E. Marsh's Viscount Monarch, a big, heavy, long bull, was fourth; whilst fifth went to Mr. John Handley's useful bull, Master Douglas. The reserve was taken by Mr. Thomas Winter's Star of Hope, and highly commendeds passed to the same owner's Prince Palatine. Mr. W. J. Hoskens' Pioneer, Mr. C. W. Brierley's Royal Referee, Mr. C. M. Cameron's Prince Stellar, the Earl of Lathom's Wild Prince 52nd, and to Colonial Makin's Lord Frogmore 2nd.

The champion class for the best bull exceeding ten, but not exceeding 21, months old did not fill well, there being only 16 entries. First prize of £50 went to Mr. W. J. Hosken's Hayle Speculator, a very mellow, nice-handling bull; second was given to Mr. J. McWilliams' Stoneytown Archer; a big, strong bull of rare export colour was Mr. G. Freeman's Forerunner, which was placed third; the reserve ticket went to Lord Lovat's Highland Chief, a very hardy one. The highly commendeds were Mr. William Bell's White Flag, the Hon. W. F. D. Smith's H.R.H., and Mr. R. H. Dyke's Duke of Charmingland 96th. There was a good muster of bulls in the class for those exceeding 18, but not exceeding 21. Here Mr. John Handley had his opportunity with Lord Clarence, a well brought out one, with deep, heavily-fleshed thighs; second to him was placed Colonel Makin's Rotherfield Adonis, a rare deep one, though a bit inclined to stand slack; Mr. Joseph Harris' Prince Edward stood third, with a very even back. Mr. J. W. Barnes sent his Auditor to be fourth, a rare nice charactered one; Mr. John Gill's North Star shining a trifle uneven, though it had a good coat, for fifth position; the reserve went to Mr. J. W. Barnes' Sultan; the highly commendeds comprising the Earl of Manners' Matchless, Mr. John Handley's Sir Redvers, Mr. C. H. Jolliffe's Royal Favour, Mr. Joseph Beach's Good Lad, Mr. R. H. Dyke's Duke of Barrington 55th, Mr. James Lawson's Northern Prince, Mr. E. Simpson's Rosedale Beau 2nd, and the Hon. W. F. D. Smith's Bretwalda. The next class was for bulls between 15 and 18 months old, and a rare strong one it was, there being an entry of 93. Here Mr. W. J. Hosken again drew to the fore with Carwin Lad, possessing a rare shoulder, well-packed loin, and nice thighs; second prize went to Mr. W. Young's Shylock, that could have done with a bit more girth; third prize went to Messrs. Bewley's Baron Milverton 11th, a long, growing useful bull, that could have done with more bulk; Mr. Benjamin Read's Royal Beau was fourth, a level-backed, good middle-pieced one; Mr. J. A. Preece secured fifth with English Admiral, of a type that should sell; the reserve ticket went to Mr. R. H. Dyke's Squire Mutton; and highly commendeds to Messrs. S. E. Dean's Dowsly Oxford Royal, N. Benjafield's Gillingham Chief, William Bell's Banker, Colonel Makin's Epigram, E. Simpson's Baron Shelford, H. K. Colville's Bates Prince, W. Nevett's King Hal, Mrs. Mary Lewis' Count Beauty, Mr. T. Mace's Gay Knight, and Mr. A. Hiscock's Manor Golden Prince.

There was an entry of 117 in the class for bulls exceeding 12 and not exceeding 15 months old. Mrs. L. H. Holland drew to the fore with Last Century, a very deep, nicely-turned bull; Colonel Sir Nigel Kingscote was second with Baron Dursley 9th, a fine bull that had his tail set a bit too high; third position was given to Mrs. S. H. Allen's Master Stephen, a well-balanced bull; Lord Lovat's Baron; a trifle narrow on top, was placed fourth; and the same owner fifth with Baron Beaufort, a trifle cut up behind, and another, Conservative, from his lordship's herd, was reserved. Amongst the highly commendeds

THE SHORTHORN BULL shown above is "MAJOR SPRIGHTLY," a son of Granite City, and bred by Mr. Parkin-Moore. At the Birmingham Shorthorn Show and Sale last week Major Sprightly was placed at the head of the class for bulls over twenty-one and not exceeding thirty months old, and at the subsequent sale was purchased by Mr. Bourne for 30 gs.

THE SHORTHORN BULL, "LORD CLARENCE," which forms the subject of the above illustration, is a son of Cameo, being bred by Messrs. Harrison. At last week's show sale at Birmingham he was awarded first prize in the class for bulls exceeding eighteen and not exceeding twenty-one months old. At the sale his owner, Mr. John Handley, disposed of him to Mr. Downes for 65 gs.

were Mr. H. Dudding's Fair King, C. E. Morris' Royal Prince, John Pear's Byron's Captain, Mr. R. H. Dyke's Duke of Barrington 57th, Mr. S. Leon's Count George, Mr. John Little's Vain Lord 2nd, Mr. T. Potter's Red Jacket, L. de Rothschild's Ascott Justice, Mr. Nevett's Valentine. The final class was for young bull calves, and a smart lot they were, and keen was the contest between Colonel Sir Nigel Kingscote's Duke of Hazelcote 110th, which by its walk headed the class; and Mr. W. J. Hosken's Hayle Knight, with a splendid middle, but narrow ends; Mr. H. S. Leon's Royalist made a growing third; whilst Mr. L. de Rothschild's Ascott Leader and Ascott President were fourth and fifth respectively; the reserve going to Mr. T. Stokes' Oxford May Boy. The highly commendeds were Messrs. Charles Bathurst's Lydney Bouncing Lad, S. E. Dean's Lord Wild Eyes 12th, G. F. King's Chewton Favourite, Colonel Makin's Hall Garth Bramble, H. Landon's Bashful Boy, and Earl Manners' Chieftain. The extra prize for the best team of five bulls was won by the Earl of Powis, Mr. L. de Rothschild's team being reserved. Trade as a rule showed improvement, the females making better prices than for years past.

The Sales.

FIRST DAY.

A very satisfactory feature of the sale, which, as usual, was conducted by Messrs. Lythall and Walters, was the keen demand for animals for South Africa, and a number of young bulls were secured for exportation; but the home buyers, who, like the foreigners, were very strongly represented each day, seemed determined not to allow all the best bulls to leave the country, and they fought the foreigners very hard, and, fortunately, met with an unusual amount of success. As may be imagined, the result of this keen competition was that some high prices were realised, three-figure prices being comparatively common. One of the most successful sellers was Lord Lovat, of Beaufort Castle, Beauly, N.B., who sent four bulls, and for these received a total sum of 1,025gs., on the splendid average per head of £269 1s. 3d. The highest price paid was 335gs., and the others realised 280gs., 210gs., and 200gs. The bidding for them was of an exceptionally spirited character, but only one, the 280-guinea animal, was allowed to leave the country, the other three going to Lincolnshire, Bedfordshire, and Buckinghamshire. The cows and heifers also realised good prices, several of the latter selling at over 100gs. each, so that all round the sale was a most successful one. Below we give particulars of the sales in each of the numerous classes.

On the first day (Wednesday) the cows and heifers were brought under the hammer, the first class taken being that for the older cows. Mr. Brierley's first prize-winner, Autumn Queen, the winner of numerous prizes, evoked fair competition, and eventually fell to the bid of Mr. Jessop for 72gs., but the second winner, Lord Tredegar's Queen Mab, sold even better, Mr. Harris having to pay 90gs. for her. Other prices in this class were: 54gs. paid by Mr. Blackwell for the highly commended Countess of Sherlowe, exhibited by Mr. T. Stokes, of Dunole; 47gs. for Mr. J. A. Preece's Cream Custard (highly commended), Mr. H. Fell being the buyer; 46gs. for Colonel Sir Nigel Kingscote's Sabrina, paid by Captain Harrison; 28gs. paid by Mr. Britton for Mr. W. Bewley's Lizzy; and 30gs. by Mr. Wodehouse for Queen Dowke, the exhibit of Mr. G. Gerrard, of Worcester. Viscount Deerhurst paid 25gs. for Red Marigold, the property of Mr. T. Stokes; the Earl of Powis disposed of his red and white Cowslip to Mrs. Holland at a similar figure; while Captain E. M. Whitting, Weston-super-Mare, obtained 31gs. from Mr. Pallister for his Lady Somerset. For Mr. Arkell's Fuchsias Florentia Captain Whitting paid 38gs. Three-figure prices were obtained twice in the class for heifers between two and three years old, the top figure being 111gs., which sum was paid by Sir Thomas Gooch for Mr. C. W. Brierley's first prize-winner Royal Jewel and her nice-looking calf. The other three-figure price, 100gs., was also secured by Mr. Brierley, this time for Coquette, the purchaser being Mr. Horlick, who also bought Mrs. Holland's Princess Nancy, the winner of the reserve number, at 52gs. Another very numerous class was that devoted to heifers between one and two years of age. Mrs. Holland's Moss Rose, which headed the class, was purchased by Mr. Heywood-Thompson at 72gs., while her companion in honours—Love Bird—a splendid specimen from the old Brimfield herd, found a buyer in Mr. W. T. Garne at 100gs. Love Bird is a daughter of the famous Ingram's Queen, which in her prime secured no fewer than thirty prizes, including the Shorthorn Society's dairy prize. Mr. Fell paid 62gs. for Mr. H. Wynne's reserve animal, Rose Moss, while Mr. Lewis obtained Mr. G. F. King's Countess 61st at 42gs. The Earl of Powis' Esmeralda, which was highly commended, found a purchaser at 36gs. Mr. James Horlick's Cowley Empress, which also received a complimentary award, fetched 35gs., Mr. Butler being the purchaser. Of the fifteen heifer calves shown, the best animal belonged to Mr. C. W. Brierley, and was named Queen Clarrisa. The calf found a purchaser in the Duke of Northumberland at 25gs.

SECOND DAY.

The animals offered at Thursday's sale were the older bulls, and very few of them remained unsold. The proceedings began with the dispersal of those entered in the class for bulls exceeding 30 months old, in which the first prize-taker was Lord James Douglas, belonging to Mr. J. Handley, and bred in Scotland, the winner of many prizes at the summer shows. It was sold to Mr. Gordon, of Dublin, for 30gs.; whilst Earl Manvers's second prize-winner, Ruddy Star, was disposed of at three guineas less. The commended Prince Paul, nearly three weeks old, the property of Mr. Rowland Wood, realised a much higher price, namely 80gs., Mr. Smithson being the buyer. Mr. Robothan paid 30gs. for Mr. H. Baker's Plaudit; Mrs. Holland sold the highly commended Brilliant Bean to Mr. Botterill for 31gs.; and Mr. Davis gave 31gs. to Mr. C. H. Jolliffe for the highly commended Handsome Boy. One of the most interesting exhibits was Stephanus, the six-year-old son of Fairfax, bred by the late Queen Victoria, and shown for His Majesty the King. The bull took many prizes at the principal shows, his greatest achievement being at the Royal at York in 1900. In spite of his association with the Sandringham herd there was little competition for him, and he went for 30gs. to Mr. Robertson. Mr. Batho paid 31gs. to Mr. T. Cartwright for Captain of Rissington; Mr. J. W. Barnes sold the commended Prince Emanuel to Mr. Fellowes for 41gs.; Mr. W. Evans received 36gs. from Mr. Smithson for York's Certainty Duke 10th; Mr. Thorneycroft paid 32gs. for Mr. J. W. Barnes's Fusilier; the same exhibitor's British Flag went to Mr. Fellowes at 65gs.; at 50gs. Mr. Simpson secured the highly commended Invincible from Mr. P. L. Mills; and Sir T. Gooch paid 41gs. to Mr. G. F. King for the reserve Chewton Victor.

In the class for bulls between 21 and 30 months, Mr. W. Parkin-Moore's first prize, Major Sprightly, a red and white two years old, was secured by Mr. J. E. Bourne at 30gs., the second prize-winner, Lord Remenham, the property of the Hon. W. F. D. Smith, M.P., was secured by Mr. Webb, at 51gs., for exportation to South America. Mr. Taylor paid 43gs. to Mrs. Lewis for the third prize-winner, Lord Stanley, and Mr. A. E. Marsh sold the fifth winner, Viscount Monarch, to Mr. Cattell, for 58gs.; at 37gs. Mr. Fellowes secured Baron Deans from Mr. J. W. Barnes; Lord Howe paid 31gs. to Mr. W. J. Hosken for Pioneer; Lord Lathom sold Viscount Barrington 5th to Mr. Naylor for 57gs.; Mr. Baker paid 55gs. to Mr. L. de Rothschild for Lord Barrington; the commended Scottish Wrangler was sold by Mr. J. Hewson to Mr. Fellowes for 63gs.; Mr. Wodehouse gave 49gs. to Lord Lathom for the highly commended Wild Prince 52nd; Mr. J. Garne disposed of Dairy King to Mr. Cattell at 34gs.; Mr. Mullins paid 39gs. to Mr. J. Hindley for Master Douglas; Crœsus 4th, the property of Mr. R. H. Dyke, went at 34gs. to Mr. Webb, who was buying largely for South America. He paid 44gs. to Mr. H. Oakley for the commended Baron Bridekirk 30th, and also gave 47gs. to Mr. A. Hiscock, jun., for Manor Sir Gilbert. Mr. C. Morgan-Richardson sold Star of Freedom to Mr. Cattell for 51gs.; and the same buyer secured Mr. J. W Barnes's Jabez for 45gs. Mr. Fellowes paid 47gs. to Colonel Makins for his highly commended Lord Frogmore 2nd, and 71gs. to Mr. J. W. Barnes for the commended Wrangler; while Mr. J. Garne sold Daisy Prince to Mr. Trowbridge for 31gs., and Mr. Stratton gave 31gs. to Mrs. Faux for the highly commended Baronet.

The class for bulls between 10 and 21 months contained 16 entries, and under the conditions the exhibitors were permitted to place their own reserve upon their representatives. Several splendid youngsters were included in the sale, and the most promising stock bulls were eagerly sought by home and foreign breeders. The first prize-taker was Mr. W. J. Hosken's Hoyle Speculator, a red son of Royal Sovereign, 14 months old. The competition for him in the ring was very severe, but he will remain in this country, for, reserved at 100gs., he was knocked down to Mr. J. Colman, of Surrey, at 200gs. Mr. Webb, however, secured for South America, the second prize-winner, Stoneytown Archer, belonging to Mr. J. McWilliam, which realised 58gs. Mr. G. Freeman took the third award with Forerunner, which was reserved at 20gs., and sold at 100gs. to Mr. Clark. However, the highest price of the day was paid for the reserve bull, Highland Chief, a red son of Royal Star, 14 months old, and exhibited by Lord Lovat. Coming from a noted herd the foreigners tried hard to get this bull badly, but so did some of the home breeders, and the result was the youngster was run up from the reserve figure of 20gs. to 280gs., at which price he fell to the bid of Mr. McClellan for exportation to South America. Mr. Webb paid 42gs. for a useful bull, Cymbal, 16 months old, from the well-known herd of Mr. T. R. Hulbert.

The last class dealt with on Thursday was for bulls between eighteen and 21 months old. Mr. J. Handley took the first prize with Lord Clarence, which was sold to Mr. Downes for 65gs. Mr. Green bought the second winner, Rotherfield Adams, from Colonel Makins, for 53gs.; Mr. J. Harris received 50gs. from Mr. Heywood-Thompson for Prince Edward, the third winner; Mr. Cattell gave 53gs. to Mr. J. W. Barnes for the fourth winner, Auditor, and Mr. J. Gill sold the fifth prize taken, North Star, to Mr. Webb, for 38gs. The reserve bull, Sultan, belonging to Mr. J. W. Barnes, went to Mr. Hazell at 57gs. Mr. Webb was again a large purchaser. He secured Kingswood, from Mr. J. Naylor for 36gs., gave 40gs. to the Hon. W. F. D. Smith, M.P., for Superior, 45gs. to Earl Manvers for the highly commended Matchless, 42gs. to Mr. J. A. Preece for the commended Drayton Duke, bought Ascott Court from Mr. L. de Rothschild for 36gs., paid 39gs. to Mr. J. Harris for the commended Manifesto, 36gs. to Mr. A. Green for Loving Cup, 32gs. to the executors of the late Sir Joseph Pulley for Corsair 26th, 34gs. to Mr. J. Lawson for the highly commended Northern Prince, 44gs. to Mr. C. A. Scott Murray for the commended Pilgrim, 40gs. to the Hon. W. F. D. Smith, M.P., for the highly commended Bretwalda, and 31gs. to Mr. T. Stokes for Jolly Tar. Other animals in this class sold up to 62gs., this sum being given by Mr. J. Durno, for Lord Powis's Chance Shot.

THIRD DAY.

On the concluding day the sale opened with the bulls between fifteen and eighteen months old. The first animal led into the ring was the chief prize-taker in the class, Corwin Lad, from the well-known Cornish herd of Mr. W. J. Hosken. Well bred and in splendid form, at the age of seventeen months; the foreign representatives and the home breeders displayed much anxiety to secure him. The bidding was brisk, but Mr. J. A. Preece, of Thrapston, stayed the longest, and the red bull was knocked down to him at 210 guineas. Then there was a big drop to 43 guineas, which Mr. Davey gave for Shylock, the second prize taker, shown by Mr. W. Young. At 48 guineas Messrs. Bewley Brothers sold Baron Milverton XI., the third winner, to Mr. Bickley; the fourth prize taker, Royal Beau, exhibited by Mr. B. Read, went to Mr. Blackman for 45 guineas, and Mr. Clark paid 52 guineas for Mr. J. A. Preece's fifth prize winner, English Admiral. Good prices, in many instances above the average, were obtained for the majority of the other youngsters. Mr. Webb, as on the previous day, bought largely for South America. He paid 43 guineas for the highly commended Banker, belonging to Mr. W. Bell, gave 36 guineas to Mr. R. H. Dyke for the reserve bull, Squire Munton, 37 guineas to Mr. J. A. Preece for Scottish Admiral, 35 guineas to the representatives of the late Mr. W. Nevett for the highly commended King Hal, 38 guineas to Colonel Sir Nigel Kingscote for the commended Lord Sandgrove 48th, 35 guineas to Mr. A. Hewlett for King Lear, 35 guineas to Mrs. Mary Lewis for the highly commended Court Beauty, 40 guineas to the Hon W. F. D. Smith, M.P., for the commended Sunstroke, 35 guineas to Mr. L. de Rothschild for Ascot General, and 40 guineas to Mr. G. Freeman for Frontispiece. Mr. Clement paid 77 guineas to Mr. C. W. Brierley for the commended Silver Count, the other prices in the class ranging up to 45 guineas.

Exceptionally high prices were realised for some of the best bulls in the class for youngsters between twelve and fifteen months old. The first winner was Mrs. L. H. Holland's roan, Last Century, which was knocked down to Messrs. Green Brothers for 70 guineas; while Colonel Sir Nigel Kingscote's second prize taker, Baron Dursley 9th, a red bull, fell to Mr. Cameron at 50 guineas; and at 65 guineas Mr. Crawfoot, of Ireland, bought Mr. S. H. Alen's prize-taker, Master Stephen, a red and white bull. The fourth prize-taker, Baron, a red bull, 14 months old, a son of Royal Star, and bred by Lord Lovat, Beaufort Castle, Beauly, N.B. showed to great advantage in the ring. The competition for him between the foreigners, and the home buyers was very keen, but he will remain in this country, for Messrs. Dean, Bourne, Lincolnshire, secured him at 210 guineas. Lord Lovat also exhibited the fifth prize-winner, Baron Beaufort, a red and white son of Royal Star, just over a year old, and he was sold after smart bidding to Mr. L. de Rothschild, Leighton Buzzard, for 335 guineas, the highest price of the whole sale. The reserve bull, Conservative, a red son of Royal Star, from Lord Lovat's celebrated herd, was another great attraction, and he, too, will remain in this country, Mr. H. S. Leon, Bletchley, purchasing him at 200 guineas. Mr. J. Harrison sold his commended Silver Star to Mr. H. Woods for 47 guineas; and Mr. Vigar gave 48 guineas to Mr. C. E. Morris for the highly commended Royal Prince. Mr. Webb bought for exportation to South America Mr. J. Pears's Mere Captain, for 43 guineas; he gave 37 guineas to Mr. J. A. Preece for Captain Josephine; 41 guineas to Mr. J. Pears for the highly commended Byron's Captain; 37 guineas for Mr. T. Mace's commended Rose Knight, and

40 guineas to Mr. R. H. Dyke for the highly commended Duke of Barrington. Others sold up to 50 guineas.

The bull calves made a capital show, and the bidding for them was generally brisk, and excellent prices were obtained for the best lots. The first prize-taker was Colonel Sir Nigel Kingscote's Duke of Hazlecote 110th, a red youngster, nearly twelve months old, sired by Cader Idris, which was knocked down to Mr. Minton at 96 guineas. Hazle Knight, a red son of Monocrat, about a year old, from the herd of Mr. W. J. Hosken, took the second prize, and was sold to Messrs. Dean for 75 guineas. Mr. H. S. Leon took the third prize with the white Royalist, a son of Royal Victor, and this bull was sold for 50 guineas to Lord Calthorpe. His lordship then secured at the same price the fourth winner, Ascott Leader, a red and white, exhibited by Mr. L. de Rothschild; and the fifth prize-taker, Ascott President, also belonging to Mr. L. de Rothschild, was sold to Mr. Millican for 41 guineas. Mr. J. E. Casswell bought the highly commended Sydney Bouncing Lad from Mr. C. Bathurst for 55 guineas; Messrs. Dean sold the highly commended Lord Wild Eyes XII. to Mr. Woods for 35 guineas; and many other animals realised upwards of 30 guineas each.

Show and Sale of Galloway Bulls at Castle Douglas.

The annual show and sale of pedigree Galloway bulls, under the auspices of the Galloway Cattle Sales Association, was held at Castle Douglas on Thursday. There was a large and representative gathering of farmers, stock-breeders, and agents to participate in the sale. The show of young animals was excellent, and some youngsters of outstanding merit were included among the prize-winners. The entries showed a large increase over the numbers of those received last year, in fact, the large supplies forward tended somewhat to lower prices, which showed a falling off compared with former years. Mr. Brown (Stepford) carried away the champion prize with a very stylish bull, Campfollower III, of Stepford, which was purchased by Mr. Montgomery Neilson, of Queenshill, at 40 guineas. The top price of the day—54 guineas—was paid for Scottish Chief III., of Castlemilk, by Mr. Montgomery (Netherhall).

The following were the prize-winners and prices realised:—Two-year-olds: 1, Mrs. Clark (Auchenhal). Conquering Hero—Mr. James M'Gill (for Colonel Kennedy (Knocknalling), 29 guineas; 2, Thomas Graham (Marchfield), Guiding Hand, sire Lord Douglas of the Green—Mr. James Biggar, £27 15s.; 3, R. and J. Shennan (Balig), Deemster, sire Norseman, of Castlemilk—Mr. M'Taggart (Culnaightrie), £16 5s. 6d.; h.c., Mrs. and H. Fraser (Arkland), Gallant Scot III., sire Great Scot—Mr. Miller (Ernambrie), 14 guineas; c., Mrs. and H. Fraser (Arkland), Gartley Boy, sire Minotaur—Mr. Lusk (Airieland), 11 guineas; Robert Graham (Kirkconnell), Lecturer of Cavens, sire The Professor of Tarbreoch—Mr. Miller (Ernambrie), 14 guineas.

Bulls calved after December 1st, 1900, and previous to March 1st, 1901: 1, Sir Robert Jardine, Bart., of Castlemilk, Scottish Chief III. of Castlemilk, sire Black Douglas III. of Castlemilk—Mr. Montgomery, of Netherhall, £56 14s.; 2, David Brown (Stepford), Crusoe of Stepford, sire Alfred II. of Castlemilk—The Earl of Antrim, £37 16s.; 3, R. and J. Shennan (Balig), Dreadnought, sire Norseman and Castlemilk—Mr. Jefferson (Rotherayke, Cumberland), £55 13s.; 4, David Brown (Stepford), Chief II., of Stepford, sire Campfollower of Stepford—Colonel Dudgeon, of Cargen, £43 1s.; 5, Mrs. and H. Fraser (Arkland), Baron Scot, sire Great Scot—Mr. James Wallace (Claycrop, Kirkinner), £28 7s.; h.c., James Wilson (Tundergarth Mains), War Cry of Tundergarth Mains, sire Macdougall of Naworth—unsold; h.c., Robert Wilson (Kilquhanity), Macdonald II., of Kilquhanity, sire Lord William of Durhamhill—Mr. A. Montgomery, £27 16s. 6d.; c., R. and J. Shennan (Balig), Defiance, sire Norseman of Castlemilk—Mr. Fenwick, Forrester's Lodge, Durham), £31 10s.; James Pender (Morton Mains), Lander Rover), sire Earl of Lauder—Rev. Dr. Gillespie (Mouswald), £17 16s.; Thomas Graham (Marchfield), George Fordham, sire Shamrock—unsold.

Bulls calved on or after March 1st, 1901: 1, David Brown (Stepford), Campfollower III. of Stepford, sire Great Scot—Mr. Montgomerie Neilson, of Queenshill, £42; 2, T. Biggar and Sons (Chapelton), Foundationer, sire Mackenzie of Lochenkit—Countess of Carlisle, £37 16s.; 3, F. Fenwick (Forester's Lodge, Wolsingham, Durham), Jacobite, sire Grand Scot—Mr. Lawson (Chapeltown, Longtown), £28 7s.; 4, Duke of Buccleuch (Drumlanrig), Brucina III. of Drumlanrig, sire Earl of Annandale—Mr. Lane (Limavady), £25 4s.; 5, Robert T. Scott (Drumhumphry), Dresden of Drumhumphry, sire Contender IV. of Tarbreoch—Mr. Graham (Markcomb, Keswick), £14 3s. 6d.; h.c., C. Graham (Skipmyre), Geordie of Shipmyre, sire Greater Scot—Mr. R. Graham (Kirkconnell), 16 guineas; c., George Robb (Barscobe), Crown Prince of Barscobe, sire Skipper of Lochside—Mr. Mitchellson (Carlisle), £15 4s. 6d.; R. and J. Shennan (Balig), Dogberry, sire Norseman of Castlemilk—the Earl of Stair, £21; John M'Cormick (Lochenkit), Old Times of Lochenkit, sire Contender IV. of Tarbreoch—Mr. Montgomery, of Netherhall, 13 guineas; Mrs. and H. Fraser (Arkland), Macdougall of Arkland, sire Great Scot—Mr. Graham (Birchtimberhill), 15 guineas.

Particulars of Transactions in Store Stock.

Reported to the Department of Agriculture and Technical Instruction for Ireland.

The fair at Killylea, co. Armagh, on the 28th ult. was an average-sized one, composed chiefly of second and third class cattle. The demand was brisker than in recent fairs, especially for any animals in fair condition, but thin cattle were hard to sell. Good springers were scarce and in fair demand. Prices:—Yearlings, 2nd class, £5 7s. 6d. to £7; 3rd class, £4 10s. to £5. Two-year-olds, 2nd class, £7 5s. to £9 5s.: 3rd class, £5 17s. 6d. to £7.; three-year-olds, 2nd class, £10 5s. to £13. Springers, 2nd class, £12 to £15; 3rd class, £9 10s. to £10 10s.

At the fair at Roscommon on the 1st inst. cattle in forward condition met a ready sale, but thin stores were much neglected and those sold paid very little for winter keep. Prices:—Calves, 1st class, £5 10s.; 2nd class, £4. Yearlings, 1st class, £7 10s. to £8; 2nd class, £6 10s. to £6 15s. Two-year-olds, 1st class, £10 to £12; 2nd class, £7 15s. to £9 4s. Three-year-olds, 1st class, £13 to £14; 2nd class, £10 7s. 6d. to £12 10s. Springers, 1st class, £17 13s. 4d. to £18 10s.; 2nd class, £13 6s. 8d. to £15.

The fair at Bandon, Co. Cork, held on Wednesday was an average-sized one, composed chiefly of second and third-class cattle, for which there was a fair demand. Prices:—Calves, 2nd class, £3 15s. to £4 5s.; 3rd class, £2 5s. to £3 5s.; yearlings, 1st class, £8 to £9; 2nd class, £6 to £7 10s.; 3rd class, £5 to £5 10s; two-year-olds, 1st class £10 10s. to £11 10s.; 2nd class, £8 to £9 15s.; 3rd class, £6 2s. 6d. to £7 7s. 6d.; springers, 1st class, £14 10s. to £15 10s. 2nd class, £11 10s. to £13; 3rd class, £9 to £10.

There was but a small supply of thin cattle at the fair at Killarney on Monday, and a fair demand was experienced. Prices:—Calves, 3rd class, £2 5s. to £3 5s.; yearlings, 2nd class, £5 5s. to £6; 3rd class, £3 15s. to £4 17s. 6d.; two year olds, 3rd class, £4 2s. 6d. to £6 12s 6d.; three year olds, 3rd class £4 17s. 6d. to £6 10s.; springers, 2nd class, £10 15s. to £12; 3rd class, £6 5s. to £9 15s.

Except for well-fed cattle, a very slow demand was experienced at the fair at Boyle, Co. Roscommon, on Thursday. Quotations:—Calves, 1st class, £5 5s.; 2nd class £4 2s. 6d.; yearlings, 1st class, £7 to £7 12s 6d.; 2nd class, £5 7s. 6d. to £6 5s.; two years old, 1st class, £10 to £11 15s.; 2nd class, £7 15s. to £9 5s.; three years old, 1st class, £14 to £15 17s. 6d.; 2nd class, £11 to £13; springers, 1st class, £17 to £20 6s 8d; 2nd class, £13 2s. 6d. to £15 5s.

The Death of Mr. George Garne, of Burford, removed a familiar figure from the shorthorn world. He had been in failing health for some time, and passed away on February 27th at the age of 79. Although it is now many years since he was a shorthorn breeder himself, he was well known as a keen and good judge, and until quite recently frequently officiated in that capacity at many of the leading shows. He was the second son of Mr. Thomas Garne, of Broadmoor. Farming first at Eastington, Northleach, he subsequently moved to Churchill Heath, near Chipping Norton, where he bred a first-rate herd of shorthorns. Mr. Garne was one of the few breeders during the seventies that refused to be led into the general fashion of "line-breeding." By carefully blending the Bates and Booth strains with the grand cows of the old Pye and other tribes, that had been so long in the family, he raised some fine animals that more than once were referred to by Mr. Strafford as "Garne's composites." The herd was finally dispersed in 1880 at an average of £34 10s. 11d. for 76 head. In 1874, thirty-six head averaged £66 12s.; in 1876 forty-four head averaged £44 12s., and in 1878 thirty-five made £44 10s. each. Some of the best herds of the present day have a number of representatives of the old Churchill Heath families, among which may be mentioned those of Mr. William Garne, of Aldsworth, and Mr. Henry Dudding, in Lincolnshire.

SOCIETY NOTES.

The Wensleydale Agricultural Society suffered a loss of £41 4s. 2d. on last year's transactions, but as they had at the beginning a balance of £187 12s. 4d., they were able to wind up the year with £146 8s. 2d. to their credit. The income included £154 13s for subscriptions, £81 5s. for special prizes, and £98 17s. 6d. gate money. The expenditure included £210 18s. prize money, £12 12s., Judges' fees, £4 18s., refreshments, £6, the tent of show field, £24 erections, £46 13s. 4d. hurdles, which were sold for £42 14s. 6d.; hire of tents and poultry pens, £7 16s. 2d. At the annual meeting the Hon W. Algar Orde-Powlett was unanimously elected president for the ensuing year, whilst Mr. Thomas F. King was re-elected secretary. It was decided that the next show should take place on Saturday, August 16th.

The report presented at the annual meeting of the Leicester Sheep-breeders' Association stated that the widespread depression in the ram trade had one noteworthy effect. For the first time since the Flock Book was established, large numbers of Lincoln rams were sent across the Humber into Yorkshire, and this unexpected invasion cut down the prices of all classes of sheep. The Leicester is apparently increasing in popularity in France, where it holds an important place. The merino sheep there are decreasing very rapidly, following upon the fall in the value of wool; but the cross with the Leicester seems to be growing in favour. The Committee have not succeeded in their appeal to the Royal Agricultural Society for a reinstatement in the schedule of the class for two-shear rams. Lord Middleton was re-elected president of the association, and Messrs. L. Clarkson and E. F. Jordan vice-presidents.

At the last meeting of the Cumberland and Westmoreland Chamber of Agriculture the subject of rural depopulation was once more discussed, but still no definite decision was arrived at, and it was agreed to further consider the various proposals put forward at a meeting to be held on the 29th inst. One of the motions put forward—and which received fair support—was to the following effect:—"That this Chamber views with much dismay the depopulation of our rural districts, and the tendency of land being allowed to go out of proper cultivation, and pledges itself to do everything in its power to induce the Central Chamber and his Majesty's Government to further such measures as will lead to a discontinuance of such disastrous conditions by providing capital to suitable men for stocking small farms on a proper financial arrangement, and also by imposing a reasonable import duty on corn and manufactured flour, the proceeds of such duty to be applied to the relief of agricultural rates."

Several important matters were brought up for consideration at the last meeting of the Cheshire Chamber of Agriculture. "Our Food supply in the Time of War" was one of the subjects, and although several speeches were made, no resolution was passed, the matter being allowed to drop. The Rating of Machinery Bill was mentioned, but there was nothing said upon it. Mr. J. C. Medd, of Cirencester, gave an interesting address on "Agricultural Education," in the which he said he did not think the Board of Education qualified to deal with the farming matter. It would take years to create within the Board of Education what he called an agricultural atmosphere. They wanted an agricultural educational authority. They wanted the country divided into appropriate districts, with inspectors—men well qualified in the science, theory, and practice of agriculture—appointed to look after this class of education. They wanted to establish demonstration stations—not so much for purposes of research as for practical demonstrations in agriculture. They should be subsidized by a central authority, and supervised and controlled by the local authority, and all information should be freely distributed. They wanted more funds placed at the disposal of the Board of Agriculture for educational purposes. At present the Government only allowed £8,000 a year for agricultural education, which was quite inadequate. In France the Government allowed £153,000; in Denmark, £108,000; in Wurtemburg, £60,000; in Canada, £156,250; the State Department at Washington had £626,254 allowed; and the little country of Holland, a quarter the size of this country, had five times as much as we had—namely, £40,933. In conclusion, Mr. Medd suggested the following resolution, which was carried:—"That this Chamber is in full sympathy with the aims of the Agricultural Education Committee, and urges upon the Board of Agriculture the importance of organising and extending its educational work, for which purpose it is essential that much larger funds be placed at its disposal."

The balance-sheet presented at the annual meeting of the Stowmarket Farmers' Club showed that the receipts for last year, starting with a balance in hand of £11 19s. 7d., amounted to £384 14s. 1d., including:—subscriptions, £91; donations and prize fund, and special prizes, £141 2s.; gate money on show day, £65 10s.; grand stand, £16 4s. 6d.; and entry fees, £48 13s.; the expenditure including £223 17s. 0d. for prize money, was £362 16s. 0d., leaving a balance in hand of £21 18s. 1d. The club property was valued at £20 by the Hon. Sec, Major Marriott, so that the club ended their financial year £41 18s. 1d. on the right side. After some discussion it was decided to hold the next show on July 18th. It was announced that the Suffolk Sheep Society would increase the premium for Suffolk Ram Lambs to £10, and Mr. Walter Noble said that Mr. H. E. Smith, Walton Grange, would contribute two guineas to the prize fund, to be awarded in the sheep classes.

The North-East of Ireland Agricultural Association have issued their report for 1901. This report, which is in book form, gives full particulars of the constitution of the society and a list of members. The minutes are printed of the Council meetings held during the year, and lengthy accounts of the year's shows. Several illustrations are given of prominent prize-winning horse and cattle at the society's shows.

Shorthorn.

Meetings of the Committees and Council of the Shorthorn Society were held at the society's rooms, 12, Hanover Square, W., recently, Colonel Sir Nigel Kingscote, K.C.B. (president), in the chair.

The minutes of the previous meeting were read and confirmed, and thirty-two new members elected.

Lord Moreton reported that the Editing Committee had examined and passed the list of pedigree exportation certificates issued by the secretary since the last meeting of the committee, viz., for Australia, two; South America, one; Canada, fifty-three. Total, fifty-six. Several new and other pedigrees were examined by the committee with certificates, catalogues, and other evidence in support of their correctness, and accepted for entry in the Herd Book. The committee had considered a number of applications for registered names, and they recommended that the following names be registered, and that the applicants be allowed the exclusive use of such registered name, either as a prefix or affix in the naming of their cattle.

Registered Name.	Owner.
Ardnaveigh	H. B. Murray.
Buscot	Alexander Henderson
Catthorpe	J. P. Cross.
Charfield	Lord Moreton.
Clody	R. W. Hall-Dare.
Cropwell	Henry Smith, jun.
Derryc	Maj. R. W. Cradock.
Eling	G. W. Palmer.
Farleigh	Herbert Leney.
Finnebrogue	Maj. R. Perceval-Maxwell.
Hambleden	C. A. Scott Murray.
Hayle	W. J. Hosken.
Hillsborough	Philip Jordan.
Hinderwell	George Welford.
Idsal	J. R. Howard-McLean.
Kingscote	Col. Sir Nigel Kingscote.
Leix	Viscount de Vesci.
Lyneham	Lord Moreton.
Melton	Jonas Webb.
Montrave	Sir John Gilmour, Bart.
Nevern	J. B. Bowen.
Norley	Charles Bell.
Riverside	J. I. Annett.
Sarsden	Lord Moreton.
Shilton	Capt. Oliver-Bellasis.
Slaney	D. H. Doyne.
Stratton	Viscount Baring.
Stroxton	John Langham.
Underley	Lord Henry Bentinck.
Wallstown	James Byrne.
Wayford	L. I. Baker.
Weston	Earl of Camperdown.
Woodboro'	Tom Potter.
Woodperry	John Thomson.

A number of applications for other names were considered, and the secretary instructed to communicate with the applicants suggesting the advisability of adopting other names, and which the committee recommended need not necessarily be geographical names, but that "made" names be allowed.

This report was adopted.

Mr. Darby reported that the accounts for the past two months had been examined by Messrs. Welton, Jones, and Co., and the committee, and were found to be correct; that the receipts for the same period had been £955 7s. 3d., the balance of the society's current account at the bankers' being £1,000 19s. 4d.; and that the committee recommended that cheques be drawn for various accounts amounting to £33 14s. 7d.

The following agricultural societies had acknowledged and accepted with thanks the society's offer of champion and district prizes for bulls for the current year:—Highland and Agricultural Society, Royal Dublin Society, Bath and West of England Society, Essex, Royal Cornwall, Derbyshire, Durham County, Gloucestershire, Isle of Man, Denbighshire, Leicestershire, Warwickshire, Appleby and Westmorland, Yorkshire, Northern Counties, Hollymount, County Cork, North-East of Ireland.

The following agricultural societies had also acknowledged and accepted with thanks the society's offer of prizes for pedigree Shorthorn cows in milk, for the present year:—Bath and West of England Society, Derbyshire, Gloucestershire, Durham County, Yorkshire, Warwickshire, Westmorland and Kendal, Strathearn, Royal Dublin Society, County Cork, Hollymount, North-West of Ireland.

Various applications for the society's district and milking prizes were also considered, and the secretary instructed thereon.

This report was adopted.

Death of Mr. Thomas Duckham.

We regret to announce the death of Mr. Thomas Duckham, of Holmer, Hereford, which took place on Sunday morning last after a week's illness. Mr. Duckham, who was in his eighty-sixth year, represented Herefordshire in Parliament from 1880 to 1885, and the Northern Division of the county from 1885-1886. He was a noted agriculturalist, and was chairman at the early meetings held in London for establishing the Central and Associated Chambers of Agriculture in 1886; was a member of their Council for twenty-two years, and president in 1883; was for twenty-six years member of the Council of the Bath and West of England Association, and was instrumental in bringing about the visits of the society to Hereford in 1865 and 1876. He was also chairman of the Farmers' Club in 1882, was repeatedly elected a member of the Council of the Smithfield Club, was twice elected a steward, serving in that office six years, and at the close of his duties, was elected a trustee. In 1876, at the invitation of the British Commission, he attended the Centennial Exhibition, held at Philadelphia, as judge of cattle, and frequently discharged that office at numerous exhibitions in England and Ireland. For several years he was secretary to the Herefordshire Agricultural Society. In 1857 he purchased the copyright of Eyton's herd book of Hereford cattle, which he edited until 1877. At that time failing health made it necessary for him to turn it over to the Hereford Herd Book Society, of the Council of which he has ever since been a useful member. Mr. Duckham's practical interest in Hereford cattle did much for the elevation of that breed, as he realised and insisted upon the importance of a pure and unbroken pedigree. The deceased was one of the first to realise the necessity for stringent regulations to prevent the importation and spread of contagious disease among our flocks and herds, and doubtless his efforts in this direction, which were by no means small, have done much to produce our present immunity from serious cattle diseases. The remains of the deceased were buried in Holmer Churchyard on Friday afternoon in the presence of a large and sympathetic gathering.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending March 4, 1902:—

NOTE.—The figures for the current Year are approximate only.

The Remount Question.

Sir,—I trust I may be allowed to say a few words on the remount question, and to state things as I found them from a humble individual's point of view.

The question, as I took it, was divisible into two headings—the breeding question, or the certainty of an annual supply of horses bred by Government; and the reserve question, or the necessity of a large batch of horses available for emergency in time of war. I tried hard to make both parts Imperial and to get the colonies brought together on the main question to meet the demands of the case. From what I ascertained from those representing the Colonies, I don't think there is any doubt but that they would come forward if they were asked, but that they must have a lead from the authorities at home. I went to the authorities at home, and found that Government breeding did not commend itself to the Remount Department, as there was an enormous and constant supply of foreign horses, and that a national stud would be a too expensive affair.

With regard to the reserve question, I approached Mr. Soares, the member for Barnstaple, during last month, and pointed out that the one successful movement in the whole war seemed to have been the arrangement with the London General Omnibus Company, in which a number of genuine horses in regular work were subsidised at ten shillings a head per annum in times of peace, on condition that they would be bought up by the Government at a certain price in time of war. It was shown that, if this scheme could be made Imperial and an Imperial Horse Reserve could be formed of a large batch of horses in various parts of the Empire, the security to the nation would be very great indeed.

Mr. Soares approved of this idea, and on Monday, February 10th, asked the following question in the House of Commons of the Secretary of State for War:—

"Whether, having regard to the necessities of Imperial Defence, he will communicate with the various horse-breeding Colonies, requesting them to subsidise owners of horses suitable for war-like purposes, in order that the Mother Country may have a right to claim such horses in time of war on payment of a reasonable price."

To which Mr. Brodrick replied, "Yes. The whole question of remounts is now being considered."

If this is to be taken as the case (there is, of course, a distinct if), and an Imperial Horse Reserve is to be formed, it is certainly a step in the right direction. It is the horses that people want to keep that you want to buy for the soldier, not the horses that people want to sell. The horses of the London General are bound to be genuine, as their trade and existence depend upon them. If, therefore, your horse force could be made up on the same lines, prepared and ready, they would be bound to be better than the collection of crocks and screws that are stuck into the Government contractor at the last minute, and shipped off without either judgment or knowledge as to their previous history. The resources of the Empire are unlimited, and there is no reason why a large and varied force of horses should not be arranged for with comparatively small cost to the country.—Yours faithfully,

W. Phillpotts Williams.

South Molton, Devon.

Waterglass for Preserving Eggs.

Sir,—I see in your issue March 3rd that you recommend "Waterglass" for preserving eggs. You say:—"The name waterglass is applied to both the silicate of potash and the silicate of soda." You do not say which is the one for eggs, or whether both are equally good. I should be much obliged if you would kindly let me know.

(Mrs.) S. Ives.

Moyns Park, Halstead, Essex,
March 7.

The Right Hon. Robert W. Hanbury, M.P., President of the Board of Agriculture, has appointed Mr. Richard Fynderne Harpur Crewe to be his assistant private secretary (unpaid).

London Hackney Show.

The eighteenth annual show of the Hackney Horse Society commenced in the Agricultural Hall on Tuesday last, the gay and lighter Hackneys occupying the stalls and boxes that had been prepared for their more weighty Shire occupants the previous week. As regards weather, the show took place rather under a cloud, as London was more or less enveloped in a thick yellow fog the whole of the time, occasionally so dense as to quite interfere with anything like a good view being obtained of the animals. Otherwise rain and snow, which have made matters very uncomfortable at some previous shows of the society, were absent.

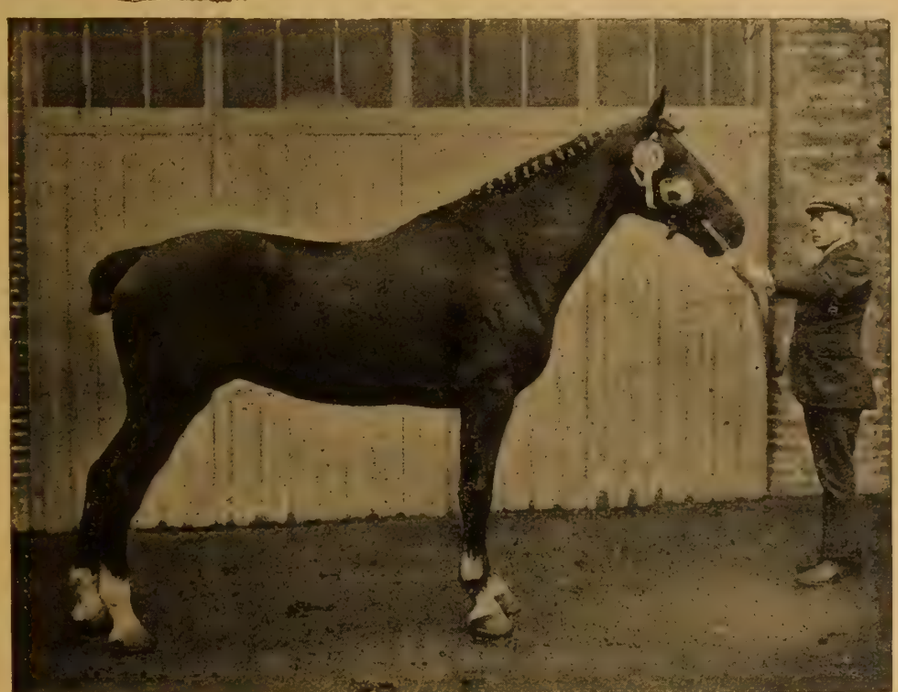
Comparisons, it is an old saying, are odious, and when we compare the show of light horses of last week with the show of heavy ones the previous week it suffers terribly. Both as regards the company assembled in the hall and the amount of interest taken in the animals, as well as business transacted, the Hackney Show was but a very weak following of the Shire. The way the arrangements for carrying out the judging, too, were not favourable to business, as the judges appeared rather to have to kill time than to get their awards settled, so that parades could take place, and those who wished to do business could have an opportunity. We have complained of these arrangements in previous years, and it really does seem tedious that people who wish to see perhaps one section only should have to waste two or three days in order to do so, on account of the judging of the harness classes being so intermixed with that of the breeding classes.

Taking the numbers and quality of the hackneys shown into account, we have little to complain of, except in some of the younger male classes. The older male classes contained a lot of very good stallions, and of useful and pleasing type. The greatest fault in the female classes was the very small number of entries and the fact that all the best animals were the same that have occupied these positions for the past two or three years, there being very few new-comers of any great merit.

Hackney Stallions.

The judging of some five or six classes of stallions occupied the first day. These were generally a very sound lot, but the hind action of a great number was so deficient that in several classes the judges appeared to have considerable difficulty in finding animals meritorious enough to fill the prize positions.

Yearling stallions were, perhaps, the weakest class, and with but thirteen entries, these made rather a poor display. Mr. W. Richardson won the first prize with a son of the famous past champion, Rosador, out of a Connaught mare, a colt that we liked much, as he looks likely to make a stallion with power, size, and muscle about him, and he will no doubt be a good winner. Mr. A. Willis and Mr. C. V. Llawnth had also useful colts in the list.



Two years old had a larger entry, 36 of these being catalogued, and the winner gave a most favourable impression. He was shown by Mr. Haley and bred by Mr. Eustace Smith near Newcastle-on-Tyne, and the get of Royal Danegelt. We look upon him as about one of the nicest style of colts we have seen for a long time. His build and general contour are very pleasing, whilst his withers and outlook, as well as quality, joints, and feet, are also most satisfactory. Mr. Galbraith's second also possessed a good deal of substance. Other very good colts were Mr. Livesey's Medway, by McKinley, and Mr. Collins's Squire John, by Gentleman John, a colt that struck us very much on account of his action, style, and beautiful flat bone.

Three years old not exceeding 15-1 high were represented by seventeen entries, and contained several very good colts. Sir Walter Gilbey's Merry Duke, by Royal Danegelt, took the lead in these. He made a very good show, flexing his hocks properly, and going with freedom. His shape and outlook, too, are good, and he stands on a good set of feet. Mr. Morton's Special Post, a well-bred colt, as much like a stallion and a getter as most, came next, and Mr. Thomas Hall's Prince Langton also gave a very good account of himself.

Three years old over 15-1 hands were a fair class, several of the last eight that remained in the ring having some size about them, though in movement perhaps they did not altogether excel. Mr. J. K. Ford sent a very good horse up to take the first place. This was Lord Kimberley, by Rosador, out of a Cadet mare. He has a lot of the carriage horse about him, with substance and quick, good action, and will doubtless prove a very useful stallion in the country. Mr. Wrench's Fitz Rose, by Royal Danegelt, also gave a very good account of himself, though he was not as successful as last year.

Four years old stallions over 14 hands came next, with 42 entries—rather a long bill—and in this class were some of the best horses, 11 of them remaining in the ring when the judges dealt the cards. The best of these was Sir Walter Gilbey's Bonny Danegelt, by Royal Danegelt, who did so well in the championships; he has developed very nice withers and shoulders, has capital feet, and parts, and moves freely, with even action. The Denmark blood in his dam has had good effect. Another very good horse in this class was Mr. Buttle's Garton Sirdar, with capital back and tops, some scope about him, and good legs and feet. Mr. Thomas Hall's St. Thomas, by Garton Duke of Connaught is also a first class style of stallion. Though he only succeeded in getting into the third position, his owner may depend upon it he has a horse that will be liked and make a mark.

Older stallions between 14 and 15 hands high were not liberally represented, only 12 being entered. There were, however, two or three very good horses here. Mr. Makeague's The Autocrat, by Garton Duke of Connaught, a good brown in colour, and a good mover of the right cast, was at the top, followed by Mr. W. Moreton's Extra Stamp and Mr. Chapman's well-known Manifred.

THE HACKNEY MARE, ROSARENE, shown above was the Champion mare at the Hackney Show last week. She was also awarded the special prize and silver medal for the best mare in the older classes. At the Hackney Show of 1901 Rosarene was awarded first prize in the three-year-old class, the special prize for the best mare in the young classes, and reserve for the female championship. Later on it was found that Rosadora, who had been awarded the championship, was not in foal at the time, so that the award fell to Rosarene. She was exhibited at both shows by Mr. Charles E. Galbraith, Terregles, Dumfries, but was bred by Mr. F. W. Buttle, Hackney Stud Farm, Rillington, York, being by Rosador, 4,964, out of 8,846 Elegance.

This age of stallions between 15 and 15-2 hands, of which 14 were entered, brought out the champion of the show in Sir Walter Gilbey's well-known Royal Danegelt, who was in very good form; strong style, with good movement and the right shape and quality. Mr. J. W. Hewitt's Umberto, by Garton Duke of Connaught, who came second, also looks like making his mark as a stallion. He is a grand class of horse, the Cadet and Connaught blood having mixed well. One or two other very good horses were shown in the class.

The bigger stallions, over 15-2, were again a strong class, 38 of them being catalogued. Sir Gilbert Greenall's Clifton III., by Clifton II., out of a Cadet mare, headed the class. Mr. Fewson's Cornfactor and Sir J. Greenall's Lord Drewton II. were next placed, followed by Sir R. D. Moncrieffe's Moncrieffe Statesman, by Garton Duke of Connaught, a stallion that will be as much liked and, depend upon it, as much used as most of them. He is certainly of the stamp required to get first-class carriage horses, with size and action, therefore of the highest value.

The champion stallions were, of the younger classes, Mr. Haly's Danegelt Royal, and Mr. Galbraith's Administrator.

Champions of the older classes in the show, Royal Danegelt and Bonny Danegelt.

Pony Stallions.

Pony stallions made a very good entry, and of those quick, active, useful, strong little beasts, there was quite a good display. Amongst the best of them were Sir J. Greenall's Tissington Horace, by Sir Horace, a sharp, good mare. Mr. W. Foster's Blend, were first and second in this class. Then in the older ones, Sir Gilbert Greenall's splendid pony, Sir Horace, made not only a first but also a champion. He moves like a wire, and his quality is of the very best. Messrs. Jones and Sons' Fireboy, who was reserve for the championship, though of different blood, is a very quick smart pony, likely to beget ponies of a valuable class. Mr. Baxter's Dandy Ribbon, another wonderfully good mover with style and beauty, was awarded third in his class. This class was very good.

Hackney Mares and Fillies,

The judging of these classes, which was proceeded with on the second day of the show, and concluded on the third day, was, in some cases, simply a repetition of last year's show, and the entries were very light in numbers; the quality of these classes, however, on the whole, must be considered very superior to that of some of the stallion classes.

The first class of this sex and section to be judged was that for yearling fillies, in which Mr. Buttle's Rosarette by Rosador, a big grown filly with good limbs, came to be first. Mr. Robert Whitworth had also a very good filly, Commodity by Ganymede, that came second, not covering quite as much ground as the winner, yet a well-built, powerfully made filly.

Two years old fillies had nineteen entries, Mr. F. J. Batchelor's Hopwood Bonnet by Hedon Swell, topping the lot. She carried herself in very nice form, and had a good back and loin, with a lot of muscle about her. May Hopwood, from the same stable, who appeared to have rather more scope about her, and with nice shoulders and quarters, came in second. The Garton Duke of Connaught blood has certainly produced a good filly here. Three years old, not exceeding 15 hands, made up rather a small class, 11 only being entered. Priority was here accorded to Sir Walter Gilbey's Merry Dorothy, by Royal Danegelt, who moved with style and speed, bending her hocks well and going evenly all round. Mr. W. Lawson's Litcham Daisy, who was placed second, a daughter of Bonfire from a cadet dam, also moved uncommonly well, and with the right kind of back and a capital was well worthy of her distinction.

Three years olds, over 15 hands, came next, 12 out of these coming forward, and Sir Walter Gilbey's Merry Sunlight by Royal Danegelt, a filly with very nice shoulders, and the best of flat bone, took the lead in them. Other very choice fillies being Mr. Jay's Knowle Halma by His Majesty, and Mr. Thornton's Middleton Bohemia. Four years olds, over 14 hands, in foal or with foal at foot, were good in quality, though numerically one of the shortest classes, as only nine were entered. Mr. Galbraith's famous mare, Rosarene, put one more jewel in Rosador's crown, and later added champion honours. She has great powers about her, and moves evenly and with force and style. Mr. Liddell-Grainger's Ayton Sweet Nancy by His Majesty, is one of those beautiful made

mares, fitted with good hock action that we have seen at the font times before, and that one always likes to see again. he came in second, Mr. C. J. Vaughan taking third with Mimbridge Baroness, new to our recollection. Mare foaled in or before 1897, over 14 and not exceeding 15 hands, in foal or with foal at foot, totalled up 7 entries. Sir Gilbert Greenall's good mare, Gold Flash by Goldfinder 6th, who ahs led the way many times, was worthily placed at the head of them. Mr. Inman's Vivandiere, another equally well known and worthy one, second, and Mr. Thornton's Princess May carried off the other honour.

Between 15 hands and 15.2 high but two prizes were given, as the class contained but four entries. The winners were Mr. Livesey's well-known and fresh-looking first-class mare, Queen of the South, and Mr. Ireland's Lady Connaught.

Over 15.2 hands, the class strengthened somewhat numerically, and Mr. C. E. Galbraith won a splendid victory with Rosadora, so many times previously head of the poll and a great winner. Mr. Astley's Panic by Garton Duke of Connaught, and Mr. Moore's Lobelia by Chocolate, Junior, were the other winners.

The champion mares were, of the younger classes, Sir Walter Gilbey's Merry Dorothy, sire Mr. Lawson's Litcham Daisy of the older classes, and of the show Mr. Galbraith's Rosarene and her stable companion, Rosadora.

Pony Mares.

Pony mares were a pretty smart lot all round. In the younger classes, Mr. Woodwin's Sedgemere Lady Horace by Sir Horace, and Mr. Ayres' Mickleover Daisy by Sir Berkeley, stood well at the first, Mr. Cole's Beeswax by Berkeley Model also making a good show and coming in third. In the next class Mr. Hollin's very sweet and fine goer, Berry Hill Sniff, occupied easily we thought, the place, Mr. Foster's Mell Valley Custard and Mr. A. S. Day's Peggy being second and third. The last class for breeding ponies contained eight entries, Sir G. Greenall's Greeta by Lord Cadet made a capital mark. There her action and quality being very good. Other fine ponies were Mr. Hollin's Berry Hill Sniff and Sir Gilbert Greenall's Dorothy Derby III., whose name is a guarantee of the highest quality.

The champion pony mare was Sir G. Greenall's Greeta; reserve, Mr. Hollin's Berry Hill Sniff.

Produce Groups,

This very interesting class was judged on Friday morning. The entries, however, were rather small, three groups competing for the male prizes, which was awarded to Royal Danegelt, but as his progeny had done so remarkably well, and Rosador's quality was reserved. Garton Duke of Connaught was also well represented.

Of the two groups of fillies, Rosador's were accounted the best, and Garton Duke of Connaught's the reserve.

Harness Classes,

There was rather a good entry of these classes, but the fog was so thick in the Hall at the time they were judging that it was quite difficult to give a correct opinion of them. The space is too limited for the animals to do the best for themselves.

The Sale.

The larger attendance and freer bidding at this sale from the commencement as compared with former years, led me to hope a good sale would result; such, however, cannot be said to have been the case, for out of offered only 18 head found purchasers. Here, as at the Shire Horse Show last week, the difference in value between the vendors' valuation and that of those who are intending purchasers was clearly marked by the fact that so large a proportion were

The best prices realised were as follow:—170 gns. for Mr. A. W. Hickling's four years old stallion, Master of Hilston, by the Champion Connaught, his new owner being Mr. Wing, of Marsh; Northern Star, a chestnut mare, of Mr. T. P. Willis, made 82 gns. to Mr. Meredith; the three year old pony stallion, r.n. in its class, from Mr. J. Smith's stud realised 80 gns. to Mr. Lee; 71 gns. was paid for Mr. R. Willis' Beeston Rosador, a five years old chestnut gelding, to Mr. J. Heap; a guinea less was paid for Messrs. Hartley's seven years old stallion, Lord Lindsey, sired by Connaught, apparently one of the cheapest bargains of the day; two other stallions made 60 gns. each, namely, Mr. C. Vince's seven-years old, Lord Berners, by Lord Donoghus, to Mr. Smith, and for Mr. W. Jackman's eight years old Master of Enfield, by Master of Lovat, to Messrs. Smith and Abbot respectively; 52 gns. was given for Miss Elevator, from Mr. R. Willis' stud, by Mr. Kellam; a guinea less secured the seven years old pony stallion, Confidence George, from Mr. W. Hollin's, from Mr. James Ford; and 49 gns. secured Mr. James Hargraves' yearling filly, Bowling Primrose, to the last-named purchaser; the average of the 18 sold being £57 13s. 5d. Last year's average for 20 was £68 19s., and that of 1900 £65 16s. 6d. for 18.

Judges.

HACKNEY SECTION.

C. Edward E. Cooke, Hinxton Grange, Saffron Walden.
Arthur E. Evans, Bronwylfa, near Wrexham.
J. D. Reed, Beeford Hall.

PONY SECTION.

A. W. Hickling, Adbolton, Nottingham.
James McMeeken, Kellybank, Dollar, N.B.

Champion and Special Prizes.

STALLIONS.

Champion Cup, value £30, for the best stallion in Classes 1 to 8: Sir Walter Gilbey, Bart., Elsenham Hall, Essex (Royal Danegelt), r. Sir Walter Gilbey Bart. (Bonny Danegelt).

Special Prize and Silver Medal, value £20, for the best stallion in Classes 1, 2, 3, 4.—Mr. Alfred A. Haley, Hackney Stud Farm, Eddlethorpe, Malton (Danegelt Royal), r., Mr. Charles E. Galbraith, Terregles, Dumfries (Administrator).

Special Prize and Silver Medal, value £20, for the best stallion in Classes 5, 6, 7, and 8.—Sir Walter Gilbey, Bart. (Royal Danegelt), r., Sir Walter Gilbey, Bart. (Bonny Danegelt).

Special Prize and Silver Medal, value £10, for the best stallion in Classes 24 and 25.—Sir Gilbert Greenall, Bart., Walton Hall, Warrington (Sir Horace), r., Messrs. John Jones and Sons, Dinarth Hall Pony Stud, Colwyn Bay (Fire Boy).

MARES, FILLIES, AND GELDINGS.

Champion Cup, value £25, for the best mare in Classes 9 to 16.—Mr. Charles E. Galbraith (Rosarene), r., Charles E. Galbraith (Rosadora).

Special Prize and Silver Medal, value £15, for the best mare in Classes 9, 10, 11, 12.—Sir Walter Gilbey, Bart. (Merry Dorothy), r., Mr. William Lawson, 20, Alexandra Road, South Shore, Blackpool (Mitcham Daisy).

Special Prize and Silver Medal, value £15, for the best mare in Classes 13, 14, 15, 16.—Mr. Charles E. Galbraith (Rosarene), r., Mr. Charles E. Galbraith (Rosadora).

Special Prize and Silver Medal, value £10, for the best mare in Classes 26, 27, 28.—Sir Gilbert Greenall, Bart. (Greeta), r., Mr. William Hollins, Berry Hill, Mansfield, Notts (Berry Hill Sniff).

STALLIONS.

CLASS 1.—Yearling entire colts (foaled in 1901): 1, W. Richardson, High and Low Bonwick, Seaton, Hull (Bonwick Rosador); 2, A. Willis, Woodcut, Hollingbourne, Kent (Irvington); 3, C. V. Haworth, The Towers, Thornton, Poulton-le-Fylde (Thornton Royalty); r., Sir R. Moncreiffe, Bart., Moncreiffe House, Bridge of Earn, Perthshire (Moncreiffe Vengeance); h.c., J. Clappison, Ottringham Grange, Hull (Grange Roosevelt); c., J. Robinson, St. Augustine Gate, Hedon, Hull (Harbour Farm Squire).

CLASS 2.—Stallions, 2 years old (foaled in 1900): 1, A. A. Haley (Danegelt Royal); 2, C. E. Galbraith (Administrator); 3, A. Collen, Hackney Stud, Saffron Walden (Walden Squire John); 4, H. Livesey, Rotherfield, Sussex (Medway); 5, H. V. Sheringham, South Creake, Fakenham, Norfolk (Creake Matchless); r., G. Hall, East Farm, Langton, Malton (Fearless Footsteps); h.c., F. W. Buttle, Hackney Stud Farm, Rillington, York (Rosaroyd); c., A. Fewson, Hedon, Hull (Hedon Primo); Cockayne Bros., Hackney Stud Farm, Sheffield Lane Paddocks, Sheffield (Paddock Wildfire); R. Brigham, Tholla Hill Farm, Millington, Pocklington, Yorks (St. John).

CLASS 3.—Stallions, 3 years old (foaled in 1899), not exceeding 15.1 hands: 1, Sir Walter Gilbey, Bart. (Merry Duke); 2, N. Morton, Brookville, Ballymena, Antrim (Special Post); 3, T. Hall (Prince Langton); r., W. Scott, Gilfoot, Carluke, Lanarkshire, N.B. (Athill); h.c., J. L. Anthony, Sedgeford, King's Lynn (Sedgeford Gay Lad); c., C. S. Fletcher, The Grange, Angram, York (Angram Garton Duke); Craven Fort, Steeton, Keighley, Yorks (Steeton Sensation).

CLASS 4.—Stallions, 3 years old (foaled in 1899), over 15.1 hands: 1, J. K. Ford, Chellaston House, Chellaston, Derby (Lord Kimberley); 2, F. Wrench, Killacoona, Ballybrack, Ireland (Fitz Rose); 3, Dixon Nicholson, The Grange, Waton, Cranswick, Hull (Watton Baronet); 4, J. Morton, Stow, Downham Market, Norfolk (Gold Galore); r, Lees Knowles, M.P., Westwood, Pendlebury, Manchester (Dainty Duke); h.c., C. S. Fletcher (Angram Amazement); c., J. Barker, The Grange, Bishop's Stortford (Baden Powell); G. Wilson, Cedar House, Garton, Driffield, Yorks (Cedar King).

CLASS 5.—Stallions, 4 years old (foaled in 1898), over 14 hands: 1, Sir Walter Gilbey, Bart. (Bonny Danegelt); 2, F. W Buttle (Garton Sirdar); 3, T. Hall (St. Thomas); r., H. Livesey (Dissenter); h.c., T. D. John, Chaldeans Stud Farm, St. Fagans, near Cardiff (St. Donats); c., G. Mason Gale, Atwick Hall, Seaton, Hull (Atwick Junior); H. Moore, Burn Butts, Cranswick, Hull (B. B. Rumwood); A. W. Hickling, Adbolton, Nottingham (Master of Hilston); Cockayne Brothers (Paddock Rufus); W. H. Clark, Skeffling Stud Farm, Patrington, Hull (Skeffling B.P.); R. W. Jay, Hollybush, Southgate, N. (Towthorpe Performer).

CLASS 6.—Stallions (foaled in or before 1897), over 14 and not exceeding 15 hands: 1, J. Makeague, Golborne Park, Newton-le-Willows, Lancs. (The Autocrat); 2, N. Morton (Extra Stamp); 3, E. C. Chapman, Stud Farm, Alethorpe, Fakenham, Norfolk (Manifred); r., Cockayne Bros. (Paddock Polonius); h.c., W. Scott, Gilfoot, Carluke, Lanarkshire (Gold); c., R. Whitworth, Londesborough Stud, Market Weighton, Yorks (Christopher North).

CLASS 7.—Stallions (foaled in or before 1897), over 15 and not exceeding 15.2 hands: 1, Sir Walter Gilbey, Bart. (Royal Danegelt); 2, J. W. Hewitt, Massey Brook Stud, Thelwall, near Warrington (Umberto); 3, J. Yates, Bilton Hall, York (Acid Drop); 4, H. Liddell-Grainger, Ayton Castle, Ayton, N.B. (Nugget); r., J. and H. Moorhouse, Flanshaw Stud Farm, Wakefield (Duke Arthur); h.c., R. and P. Hartley, Stud Farm, Balderstone, Blackburn (Lord Lindsey).

CLASS 8.—Stallions (foaled in or before 1897), over 15.2 hands: 1, Sir Gilbert Greenall, Bart. (Clifton); 2, A. Fewson (Cornfactor); 3, Sir Gilbert Greenall, Bart. (Lord Drewton); 4, Sir Robert D. Moncreiffe, Bart. (Moncreiffe Statesman); r., Lees Knowles, M.P. (Dane Canute); h.c. J. Rowell (Rosellan); c., J. Morton (Current Coin); A. Collen (Denmark Excel); A. Lewis (Heacham Gabriel); A. Lewis (Leyswood Speculation); R. G. Heaton (Sir Tom); W. T. G. Young, Garton Grange, Driffield, Yorks (Young's Connaught).

MARES.

CLASS 9.—Yearling fillies (foaled in 1901): 1, F. W. Buttle (Rosarette); 2, R. Whitworth, Londesborough Stud, Market Weighton, Yorks (Commodity); 3, E. J. Vaughan, Mimbridge Stud, near Chobham, Woking, Surrey (Mimbridge Eloquence); r., H. Liddell-Grainger (Ayton Rosamond); h.c., F. J. Batchelor, Hopwood Stud Farm, Alvechurch, Worcs. (Hopwood Sybil); c., D. Mitchell, Millfield, Polmont, N.B. (Scotia's Queen).

CLASS 10.—Mares, 2 years old (foaled in 1900): 1, F. J. Batchelor (Hopwood Bounce); 2, F. J. Batchelor (May Hopwood); 3, W. Oppenheimer, Riversdale, Thames Ditton, Surrey (Knowle Belinda); 4, G. Wilson (Cedar Primrose); r., W. Scott (Bryony); h.c., A. D. Oates, Ryburn Stud, Halifax (Ryburn White Rose); c., R. Whitworth, Londesborough, Market Weighton, Yorks (Advertisement).

CLASS 11.—Mares, 3 years old (foaled in 1899), not exceeding 15 hands: 1, Sir Walter Gilbey, Bart. (Merry Dorothy); 2, W. Lawson (Litcham Daisy); 3, Sir Gilbert Greenall, Bart. (Terrington Majestic); r., Sir Gilbert Greenall, Bart. (Terrington Purity); h.c., F. J. Batchelor (Hopwood Iris).

CLASS 12.—Mares, 3 years old (foaled in 1899), over 15 hands: 1, Sir Walter Gilbey, Bart. (Merry Sunlight); 2, R. W. Jay, (Knowle Halma); 3, R. T. Thornton, Middleton Hall, Brentwood, Essex (Middleton Bohemian); r., F. J. Batchelor (Auchans Rosette); h.c., J. W. Astley, Brewery, Nelson, Lancs. (Nelson Queen); c., E. C. Chapman (Alethorpe Olive); Cockayne Bros. (Paddock Queen).

CLASS 13.—Mares, 4 years old (foaled in 1898), over 14 hands, in foal or with foal at foot; 1, C. E. Galbraith, Terregles, Dumfries (Rosarene); 2, H. Liddell-Grainger (Ayton Sweet Nancy); 3, E. J. Vaughan (Mimbridge Baroness); r., R. P. Evans, Woodhatch House, Reigate, Surrey (B.B. Iris); h.c., H. H. Smiley, Inver Stud, Larne, Antrim (Merry Mayflower).

CLASS 14.—Mares (foaled in or before 1897), over 14 and not exceeding 15 hands, in foal or with foal at foot: 1, Sir Gilbert Greenall, Bart. (Gold Flash); 2, W. E. Inman, 1, Apsley Place, Huddersfield (Vivandiere); 3, R. T. Thornton (Princess May); r., W. R. Lysaght, Dennel Hill, Chepstow (Lady Florence); h.c., S. Brunton, Frogmore House, St. Albans, Herts (Snowstorm); c., W. W Hargrave, Alderbrook, Parbold, Southport (Lady Hannah).

CLASS 15 (foaled in or before 1897), over 15 and not exceeding 15.2 hands, in foal or with foal at foot: 1, H. Livesey (Queen of the South); 2, J. T. Ireland, Molescroft Grange, Beverley, Yorks (Lady Connaught); r., R. T. Thornton (Chloris); S. Cliff, Wortley, Leeds (Twinkle).

CLASS 16.—Mares (foaled in or before 1897), over 15.2 hands, in foal or with foal at foot): 1, C. E. Galbraith (Rosadora); 2, J. W. Astley (Panic); 3, H. Moore, Burn Butts, Cranswick, Hull (Lobelia); r., H. Liddell-Grainger (Princess Marsh); h.c., W Kerrison, Bridge Street, Fakenham, Norfolk (Fakenham Princess); c., J. Wreghitt, East Thorpe, Market Weighton, Yorks (Londesborough Duchess).

CLASS 17.—Mares (barren) or geldings not over 6 years old (foaled in or after 1896), over 14 and not exceeding 15 hands: 1, J. Heap, Outwood, Birkenhead (Orlando); 2, J. Makeague, Golborne Park, Newton-le-Willows, Lancs. (Miss Primrose); 3, T. C. McKibbin, The Heaning, Windermere (Milford Maid); r., J. J. Taylor, Deanery Stables, Godalming (Atwick Flirt); h.c., J. Makeague (Hermione); c., J. W. Astley (Liberty); Sir Gilbert Greenall, Bart. (Terrington Frolic).

CLASS 18.—Mares (barren) or geldings not over 6 years old (foaled in or after 1896), over 15 and not exceeding 15.2 hands: 1, A. Fewson (Lady Venice); 2, A. D. Oates, Ryburn Stud, Halifax (Ryburn Belle); 3, J. Prentice, Carolside, Uddingston, N.B. (Bothwell Squire); r., Mrs. Frederick E. Colman, Nork Park, Epsom Downs (Nork Sensation); h.c., Col. The Earl of Albemarle, C.B., M.V.O., Quidenham Hall, Attleborough, Norfolk (Bombshell); c., R. Surfleet, Beckingham, Gainsboro' (Beckingham Gentleman); Mrs. Fred Holmes, Staveley Grange, Shipley, Yorks (Blucher); E. J. Vaughan (Mimbridge Willerby); E. J. Vaughan (Rodasor); J. W. Astley (Reckless); R. G Heaton (Rother Mimosa); A. Gemmell, Ayr, N.B. (Star of the North); Col. F. W. Tannett-Walker, Carr Manor, Meanwood, Leeds (Sweet Lavender); T. B. Fox, Wharfedale Grange, Ben Rhydding, Leeds (Wharfedale Squire).

CLASS 19.—Mares (barren) or geldings not over 6 years old (foaled in or after 1896), over 15.2 hands: 1, C. E. Galbraith (Manila); 2, C. Scorah, Long Sandall, Doncaster (Barmborough Prince Edward); 3, A. A. Haley (Roosevelt); r., W Revill, Conisbro', near Rotherham (Henzada); h.c., A. Fewson (Sweet Bouquet); c., J. Jebson, Yapham Grange, Pocklington, Yorks. (Amaze); G. Clark, 18, Scot Lane, Doncaster (Sandall Golden Gift); Sir Gilbert Greenall, Bart. (Terrington Harpist); Mrs. F. E. Colman, Nork Park, Epsom Downs (The Young Man of Nork); R. P. Evans, Woodhatch House, Reigate, Surrey (Woodhatch Sirdar).

HACKNEYS IN HARNESS.

CLASS 20.—Mares (barren) or geldings, not over 6 years old (foaled in or after 1896), over 14 and not exceeding 15 hands: 1, J. Heap (Orlando); 2, J J. Taylor (Atwick Flirt); 3, H. H. Smiley, Inver Stud, Larne, Co. Antrim (Copley Flora); 4, Mrs. R. T. Thornton (Middleton Bonbon); r., G. E. Franklin, The Field, Derby (King Gobang); h.c., J. E. Anderton, Breeze Hill, Cadley, Preston, Lancs. (Mona Brunette).

CLASS 21.—To be shewn in harness.—Mares (barren) or geldings, not over 6 years old (foaled in or after 1896), over 15 and not exceeding 15.2 hands: 1, F. J. Batchelor (Enid); 2, J. Prentice (Bothwell Squire); 3, R. Surfleet (Beckingham Gentleman); r., Mrs. F. Holmes (Blucher); h.c., J. W. Pepper, Stamford, Lincs. (Filibuster); c., C. Scorah (Coronation); S. Atkinson-Jowett, Oldcotes, Rotherham (Oldcotes Star); Mrs. R. T. Thornton (Rougham Lady Kate).

CLASS 22.—To be shewn in harness.—Mares (barren) or geldings not over 6 years old (foaled in or after 1896), over 15.2 hands: 1, C. Scorah (Barmborough Prince Edward); 2, Mrs. R. T. Thornton (Duke of Cranbrooke); 3, A. Gemmell, Ayr, N.B. (Healthy); r., R. G. Heaton (Her Grace).

PRODUCE GROUPS.

CLASS 23.—Three Hackney stallions or geldings (not exceeding 6 years old) by the same sire (£15 equally divided between the produce, and £5 to the sire): Sir Walter Gilbey's Bonny Danegelt and Danegelt Royal, and Mr. Frederick Wrench's Fitz Rose, by Royal Danegelt; r., Mr. F. W. Battle's Garton Sirdar, Mr. John Lett's Rillington Grandee, and Mr. J. K. Ford's Lord Kimberley, by Rosador.

CLASS 23a.—Three Hackney mares or fillies (not exceeding 6 years old) by the same sire (£15 equally divided between the three, and £5 to the sire): Mr C. E. Galbraith's Rosarene and Rosadara, and Mr. F. W. Buttle's Rosarette, by Rosador; r., Mr. A. D. Oate's Ryburn Belle, Mr. J. W. Astley's Panic, and Mr. J. T. Ireland's Lady Connaught, by Garton Duke of Connaught.

PONY STALLIONS.

CLASS 24.—Pony stallions, 3 years old (foaled in 1899), not exceeding 13.3 hands; or 2 years old (foaled in 1900), not exceeding 13.2 hands: 1, Sir Gilbert Greenall, Bart. (Tissington Horace); 2, W. Foster, Mel-Valley, Moseley, Worcestershire (Herod); 3, T. P. Robinson, Pinderfields House, Wakefield (Pinderfields Horace); 4, F. W. Blain, The Cottage, Bunbury, Tarporley, Cheshire (Sir Nigel); r., J. Smith, Whittingham House, Preston, Lancs. (Whittingham Model); h.c., G. S. Lysaght (Anatomy), c., J. L. Appleyard, Woodleigh, Armthorpe, Doncaster (Armthorpe Swell); J. Rowell (Bury Cassius).

CLASS 25.—Pony stallions (foaled in or before 1898), not exceeding 14 hands: 1, Sir Gilbert Greenall, Bart. (Sir Horace); 2, J. Jones and Son (Fire-Boy); 3, E. Baxter, Hutton Stud, Brentwood, Essex (Dandy Ribbons); r., A. Wilson (Carleton Wonder); h.c., W. Hollins, Berry Hill, Mansfield, Notts. (Confident George); The Seaham Harbour Stud, Ltd., The Dene, Seaham Harbour (Monte Christo).

PONY MARES.

CLASS 26.—Pony mares, 3 years old (foaled in 1899), not exceeding 13.3 hands; or 2 years old (foaled in 1900), not exceeding 13.2 hands: 1, S Woodiwiss, Sedgemere

Stud, Great Waltham, Essex (Sedgemere Lady Horace); 2, H. E. Ayre, Mickleover, near Derby (Mickleover Daisy); 3, H. Stratton Coles, Guyer's House, Corsham, Wilts. (Beeswax); r., R. Willis (Beeston Princess); h.c., J. A. Mullens, Barrow Hills, Longcross, Surrey (Myra).

CLASS 27.—Pony mares (foaled in or before 1898), not exceeding 13 hands, in foal or with foal at foot: 1, W. Hollins (Berry Hill Sniff); 2, W. Foster, Mel-Valley, Moseley (Mel-Valley Custard); 3, A. S. Day, Berkeley Stud, near Crewe (Peggy Sure Four); r., D. Mitchell, Millfield, Polmont, N.B. (Marsline); h.c., J. Jones and Son (I Am Coming).

CLASS 28.—Pony mares (foaled in or before 1898), over 13 and not exceeding 14 hands, in foal or with foal at foot: 1, Sir Gilbert Greenall, Bart. (Greeta); 2, W. Hollins (Berry Hill Snuff); 3, Sir Gilbert Greenall, Bart. (Dorothy Derby 3rd); r., W. Hollins (Grovehill Midget); h.c., Capt. C. A. Madge, c.o. T. Radmore, Cheam, Surrey (Burton Bess); S. Woodiwiss (Sedgemere Princess).

PONIES IN HARNESS.

CLASS 29.—Pony mares (barren) or geldings not over 6 years old (foaled in or after 1896), not exceeding 14 hands: 1, G. E. Franklin, The Field, Derby (Queen Gobang); 2, W. Foster (Mel-Valley Flyer); 3, W. Foster (Lady Horace); r., Mrs. R. T. Thornton (Model Rosa); h.c., Miss E. K. Cunliffe, Tyrrels Wood, Leatherhead (Mel-Valley Champion).

Royal Northern.

The Royal Northern Agricultural Society's spring show was held at Killybrewster, Aberdeen, on Wednesday, and it proved to be one of the best of the series. The entries were much larger than usual, the total being 617, as against 634 last year; whilst, as to the quality, the display of horses was undoubtedly the best ever seen at these shows. There were also exhibits of seeds, roots, poultry, and farm implements, and all were very creditable. In the grain department the samples shown were very superior. The medal winners were:—For barley, Mr. John Reid, Balquharn, Alford; for oats, Mr. George Smith, Ordens, Banff, with a sample of potato oats; and for potatoes, Mr. James Mackintosh, Crathes. In the four-year-old class for draft stallions, the first place was taken by Mr. A. M'Robbie, Sunnyside, Aberdeen, with Canny Man, a six-year-old which has won several prizes, and on Wednesday stood far above the other competitors. The second was Royal Kyle, which belongs to Messrs. Cocker, Hill of Pettie, and one of Mr. Coates' premium horses at Dumfries last year. The third winner was one of the Sunnyside stallions, Lord Trayner, an animal which was first as a two-year-old at Aberdeen; second as a three-year-old, and at that age he was engaged by the Sutherlandshire Farmers Club. He was not exhibited last year. In the three-year-old class, Mr. J. P. Sleigh, Fyvie, had an outstanding winner in Holloway, a brown, bred by Mr. P. M'Culloch, Whitefield, Glenluce. He was followed by Royal Scot, the property of Mr. William Renwick, Corstorphine, a very good horse, but not strong in his pasterns as the leader. Right Time, the property of Mr. Charles Lawson, Mains of Cults, took third place. For two-year-olds, Messrs. Cocker had first ticket with Sir Walter, a brown animal bred by Mr. Weir, Bridgend, Islay, which had a very creditable victory. The second prize went to Mr. Durno's Golden Gleam, exhibited for the first time. The yearling colts were a good display, and the Messrs. Cocker were again to the front, with a brown horse, which has been sold to Mr. Clark, Nether Lee, Cathcart. The second award went to Mr. Fleming, Friock Mains, whilst Mr. Alexander Burr, Oldmeldrum, had the third ticket. For draught fillies foaled after January 1st, 1900, Mr. Merson, Craigwillie, Huntly, with Jess of Craigwillie, his third prize-winner last year, made a nice leader, the second prize going to Mr. Sleigh, Strichen, with his first-prize filly at Perth. For yearling fillies, Mr. Fleming, Friock Mains, had an easy win with a half-sister of the beautiful filly which he exhibited so successfully last summer. Montave Gleeful, the second prize-winner, which belonged to Mr. Harper, Insch, was rather undersized, and a little low in the back. In the sweepstakes for yearling Clydesdale colts, Messrs. Cocker had first place with their prize-winner in its class, followed by Mr. R. Copland, Ardlethen, Ellon; while in the sweepstake for yearling Clydesdale fillies Mr. Harper, with Montrave Gleeful, had the leading award, and was followed by Mr. D. Walker, Udny. For thoroughbred stallions, Mr. David Courage, Aberdeen, with Gold Seal, a chestnut rising three years, was awarded the premier place. For hackney stallions (there being only three entries), John Brown, Craigie Cottage, Hardgate, Aberdeen, had first place, with Denmark Junior, a stallion bred in England. In this class, the second prize went to Mr. Alexander Leslie, Keith, with St. Leger, a horse rising six years, bred by the late James Walker, of Limefield, West Calder. In Shetland pony stallions, the chief awards went to Mr. Mackenzie, Earlshall, Leuchars, with Flint and Dick, two very nice specimens of the breed.

Mr. Bernard N. Wale, Agricultural Instructor at Brewood Grammar School, has issued his annual report of the experiments carried out during 1901 on the agricultural side of Brewood Grammar School.

The Hunter Show.

The last of the trio of spring horse shows at the Royal Agricultural Hall, Islington, for the present year, opens to-morrow (Tuesday), when the eighteenth annual show of the Hunters' Improvement Society, in conjunction with the Royal Commission on Horse-Breeding, and Polo Pony Society, will be commenced. The prize list is a most liberal one, the total amount offered being £5,931 5s. The Royal Commission on Horse-Breeding offer £4,200 in 28 King's Premiums of £150; the Hunters' Improvement Society £1,195; and the Polo Pony Society £536 5s. Seven groups will be catalogued, and are the representatives of Chibiabos (5), Four Poster (3), Pantomime (9), Swallowfield (4), Toscano (3), Withernam (3), and Yard Arm (10).

Entries.

As will be seen from the small table given below, the entries show a gratifying increase on those of last year, and are no fewer than 133 more than in 1900, whilst the total is nearly three times as great as in 1891, when there were, of course, no polo ponies exhibited. The following table shows the entries in the various sections for this and previous two years:—

	1902.	1901.	1900.
Thoroughbred stallions	119	113	115
Hunter sires and colts	37	28	40
Polo pony stallions and colts	49	40	31
Hunter mares and fillies	59	83	70
Polo pony mares and fillies	114	78	59
Hunter geldings	129	90	88
Polo pony geldings	35	19	12
Chargers	58	75	52
	600	526	477

The entries in the thoroughbred and hunter classes this year are as follows:—Thoroughbred stallions competing for King's Premiums, 119; thoroughbred colts, three years old, 3; hunter colts, 16; yearling hunter colts or geldings, 19; two-year-old hunter colts or geldings, 42; three-year-old hunter colts or geldings, 28; yearling hunter fillies, 16; two-year-old hunter mares, 19; three-year-old Hunter mares, 12; four-year-old hunter mares, 10; four-year-old hunter geldings, 18; five-year-old hunter mares or geldings, 48; mares, five years old and upwards, 11; young horses, likely to make chargers, 58.

Polo Pony Section.

There are fourteen classes set apart for polo ponies—four for stallions, three for brood mares, three for young stock, and four for riding classes—classes for army remounts (one), mountain and moorland ponies (two), and three competitions—bending, handiest pony, and boys' hunters to be tested over small jumps. The entries in each class are:—Stallions: Not exceeding 14.2, 11; not exceeding 13.2, 7; eastern sires, not exceeding 14.2, 10; polo-bred sires, three, four, or five years old, 4. Brood mares: Above 13.2 and not exceeding 14.2, with foal at foot, or to foal in 1902, 25; not exceeding 13.2, with foal at foot, or to foal in 1902, 9; Arab brood mares, 7. Young Stock: Yearling entire colts, geldings, or fillies, 16; two-year-old entire colts, geldings, or fillies, 21; three-year-old geldings, or fillies, 9. Riding Classes: Four years old, 6; five years old and upwards, 42; four years old and upwards, not exceeding 13.2, 7. Army Remounts: Five to nine years old, not to exceed 14.2, 6. Mountain and Moorland Ponies: Brood mares, in foal or with foal at foot; fillies, two or three years old (a) thirteen hands and over, 11; (b) under thirteen hands, 4.

Some novel features are to be introduced in the polo section this year. In addition to the ordinary class, an extra stock class has been opened, in which Professor Cossar Ewart will show an interesting exhibit in his Zebra-Hybrid Birgus. Lord Arthur Cecil is also sending groups of mountain and moorland ponies, stallions, and mares of the following old British breeds:—Connemara, Exmoor, Fell, Highland, New Forest, and Welsh ponies. In the eastern sire class there will be two ponies of note—Parahk, which carried the late Captain de Montmorency (killed in South Africa) when he won his V.C. in the Soudan; and Bashom (the Fox), which, though wounded at Omdurman, carried despatches fifty miles. De Wet (the Basuto Pony), exhibited in 1901 for the first time, is again shown.

Programme.

The official programme of arrangements for the week is as follows:—

TUESDAY.

Show opens at 9 a.m. Closes at 6 p.m.

9 a.m.—Judging of Thoroughbred Stallions entered for the King's Premiums.

12.30 p.m.—Seventeenth Annual General Meeting of Members of the Hunters' Improvement Society.

If time permits, a Parade of the Hunters and Chargers will take place in the afternoon upon the conclusion of the Judging.

WEDNESDAY.

Show opens at 9 a.m. Closes at 6 p.m.

9 a.m.—Judging of Hunter Young Stock (Classes 1 to 9), followed by Judging of Hunter Riding Classes (10 to 15). Parade of Premium Stallions, etc.

THURSDAY.

Show opens at 9 a.m. Closes at 6 p.m.

9 a.m.—Judging of remainder of Hunter Classes left over from Wednesday.

12 noon.—Judging of Chargers (Classes 16 to 19).

12.30 p.m.—Annual General Meeting of Members of the Polo Pony Society.

2.30 p.m.—Parade of Thoroughbreds, Hunters, and Chargers.

4 p.m.—Judging of Polo Riding Classes (30 to 33).

FRIDAY.

Show opens at 9 a.m. Closes at 5 p.m.

9 a.m.—Judging of Polo Breeding Classes (20 to 29). Award of the Gold and Silver Challenge Cups. Mountain and Moorland Ponies (Class 38).

2.30 p.m.—Remount Class (Class 34).

3 p.m.—Parade of the Pony Classes.

4 p.m.—Bending Race, Handiest Pony and Jumping Competitions.

English Jersey Cattle.

A council meeting of the English Jersey Cattle Society was held at 7, Princes Street, Hanover Square, London, W., on Monday, preceded by a meeting of the General Purposes Committee, Sir James Blyth presiding.

Twenty new members were elected.

A letter was read from Mr. J. J. Hemingway, secretary, enclosing the new bye-laws under which English Herd Book animals may be accepted for entry in the Herd Register of the American Jersey Cattle Club. The following extracts are from these bye-laws:—

"Animals imported from Great Britain, to be eligible, must have been entered in the English Jersey Herd Book, and must present an unbroken pedigree to ancestry recorded in the Island of Jersey Herd Book.

"Application for entry of an imported animal must be accompanied by a certificate signed by the authorised agent of this Club resident in the Island of Jersey, or resident in Great Britain (as the case may be), testifying to the identity of the animal and to the truth of the statements accompanying it, and also by a certificate of export, giving the breeding of the animal, signed by the secretary of the Jersey Herd Book, or by the secretary of the English Jersey Cattle Society. In the case of English-bred animals, the certificate signed by the agent of this Club shall include the complete pedigree of the animal carried to the Island of Jersey recorded ancestry, certified to by the secretary of the English Jersey Cattle Society, which pedigree shall be published in the Herd Register of this Club. The certificate of export shall be returned to the owner of the animal, upon his request, after examination and record.

"In order to prevent the possibility of the substitution of other animals for those to which the certificates refer, the authorised agent of this Club in the Island of Jersey, or in Great Britain, shall number each set of certificates, and shall attach to each animal, around the neck or the base of the horns, a chain, to be furnished by the secretary, fastened with a padlock, bearing the same number with the certificate, the keys of which, in duplicate, shall be in the possession of the agent of this Club in the Island of Jersey, or in Great Britain, and of the secretary. After arrival the chain and lock must remain attached to the animal until examined by the secretary of the Club or his deputy; provided that, in the case of accidental breaking of the chain, the animal may be admitted with the consent of the Board of Directors. The lock and chain may be left on the animal and retained by the owner, provided he reimburses the Club for the cost of them.

"The letters A. J. C. C. and the number shall be branded either on the horn or hoof, at the option of the importer.

"No application shall be considered until the fees are paid; nor shall any number be assigned by the secrttary until every requirement has been complied with.

"The fees on animals imported from the Island of Jersey and from Great Britain (excepting those imported in dam) shall be: Entries of males or females, 10 dollars each (£2 2s.)."

The secretary reported that birth sheets from 300 herds had been received for entry in the forthcoming Herd Book, Vol. XIII. Of these the greater portion had been revised, and the work was well forward.

Mr. Ernest Mathews, on behalf of the General Purposes Committee, reported that they had examined the statement of funds, and recommended the payment of accounts for printing and other expenses. Mr. Mathews further stated that the Council had found that most of the Jerseys now tested reached the present standard of merit, and that a higher degree of excellence should be fixed. The committee therefore recommended that in future certificates of merit should be granted for:—Cows under five years old obtaining 30 points; cows five years old and over obtaining 35 points. The report of the committee was adopted.

Letters accepting the offer of prizes for butter tests for 1902 were read from the secretaries of the following shows:—Royal Jersey Society.—Gold, silver, and bronze medals, and £1 butter

prize. Bath and West of England.—Gold, silver, and bronze medals, £30 for two classes of cows of any breed or cross, and £1 butter prize. Royal Counties.—Gold medal or £10, silver medal and £5, bronze medal and £3; also £1 prize for the best butter. Tunbridge Wells.—Gold medal or £10, silver medal and £5, bronze medal and £3; also £1 prize for the best butter. Tring.—Gold medal or £10 silver medal and £5, bronze medal and £3; also £1 prize for the best butter.

The General Purposes and Editing Committees were re-elected for the year 1902 with the exception of the Hon. A. E. Parker, who wrote stating he wished to retire. A list of judges proposed by members of the Society was revised and ordered to be forwarded to the secretaries of the various agricultural societies. The following new members of council were elected:—Viscount Enfield, Dancers Hill, South Myms, Middlesex; and Mr. J. Carson, Crystalbrook Park, Theydon Bois, Essex.

The next council meeting was fixed to take place in May.

IN PARLIAMENT.

HOUSE OF COMMONS.

Agricultural and Technical Instruction in Ireland.

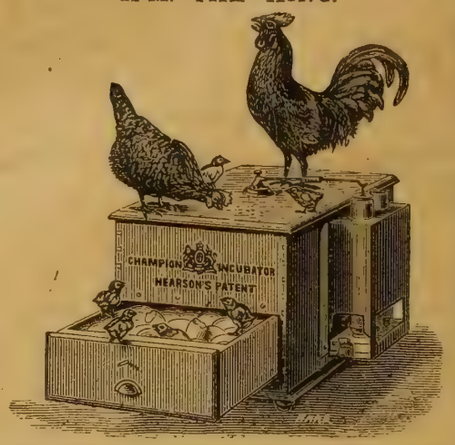
On Monday the Attorney-General for Ireland presented a Bill to enable County Councils in Ireland to exclude congested districts from the area of charge for certain purposes relating to agricultural and technical instruction. The Bill was read a first time.

Light Railways.

Mr. Bryce asked the President of the Board of Trade on Monday whether he proposed to bring in a Bill this session to amend the Light Railways Act; and, if so, whether he could introduce it before Easter.

Mr. G. Balfour.—The Bill is in preparation, but I am unable to say when it will be introduced.

Remounts Purchased in England.



Mr. F. Wilson asked the Secretary for War on Thursday whether, having regard to Colonel Kitchener's Report on Remounts, stating that nothing had really come up to the English horse for cavalry and draught, the War Office intended in future to buy a larger proportion of English horses; and whether, to facilitate sale and purchase, he would give a return showing who were the authorised official buyers in each county, the class of animal required, and the price which would be paid for accepted horses, thereby encouraging farmers and breeders to sell direct to Government at full prices instead of getting a less rate through middlemen.

Lord Stanley—The success of English horses in South Africa, which horses, I should mention, include a considerable proportion of horses from America, was due in a considerable degree to their hard condition, they being corn-fed. In normal times the horses required for the Army at home have been, with very few exceptions, purchased in England or Ireland. Purchase is being briskly carried on in those countries, and will be continued as long as suitable animals are procurable and required. I will consider whether it is possible to advertise more widely than at present the channels through which horses are purchased and the conditions.

The second number of the "Nature-Study Journal," which has just come to hand, contains some useful suggestions and reports of lessons for the use of our rural school teachers. The publishers are the South-Eastern Agricultural College, Wye, Kent, and the secretary, to whom communications should be made, is Mr. Lance Rawes, Send School, Woking.

Bridport Cattle and Sheep Fair.—The spring sheep and cattle fair at Bridport, Dorset, held on Wednesday, was well supplied, but scarcely to the extent in some previous years. Buyers were largely represented from over the Somerset and Devon border, as well as from other parts, and a brisk trade resulted for all the better-class things, either in cattle or sheep, prices of which compared favourably with other recent years. Couples made 46s. to 54s. 6d.; wethers, 40s. to 48s. 6d.; ewes, 38s. to 48s.; horn wether hogs, 37s. to 46s.; cross-bred lambs, 30s. to 36s.; horn lambs, 28s. to 35s; store lambs, 27s. to 35s. Cattle: Milch beasts made £16 10s. to £21 for heifers, and £12 to £14 for cows; barreners, £18 to £26 per pair, with a brisk inquiry for the fresher condition grades. In-calvers were also much wanted, and made good prices. Calves, both for slaughter and for rearing purposes, sold well. Store pigs a good killing trade; medium weights in fat pigs 10s. 6d. to 11s. per score.

CHICKENS ALL THE YEAR ROUND
BY USING
Hearson's Patent
CHAMPION INCUBATORS.
Manufacturers by Appointment to

Best Way to Feed Fowls.

In the Journal of the British Dairy Farmers' Association, Mr. J. P. W. Marx has something to say about the way to feed fowls. It seems the best method is to scatter the food over a wide space of ground, be that food soft or hard. This is subject to some exceptions, depending on the state of the ground and whether the fowls are kept in confinement or at liberty. If the ground be soft and dirty, such as would be the case in wet weather, so that dirt must adhere to the food, then the food is better given in long low wooden troughs, or large flower-pot saucers. Similarly, when fowls are penned up and the ground is likely to be soiled by their excrement, the food of all kinds should be fed from some kind of vessel.

The utensils used for food should be numerous, placed some distance apart, and each one filled as quickly as possible. The object in doing this and in widely scattering the food when thrown broadcast on the ground is to separate the fowls at feeding time, and give every one a chance of getting its fair share. To empty a bucket of corn out of the stable door means a grand opportunity for the strongest to get more than their share, and also to peck and bully the weak fowls, which do not get enough. Whenever the state of the ground and the weather permit, the food should be thrown wider about. If the feeding ground can be so arranged as to extend round two or three sides of a building or behind any odd corners, so much the better, for then any persecuted members of the flock have a better chance of getting a fair meal in peace. When three or four cocks are running together there is always a lot of bullying at feeding time. A couple of lengths of waddled hurdles placed here and there on the feeding ground make an admirable screen, and serve to break up the fowls when fed.

The feeding place should, when possible, be changed frequently. If the poultry have the run of a short grass meadow this can be done at any time. By throwing the food on the grass the fowls are kept scratching and hunting for a long time; the crop is slowly filled by the food they have to seek for, and this is much better than rapidly distending it by gobbling up corn from a heap. Moreover, the scratching which goes on for some time after the food is given is capital exercise, and keeps the fowls bright and active. Fowls hang about and draw to the place where they are fed; generally speaking, they are not wide foragers. Some breeders and varieties and some individuals are better than others in this respect. Hence, if the actual place of feeding be changed, say monthly, the fowls are induced to wander about more freely.

Present Care of Poultry.

The young pullets which have come on to lay and drop their eggs about the run, should have some nice nests prepared for them, and two or three dummy eggs placed in. If this does not tempt them to go in, they should be put in, and fastened in for a day. This teaches them to go in. If the eggs are dropped about the run the frost injures them, and makes them unfit for sitting purposes. On frosty days the eggs should be looked up two or three times a day. This is very important to those who have valuable fowls. Those who are thinking of going in for fresh cockerels, stock drakes, guinea fowls, ganders, and turkeys, should order them this month, if they have room for them; if not, there will be a possibility that the best birds will be gone by next month, or they have to pay a much longer price for them. This is important to those who require male birds more than those who only wish for hens and pullets, though it is well to buy the latter also, so that they may settle down comfortably in their new quarters.

New Agricultural Patents.

Specially compiled for *Mark Lane Express* by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

3,959.—Henry Myers, of Burton-on-Trent, for "The manufacture of cattle meal, from millers' and brewers' by products."

4,112.—John Barlow, of Chancery Lane, London, for "Improvements in or relating to seed drills and the manner of their application to ploughs."

4,408.—Thomas Edmund Rowe, of Manchester, for "Improvements in Agricultural one-way ploughs."

Patents Sealed.

19,207.—J. Lowson, J. Money, and W. Price, all of Lincoln, for "Ploughs, agricultural."

19,628.—S. J. Symes, of Wicklow, for "Reaping, mowing, and harvesting machines."

The Cannock Agricultural Company's Catalogue for 1902 contains, in addition to full particulars of the firm's special bone manure's selected farm seeds, implements, etc., much information of general interest to agriculturalists. Grass and clover seeds, root seeds, etc., are described in detail, and particulars of their special characteristics and qualities given. The list is well arranged and illustrated. A copy of the Catalogue may be had post free on application to the company.

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent"-fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s per cwt., carriage paid to nearest station.

INVESTED FUNDS: £43,000,000.

Summary of the Report presented at the Fifty-third Annual Meeting, held on 6th March, 1902.

ORDINARY BRANCH.—The number of Policies issued during the year was **76,831**, assuring the sum of **£7,575,835**, and producing a New Annual Premium Income of **£389,776**.

The Premiums received during the year were **£3,489,955**, being an increase of **£167,613** over the year 1900.

The Claims of the year amounted to **£1,563,775**. The number of Deaths was **6,723**, and **6,105** Endowment Assurances matured.

The number of Policies in force at the end of the year was **651,558**.

INDUSTRIAL BRANCH.—The Premiums received during the year were **£5,529,461**, being an increase of **£31,764**.

The Claims of the year amounted to **£2,104,939**. The number of Deaths was **211,670**, and **2,227** Endowment Assurances matured.

The number of Free Policies granted during the year to those Policyholders of five years' standing who desired to discontinue their payments was **74,198**, the number in force being **771,279**. The number of Free Policies which became Claims during the year was **17,880**.

The total number of Policies in force at the end of the year was **14,334,820**: their average duration exceeds nine and a half years.

The Assets of the Company, in both branches, as shown in the Balance Sheet, are **£43,292,026**, being an increase of **£3,396,698** over those of 1900.

The Staff Provident Fund, which was founded in 1898 for the benefit of the outdoor staff, shows a satisfactory increase for the year, the total amount standing to the credit of the Fund being **£101,960**.

Messrs. Deloitte, Dever Griffiths & Co. have examined the Securities, and their certificate is appended to the Balance Sheets.

D. W. STABLE,
Secretary.

THE "SVEA" SEPARATOR

The "SVEA" Separator is the Cheapest because it is
THE SIMPLEST, THE STRONGEST,
THE MOST DURABLE, THE EASIEST TO TURN,
A PERFECT SKIMMER, and
HAS THE GREATEST CAPACITY.

The **"SVEA" Separator** being thoroughly up to date, embodies the following improvements:—

1.—**The Short Bowl Spindle** replacing the usual long one, which so soon gets damaged if not handled with great care.

2.—**The Patented Top Bearing** by means of which the bowl is supported at **both** top and bottom.

This is a special feature of the "SVEA," and is considered a great advantage as contributing to the smoother and easier running of the bowl, also preventing all accidents.

3.—**The Simplicity** of the skimming arrangement consisting of only a few rings or discs (in the small sizes 4) instead of the usual large number.

4.—**The Bowl is easy to take to pieces and clean.** This fact and the small number of the parts to clean will be much appreciated by every one used to Separators.

5.—**The Conical Lugs** on the inside of the Bowl Top make it **impossible for the Bowl to get out of balance** by reason of the threads becoming worn.

6.—**The easy and noiseless motion** effected by the use of Conical Gearing instead of the usual cylindrical one, thus permitting the

7.—**Reduction of friction and wear** obtained by the position of the worm wheel, at an angle of 45° to the worm, instead of the usual right-angled gearing.

8.—The **extraordinary strength** and good workmanship of the machine throughout.

Table of Sizes & Prices

OUR VARIETY HORSE SHOW AND THE REMOUNT QUESTION.

We term the great national exhibition of light horses held last week in the Royal Agricultural Hall the "variety" show because it comprehends so many kinds, and also owing to its copious embrace of races, topics of inquiry innumerable, and of great versatility, crop up about it. Thoroughbred Stallions, Hunters, Chargers, Polo Ponies, Army Remount, Mountain and Moorland Ponies, and sections extending even to classes for bending races and manœuvres appeared in view, in turn causing every one of the four days to unfold its own features of interest, and to impart to our third spring equine display at Islington a high national importance and value never previously attained to.

The show, moreover, was well calculated to draw towards it a larger amount of public attention this year than usual, owing to the present phase of the army remount question. All at the moment is uncertain what the Government intend to do to make the supply of army horses more efficient and satisfactory than it has been in the past. Mr. Brodrick not long since was understood to declare that "the whole question of remounts is now being considered." We have only to await patiently, therefore, the result of these deliberations, with the hope that there will be no trifling with the questions of momentous magnitude involved, and that if it be possible to make the issue conduce to the advantage of home breeding, the desirability of causing matters to evolve in that direction will not be lost sight of.

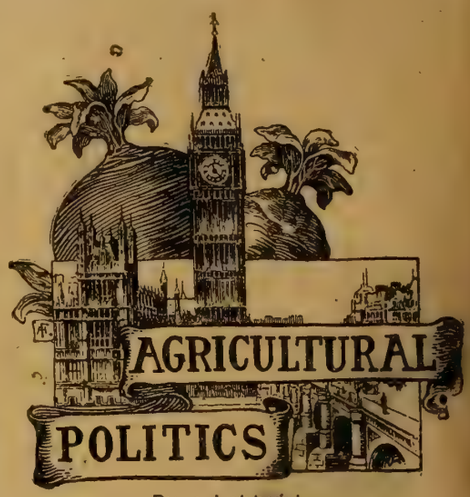
Previous to the war in South Africa our farmers were frequently told by the powers above that they did not attend to the breeding of half-bred horses to anything like the extent the service demanded. The reply to this was that it did not pay them to do so; that, owing to light horses requiring a much longer period to come to maturity than heavy horses before they were marketable, occupiers of all the best lands and those eligible for cart-horse breeding found it far more remunerative to breed and rear the latter than the former. To meet this difficulty proposals have from time to time been made that the Government should hold in hand large horse farms of its own, so that the Commissioners it sends out to buy horses might purchase and take them off farmers' hands younger than they do at present. No doubt, if such a scheme were deemed practical and could be carried out, there would be far greater inducements for farmers in general to take up the matter than now. But those who pretend to know declare

that there is not the slightest probability of the Government entertaining that scheme, because it would involve great expenditure and prove non-economical. The supply of foreign horses is, no doubt, large, and was drawn upon immensely in the past two years, but that it varies considerably in quality is unquestionable. Lord Stanley, on being questioned in the House of Commons the other day, admitted that in normal times army remounts have usually been purchased, with few exceptions, in England and Ireland, and that unquestionably they have been superior to foreign horses. Lord Kitchener's report has been quoted over and over again in declaring as much. But the fact appears to have been that when so many horses were captured or killed by the Boers the army contractors were glad to get anything available for military purposes they could lay hands on.

The experience of the South African campaigner has, however, led to a change in the opinions of some as to the best animals to rear for army purposes; smaller, stocky ones of less height than formerly being deemed best. There cannot be the slightest doubt of such being the case when warfare is conducted in hilly districts, because active, small horses are more manageable and expeditious in their movements than larger, heavier ones. But whether the old-fashioned cavalry horse would not offer the greater resistence and perform more havoc with infantry on the plain or an ordinary battlefield is not merely doubtful, but extremely probable. The experiences of South Africa have proved of an extraordinary character. The fastnesses of the mountain districts presented almost insurmountable difficulties for any kind of remounts to cope with, and for infantry and cavalry alike there were surprises and unlooked-for contingencies innumerable. We ought not, then, to make our future proceedings or determine future plans too much on the experience of a campaign of such an exceedingly extraordinary character.

Meantime we may heartily exchange congratulations that the eighteenth annual show of Thoroughbreds, Hunters, Chargers, etc., has proved pre-eminently a satisfactory one. The fact of the vast increase of entries from 477 in 1900 to 526 in 1901 and 600 in 1902 is, no doubt, attributable to the additions chiefly of the Polo and other pony sections, but no doubt these varieties required attention and improvement previously, and whether the character of our army remounts is destined to alter in the future or not, public interests will be largely promoted by the evolutions now taking place. Exceedingly desirable, for instance, does it seem that the hardy forest and mountain ponies should be sustained in their integrity, and be brought to still greater perfection, if possible, by being bred to the high quality Polo pony stallions. The stout-limbed, brawny, robust forms of these races are admirably well fitted to build upon for obtaining the ideal stamp of small military horse. Many theorists, will have to be the army remounts of the future. But it has been asserted that the most valuable type of some mountain kinds, and especially the Welsh, has been lost. A statement has appeared in one journal that Hackney stallions have spoiled Welsh ponies, but probably a great many stallions have been employed which, although termed Hackney, had very little of what would be considered pure Hackney blood.

There was, however, a most admirable exhibition of ponies, the groups of extra stock brought forward by Lord Arthur Cecil making full amends for any shortcomings in the ordinary classes; and both the Hunters' Improvement and Polo Pony Societies may be congratulated on the satisfactory character of the exhibits. Nor must the Thoroughbred stallions be omitted from mention. Those who remember what they were like when the Royal Commission on Horse-breeding was first appointed for the Royal premiums to be appropriated to the object of placing the best Thoroughbred stallions at the service of breeders, will admit that there was far greater difficulty in selecting the full complement of sound animals than now. There was practically no difficulty last week, and, so far as the service extends, the result cannot but be beneficial.



By a Man of Mark Lane.

The receipts on account of Revenue from April 1, 1901, when there was a balance of £5,596,918, to March 8, 1902, were £131,129,602, against £120,795,584 in the corresponding period of the preceding financial year, which began with a balance of £3,517,047. The net expenditure was £179,837,137, against £170,740,400 to the same date in the previous year. The Treasury balances on March 8, 1902, amounted to £12,564,223, and at the same date in 1901 to £7,694,682.

According to the report issued by the Bengal Department of Land Records and Agriculture, the normal area cultivated with oilseed crops in that province is estimated at 4,162,400 acres, but the area actually sown this year is returned at only 3,805,500 acres, against 3,872,700 acres last year. The decrease is due to the drought at the sowing season. Dinajpur is the only important oilseed-growing district in the province which anticipates a crop of 100 per cent. Rajshahi, Pabna, Mymensingh, and Saran estimate an out-turn varying from 90 to 99 per cent., while Rangpur and Purnea expect from 80 to 89 per cent. of a normal crop. Nadia, Dacca, and the Sonthal Parganas expect from 70 to 79 per cent., and Bogra, Gaya, and Hazaribagh from 60 to 69 per cent., but Champaran anticipates only 55 per cent., Ranchi 50 per cent., and Darbhanga 47 per cent. of a normal crop. The out-turn for the province, as a whole, will amount, according to the estimates of the District Officers, to 78 per cent. of a normal crop. If, however, general rain falls before the middle of March, it is probable that an 80 per cent. crop will be harvested.

The Beer Bill, of which Mr. Tomlinson has charge, and which is down for reading on April 23, has now been practically drafted, and will probably be issued this week. It is drawn on somewhat different lines from the Bills which have been previously before the House.

The area under rice cultivation in the 14 principal rice-growing districts of Lower Burma is, according to the District Officers' reports on January 31st, 6,498,120 acres, an increase of 189,087 acres or almost 3 per cent. over the area reported last year. Rain fell at the end of the first week in February, but the damage to the crop has been very slight. Some damage is anticipated in the neighbourhood of Ma-ubin, where over one inch of rain fell, and slight damage is reported from Thaton. The estimated surplus available for export is estimated at 2,260,000 tons cargo rice, equivalent to 38,300,000 cwts. cleaned rice. The increase of 60,000 tons is largely due to the anna estimate in Thongwa being raised. Of the estimated surplus about 80,000 tons may be exported to Upper Burma.

By a Lobbyist.

It is not without significance that the Warwickshire Chamber of Agriculture has decided—after hearing a paper read by that strenuous and practical reformer, Mr. Oscar Bowen, of Ladbrooke Park—upon the appointment of a committee with a view to formulating a practical reorganisation scheme dealing with the Board of Agriculture. This is a wise and judicious step. I am persuaded that Mr. Hanbury is too zealous a man to regard the resolve with jealousy or disapprobation. In pursuing the policy of reorganisation upon which he has decided he will naturally be anxious to become acquainted with the desire of the farmers themselves. The formulation of a scheme will mean that a disciplined and methodical attention has been devoted to the business, and that the advice proffered to the Minister for Agriculture is not the ill-regulated and ill-digested thought of a rhetorical moment. The world is now aware that Mr. Hanbury is anxious to in some way adapt the Irish example to British necessities. May I thus suggest to the Warwickshire Chamber and to all other bodies possessed by a similar anxiety that it would be wise to give a careful study to the constitution of the Irish Board and to the modifications and developments necessary to make its adaptation a beneficent organisation to British farmers. Mr. Hanbury is at this moment in an impressionable and assimilative mood. He will readily pay heed to practical advice.

I ought to congratulate my old friend Mr. Bowen upon what is really a notable achievement. The Warwickshire Chamber of Agriculture is the first body of its kind to give an organised attention to the constitution of the executive authority in agriculture, and this organised attention is due entirely to the vigorous advocacy of Mr. Bowen.

This Warwickshire example ought to be followed. Mr. Hanbury would, in fact, welcome it. This much, indeed, he made clear in his speech at York. If that speech meant anything at all—and I do not desire to dwell at any length upon it, for it would be only to laud my own efforts, the oration being practically a reproduction of the contentions which I have in and out of season pressed on the interest—it was an invitation to the farmers, both in their individual and organised capacity, to let him receive their own views upon the character which the re-organising policy should assume. The speech was even more than this—it was a rebuke to the characteristic apathy of the rural organisations. "You should," said the Minister, "not merely sign resolutions. You should let the Board know what are the necessities of the interest and what are the particular necessities of your own special districts." "Help me," he pleaded, "to make the Board something more than a doll dressed up in red tape." The non-recognition of this invitation would be an act of criminality. A Minister is asking for the help of the farmers themselves not merely in the establishment of a friendly department in the executive authority—not merely in the establishment of a department which shall protect their flocks and herds against disease and their milk and butter against the competition of fraudulent products, but in the establishment of a department which will be capable of checkmating the

sordidly-exorbitant demands of the railway companies and of a department which will perform the supreme duty of seeking out new and profitable markets. Everyone of these purposes was made clearly apparent in the York speech, and they were conveyed to Mr. Hanbury's hearers with an emphasis of phrase that sufficed to admirably illustrate his resolution.

The Warwickshire Chamber, by the way, is entitled to flatter itself with the recollection that Mr. Hanbury's generous ambitions were pre-suggested to them in Mr. Bowen's paper. Their enunciation by Mr. Bowen and their acceptance by the Chamber is an excellent evidence that both the author and his hearers possess the gift of prescience.

The movement in favour of encouraging the pursuit of horse-breeding by British farmers—in order to provide an assured source of supply for the army—proceeds apace. The Duke of Devonshire has promised the Earl of Dunraven that he will call the attention of the Members of the Royal Commission on Horse-breeding to the matter, with a view to seeing if it be possible to advise a practical policy. While this is so, in the House of Commons members are eternally badgering Ministers with questions which serve to illustrate how disjointed, haphazard and faulty is the present system, and how easy it would be in a quarrel with a great continental rival for the enemy to rob us of that source of supply. More important, however, is the fact that Mr. Hanbury has also in this connection adopted the platform of the MARK LANE EXPRESS, and has declared in unmistakable language that "if the War Office wants horses, the British farmer has the first claim to supply them"—in other words, that the British farmer has the first right to profit by the market which the necessities of the empire creates. Unfortunately, the farmers themselves and the farmers' organisations have not seen fit to move in the matter. It may be that they think the business is in such sufficiently good hands that no definite action on their part is necessary. A Minister, however well-advised and generously-inspired he may be, is all the better for a stimulant, and the Parliamentary agitator works all the better for applause, even though it be the applause of a clique. Agitation—to utter a third instructive platitude—is the only parent of reform.

It has been suggested to me by a well-known Member of Parliament that the relations of Mr. Hanbury and his fellow Ministers are not, to use my Parliamentary friend's own phrase, "quite cousinly." For the life of me I cannot see the justification for this suspicion. This M.P. finds it, however, in the fact that in his last speech the Minister for Agriculture did not fail to lament that during the present war there has been no co-operation between the Board of Agriculture and the War Office in connection with the purchase of horses for the army. It was a most justifiable criticism, but, at the same time, it might have been born of some other influence than Ministerial disagreement. I attribute this utterance of Mr. Hanbury's simply to the fact that he is desirous of pressing the wisdom of the policy of clothing the Board of Agriculture with effective powers upon his colleagues in the most direct manner possible. I can comprehend that in the Cabinet Councils the more pressing and lurid question associated with the conduct of the war and of the best way of securing peace command an absorbing attention. It would be simply impossible at these momentous conferences to secure a hearing for a scheme of comparative insignificance. However, Mr. Hanbury's colleagues would naturally like to know what Mr. Hanbury has to say; and they would, in their matutinal study of the newspaper, peruse his remarks. Mr. Hanbury is just the practical-minded man who would comprehend that he must not intrude his domestic purposes into a conference in which the tragic issues of the war must have first consideration. He, however, has adopted a method quite as effective. I am certain that when, in any future campaigning, the army needs horses, full advantage will be taken of the knowledge and experience of the officials of the Board of Agriculture.

At all events, one thing is clear and emphatic. Mr. Hanbury has the right to demand, and, indeed, to command the unswerving fidelity and loyalty of the British farmers and of the British rural organisations in his present purpose. He is the first Minister of Agriculture who has revealed the resolution to give the department a practical character—to make it, in Mr. Hanbury's own phrase, the personal friend of the farmer. In this connection, I am directing no raillery at either of Mr. Hanbury's predecessors. It may be that the experience which Mr. Hanbury now possesses was necessary to a full comprehension of the defects of the Board. Be that as it may, Mr. Hanbury is anxious to perform the good task, and I again urge that he be conceded an unswerving, diligent support. This will mean the abandonment of the sluggish apathy which usually possesses the farmer where his own affairs are concerned. Will he consent to the sacrifice?

PRACTICE WITH SCIENCE.

Manuring Experiments in Hampshire.

(*Continued from p. 267.*)

Professor Gilchrist also gave the results of some trials with regard to

Manuring Potato Crops,

which he carried out with Dr. Vipan at East Cams Farm — unmanured the weight, big and small, was 4 tons 13 cwt., with 20 tons to the acre of farmyard the crop was increased by one ton, and a complete dressing of artificials gave 12 tons as compared with 5½ tons on the unmanured plot. The dressing applied in this case was 20 tons of farmyard manure, 2 cwt. nitrate of soda, 3 cwt. superphosphate, and 1½ cwt. sulphate of potash. The same manures without the dung gave 11 tons 7 cwt., or an increase of about 6½ tons over the unmanured. In another case, instead of the 3 cwt. of superphosphate they used 4 cwt. of basic slag and the other manures, and the result was to get only 7 tons of potatoes instead of 11 tons. On a third plot they used no potash, and the result was no better than the unmanured crop—here, therefore, was a very decided result from the use of 1½ cwt. of sulphate of potash. Where no nitrogen was used the crop was 10 tons, as compared with 11 tons where 2 cwt. of nitrate of soda was used. To get a good result with dung it was advisable to apply it a month or two before putting in the root, or potato crop, because if it was used just at the time of planting potatoes, or sowing mangel, if they had a dry spring the dung kept the land more open, and the drought got in. Or take the case of a crop of barley; an acre of barley during the time it was growing would evaporate about 600 tons of water, and if they put on dung in the spring to plough in, so as to let drought into the land, there was not as much water left to the soil. If they could so treat the land during the winter and spring as to get a condition for preserving the moisture in the soil they should secure much better results from any manures that might be applied. If dung was applied in the winter and ploughed in, it became incorporated with the soil, and helped to hold moisture instead of letting it go. He also referred to some results for pasture. The trials were carried out on a field near Botley, on Mr. Gater's farm, and in this case the best results were got by a dressing of potash manure and basic slag combined. A dressing of this had a marvellous effect in making the pasture finer in the bottom, and the top grass of much greater extent, and in every way of improving the pasture.

Conclusions.

They saw, therefore, that in the manuring of land they had to manure in a very different way for different crops. If they wanted to improve pasture in that district, probably the best manure was basic slag, and, as a rule, it would be very well backed up by using a potash manure like kainit, or sulphate of potash, or muriate of potash. If potato crops, if they applied nitrate of soda they got a great decrease of haulm, but they did not obtain relatively the same increase of crop—it would increase the crop, but not to the extent indicated by the increase of haulm.

Many were apt to manure mangels just as they manured turnips and swedes, but they must be manured in a very different way. For turnips and swedes superphosphate was by far the most important, and, as a rule, potash manures, and even nitrogenous manure, sometimes increased the crop: in the case of mangel they, as a rule, wanted all the ingredients, nitrate of soda was of the first importance, phosphates second, potash was very often useful, and a judicious dressing of common salt was almost certain to give an increase of the crop.

In the manuring of crops throughout the rotation it was advisable in profitable farming not to spend money unless they were pretty sure it was coming back. It was no time for any expensive farming or for spending a great deal of money so as to get the very highest crops, but it was a time for judiciously making use of farmyard manure and supplementing it with judicious dressings of artificials—they might be small, but should be large enough to give a result. In this way many satisfactory crops would be grown. He hoped the use of expensive special manures would very soon be given up; when they had a manure which was called "special turnip manure," or "special potato manure," they had practically no guarantee as to what it was made up of. But if with the judicious use of farmyard manure they appreciably applied artificials such as he had mentioned to them, and which they could mix for themselves, he had no hesitation in saying that the results would be much more satisfactory, and at the same time much more economical.

In reply to the discussion which followed, Professor Gilchrist said he was quite open to conviction on the point as to the use of

Nitrate of Soda as a Top Dressing,

but he had seen many blanky plots in mangels which had been due to top dressing. By applying part at the time of sowing, it was mixed with the soil, and, as a rule, no water percolated through the soil at the time mangels were sown, or for some time afterwards, it being a dry season of the year, and as long as this was the case the nitrate was not lost out of the soil. It would not do to apply salt like kainit late in the winter. Kainit was nearly as soluble as salt, but did not get washed out of the soil. Salt did get washed out, and should not be applied too soon. Mr. Blundell had raised an interesting point as to the amount of dry matter from each of these plots. He was sorry to say they did not take specimens of the roots, and they had not been analysed. It also would mean a very considerable amount of research work, but that had been done in a very complete way at Rothamsted by the late Sir John Lawes and Sir Henry Gilbert, the latter of whom we also lost during the recent Christmas vacation. Their analyses proved there was less water in mangels from unmanured plots than from any of the other plots, but at the same time the material was not as good for feeding, because the small mangel from unmanured plots were more stringy, and there was more undigestible matter. Where nitrogenous manures only had been applied, the mangels had been more watery, but where phosphates and potash have been applied in addition the mangels had not been quite so watery, and the feeding power had been greater; and where sulphate of ammonia only had been applied to the mangels the leaves had come up well, but the roots had not matured. Some work of this kind was going on at Reading just now. Dr. Luxmoore was analysing several different kinds of mangels grown alongside of each other, and if they published the number of tons per acre, and then the number of tons of feeding material per acre, deducting the water, he was sure it would be interesting. He had often seen mangels more patchy where nitrate had been sown, and had thought it was due to its injudicious application as a top dressing.

OUR LIST OF SHOWS.

The Mark Lane Express

POCKET BOOK

AND

LIST OF AGRICULTURAL SHOWS.

Our list of Agricultural Shows is this year issued in the form of a pocket book, of a convenient size, which, in addition to containing the Show Fixtures for 1902, includes a considerable amount of useful information, consisting of Railway Rates for Stock, tables, etc. The Pocket Book consists of 72 pages and cover, and is of a size eminently suitable for the purpose for which it is intended. A vacant page for memoranda faces each page of the Show Fixtures, and this arrangement will be found of great use, enabling readers to easily and quickly make a note of any prospective engagements.

Copies of the "Mark Lane Express Pocket Book and List of Agricultural Shows" may be obtained free upon application to 1, Essex Street, Strand, London, W.C., the only stipulation being that ½d. stamp for each copy required is forwarded to cover the cost of postage.

WATERPROOF SHEETS

FOR

THRESHING MACHINES, PORTABLE ENGINES, MILLER'S, CARRIERS, LUGGAGE CART COVERS,

AND ALL PURPOSES.

Illustrated Price List and Samples Post Free.

Waterproof Oil Sheets at 1/6 and 1/8 per square yard.

Chemically-Dressed "Peck" Cloth at 1/11 per square yard, complete with tie cords, lettering, &c. Thoroughly seasoned, ready for immediate use.

J. H. PECK & CO., LTD., WIGAN.

Established 1803. *Telegrams*—"Peck, Wigan."

The Provision Trade and Blended Butter.

The following resolution has been unanimously adopted at a largely-attended meeting of members of the provision trade:—

"That in the opinion of this meeting of members of the Home and Foreign Produce Exchange, representative of importers and distributors of provisions, in general meeting assembled, the sale of so-called 'milk-blended butter' is to be condemned as opening the door to fraud, and as being in the highest degree prejudicial to the interests of consumers, and a serious menace to the production of butter both in this country and in the Colonies; and that, in the event of it being held to be legal to sell this mixture as butter, urgent representations be made to the Board of Agriculture to take immediate steps to promote such legislation as will prohibit the sale of butter containing more than 16 per cent. of moisture, thus protecting honest traders and dairying interests."

Siberian Butter.

The Russian Ministry of Finance has taken a series of measures for effecting the development and improvement of the butter industry in Siberia, and to increase its sale in the foreign markets. For that object the Ministry has decided to found three dairy schools in Kainsk, in Kurgan, and in Omsk; to increase the number of instructors and artisans in order to teach the local farmers how to prepare butter, and to hold, with the help of these instructors, special courses of lectures; to found laboratories in Siberia for scientific research in all matters concerning dairy produce; to establish the normal standard of milk and all products procured from it, and to expain the reasons of any defects, and also to found five experimental stations where milk and butter would be tested by experts; to furnish the butter factories, the harbours and steamers of the Siberian rivers and all the principal railway stations with refrigerating stores; to increase the number of quick trains for the conveyance of butter from Siberia to the Baltic harbours, and to add 465 new railway cars to the 570 that are already in use, with refrigerators for the summer season; also to establish a sever control so that the temperature of stores and cars shall not exceed 42deg.; to open up credit with the Russian Government Bank for the buttermen, not only for their working capital, but also as to loans upon their industrial implements, and upon the invoices of their butter consignments; to promulgate a law increasing the punishment for adulterating butter, similar to the one existing, relating to flax and hemp; to decrease the railway tariff for conveying implements for the butter industry.

Apart from the direct communication established during 1901, providing special quick trains for conveying butter and other products of a perishable nature from Siberia to Riga, and from Riga to London, to found another similar line going from Riga to Hull once a week. To communicate through a specially appointed expert in London to the British committee attached to the Board of Agriculture here, the result of the analysis made by the Russian Ministr yof Agriculture in St. Petersburg on the samples of butter produced in all parts of the Russian Empire of the normal compounds of butter in commerce. For all these above purposes credit is assigned, a permanent credit of £7,000 per annum and a sum of £20,000 as assistance granted at once. It is expected that with its help the quantity of butter produced in Siberia during the current year will be double that of last year, and that its quality will be greatly improved.

London's Milk Supply.

The conveyance of milk has long been a notable feature with several of our most important railways; indeed, so serious has the question of the daily milk supply become in our largest towns that there are certain trains known by the specific name of "milk trains." Of course, the bulk of this traffic is in connection with the bringing of milk into London, and whilst all the various railway lines running into the Metropolis do their share towards the solution of the problem, yet, perhaps, we shall not be far wrong (says a writer in the "Railway Magazine") if we say that the great bulk of the milk brought to London comes along either the London and North-Western, the Great Eastern, or the London and South-Western lines. Much of the milk traffic, however, is dealt with outside the main stations menitoned. Thus, the London and North-Western makes Willesden busy with it, whilst Vauxhall is the scene of the London and South-Western performances in the same direction. The "Milk Dock" at Euston deals with 5,000 "churns" daily, and the Vauxhall platforms with over 2,000, including "fulls" and "empties."

How much milk is thus brought into London each week? Exact figures from every company are not attainable, but from such as have been given, and fram other statistics of the Board of Trade, it would appear that London requires, roughly, about 2½ gallons weekly per family to supply its wants. As there are some 1,000,000 families in the London district and suburbs, we may take it that at least 2,500,000 gallons of milk are used every week by them, and practically the whole of this immense amount has to come on the rails from country places far and near. If we multiply our weekly total by fifty-two we shall soon discover that the railways carry no less than the incredible amount of 130,000,000 gallons of milk into the Metropolis each year.

It seems almost beyond our power to realise what that means. We have read of olden days, when the "streets ran with wine like water" after some notable event, but it has been left to our own day to make streets that could run with milk even more freely. Surely we must have lighted upon the days spoken of by the prophet when "the land shall flow with milk." We were told last summer that on a certain warm day the Thames passed over Teddington Weir at the rate of 55,000,000,000 gallons per hour; at this rate the yearly supply of milk bronght to London would just have kept the river running pure milk for two whole hours.

"Mark Lane Express" Diary.

March.

18, 19, and 20. Horse sales at Wrexham.
18. General Meeting of the Suffolk Horse Society.
19. Sale of the entire herd of Red Polled cattle belonging to J. E. Platt, Esq., at Howbury Hall, Bedford.
19. Sale of 55 Shire horses for Mr. Cole Ambrose, at Stuntney Hall, Ely.
19. Show and Sale of Hereford Herd Book Society, at Hereford Cattle Market.
20. Sale of Lady de Rothschild's Jerseys, at Aston Clinton, Tring.
19, 20, and 21. Sale of horsese at Crewe.
20 and 21. Sale of Shires at Peterborough.
20. Sale of Herefords, Shropshire sheep, etc., belonging to Mr. H. Instone, at Cound, near Shrewsbury.
21. Sale of Large Black pigs at Ipswich.
21. Show and sale of Shorthorn and Galloway bulls at Carlisle.
22. Norfolk Agricultural Society's Spring Horse Show, at Norwich.
22. Peterborough Agricultural Society's Spring Show of Stallions.
22. Sale of pedigree Hackney, Show, and Harness horses at Peterborough.
24. East Berks Horse Show Society's Spring Show, at Hawthorn Hill Racecourse.

By Hordeum.

The Next Barley Show.

The preliminary schedule of prizes offered at the next barley show at the Brewers' Exhibition is just issued. This is distinctly a step in the right direction, for many of the best supporters of this show are seedsmen and manure makers, whose active operations and real business are done in the early spring. If is good for barley growers also, as it keeps them abreast of the times, and they can learn what is going on in time to make the best advantage of it.

Hitherto this schedule has been published in full in the columns of the MARK LANE EXPRESS, but the expansion has this year been considerable and brought it beyond the limits of space available. Originally starting with two small quarto pages, it this year occupies twelve tall folio pages of closely-printed matter.

The original four classes have now grown into

Forty-four Classes,

in addition to three full pages of Champion and special prizes, many of which are of considerable value apart from the extra price all prize-winning samples secure.

The first object of this Exhibition was to bring buyers and sellers together, and to inform the latter of the true needs and necessities of the former—the users of the material produced. It is folly for growers to produce grain which is worse than useless to brewers. Some of the men best acquainted with the necessities of the case were secured by the directors of the Exhibition, and for many years now they have patiently toiled with a view to helping farmers learn what brewers need. It may frankly be claimed for them that their labour has already been productive of much good.

An instance may be cited to prove this. In all the earlier shows, noted barley counties sent up many samples unfit to be malted. This showed regrettable ignorance on the part of the farmers, but the fact that they took the trouble and risks of exhibiting also proved that they were willing to be helped and to learn.

Steady Improvement Followed.

Of late years nearly every sample has been of fine quality, and the general average has manifestly grown in favour of choice grain of superfine types.

The samples sent year by year have been accompanied by a mass of detail relating to growth, rotation, manuring, soils, and other matters. These have been carefully tabulated, every year, and the results have been published, furnishing much valuable information not available from any other source. Some of the results obtained have been striking, and in defence of the British farmer, who is often accused of stupidity, it may be urged that in this instance he has been swift to learn the lessons taught.

Take as an instance the

Rotation of Crops.

This subject has been treated by the judges as one of the integral factors in manuring, which has long been recognised as the crux of the position by all intelligent men wishing to know how to grow barley for malt of high quality. Much of the absurd rubbish that has been talked about "sun influences" is made impossible when recognised as being equally associated with this matter, for the coarse-skinned, six-rowed barleys imported from sunny climes follow no rotation (as we understand it), and they are not manured.

But all these things are open to everyone who cares to know and secures a copy of the schedule and of the report upon last year. The work already done is distinctly in favour of agriculture, and it is to be hoped it will ere long receive the recognition and able assistance of Mr. Hanbury, who, in his official capacity of Minister of Agriculture, is doing so much for so many of the points in our great national industry, where intelligent

and sympathetic treatment can be productive of much good.

One of the tokens of development shown in this year's schedule is the offer of

Prizes for Every County.

or comparatively restricted area of two or three contiguous counties placed under similar conditions. In every locality a man has several prizes offered under conditions where he has to compete only with his neighbours, who are all under similar weather influences to himself. He may win one of his own county prizes when he has no chance against Suffolk. The total number of prizes offered has risen to upwards of 300, and whilst exceptional samples may win several, all good samples stand a chance of gaining some distinction if they have been intelligently handled. Yorkshire, our premier barley county, may be fittingly taken as an instance. It has the offer of very handsome prizes in the East Riding through the generosity of Lord Wenlock. The West Riding is similarly handsomely treated by Messrs. Colchester and Co., Ipswich, and the North Riding by the British Barley Society. Cambridge has been provided for by Col. Harry McCalmont, Norfolk by Messrs. F. and G. Smith, Suffolk by Sir Cuthbert Quilter, The West Midlands by Messrs. S. N. Thompson and Sons, and many more. A notable advance has been made in the case of Ireland, where Messrs. Flinn and Son, Bishops Stortford, offer a challenge cup, whilst Scotland and Wales are amply provided for. But it cannot be too widely recognised that apart from all prize winning, it is of great value to every county growing good barley to send up a dozen or a score samples to this show, which is closely watched by large buyers. Copies of the schedules can be had (gratis) on application to the British Barley Society, 11, Queen Victoria Street, E.C. To barley growers who can exhibit, it may be useful to point out, that the entrance fees are reduced by one-half to all members of the British Barley Society.

Arsenic in Beer.

The Royal Commission on Arsenical Poisoning resumed its sittings at the Westminster Palace Hotel on the 7th inst., Lord Kelvin, the chairman, presiding.

Dr. E. S. Reynolds stated that a special lookout had been kept by himself and assistants at the Manchester Workhouse Infirmary, the Manchester Royal Infirmary, and in his private practice, for any symptoms which might have been caused by arsenic occurring in food or drink, but with few exceptions they had entirely disappeared. From his clinical observation during the last 20 years he was driven to the conclusion that the disappearance during the last seven months of so many symptoms which were formerly described as due to alcohol could only be explained by the elimination of arsenic from alcoholic beverages, and as a corollary that arsenic had for many years been present in alcoholic beverages to an extent dangerous to a few drinkers specially susceptible, and possibly from a source entirely independent of contaminated glucose.

Mr. Arthur Angell, public analyst, Southampton, gave evidence, and the commission adjourned.

Agricultural Instruction at Reading College.

A course of instruction, specially designed for farmers' sons and others between the ages of 16 and 25, who, having had practical experience of farm work, are desirous of devoting one winter to the study of agriculture, will be given at Reading College, commencing on October 2nd, 1902, and embracing ten weeks' work before and ten weeks' after Christmas. The following is the approximate number of lectures to be given:—Soils and manures, 30 lectures; crops and pasture, 30; live stock, 30; foods and feeding, 30; hygiene of farm animals, 30; insect pests and plant diseases, 20; book-keeping, 20; mensuration and surveying, 20; chemistry, 20; botany, 20.

Students must be familiar with the ordinary routine of a farm before entering on this course, and a written and oral examination, chiefly in agriculture, is held at the close, on the results of which the Certificate in Agriculture (Oxford and Reading) is awarded, provided the candidate is 19 years of age or over. The tuition fees for the course are £12, reduced to £9 in the case of students from contributing counties. The County Councils of Berks, Bucks, Hants, Dorset, and Oxfordshire award exhibitions in conection with this course. The fees and the cost of living in Reading need not exceed £30.

Holders of this certificate can remain at the college for a further ten weeks' course in dairying or in poultry keeping, and on passing the examination in connection with either, they may have their certificates endorsed to that effect. Further particulars can be had on application to Mr. Douglas A. Gilchrist, Director of the Agricultural Department, Reading College.

Home Notes.

The Borough.

The transactions of the past week provide me with very little material for comment. The current of trade has flowed along steadily, but quietly; probably the apparent diminution of its volume is caused by the clearance that must have been made of desirable parcels; and the necessary limitation of selection to such qualities, as consumers are not commonly disposed to buy. Prices may be quoted as very firm all round at recent currency, and for any coloury and well-conditioned samples more money can be secured. The difficulty of getting good English is creating a rather strong demand for Pacifics, but the advance in value on the other side hinders business at present on our market for this produce. It therefore appears probable that we shall have a quiet time until the Easter holidays have passed, but I see no reason why values should be weakened, being more inclined to expect advanced prices as soon as business is resumed.

A friend writes me to suggest that there must be

a Reason Why

"So many hops continue to be imported, when, at the same time, there are large quantities in growers' hands that cannot be sold, even at very low prices." He asks me to explain the anomaly, and his request opens up a somewhat complex question. There was a period in our history, not very remote, when the use in the manufacture of beer of any other preservative than hops was forbidden by law, which was enforced by heavy penalties. At the same period a duty was levied upon imported hops, therefore in those happy days neither hop substitutes nor foreign hops had any place in our breweries. "The world (from the beer consumer's point of view) went very well then," and it is a subject of regret that these conditions have undergone so many and such important alterations. But so it is. Brewers have been granted freedom to use almost any materials, and foreign hops are allowed to enter our markets free of duty. This latter circumstance has doubtless been the main cause of the development of hop raising in the United States of America, from which country our chief competition in modern days has emanated. At their first introduction the rank flavour of American hops was distasteful to our brewers, but finding that when kept for use as yearlings this peculiarity was considerably modified, and that the hops were so much richer in preservative quality, as well as lower in price than the average English produce, early prejudices were put aside, and Americans were gradually accepted. I am not aware that they are frequently used alone, but several of our extensive brewers have blended them with English hops for many years, and having thus established a customary flavour in their beers, they are compelled to continue the practice. The comparative price of English and American hops has therefore but small influence upon the consumption. The proportion of foreign to English hops used by English brewers seems to average about one in three, and taking one year with another, for some years past, it will not be found that changes of value of either product have materially affected the relative qualities. Continental hops, which formerly predominated in our imports, have receded as the American supplies have advanced, but last year when American shipments fell off, the Continentals came once more to the front, which circumstance appears to prove that our brewers having accustomed their consumers to a blended hop flavour, prefer to maintain it, even though in doing so they increase their outlay.

But alongside the facts to which I have briefly alluded there will be found another, which is an important element in the search after a "reason why." It may safely be accepted as an axiom that

the English Crop Regulates the English Market.

If we do not grow sufficient to provide the proportion of English hops required by our brewers the value of our product is enhanced, independent altogether of the foreign supply that may come forward in the same year. On the contrary, if our crop be larger than the due proportion, our prices go down, as surely as they did in old days, when foreign hops were unknown. Therefore, I must bring my correspondent back to the main and most essential points. These are:—(1) Only the best descriptions of hops should be grown in England. (2) They must be cultivated and cured in the most approved methods to attain fulness of condition and flavour. (3, and most important.) The annual quantity must be limited to the annual consumption. I think my friend will be with me in these conclusions, and if my anticipations be correct, he may safely dismiss his anxiety concerning foreign hops, and devote some of his energy to the task of assisting me in my efforts to enlighten our comrades at home as to the best means to promote and secure the permanent prosperity of our own industry.

Foreign Notes.

Nuremberg.

As is not unusual at this season, business has slackened off during the past few days, but as new supplies are much reduced, the stocks held by dealers are being gradually lowered, and consequently values are maintained at the same level at which they have been recently current. Buyers are ready enough to examine new arrivals, in the hope of finding lots of choice or even good quality, as the spot market has been denuded of such qualities for some time. The bulk of the present holdings, consisting of hops, which, under ordinary circumstances, would be graded as inferior, there is little opportunity to induce sales, consumers being rather disposed to work upon their reserves, and postpone further purchases until they are actually compelled to come to market; but, despite these hindrances, a steady trade is being done, and although the immediate tendency of affairs is towards continued calmness, it is confidently expected that business will be renewed with some strength with the opening of next month, and that higher values will then be firmly established.

Belgium.

Demand is rather slow, but prices, recently advanced to 50 francs, are firmly upheld. The holdings of growers are reduced to an insignificant quantity, and these are rather withheld, in view of the realisation of higher lgures.

America.

As anticipated in my last report, the value of choice hops has been advanced on the New York market to 20 cents, and probably quotations are still higher at this moment. Lower grades have also moved upwards in sympathy with the best, and even old hops are feeling the effect of the strong market. As this firmness is the natural result of shortness of supply, combined with healthy demand, there is little doubt that it will continue and will be considerably emphasised as the season progresses, and I anticipate that the establishment at an early date, and the maintenance throughout the summer, of a higher range of values than is now current will certainly be realised. The "American Agriculturist," discussing the position, finds reason therein for better prices, while there is cause for surprise that such low figures have hitherto been quoted. It is pointed out that the world's crop of 1r01 was only moderate, as a whole, and in Europe, outside of England, the yield was disappointing, particularly in Germany, where it was the lightest sinc e1893. It is consequently estimated that the world's consumption this year (if the brewers use the normal quantity of hops) must exceed the year's production, by at least 250,000cwt. The season opened in America with markets comparatively bare of old growths, the high prices of 1'00 and 1900 season having induced growers to sel all their produce, whether new or old. Stocks in dealers' hands were also low, and there was no indication that brewers held large reserves. It was therefore believed that high prices would rule from the start of the season, with such a moderate crop in sight. But brewers were wary, and kept off the market. They bought very lightly, and dealers were thus enabled to bring arguments to bear which induced growers who were in need of money to sell at prices much below their reasonable expectation. By the careful exercise of similar policy throughout the season, dealers have held the control of the market, and any advantages that are now arising from improved values are being reaped by them, while growers look upon their proceedings with envy.

In New York State the discouragement of growers during several years is causing a marked decrease in average, which promises to continue. On the Pacific coast, where the average of yield is heavier, and the cost of production lower, average prices have left a fair profit to growers, so that they will continue and perhaps enlarge the business, except in portions of California, where apple-growing is proving to be more remunerative.

All official reports and notices of the National Association of English Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interes and benefit to the member of the society.*

Proposed Agricultural Conference.

Sir,—May I ask you for space in your valuable paper to lay the following suggestions before your readers.

The great growth of the past century indicates that co-operation and co-ordination is especially needed in things agricultural. Co-ordination is lacking not because of the inanate dislike of people to co-operate, not because of jealousy between societies and associations, but chiefly because of the lack of opportunities of learning what others are doing.

Taking the subject of village industries, for instance, it is most difficult to get definite information either as to what is being done in certain localities or where special industries flourish.

Again, there are many possibilities for the promotion and establishment both of the lighter branches of agriculture and of many of the rural industries in villages and districts, but the individuals who have the will to start them either have not the power, the training, or the knowledge to see the possibilities within their reach. This lack of training and knowledge, of course, reacts upon the rural population, and contributes to the rural depopulation.

Then again many local industries are cramped through not being more widely known, and many an individual started upon an independent career suffers through lack of a market; thus associations and individuals need the stimulus of friendly competition and mutual co-operation.

It is proposed to hold a conference at Warwick Castle on May 1st next, to provide an opportunity—

(1) For those directly engaged in any other lighter branches of agriculture or rural industries to make known their work.

(2) For those who are inetrested in the things pertaining to the welfare of our country districts to learn what is being done to stay the rural depopulation.

(3) For an interchange of ideas and sympathetic suggestions between those engaged in allied industries.

(4) For those who need teachers or trained workers to meet those who are fully trained and capable of teaching others.

(5) For the binding of all these in one strong organisation for co-operation and co-ordination.

It is therefore hoped any who are interested in the objects for which the conference is called, and who wish to learn fuller details of the programme of the discussion, as also of the hospitality to be offered for the occasion, will write for particulars to the Warden, Lady Warwick Hostel, Reading, or to myself.—Yours faithfully,

FRANCES EVELYN WARWICK.

Warwick Castle.

Bristol Wool Fair.—There was an average attendance at the half-yearly wool fair at Bristol, on Wednesday. There was little inquiry for fleeces, but some fairly good lots of matchings were disposed of at a farthing to a halfpenny per pound below the price of the last March fair. A better trade was done in skin wools, the stronger sorts being in good demand, but the finer descriptions were disposed of only with difficulty. Hogs and tags were a dragging trade, sales being effected at recent rates.

On Thursday, in a Divisional Court of the King's Bench, the Lord Chief Justice, Mr. Justice Darling, and Mr. Justice Channell heard arguments on a rule which had been obtained at the instance of an agricultural labourer named Saunby, calling upon the magistrates and the guardians of Boston, Lincolnshire, to show cause why an order made directing him to pay 1s. per week towards the support of his mother should not be quashed. For the appellant it was contended that the "sufficient ability" which had to be proved under the Statute of Elizabeth before an order was made was an ability to maintain and relieve a parent to the full extent, and that orders for so much a week were illegal. The Act was not, it was said, intended to apply to labourers. The Court discharged the rule, on the ground that there was evidence before the magistrates of ability to pay, on which they were entitled to act.

THE GARDEN.

We are now well into March, and the spring equinox within measurable distance. And yet, up to the present, at least, anything more unlike March weather could scarcely be imagined, except from the fast-lengthening days, one might reasonably take the season to be November or December, the prevailing features being damp, dull skies, heavy fogs, and an almost dead calm, day after day. If there is any truth in the old adage we shall have a cold spring yet, for does it not say—

"So many fogs in March, so many frosts in May."

Yet the atmosphere is mild, and though there has been a little rain, the soil is still fairly dry and in good working condition, as a rule, so that all outside work can be prosecuted with both ease and success.

Both rhubarb and seakale may be readily brought on in the open ground now, as they stand, covering the roots with pots, or in default of these, with any inverted boxes, baskets, or the like, with a little littery manure, or the like, over all, to exclude air and light. Already the "natural" or unforced rhubarb is beginning to come into the London and other markets, and seakale is also more plentiful and lower in price. This latter subject is frequeuntly forced in the open at this season by simply covering the crowns with some protective material, such as leaf mould, spent hops, or even burnt earth. In maritime localities seaweed is frequently employed for this purpose, and being left on the ground afterwards, acts as a manure to the roots.

Finish planting the root-cuttings of seakale at once, and if more stock is wanted sow a bed of seed, in drills about a foot apart.

Clean over established asparagus beds, remove the top dressing of manure put on in the autumn (if any)—though we do not approve of this practice as a rule—and give a good sprinkling of salt. Do not give any surface dressing of manure, leaf mould, or the like, with the object of blanching the young shoots.

Prepare the ground for fresh beds, trenching it deeply, and working in plenty of manure—rough below, and the finer portions on top. The upper 8in. or 10in. should be made very fine, light, and rich. Plant towards the end of next month, or in cold localities early in May. Sow a small bed of seed also.

Finish cleaning old strawberry beds in the open, and the annual top dressing of manure may be put on at any time now, though there is no hurry for a little while yet, except perhaps in very early districts. Get a bed ready for planting next month, that is, if any thrifty young plants are at hand, or can be had, trenching it quite two feet deep, and working in a good coat of manure, also some burnt earth or wood-ashes.

A bed of the new autumn-bearing strawberries, such as St. Joseph and Antoine de Padone, may be planted now. As the fruit is gathered from forced plants in pots remove them to a cold pit or frame, and in May plant them out in good, rich soil, and they will probably bear again towards the autumn.

Cheques and Post Office Orders payable to WILLIAM A. MAY, 1, Essex Street, Strand, London.

SUBSCRIPTION RATES:—United Kingdom, one year, 15s.; six months, 7s. 6d.; the Colonies and Abroad 17s. 6d. per annum.

MONDAY (March 10th).—Dull and cloudy weather prevailed over our Islands, and fog or mist occurred in many places on our coasts. Rain was measured in the morning, as the result of the fall since the previous day, over nearly the entire Kingdom, but the amounts were generally small. The winds were mostly Westerly, and they were everywhere very light, except at a few exposed positions on our West coasts. The temperature was rather high for the time of year, and it was only in the North and East that the thermometer fell below 40deg. during Sunday night.

TUESDAY (March 11th).—The weather was again generally very cloudy, and fog or mist was prevalent over the Western and Southern portions of the Kingdom. Rain was measured in the morning in Ireland, as well as at some of the Western English stations, as the result of the fall in the preceding twenty-four hours, but the amounts were small. Winds were everywhere very light, and they were variable in direction, except in the West, where a South wind had set in under the influence of a cyclonic disturbance which was approaching from the Atlantic. There was a slight frost in parts of Scotland during Monday night, but at some of the Western stations the thermometer did not fall below 45deg. The mid-day temperatures exceeded 50deg. in the South and West.

WEDNESDAY (March 12th).—The weather was generally cloudy over our Islands, and ran fell at a few places in the North and West. Small amounts of ran were measured in the morning, as the result of the fall since the previous day, over the Western portion of the Kingdom. The winds were blowing from between South-East and South-West, and they continued very light, execept on our North-West coasts.—Temperature had risen briskly in Scotland, but elsewhere the changes were slight, and the thermometer is generally rather above the average. In the South and West the mid-day temperatures exceeded 50deg.

THURSDAY (March 13th).—The weather was dull in most parts of our Islands, and fog or mist was very prevalent on the English coasts. Rain was measured over the Northern and Western portions of the Kingdom in the morning, as the result of the fall in the preceding twenty-four hours, but the amounts were mostly small. No rain fell in any part of Great Britain during the day, but showers were again experienced in Ireland. A fresh cyclonic disturbance had appeared on our North-West coasts, and had apparently merged with the smaller disturbance which had arrived from the Atlantic on Wednesday, occasioning gales and strong South-West winds in the North of Ireland and on the North coast of Scotland. The temperatures were generally rather lower during Wednesday night than of late, but the mid-day readings exceeded 50deg. in most parts of the country.

FRIDAY (March 14th).—The weather was fine and bright during the early part of the day in the south-east of England; but in other parts of our islands the sky was either cloudy or overcast. Rain was measured in the morning, as the result of the fall since the previous day, in the north and west, but the amounts were mostly small. The wind was southerly over the entire country under the influence of a cyclonic disturbance which was moving towards us from the Atlantic. Slight frost occurred in the open during Thursday night in different parts of the country, but the temperature during the day was again rather above the average.

SATURDAY and SUNDAY (March 15th and 16th).—The cyclonic disturbance which traversed the south of England during Friday night, and occasioned strong westerly winds or gales, accompanied by heavy rains, over the southern portion of the kingdom, subsequently traversed the North Sea. On Sunday morning the central area of the storm was situated over Denmark, and the disturbance had increased in intensity. Rough weather was experienced over the North Sea on Saturday, and the winds were still strong on Sunday near the region of the storm centre, while over our islands the wind had moderated. Rain was measured over nearly the entire country on both days, and, in most places, the amounts are much heavier than for some time past. The temperature continued high, although rather less than on several recent days.

Berkshire.

Farm work made but little progress during the month of February. For the first three weeks there were sharp frosts, and the last week drizzling rains, so that there was very little ploughing and no planting done during the month; but since March came in everything is changed, for it has been mild and dry. The land works well, and there is a good seed bed for beans, peas, oats, and barley, and everyone is now very busy making the best of this fine time. The sharp frosts seem to have done very little damage, for the wheat looks a fair plant, but not very strong. The rye and winter oats promise well, and the vetches never looked better. The young grasses are not a particularly good plant, but look healthy. Cattle have done well, and there is a fair trade for beef, which keeps up the price of beasts. The mutton trade is bad, and sheep are very difficult to sell at lower prices. The lambing season has been a good one, for the lambs have fallen strong and the ewes are healthy, with a fair amount of twins. Pigs seem to sell well when you can find a customer, but the markets being stopped prevents much trade being done. Straw is scarce and dear, but there is not quite so much demand for hay. The wheat market continues dull, but firm. There is a little better demand for barley fit for seed, and oats still sell well. Labour is scarce, but sufficient for present requirements.—J. L. (March 13th).

Carmarthen.

Since my last report we have had some very rough weather. It was real winter, and no mistake. We did not have such a heavy fall of snow as in some parts, and it remained long on the ground, and it was freezing almost through the month of February, and was good weather for hauling out manure, etc., and the only weather for skating we have had for years, and was also suitable for splashing hedges, so the farm work is pretty forward in this county. The weather again in this month has been dry, with mist overcast, and mostly cloudy, except some few days have been warm. Very little rain has fallen, and the land is now in excellent working order for the plough or harrow. There is very little spring corn being set yet in this county. Should this dry weather continue we shall be able to set our spring corn in March dust, which we have always found beneficial. It is hoped that mild growing weather will soon set in, as fodder is scarce, and hay advancing in price, now £6 per ton. Fat beasts are selling at fair prices, but very little profit, owing to the high price at which feeding-stuff is sold. Fat sheep are scarce, and are selling at about 8½d. per lb. Fat pigs are also scarce and dear, from 10s. to 11s. per score.—D. P. (March 14th).

Cornwall (West).

To the end of February the weather was cold and the season backward. Since March has come in, however, the weather has been very mild, so mild that we seem to be in April rather than March. Crops are growing fast. Trees are commencing to assume their green foliage. Wheat is looking nice and strong. Not much oats or barley has been sown as yet, as we do not sow much before the middle of March and beginning of April. Prices: Good beef selling fairly well, at 56s. to 60s. cwt. Store bullocks, cows, and calves are cheap. Hay and straw are very scarce, consequently dear. The cauliflower trade has not by any means been good. The quality up to now has been bad and difficult to sell. Now the quality has improved, and we are hoping for better prices, providing we do not get a glut, owing to the mild weather. The early potato crop is about finished being planted. Old potatoes are cheap, 60s. to 70s. a ton.—F. C. (March 13).

Devon.

Seldom has this county at this time of the year shown vegetation more forward or labour on the farm so far advanced. Wheat, as a rule, looks well, and a fairly thick plant. Oats have also come up well, and barley, and some winter-sown barley looking splendid. This has only recently been given a trial, and seems likely to be successful. Meadows, pastures, and grasslands are lyooking promising for a good hay crop, whilst vetches, trifolium, rye, and catch crops promise early and abundant crops, which will save stocking grass intended for hay. Turnips nearly cleared, but a good supply of mangolds left, and there has not been such a run on the small haystacks as was feared, so keep prospects are bright, and the weather extraordinarily mild. It has also been a full average year for lambs, with very slight mortality, and store stock look well, whilst all stock is healthy, and prices seem improving; but we may get a dose of winter later. I hope not, but those who remember Hermit's Derby run in a snowstorm know that it is possible to have winter in May. Even the bud on the fruit-trees is very forward, so sharp frosts now may do harm.

North Notts.

The weather has been generally mild for the period of the year. Spring's early advent appears to be heralded by many signs in the fields. The wheat plant is now making some progress, after the nip of the keen frosts, it is beginning to tiller. Not much, if any, spring sowing has been done yet, and there is really little encouragement for the farmer to sow spring wheat, but, on the other hand, there will be a large r breadth of oats consigned to the soil this year. For the price realised being within a shilling a bushel of that of even wheat. The lambing season is now in full swing. Generally speaking, there is a good fall. There is the usual loud complaint of the great shortness of farm hands, more especially those that are competent to milk. Perhaps the early hours and Sunday labours are a great deterrent to either girls or young men acquiring the art of milking a cow nowadays. With high, drying winds the land will soon be in a fit state to receive the seed, barley, oats, and beans. But these later years very many farmers seem to prefer the winter beans, as to being more sure of a crop. Some efforts are going to be made to bring about a more vigorous enforcement of the Wild Birds' Protection Act, which in this district has remained a dead letter. There are many sales this spring, thus indicating many changes. The outlook is none too rosy on the near approach of the vernal equinox in North Notts.—"Agrestic" (March 13).

Somerset (North).

Farms in this district usually change hands on 25th inst. (Lady Day), so this is the season for auction sales of farm live stock and implements, and by attending these, and seeing the animals, and having the prices under the hammer, you can correct your judgment as to values very much better than you can at the fairs, where you often find the prices asked in the morning are no indication of what the same animal is worth as the day goes on, besides, if a seller, of having to endure the jostling and trickery of the low-class dealers. It is clear from the prices obtained at these farm sales that beef and store cattle are dearer than ever. This also may be said of milk cows, whereas sheep are a drag, whether fat or lean. Doubtless the foreign article and the low value of wool have much to do with it, while as to implements, unless they are of modern make and have been well looked after, the prices they fetch are very disappointing to sellers. All this makes it easy for some under-capitaled, would-be farmers to go in for an arable farm on the off chance of obtaining credit for their seeds and manures, also rent, with a resultant meeting of creditors next Christmas, when all has been sold off the farm, and the tenant is off to South Africa. With all these changes, I cannot learn that rents are any lower, but the new comers seem to demand and get the landlords to make outlays on premises and fences which had been refused to old tenants, damage done by over-preserving game being the cause of much of the trouble.—R. B. (March 14th).

Worcester.

Autumn-sown wheat and oats looking well. Land in a good state after the ong frost, and spring corn going in well. Peas planted before the frost are badly damaged, many fields having to be re-sown. Roots were a short crop, and are becoming scarce.

Farm work well forward. It has, as a whole, been a good lambing season. Feeding sheep have sold very badly, fat tegs making only 7d. per lb. If it were not for such low prices, prospects would be good, but with wheat, barley, mutton, and wool at the present prices farmers cannot hope to make a fair profit. R. B. (March 5th).

Foreign Prospects.

FRANCE.—The autumn-sown cereal crops are represented as being in excellent condition, and weather continues favourable for spring sowing, the prosecution of which keeps farmers from attending market.

BELGIUM.—The crop outlook is considered satisfactory.

HOLLAND.—Consequent upon milder weather, inland navigation is free from ice, and supplies of grain are coming forward more liberally.

GERMANY.—Weather this week was more inclement; a lower temperature with snow and rain alternating. Crop prospects remain satisfactory, but a seasonable change would be welcomed for spring sowing.

RUSSIA.—Weather continues mild, and favourable to crop prospects over most of the country. Around Odessa the condition of the azima and rye-fields is very promising.

HUNGARY.—Rain and light night frosts were experienced lately, but nothing has occurred to injure the appearance of the autumn-sown cereals.

ROUMANIA.—Weather continues favourable for agricultural operations.

ITALY.—Except for rain damage in some low-lying districts, the wheat crop is looking well. The wet state of the land interferes with spring work.

SPAIN.—Too much rain is complained of, causing inundations in the riverine districts to the detriment of the cereal crops.

ASIA MINOR—Weather around Smyrna has been rainy and beneficial to autumn-sown cereals, which present a fine appearance.

NORTH AFRICA.—In Tunis the crop situation is reported as excellent in Northern districts. Timely rains have relieved apprehensions respecting crops in the South.

UNITED STATES.—So far the month of March has been favourable to wheat, which is maintaining a fairly good promise. The plant has sufficient moisture for the present. Oats are being seeded under favourable conditions, and a large acreage is likely. Wheat crop prospects throughout California are satisfactory. Rainfall for season up to date equals 16½ inches, compared with 18 inches same time last year.—*Dornbusch.*

New Agricultural Patents.

Specially compiled for MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

4,589.—John Stanley Tyzack, and Joseph Taylor, of Sheffield, for "Improvements in the manufacture of scythes."

4,795.—Robert Maynard, of Chancery Lane, London, for "Improvements in or relating to portable combined chaff cutters."

4,923.—George Lee Phelps and John Owen Morris, of Strand, London, for "Improvements in fly wheels for harvesting machinery."

Patents Sealed.

19,764.—C. T. Burgess and W. B. Burgess, of Brentwood, for "Reaping mowing machines."

19,796.—R. H. N. Sellar, and J. Cook, of Aberdeenshire, for "Ploughs, agricultural."

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended March 8, 1902, together with the quantities imported in the corresponding week of the previous year:—

Animals living.	1901	1902.		1901.	1902.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt, the trade continues quiet. Barley declined about 3d per qr. Wheat rather dearer on the week. Oats firm. Maize, 9d to 1s. lower. Flour advanced 3d per sack.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—The attendance was small, and the market for wheat and flour ruled steady at about late rates, but quiet. Maize firm, and held for 3d to 6d advance, which checked business. Oats in fair demand at firmer rates. Barley quiet, but steady. Beans and peas quiet.

Mark Lane, Friday.—There was no improvement in the general departments, attendance only moderate, and what business followed since noon suggested a range favourable to buyers. English wheat continues scarce in London, and sellers are enabled to secure remunerative rates, but town millers exercise the same reluctance, and nearly everything is sent to local resorts, although supplies are not now so freely offered as of late. White ranges at 29s to 31s, and red at 28s to 30s per qr. delivered. Free on rail in country, 28s per qr. Foreign dull and easy, but unchanged. Flour was no worse, but the consumptive inquiry for American brands produced no better effects, quotations being nominally the same. Of ordinary first, Minnesota patents, Golden Lily, Pillsbury, etc., quoted at 22s. 9d., and of fancy patents, May Blossom, at 23s. 6d. Of bakers' grades, Iron Duke, 18s 6d ex store; Australian patents, 20s to 20s 6d, ex store 280lb. The price of town households was kept at 23s; and whites at 26s per sack, delivered. Top price, town made 28s net, No. 1 households, 21s 6d per sack cash at the mill door. Wholemeal, 172s per ton. Grinding barley steady, with only moderate supplies on spot, but sufficient to meet requirements, and there is a good deal coming along. Odessa, 19s ex quay; Danubian, 18s 6d ex ship. Malting unaltered, with medium types of English occasionally moving up to 32s. The bulk of the trade, however, is now confined to seed parcels at 27s upwards. Of foreign, Ouchaks and Californian meet with fair attention from time to time at generally steady rates. Oats steady, with a rather better tone this week, although slow. F.a.q. Libau ordinary, 18s 6d ex quay, 381b; 401b Libau, etc., 20s 6d upwards, ex quay. Good Konigsberg, 21s ex quay, 40lb. New Zealand, ordinary Bluff, 25s 5d to 26s 6d; and Canadian, 27s 6d to 28s 384lb ex store. English very firm. Black Winters, 42lb, 24s, and fancy sorts, 24s 6d. Grey ditto, 23s to 23s 6d 42lb; with choice at 24s. Flat maize unchanged. Mixed American nominal, being out of the market. Of round corn, Odessa firm at the opening, but last Wednesday's advance was fully supported throughout, and about 21s named ex ship, 21s 6d ex quay. Danubian in latter position, 22s 9d, and Galatz-Foxanian, 22s 6d. Plate is not offered. The market for imported beans and peas calls for nothing fresh.

COUNTRY.

Banbury, Thursday.—Wheat, red (new), 28s to 30s per qr. Wheat quiet and firm, with small show.

Birmingham, Thursday.—A moderate attendance, and trade generally quiet, though a little more inquiry was reported for feeding stuffs. English wheats, 10s 6d to 11s per bag; foreign unchanged, at 5s 10½d per cental at Liverpool for Russian, and 5s 9d for soft red Calcuttas. Maize sold at a reduction of 3d to 6d per qr; prime Plate, 22s 6d to 23s in the Channel, and Odessa 21s 9d to 22s 3d at Sharpness, and 23s Liverpool. About 3d per qr more money was asked for grinding barley, prices ruling from 18s 3d to 18s 9d at Sharpness, and 19s to 19s 6d at Liverpool. English white oats, at a reduction of 3d, were quoted at 21s 6d to 22s 9d, and blacks 21s 6d to 22s 3d per 312lb (Birmingham). New English beans, 14s 3d to 14s 6d; old, 15s to 15s 6d per bag (Birmingham).

Boston, Wednesday.—Wheat, 27s 6d to 28s; grinding barley, 22s; oats, 21s to 21s 6d; peas, 60s to 65s; maize (new), 22s 6d to 23s 6d (old); beans, 33s 6d to 34s per qr; linseed cake, £8 15s; cotton cake, £5 per ton.

Braintree, Wednesday.—Firm trade; prices unchanged. Red wheat, from 27s 6d to 28s 6d; white, 29s to 30s per qr. Supply rather small.

Brighton, Thursday.—New white wheat, 28s to 29s; new red ditto, 27s 6d to 28s 6d; barley, 28s to 33s; grinding ditto, 21s to 22s; English oats, 21s to 24s; peas, 34s to 35s. Quiet trade at last week's prices. Small attendance.

Bristol, Thursday.—Trade has shown a little improvement since our last. English wheat in fair supply today, making late rates. Foreign, 3d to 6d dearer on spot. Grinding barley and oats without change. Round maize about 3d lower. Slow trade for flour at unaltered prices. —GRACE BROTHERS.

Bury, Wednesday.—Wheat: Very little on offer, the attendance being small; prices firm and unchanged on the week, at 27s to 28s per 504lb. Barley: Trade all but over for the season, most buyers having satisfied their requirements for this season, and prices are nominal. Oats, beans, peas, and other English feeding corns are scarce and firm. Maize unchanged, at 23s to 23s 6d per qr. Lentils and Indian peas rather lower. Linseed cakes firm, at £8 15s to £9 per ton. Bran firm, at £5 10s to £5 15s per ton.

Cambridge.—During the week trade has been without any material alteration. The weather is very favourable for field operations, and farmers, being busy, bring very few samples to market. At this market to-day there was a very moderate attendance of farmers, and a small show of wheat. Demand was slow, but prices were well maintained. Very few samples of spring corn, and all prices quite as high as last Saturday. Wheat, red, 27s to 28s, and white up to 29s per 504lb.

Canterbury, Saturday.—Wheat trade dull; prices weaker, but 30s 6d per quarter obtainable for the best white descriptions. Barley and oats wanted for seed. Ruling prices:—White wheat, 28s to 30s 6d; red, 27s to 29s; malting barley, 28s to 33s; grinding, 22s to 24s; white oats, 20s to 24s; black, 19s to 23s per quarter. Peas and beans rather slow.

Carlisle, Saturday.—Much larger supply of oats in our market to-day; good demand at fully last week's prices—22s to 23s 9d. No wheat or barley sold.—THOMAS ROBINSON.

Chester.—Business was rather dull; wheat, barley, and beans underwent no change in price, but oats were rather easier. Indian corn maintained its price, although demand hardly so good as a week ago. Wheat, white and red, 4s 5d to 4s 6d per 75lb; malting barley, 4s to 4s 1d per 60lb; grinding barley, 3s 4d to 3s 6d per 64lb; oats, new, 2s 10d to 3s; old, 3s 4d to 3s 6d per 46lb; Indian corn, 12s 6d to 13s 6d per 240lb.

Chichester, Wednesday.—Wheat was in moderate supply, but the tone of business was quiet, and the attendance very scanty. There was no quotable change in prices.

Chichester, Wednesday.—Wheat was in moderate supply, but the tone of business was quiet. There was no quotable change in prices.

Colchester, Saturday.—Wheat: Very little offering, and the extreme prices of last week readily obtainable. Scarcely any spring corn showing.—FRANCIS AND CO.

Croydon, Tuesday.—White wheat, 27s to 29s; red do., 27s to 28s; malting barley, 28s to 36s; grinding, 22s to 24s; oats, 18s to 22s; beans, 31s to 33s; peas, 29s to 31s. Trade for wheat quiet at last week's prices; barley and oats firm.

Devizes, Thursday.—Our market was fairly supplied with corn to-day. Wheat sold more freely, but was not quotably dearer, although in a few instances a slight advance was realised. Barley and oats unchanged in value. Quotations were as follow: Best wheat, 13s 6d to 14s 6d; secondary, 12s 6d to 13s; best malting barley, 29s to 34s; secondary, 25s to 28s; grinding barley, 20s to 24s; oats, 21s to 24s; beans, 16s to 20s; fine flour, 22s to 24s; extra fine, 25s to 30s; best bread, 9d.

Glasgow, Wednesday.—There was a fair attendance at our market to-day. Wheat and flour are steady, but a very limited trade passing. Indian corn and round maize unchanged, with small trade. Grinding beans firm, at 3d per 280lb advance. Home and foreign oats steady, at late rates. Barley quiet. Bran and thirds steady. Oatmeal dull.—GIBSON AND CLARK.

Ipswich, Tuesday.—Wheat, the attendance was small, and there was a considerable falling off in the supplies, farmers being busy at home. Prices were firm on the week, at 28s to 29s for reds, and 28s to 29s 6d for whites, per 504lb, at Ipswich. Barley: There are not many buyers left now, and the season is rapidly approaching its close. A retail trade only was done, at about last week's prices. Oats and beans firm. Peas unchanged. Lentils quiet, at 30s per qr. Indian peas 28s per 504lb. Maize: Unchanged, at 22s for small round. Feeding stuffs quiet, but steady.

Leeds, Tuesday.—Contrary to expectations, the American markets report a decline, which, strangely enough, is responded to by firmness in Liverpool, and millers, instead of being able to buy at less money, have actually to concede a slight advance on last week's rates for both English and foreign wheat. Malting barley without change. Feeding stuffs slow, but steady.—DUNNS.

Leeds, Friday.—Quiet demand for all kinds of wheat at Tuesday's prices for English, and a slight reduction for Americans the latter making from 28s to 31s, and the former 29s to 31s 6d; beans, peas, oats, barley, maize, and flour firm at Tuesday's value.

Leicester.—Good average attendance, with small supplies of home-grown wheats. Trade sluggish, at 27s to 31s per 36 stone. Barley a quiet trade. Beans steady. Oats firm.

Leith, Friday.—There is no important change to be noted, and the market conditions are as previously mentioned. Wheat, Scotch, quiet. Oats, Scotch, ready sale at last week's prices; foreign oats, 19s to 22s 6d. Barley, Scotch, little change; foreign feeding, 21s 6d. Hard white peas, 38s. Beans, 33s 6d to 34s. Maize, 23s 6d to 24s; parcels with veryslight heat, 21s to 22s 6d; damaged, 19s to 20s. Millet seed, 19s. Mill offals: Better demand. Broad bran, 120s to 125s; medium bran, 97s 6d to 102s 6d; sharps, 95s to 97s 6d; parings, 105s to 107s 6d; cummings, 82s 6d to 87s 6d; dried grains, brewers, 97s 6d; distillers, 102s 6d to 105s; oat husks, 45s; meal seeds, 67s 6d; all sacks included.—WILLIAM MACLAY.

Lewes, Tuesday.—New white wheat, 28s to 29s; new brown do., 27s to 28s; malting barley, 32s to 35s; grinding do., 20s to 24s; oats, 21s to 25s; beans, 35s to 39s; peas, 33s to 37s per qr.

Lincoln, Friday.—Small supply of English wheat. Slow trade at late rates. Reds, 28s 6d to 29s 6d; whites, 29s to 30s. Foreign quiet. Oats a dull sale at barely late rates. Beans, peas, and maize easier.

Lincoln, Friday.—A good attendance at the Corn Exchange, and a fair show of corn. There were not many samples of wheat offering, and trade was slow at the full prices of last week. The barley season being nearly closed, there was not much doing, only a little being sold for seed purposes. Oats were about unchanged. Peas, beans, and maize firm at late rates.

Liverpool, Friday.—The market had a fair attendance, but wheat is ½d to 1d lower, with a slow inquiry. Flour—Foreign and English are steady at unchanged quotations, with a small trade. Maize—Mixed American rules very quiet at ½d under last market day's quotations. There is a moderate business passing in European and Plate sorts at a shade under previous quotations, with the exception of Odessa, which shows a full ½d advance. Barley—Malting is unchanged, with an idle trade. Feeding moves slowly, but remains steady at unaltered prices. Beans are steady, but Egyptians and flat sorts are generally 3d lower to sell. Peas are steady, with a fair inquiry at late rates. Oats are firm, but quiet at quotations for English. Foreign sorts are quiet, but steady, without quotable change. Oatmeal firmly held, but only a small inquiry at last market day's prices. Oilcake—The demand has been limited, and prices are slightly in buyers' favour.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Cannot give a good account of the market to-day. Wheat continues to be a slow sale: former terms about obtainable, but millers buy so charily. Barley is nearly over for malting, and as the best lots seem to be cleared off, the business in the article is very slow and restricted. Maize is cheaper, and oats are not such good form as recently. In other sorts of grain no alteration of any importance.

Manchester, Thursday.—Moderate attendance. English and foreign wheat met with a quiet consumptive trade at about last week's prices. Red wheat scarce and rather dearer. Maize 1d dearer. Oats, barley, peas, and beans unchanged. Flour quiet; a consumptive demand at unchanged prices.

Newcastle-on-Tyne, Saturday.—A quiet demand for wheat at our to-day's market, and to make sales lower prices would have been accepted for foreign. English scarce, and sold at late rates. Maize favoured buyers. Malting barley quiet, and not much offering. Feeding made last week's prices. No change in the quotation for oats. Beans and peas, through scarcity, made 6d per 504lb advance.—JOSEPH POLLARD AND CO.

Newport, Wednesday.—Wheat is steadily at an advance, but buyers hold off, and there is little business doing. Maize firmer, but not much doing. Oats firmly held dat last week's prices. Beans and barley, no change. Flour, fines, 22s 6d per sack. Offals scarce and dear.

Northampton.—Markets about the same as last week; no disposition to operate but at a little lower price. Business done nominal, and about same as last week. Supply and demand quiet.

Norwich, Saturday.—Wheat was in smaller supply at our market to-day, with a firm trade at late rates. Fine weather has principally prevailed during the past week, which has ended in rain and boisterous wind. Wheat, red, 28s to 28s 6d per qr., weight 63 per bushel imperial. Corn Inspector's return for the week ending March 10, 1902:—Wheat, 2,012, 26s 7½d.—J. ARTHUR MILLS.

Nottingham. Saturday.—Wheat, small supply and good trade at previous rates. Barley, none offering from grower, the few in hands of factors making good price for seed, etc. Grinding barley steady. Oats and beans, but few offering, and values well supported.—ROBERT HUBBLE.

Peterborough, Saturday.—There has been very little wheat showing to-day, demand not brisk, but last week's extreme prices were made. Scarcely anything doing in barley, and no change in value. Oats slow at late rates.—THOMAS HILL AND SON.

Ripon, Thursday.—Business is done at late prices. Inquiries for seed the chief feature. Wheat, English (new), 28s 6d to 29s 6d; ditto, foreign, 29s to 33s; barley, grinding, 22s 6d to 23s 6d ditto, malting, 26s to 31s; oats (new), 22s to 24s; round maize, 24s to 26s per qr; beans, 1s per stone.

Reading.—We had an excellent attendance in the Exchange to-day, and trade generally proved fairly brisk. Corn was plentiful in all departments, and wheat experienced a steady sale at recent currencies, changing hands at from 27s to 29s per qr. The barley on offer was principally for seed purposes, and it sold well at late rates, as did also oats.

Romford, Wednesday.—Wheat trade firm at last week's prices. Very short supply. Red wheat, 27s 6d to 28s 6d; white wheat, 28s 6d to 30s.

Rye, Wednesday.—White wheat, 26s to 30s; red do., 25s to 29s; white oats, 18s to 22s; black do., 18s to 24s.

Sheffield, Tuesday.—There was a better attendance, but both English and foreign wheats were in slow demand, and prices were the same as last week. Round maize, 6d per qr lower on the week, was in good demand. Business in beans and oats was slow, with prices unchanged. Quotations: Wheat, white, 29s 6d to 30s 6d; ditto, red, 29s 6d to 30s 6d per 60lb; barley, grinding, 22s to 23s; ditto, malting, 28s to 32s per 448lb; oats, new white, 21s 6d to 22s 6d; ditto, new black, 20s to 21s per 336lb; peas, grinding, 32s to 34s; ditto, blue, 53s to 80s per 504lb; beans, Egyptian, 35s 6d to 36s per 504lb; ditto, English, new, 37s to 37s 6d per 532lb; Indian corn, small, 23s to 23s 6d per 480lb; ditto, American mixed, 27s 6d to 28s per 480lb.

Spalding, Tuesday.—Wheat, 27s 6d to 28s per qr. A firm trade for oats at 21s to 22s per qr. Beans and peas made full prices. Small show of corn.

Stockton, Wednesday.—Few samples of English wheat showing, which made last week's prices. The foreign wheat trade keeps very quiet, and very little business was passing. Strong red wheats were very scarce, and commanded 3d to 6d more money. White wheats unchanged. Oats and maize unaltered. No malting barley showing.

Sunderland, Saturday.—Small show of wheat, which sold at about late rates. Little doing in spring corn. Arrivals, coastwise: Wheat, 430 qrs.; barley, 379 qrs; oats, 66. Foreign nil.—E. AND F. RICHARDSON.

Wakefield, Friday.—A fair business has been done in wheat during the past week, and fully late rates have been paid, but trade generally on to-day's market is slow. Malting barley is still offered for sale, with but few buyers. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LTD.

Wakefield, Friday.—The trade seems to recognise the uselessness of following the vagaries of the American markets, which appear to be based chiefly upon speculations by the professional crowd; hence values on this side remain practically unaffected, and wheat cannot be bought under last week's rates. Malting barley steady. Maize, beans, and oats quiet.—DUNNS AND CO.

Winchester, Saturday.—English wheat short supply; 28s to 29s per 65lbs. Maize 3d cheaper. Barley and oats slow trade; prices unaltered. Flour quiet trade late rates.—FEAR, COLEBROOK AND CO., LD.

Wisbech, Saturday.—A scanty supply of grain at market. Wheat rather dearer to buy, 28s to 29s. Oats firm, 22s to 24s. Barley, 27s to 30s. Beans, 33s to 38s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was very little animation at this market. Quotations: Wheat (new), 12s to 13s per 216lb; oats (old), 15s 6d to 16s per 196lb; ditto (new), 12s to 13s per 196lb; beans (old), 15s 6d to 16s 6d per 196lb; ditto (new), 14s 3d to 14s 9d per 19lb; barley, 31s to 32s per 448lb; new maize, 25s to 26s per 480lb; ditto (old), 27s 6d per 480lb.

Worcester, Saturday.—Trade quiet, there being only a limited demand for wheats, which sold at barely late rates. Feeding stuffs easier, except barley, which remained firm. Wheat, white, 11s to 11s 6d; red, 10s 3d to 10s 9d per bag.

Worksop, Wednesday.—Small attendance, and poor show of grain. Firmer tendency for wheat. White wheat made 28s to 29s; red wheat, 27s to 28s per qr; best barley for seed, 28s to 32s; secondary qualities, 26s to 28s; grinding barley, 24s to 26s per qr; white oats, 23s to 25s.; black oats, 22s to 24s per qr; maize, 24s to 26s per qr; barley meal, £6 6s 8d to £7 per ton; fine sharps, £6 13s 4d to £7 10s per ton; bran, £5 10s to £6 10s per ton.

York, Saturday.—A fair attendance. Wheats are making, with less showing, 28s 6d to 29s. Barley is drawing to a finish, the only lots offering selling readily for seed purposes. Oats are a better trade, but only a small supply. Beans and other feeding stuffs firm. Barley, 29s to 31s; short white oats, 22s to 23s; black, 21s to 22s per qr.; beans, 11d; rye, 8d per stone.

FOREIGN.
